EATON

Powering Business Worldwide

The protection

EATON

Powering Business Worldwide

you rely on.

BUSSMANN SERIES

Eaton offers more possibilities and powerful solutions to meet your needs.

Our Bussmann® series products reflect a long-standing tradition of leading fusible circuit protection and electrical safety solutions that protect equipment and enable reliable, efficient power distribution.

While our look is changing, the products you have come to know and trust remain the same.

**Expanding our products.
Expanding our thinking.
Energizing your business.**

Construction vertical market solutions

A complete line of circuit protection solutions for the construction markets

Safe. Compliant. Compact.

Commercial, healthcare and industrial facilities require reliable power distribution without compromising the safety of people or equipment. We understand that this is often a difficult result to achieve, particularly when coupled with meeting code requirements.

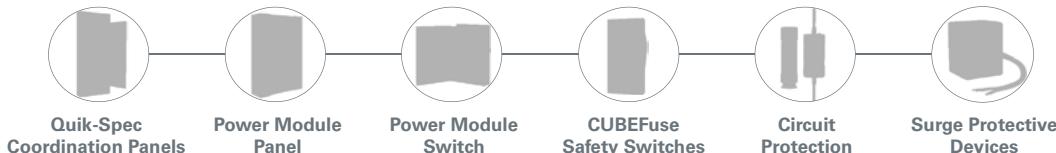

Eaton's Bussmann® series offers solutions that can help easily achieve code requirements such as selective coordination. What's more, we offer technical expertise and a support structure to help achieve your project goals, whether facing new construction or renovation.

Our comprehensive portfolio of overcurrent and overvoltage circuit protection products offers solutions that not only enhance safety and reliability, but also ensure compliance with code requirements. Additionally, many of our products boast compact sizes, helping to reduce the equipment footprint and drive down costs.

Our team of Application Engineers and Sales Engineers can recommend solutions for reducing footprint and saving installation time, all while providing the industry's best protection. They can also guide you in the selection of products to make code compliance simple.

To learn more, visit www.cooperbussmann.com/construction.

Complete portfolio of Bussmann series solutions to meet your needs

Construction vertical market solutions

Portfolio spotlight: Bussmann series products that exceed expectations

Quik-Spec™ Coordination Panels (QSCP)

- Ease of selective coordination using published ratio tables
- Compact footprint up to 40% smaller than other fusible solutions
- Safety-focused design that includes finger-safe branches, branch fuse interlock and fuse ampacity rejection

Power Module Panel

- All-in-one solution allows for simple code compliance for multi-elevator applications
- Easy to specify the right product to meet code requirements
- Space-saving solution with a single panel for multi-elevator control

Power Module Switch

- All-in-one solution allows for simple code compliance for single elevator applications
- Completely assembled unit allows for simple, time-saving installation
- Easy to specify the right product to meet code requirements

CUBEFuse™ Safety Switches

- Finger-safe design helps prevent exposure to live parts
- Current-limiting CUBEFuses help reduce arc flash incident energy levels
- Dual interlock helps prevent access for unauthorized personnel
- Optional window allows for visual verification of switch status

Circuit Protection

- Low-Peak™ fuses offer superior current limitation to help increase SCCR
- Fusetron™ Class RK5 fuses are on average 23% more energy efficient*
- Finger-safe CUBEFuses minimize exposure to live parts and reduce footprint up to 70%

* Test results are based on weighted sales volume of Fusetron and Ferraz Shawmut (Mersen) fuses by selected amp and volt rating combination.

Surge Protective Devices

- Type 2 surge protection available installed in the QSCP; factory selected to match the panel voltage and wiring
- Type 1 surge protection available for field installation on existing or new power distribution equipment
- Optimized design for safe use and easy installation

HVAC/C vertical market solutions

A complete line of circuit protection solutions for the HVAC/C markets

Compact. Innovative. Safe.

Eaton offers HVAC/R OEMs a comprehensive portfolio of overcurrent and overvoltage circuit protection products. Our leading solutions offer protection of electrical and electronic system components within the control panels that power HVAC/R equipment. For safe and reliable circuit protection, partner with a company with more than 100 years of innovation and proven technical expertise.

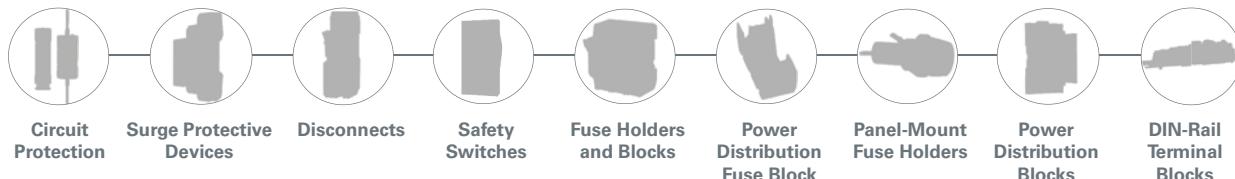

Our team of experts designs each product to not only enhance safety and reliability, but also reduce the footprint of the panel. We understand the challenge of saving space in the panel and address it with innovative products. For example, our power distribution fuse block

uses up to 50 percent less panel space when compared with traditional power distribution block/fuse block solutions.

What's more, our team of Application Engineers and Sales Engineers can recommend solutions for reducing footprint and saving installation time, all while providing the industry's best protection. They can also guide you in the selection of cost effective products to further drive down costs for your customers.

Solar vertical market solutions

A complete line of circuit protection solutions for the solar markets

Safe. Reliable. Complete.

Over the last 50 years, solar PV systems have evolved into a mature, sustainable and adaptive technology.

The unique nature of PV system power generation necessitates the need for new and effective electrical protection products for overcurrent, overvoltage and isolation events.

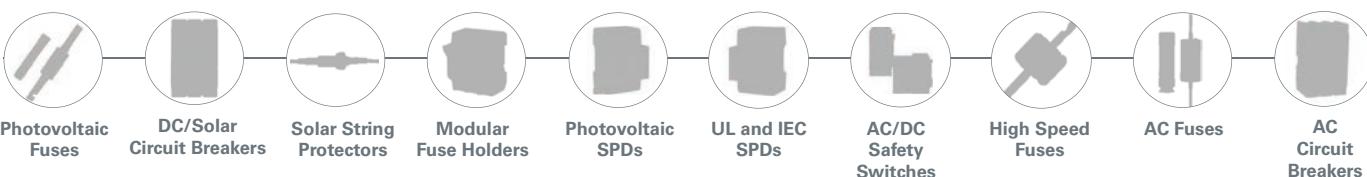

With an Eaton protected electrical system, you can optimize your renewable energy power generation capacity, knowing your equipment is safe. We are a single source for the entire AC and DC circuit protection and disconnecting means. We work closely with solar equipment manufacturers and, through coordinated research and development, have produced

revolutionary new fuses and circuit breakers that, combined with a range of surge protective devices, offer complete protection for PV systems.

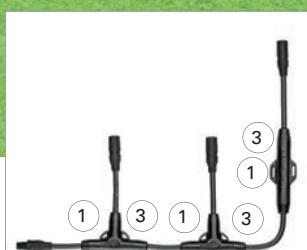

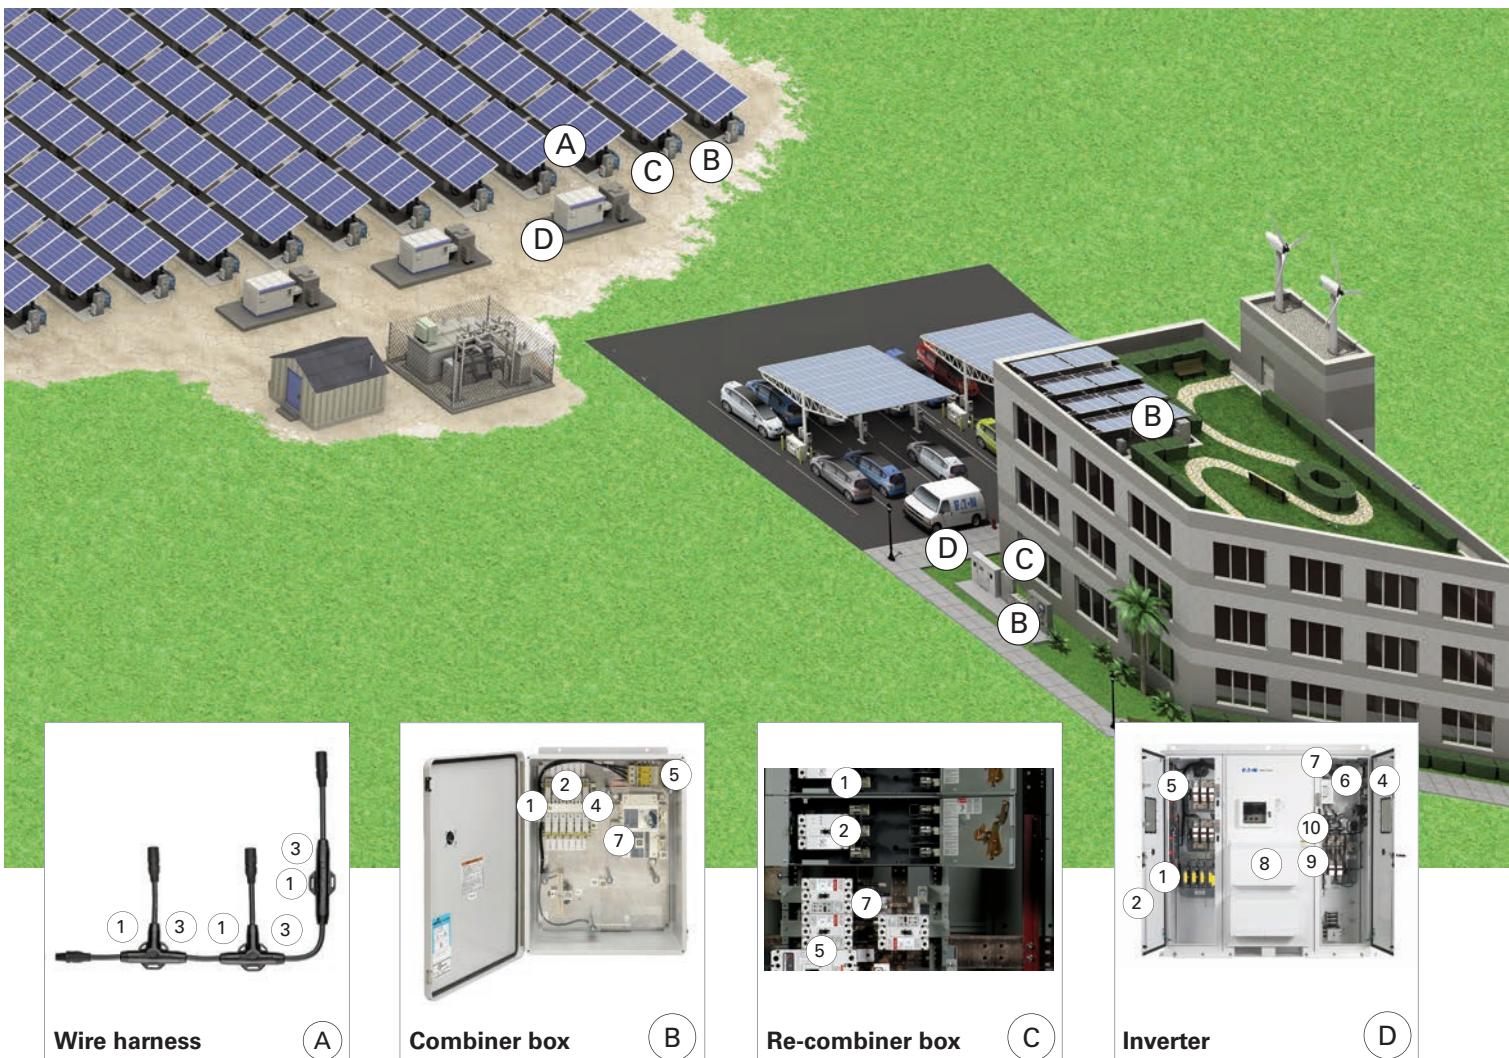

As a single source provider with 100 years of proven technology, we provide complete circuit protection solutions that are safe and reliable so you can take full advantage of converting sunlight into usable energy while working with a bankable, industry-leading manufacturer.

Electrical safety and reliability

Short-circuit current ratings (SCCRs)

Whether you're determining how much SCCR protection is needed, or determining the SCCR of your equipment control panel, the process does not have to be a struggle. When you partner with Eaton, you gain access to a range of products and solutions that make SCCR compliance easy and efficient. For more information, visit www.cooperbussmann.com/sccr.

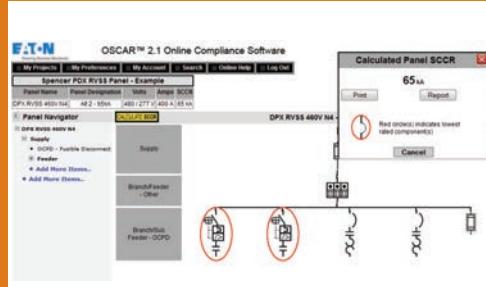

Bussmann® series FC² Available Fault Current Calculator

Easily calculate available fault current anytime, anywhere

Our FC² mobile app quickly delivers fault current calculations in the palm of your hand. The program:

- Calculate single and three-phase system fault current levels
- Generates NEC® 110.24 compliant labels, one-line diagrams and documents
- Features fuse sizing guide for main feeder and branch circuits

FC² considers transformer size, conductors and conduit in calculating the fault current.

Bussmann series OSCAR 2.1

Calculates and documents assembly SCCR for a control panel.

Our OSCAR software allows you to enter a one-line diagram of a control panel circuit, identify the components in that circuit and calculate the SCCR for the entire assembly. OSCAR contains over 60,000 part numbers and thousands of component SCCRs. The program also applies current limiting rules per UL508A that permit the SCCR of branch circuits to be raised. What's more, you can view, print and save SCCR analysis reports.

Selective coordination

Eaton offers the broadest circuit protection and electrical safety solutions in the industry that enable customers to achieve code compliance more effectively and economically than our competitors. What's more, we offer technical expertise and a support structure to help achieve project goals, whether facing new construction, expansion or renovation.

Circuit protection

- Finger-safe Bussmann series CUBEFuses™ reduce footprint up to 70%
- Bussmann series Low-Peak™ fuses offer superior current limitation to help increase short-circuit current ratings
- Eaton molded-case circuit breakers minimize downtime and offer advanced safety features
- 310+ Trip Unit enhances coordination, offering features such as an arc reduction maintenance switch

Arc flash reduction maintenance system

- Fastest arc flash energy reduction technology for personnel safety
- Remotely enabled for worker safety with remote indication for situational notification
- Code mandated in NEC® Section 240.87 for Arc Energy Reduction for circuit breakers 1200A and above
- Available in molded case circuit breakers from 55A-2500A and air circuit breakers up to 6300A
- 24Vdc circuit allows for manual or interlock switch connection for simple activation

Bussmann series Quik-Spec™ coordination panels

- Ease of selective coordination using published circuit breaker/fuse and fuse/fuse ratio tables
- Compact footprint up to 40% smaller than other fusible solutions
- Safety-focused design that includes finger-safe branches, branch fuse interlock and fuse ampacity rejection

Selecting circuit protection

The following fuse selection guides are based on the 2011 NEC® and provided fuse recommendations for the various applications listed.

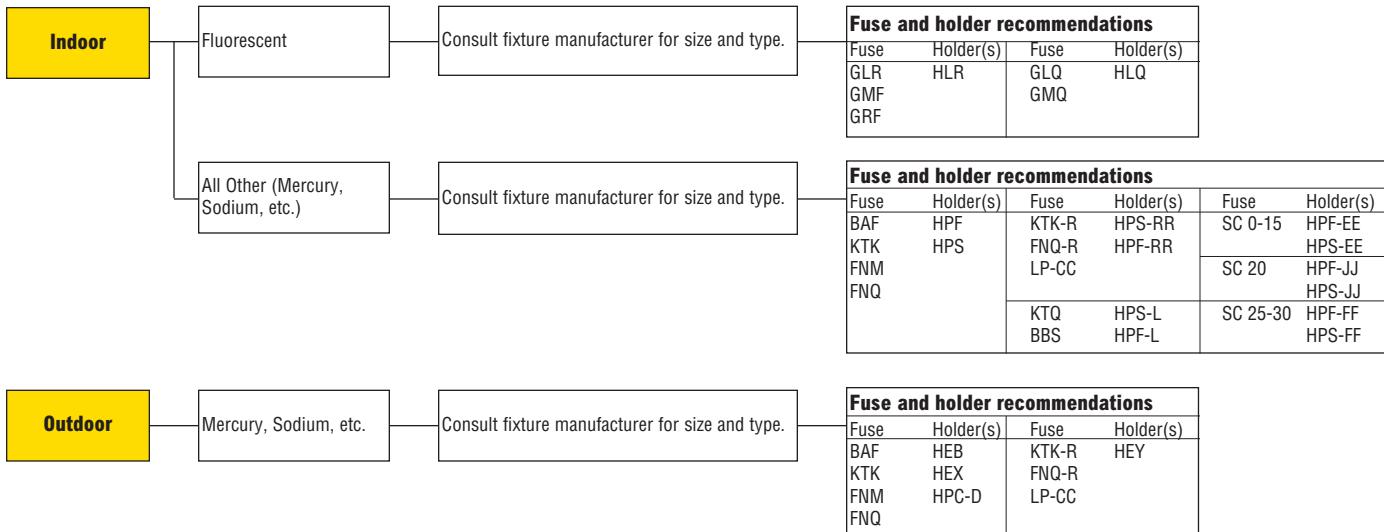

These are only suggestions. Final fuse selection should be performed only by qualified personnel able to fully assess an application's circuit protection requirements. If you need assistance in selecting a fuse for a particular application, call

the Eaton Application Engineering team for technical and application support Monday – Friday, 8:00 a.m. – 5:00 p.m. Central Time.

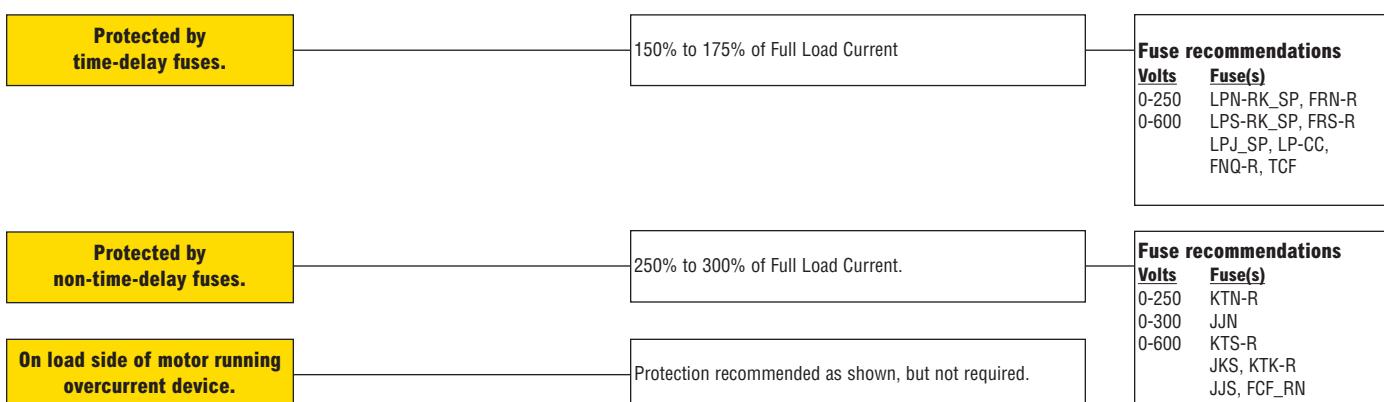

Application Engineering can be reached via phone and e-mail:

- Toll-free phone: 855-287-7626 (855-BUSSMANN)
- E-mail: fusetech@eaton.com

Low voltage, branch circuit fuses

1

Low-Peak™ time-delay, rejection-type fuses

LP-CC Class CC

Specifications:

Description: Time-delay, current-limiting, rejection-type fuse – 12 seconds (minimum) at 200% rated amps.

Dimensions: $\frac{13}{32}$ " x $1\frac{1}{2}$ " (10.3 x 38.1mm).

Ratings:

- Volts — 600Vac (or less)
- 300Vdc ($\frac{1}{2}$ -2 $\frac{1}{2}$ A and 20-30A)
- 150Vdc (2 $\frac{1}{2}$ -15A)
- Amps — $\frac{1}{2}$ -30A
- IR — 200kA RMS Sym.
- 20kA DC

RoHS

Agency information: CE, Std. 248-4, Class CC, UL Listed, Guide JDDZ, File E4273, CSA Certified; Class 1422-02, File 53787, RoHS compliant (15-30A).

Features and benefits:

- Time-delay coupled with Class CC current-limiting response provides close sizing on small motor and relay circuits, and maximum component short-circuit current rating protection.
- 200kA interrupting rating provides high ratings for control circuit locations.
- Class CC rejection feature, with appropriate fuse block, prevents inserting lesser-rated supplementary fuses.
- Inventory consolidation of $\frac{13}{32}$ x $1\frac{1}{2}$ inch supplementary fuses reduces SKU investment and minimizes potential for misapplying fuse.
- Selective coordination ratio of 2:1 (within Low-Peak fuse family) prevents electrical shutdowns from extending beyond the failed circuit.

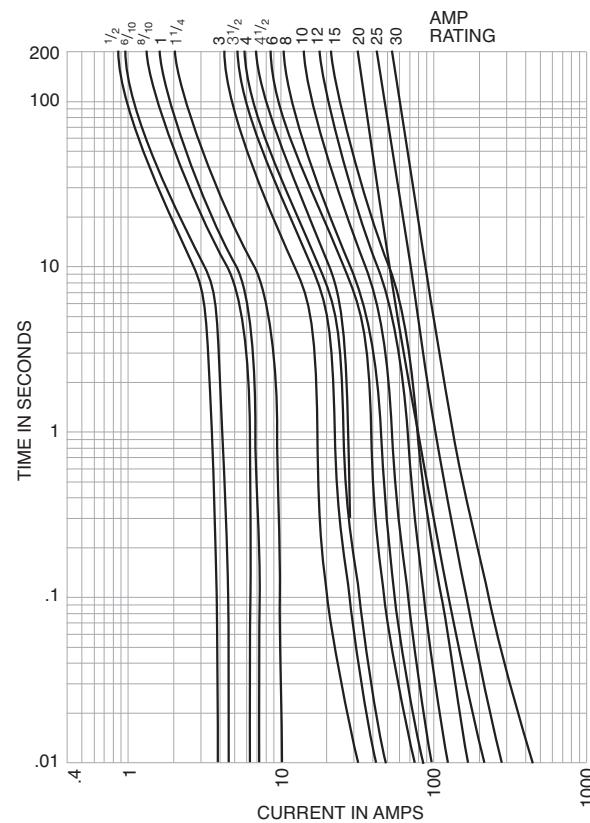

Typical applications:

- Specialized circuits
- Industrial control
- Isolated, in-line fuse holder

Low voltage, branch circuit fuses

Limitron rejection-type fuse

FNQ-R Class CC

Specifications:

Description: Time-delay, branch circuit, rejection-type fuse.

Dimensions: $1\frac{1}{32}$ " x $1\frac{1}{2}$ " (10.3 x 38.1mm).

Ratings:

Volts — 600Vac (or less)

— 300Vdc (15-20A)

— 32Vdc (Self Certified)

Amps — $\frac{1}{4}$ -30A

IR — 200kA RMS Sym.

— 20kA DC (15 and 20A only)

Agency information: CE, Std. 248-4, Class CC, UL Listed, Guide JDDZ, File E4273 CSA Certified, Class 1422-01, File 53787, RoHS compliant.

Features and benefits:

- Time-delay compatible with inrush characteristic of small control transformers.
- Current limitation at Class CC levels provides maximum component short-circuit current rating protection.
- 200kA interrupting rating provides high ratings for control circuit locations.
- Class CC rejection feature, with appropriate fuse block, prevents inserting lesser-rated supplementary fuses.

Typical applications:

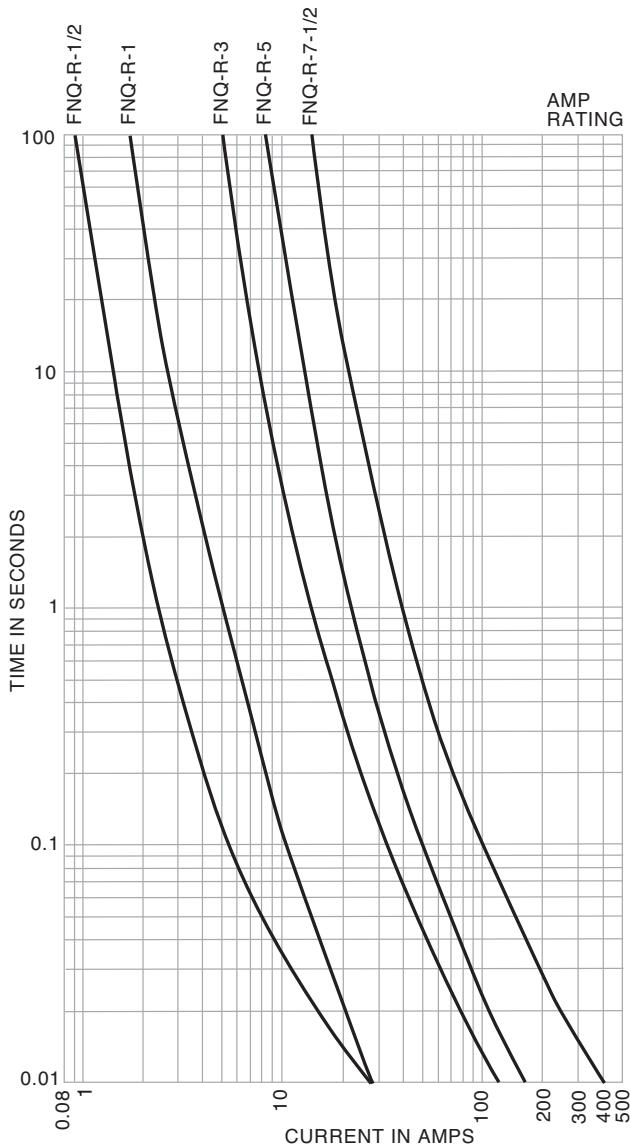

- Line protection, small control transformers
- Industrial control
- Isolated, in-line fuse holders

Limitron™ rejection-type fuse

KTK-R Class CC

Specifications:

Description: Fast-acting, branch circuit, rejection-type fuse.

Dimensions: $1\frac{1}{32}'' \times 1\frac{1}{2}''$ (10.3 x 38.1mm).

Ratings:

Volts — 600Vac (or less)

Amps — $\frac{1}{10}$ -30A

IR — 200kA RMS Sym.

Agency information: CE, Std. 248-4, Class CC, UL Listed, Guide JDDZ, File E4273 CSA Certified, File 53787, Class 1422-02, RoHS compliant.

RoHS

Features and benefits:

- Current limitation at Class CC levels provides maximum component short-circuit current protection.
- 200kA interrupting rating provides high ratings for control circuit locations.
- Class CC rejection feature, with appropriate fuse block, prevents inserting lesser-rated supplementary fuses.

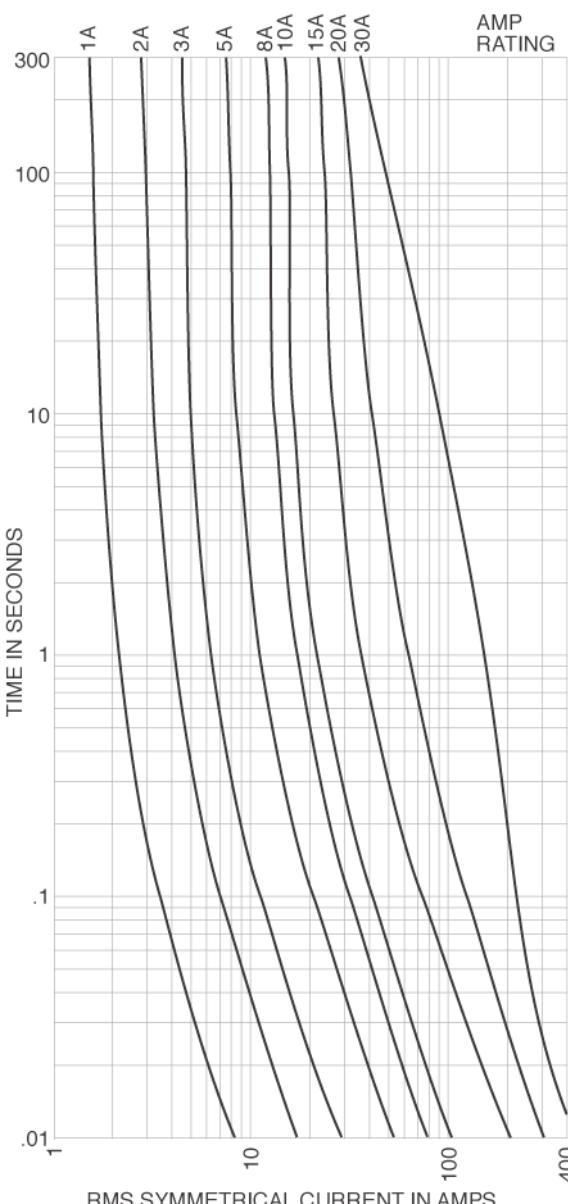

Typical applications:

- Specialized circuits
- Industrial control
- Isolated, in-line fuse holders (street lighting)

Time-delay Low-Peak CUBEFuse™ finger-safe fuse

TCF 600V Class CF

Specifications:

Description: Finger-safe fuse and fuse holder system; dual-element, time-delay fuse; 10 seconds minimum operating time at 500% rated amps.

Dimensions: See dimensions illustration.

Poles: 1-pole (gangable)

Ratings:

Volts — 600Vac (or less)
— 300Vdc (or less)

Amps — 1-100A

IR — 300kA RMS Sym. (UL)
— 200kA RMS Sym. (CSA)
— 100kA DC (UL and CSA)

Agency information: CE, UL Listed Guide JDDZ, File E4273, CSA Certified Fuse: Class 1422- 02, File 53787, UL Listed Fuse holder: Guide IZND, File E214079, CSA Certified Fuse holder: Class 6225-01, File 47235.

Features and benefits:

- Separate overload and short-circuit elements provide time delay for sizing of high inrush loads linked with Class J current limitation.
- Selective coordination ratio of 2:1 (within Low-Peak fuse family) prevents electrical shutdowns from extending beyond the failed circuit.
- Smallest footprint of any Class CC, J, T or RK fuse provides substantial space savings and installation flexibility.
- IEC 60529 and finger-safe rating provides enhanced workplace safety.

Typical applications:

- Electrical panelboards
- Machinery disconnects
- Industrial control
- Required finger-safe systems

Low voltage, branch circuit fuses

UPS and critical application fast-acting CUBEFuse™ finger-safe fuse

FCF 600V Class CF fuse

Catalog symbol: FCF_RN

Fast-acting fuse: 4 minutes maximum clearing time at 200% rated current for 1 to 30A fuse
6 minutes maximum clearing time at 200% rated current for 35 to 60A fuse

Dimensions: See dimensions illustration.

Poles: 1-pole (gangable)

Ratings:

Volts — 600Vac/dc (or less)

Amps — 1-100A

IR — 300kA RMS Sym. (UL)

— 200kA RMS Sym. (CSA)

— 50kA DC (UL and CSA)

Agency information:

UL Listed Fuse: Guide JFHR, File E4273, CSA Certified fuse:
Class 1422- 02, File 53787, CE compliance for the European Union low voltage directive

Other ratings/specifications:

Watts loss at rated current: FCF15RN: 3.48W

FCF30RN: 5.45W

FCF60RN: 7.27W

Operating and storage temperature range:

-40 to 80°C

Material specifications:

- Case: glass filled PES (Polyethersulfone)
- Terminals: copper alloy
- Terminal plating: electroless tin

Carton quantity and weight

1-30A	12	1.39	0.63
35-60A	12	1.42	0.65
70-100A	6	1.74	0.79

Features and benefits:

- The world's first finger-safe power fuse system.
- Smallest footprint of any class fuse including Class J, CC, T and RK.
- Class CF meets Class J fast-acting electrical performance requirements.
- Faster response to damaging faults to help reduce destructive thermal and magnetic forces.
- True fast-acting fuse construction.
- High interrupting rating to safely interrupt faults up to 300kA.
- No venting of arc or molten metal and gases during opening.
- Low let-through currents under fault conditions.

Low voltage, branch circuit fuses

Wind fast-acting CUBEFuse™ – finger-safe fuse

WCF 690V

Catalog Symbol: WCF_RN

Description: Finger-safe, fast-acting CUBEFuse for wind power generation.

Electrical characteristics: Maximum clearing time at 200% rated current:

- 4 minutes for 1 to 30A fuses
- 6 minutes for 35 to 60A fuses
- 8 minutes for 70 to 100A fuses

Ratings:

Volts — 690Vac

Amps — 1-100A

IR — 50kA AC (1-60A)

IR — 30kA AC (70-100A)

Agency information:

- UL Recognized Fuse: Guide JFHR, File E56412
- cURus component certified C22.2
- CE compliance for the European Union low voltage directive

Other ratings/specifications:

Watts loss at rated current: WCF15RN: 3.48W
WCF30RN: 5.45W
WCF60RN: 7.27W
WCF100RN: 11.50W

Operating and storage temperature range: -40 to 90°C

Material specifications:

- Case: glass filled PES (Polyethersulfone)
- Terminals: copper alloy
- Terminal plating: electroless tin

Installation:

Fits 690V WCF holders. See page 1-16

Application:

- Wind systems:
 - Transformer protection
 - Pitch and speed control
 - Turbine HVAC and lighting

Features and benefits:

- Maximize uptime and reliability using fuses designed and listed to UL 248-1.
- Minimize chances of equipment failure and personnel injury when using full range fuses having the industry's fastest response time to low-magnitude faults.
- Maximize return on investment with fuses proven to withstand harsh temperatures.
- Minimize design time, operating outage time and replacement cost with fuses qualified in excessively changing environmental conditions.
- Simplify compatibility with readily available industry standard holders.
- Temperature derating: Designed to maximize rated capacity in elevated environmental temperatures.
- Overload protection: Proven to clear faults faster than the UL requirement.
- Power loss: Minimal energy consumption leading to increased efficiency.

Agency Information: DE, Std. 248-5,
Class G, II, Listed Guide, IDDZ, File E4273

CSA Certified Class 1422-01 File 53787

RoHS compliant

Features and benefits:

- Current limiting for component protection, providing Class G energy-limitation for branch circuit protection.
 - 100kA interrupting rating provides cost-effective branch circuit fusing.
 - Variations in length help prevent overfusing.

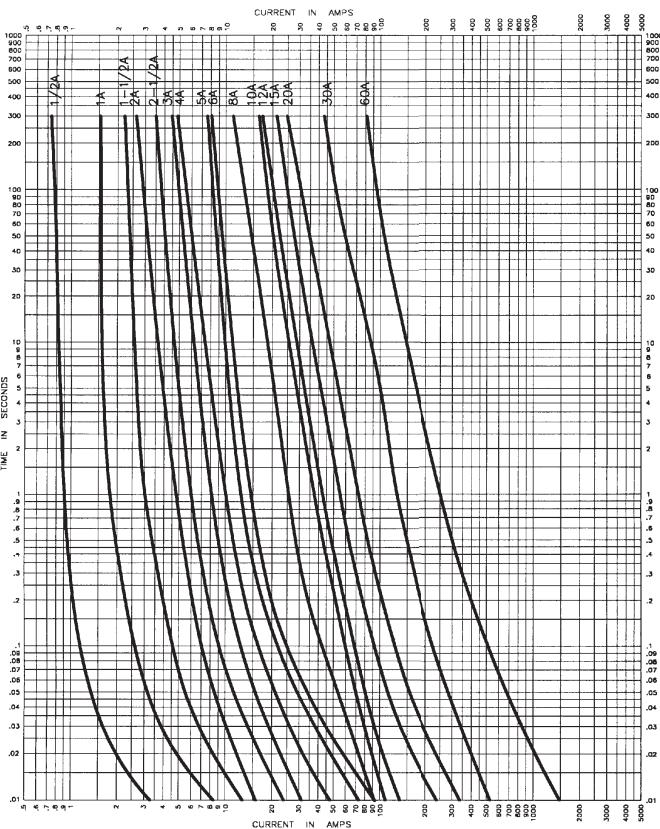

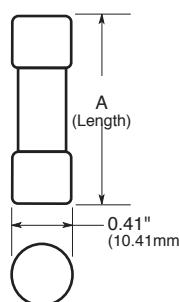

Typical applications:

- Fusible branch panelboards
 - HVAC branch circuit protection

Low voltage, branch circuit fuses

1

Low-Peak™ dual-element, time-delay fuses

LPJ_SP Class J

**Available with
indication**

Specifications:

Description:

Dual-element, time-delay fuse;

10 seconds (minimum) at 500% rated amps. Now available with optional indication on select ratings (see catalog numbers table).

Dimensions: See page 1-5 for Class J dimensions.

Ratings:

- Volts — 600Vac (or less)
- — 300Vdc (or less)

- Amps — 1-600A

- IR — 300kA RMS Sym.
- 100kA DC

Agency information: CE, UL Listed, Guide JFHR, File E56412, CSA Certified (200k AIR) Class J per CSA-22.2 No. 248.8, Class 1422-02, File 53787, RoHS compliant.

Features and benefits:

- Separate overload and short-circuit elements provide time delay for sizing of high inrush loads linked with Class J current limitation.
- Selective coordination ratio of 2:1 (within Low-Peak fuse family) prevents electrical shutdowns from extending beyond the failed circuit.
- Series combination ratings with branch circuit breakers allows broad range of coverage, independent of breaker manufacturer.

Typical applications:

- Power panelboards
- Branch circuit breaker panelboard mains
- Machinery disconnects
- Industrial control

Low voltage, branch circuit fuses

Limitron™ fast-acting fuses

JKS Class J

Specifications:

Description: Fast-acting, current-limiting fuse.

Dimensions: See page 1-5 for Class J dimensions.

Ratings:

Volts — 600Vac (or less)

Amps — 1-600A

IR — 200kA RMS Sym.

Agency information: CE, Std.

248-8, Class J, UL Listed, Guide

JDDZ, File E4273, CSA Certified, Class 1422-02, File 53787.

Features and benefits:

- Current limitation for non-inductive circuits provides Class J current-limiting response to maximum ground fault and short-circuit conditions.
- 200kA interrupting rating provides high ratings at all circuit locations.
- Economical solutions for high-fault circuits.

Typical applications:

- Power panelboards
- Machinery disconnects

fuses

Low voltage, branch circuit fuses

Low-Peak™ time-delay fuses

KRP-C_SP Class L

Specifications:

Description: Time-delay fuse – 4 seconds (minimum) at 500% rated amps.

Dimensions: See page 1-6 for Class L dimensions.

Ratings:

- Volts — 600Vac (or less)
 - 300Vdc (601-2000A, 3000A)
- Amps — 601-6000A
 - (use KRP-CL for current ratings under 601A)
- IR — 300kA RMS Sym.
 - 100kA DC

Agency information: CE, UL Listed-

248-10, Guide JFHR, File E56412,
CSA Certified (200k AIR), Class 1422-02,
File 53787, Class L per CSA C22.2, No. 248.10, RoHS
compliant.

Features and benefits:

- Time-delay of four seconds at five times rating allows closer sizing on large motor loads combined with Class L current limitation.
- Selective coordination ratio of 2:1 (within Low-Peak fuse family) prevents electrical shutdowns from extending beyond the failed circuit.
- Interrupting rating of 300kA RMS symmetrical provides adequate ratings without obsolescence for all electrical systems, big or small.
- Quality construction, using high-grade materials, provides lower watts loss and operating temperatures with superior arc quenching during current-limiting action.

Typical applications:

- Large distribution switchboards
- Power panelboards
- Large machinery disconnects

KRP-CL current-limiting, time-delay fuses

Specifications:

Description: Current-limiting, time-delay fuse.

Dimensions: See page 1-6 for Class L dimensions.

Ratings:

Volts — 600Vac (or less)

Amps — 225-600A

IR — 200kA RMS Sym.

Features and benefits:

- Time-delay of four seconds at five times rating allows closer sizing inductive loads coupled with an equivalent Class L current limitation.

- Class L case size for amp ratings from 225 to 600A allows downsize fusing of large Class L fused switches for improved circuit protection.

Typical applications:

- Large distribution switchboards
- Power panelboards
- Machinery disconnects

Low voltage, branch circuit fuses

1

Low-Peak™ dual-element, time-delay fuses

LPN-RK_SP (250V) Class RK1

LPS-RK_SP (600V) Class RK1

**Available with
indication**

Specifications:

Description:

Current-limiting, dual-element, time-delay fuse; 10 seconds (minimum) at 500% rated amps (8 seconds for 0-30A sizes). Now available with optional indication on select ratings (see catalog numbers table).

Dimensions: See page 1-5 for Class RK1 dimensions.

Ratings:

Volts LPN-RK:

- 250Vac (or less)
- 125Vdc (0-60A)
- 250Vdc (70-600A)

LPS-RK:

- 600Vac (or less)
- 300Vdc

Amps — $\frac{1}{10}$ -600A

IR — 300kA RMS Sym.

— 100kA DC

Agency information: CE, UL Listed, Guide JFHR, File E56412, CSA Certified (200k AIR), Class RK1 per CSA C22.2, No. 248.12, Class 1422-02, File 53787.

Features and benefits:

- Separate overload and short-circuit elements provide time delay for close sizing of high inrush loads linked with RK1 current-limitation and selective coordination ratio of 2:1 (within Low-Peak fuse family) helps prevent widespread blackouts.
- Inventory consolidation of Class RK1, RK5 and H fuses for reduced SKU investment and minimizing potential for misapplying fuse.
- 300kA RMS symmetrical interrupting rating provides adequate ratings without obsolescence for all electrical systems, big or small.
- Insulated end caps reduces exposure to live parts and extends air gap to distance between blades of adjacent mounted fuses or to housing.

Typical applications:

- Large distribution switchboards
- Power panelboards
- Motor control centers
- Machinery disconnect switches

Limitron™ fast-acting fuses

KTN-R (250V) Class RK1

Specifications:

Description: Fast-acting, current-limiting fuse.

Dimensions: See page 1-5 for Class RK1 dimensions.

Ratings:

- Volts — 250Vac (or less)
 - 250Vac (70-350A)

Amps — 1-600A

- IR — 200kA RMS Sym.
 - 100kA Vdc

Agency information: CE, Std. 248-12, Class RK1, UL Listed, Guide JDDZ, File E4273, CSA Certified, Class 1422-02, File 53787.

Features and benefits:

- Current limitation for non-inductive circuits provides Class RK1 current-limiting response to maximum ground fault and short-circuit conditions.
- 200kA interrupting rating provides high ratings at all circuit locations.
- Economical solutions for high-fault circuits.

Typical applications:

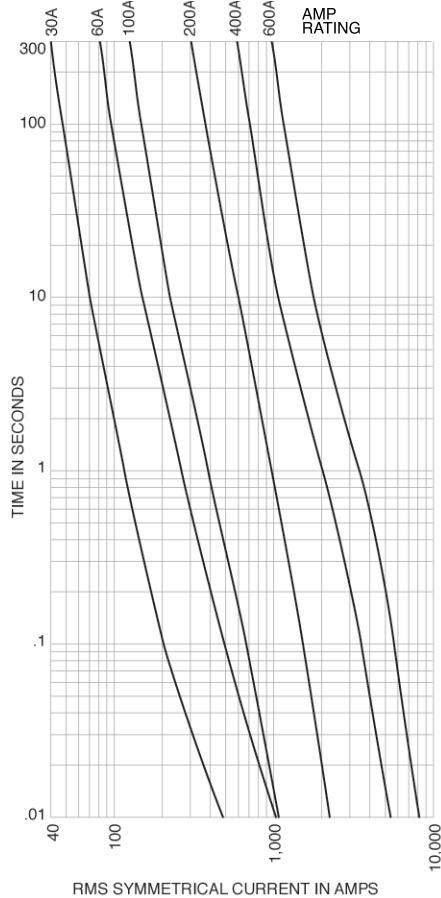

- Panelboards

Current limitation curves

Data Sheet: 1043

KTS-R (600V) Class RK1**Specifications:**

Description: Fast-acting, current-limiting fuse.

Dimensions: See page 1-5 for Class RK1 dimensions.

Ratings:

Volts — 600Vac (or less)

Amps — 1-600A

IR — 200kA RMS Sym.

Agency information: CE, Std. 248-12, Class RK1, UL Listed, Guide JDDZ, File E54273, CSA Certified, C22.2 No. 248.12, Class 1422-02, File 53787.

Features and benefits:

- Current limitation for non-inductive circuits provides Class RK1 current-limiting response to maximum ground fault and short-circuit conditions.
- 200kA interrupting rating provides high ratings at all circuit locations.
- Economical solutions for high-fault circuits.

Typical applications:

- Panelboards

Low voltage, branch circuit fuses

Fusetron™ energy efficient, dual-element, time-delay fuses

FRN-R (250V) Class RK5

Specifications:

Description: Dual-element, time-delay fuse – 10 seconds (minimum) at 500% rated amps (8 seconds for 0-30A sizes). Available with indication on select ratings (see catalog numbers table).

Dimensions: See page 1-5 for Class RK5 dimensions.

Ratings:

- Volts — 250Vac (or less)
 - 125Vdc (½-60A, 110-200A)
 - 250Vdc (225-600A)

Amps — ½-600A

- IR — 200kA RMS Sym.
 - 20kA DC

Agency information: CE, Std. 248-12, Class RK5, UL Listed, Guide JDDZ, File E4273, CSA Certified, Class 1422-01, File 53787.

Features and benefits:

- Separate overload and short-circuit elements provide time delay for sizing as close as 125% of motor FLA.
- 2:1 selective coordination amp ratio (within the Fusetron RK5 fuse family) prevents overcurrent events from opening upstream Fusetron fuses.
- Insulated end caps for 225A-600A fuses reduces exposure to live parts and extends air gap to distance between blades of adjacent mounted fuses or to housing.

Typical applications:

- Power panelboards
- Motor control centers
- Combination starters
- Machinery disconnects

Fusetron™ energy efficient, dual-element, time-delay fuses

1

FRS-R (600V) Class RK5

Specifications:

Description: Dual-element, time-delay fuse – 10 seconds (minimum) at 500% rated amps. Now available with optional indication on select ratings (see catalog numbers table).

Dimensions: See page 1-5 for Class RK5 dimensions.

Ratings:

- Volts — 600Vac (or less)
- 300Vdc $\frac{1}{10}$ -30A, 65-600
- 250Vdc 35-60A

— Amps — $\frac{1}{10}$ -600A

- IR — 200kA RMS Sym.
- 20kA DC

Agency information: CE, Std. 248-12, Class RK5, UL Listed, Guide JDDZ, File E4273, CSA Certified, Class 1422-02, File 53787.

Features and benefits:

- 2:1 selective coordination ratio (within RK5 fuse family) prevents electrical shutdowns from extending beyond the failed circuit.
- Insulated end caps for 65-600A fuses reduces exposure to live parts and extends air gap to distance between blades of adjacent mounted fuses or to housing.

Typical applications

- Power panelboards • Combination starters
- Motor control centers • Machinery disconnects

Low voltage, branch circuit fuses

Limitron fast-acting fuses

JJN 300V, Class T

Specifications:

Description: Very fast-acting, current-limiting fuse.

Dimensions: See page 1-6 for Class T dimensions.

Ratings:

Volts — 300Vac (or less)

- 160Vdc (15-600A)

- 170Vdc (601-1200A)

Amps — 1-1200A

IR — 200kA RMS Sym.

- 20kA DC @ 160Vdc

- 100kA DC @ 170Vdc

Agency information: CE, Std. 248-15, Class T, UL Listed, Guide JDDZ, File E4273, CSA Certified, Class 1422-02, File 53787, RoHS compliant.

Features and benefits:

- Series combination ratings with branch circuit breakers allows broad range of coverage, independent of breaker manufacturer.
- Current limitation for non-inductive circuits provides Class T current-limiting response to maximum ground fault and short-circuit conditions.
- 200kA interrupting rating provides high ratings at all circuit locations.
- Small footprint allows more efficient use of available space.

Typical applications:

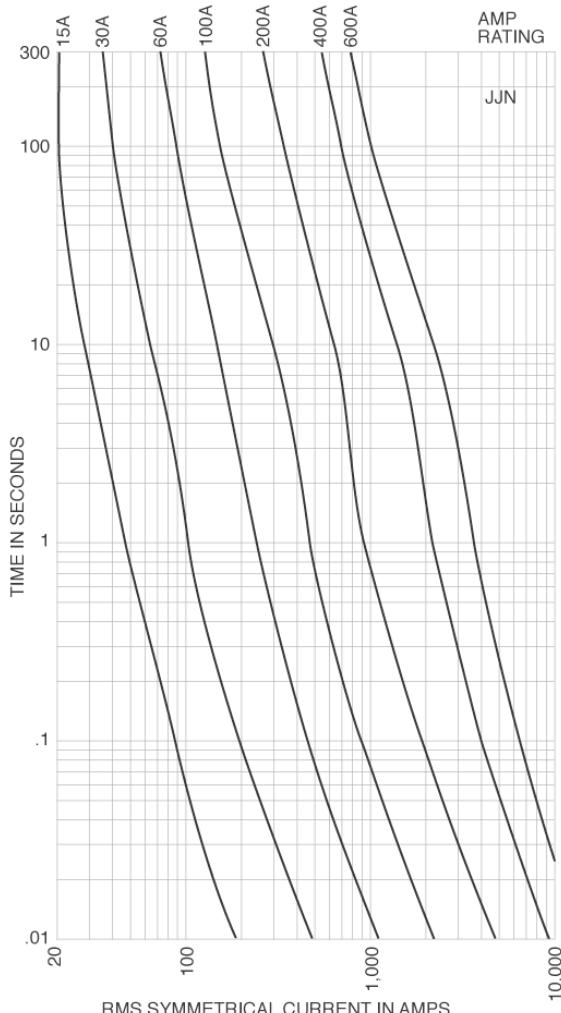

- Large apartment complexes
- Multi-family meter stacks
- VFD line protection

Low voltage, branch circuit fuses

Plug fuses

W

Specifications:

Description: Fast-acting plug fuse.

Dimensions: Edison base plug.

Construction: Brass threads with plastic body.

Ratings:

Volts — 125Vac

Amps — $\frac{1}{2}$ -12A

IR — 10kA RMS Sym.

Agency information: CE, Std. 248-11, UL Listed, Guide JEFV, File E12112.

Features and benefits:

- Dependable, fast-acting circuit protection with 10kA interrupting rating for added safety when applied to existing plug fuse systems and 125-volt single-phase control circuits.

Typical applications:

- Replacement only in existing systems.
- For general purpose circuit protection.
- Use for lighting and other non-motor circuits.

Catalog numbers* (amps)

SL and TL

Specifications

Description: Time-delay, loaded link plug fuse.

Dimensions:

Construction:

SL — Plastic base with rejection threads

TL — Brass threads with plastic body

Ratings:

Volts — 125Vac

Amps — 15-30A

IR — 10kA RMS Sym.

Agency information: CE, Std. 248-11, UL Listed, Guide JEFV, File E12112.

Features and benefits

- Time-delay loaded link TL Edison base plug fuses pass motor overload starting currents without opening and allow closer sizing to motor load for added protection.
- Time-delay loaded link SL fuses provide a rejection feature (when used alone or with Fustat adapters to retrofit Edison base holders) to help prevent overfusing.

Typical applications

- Small motor and inductive load circuits with high in-rush current levels.
- Used with box cover units to provide equipment protection.
- Applications benefiting from fuse rejection (SL series only).

Plug fuses

S and T

Specifications:

Description: Dual-element, time-delay plug fuse

Dimensions:

S — Rejection base

T — Edison base

Construction:

S — Plastic base with rejection threads

T — Brass threads with plastic body

Ratings:

Volts — 125Vac

Amps — S: 1/4-30A

— T: 1/4-30A

IR — 10kA RMS Sym.

Agency information: CE, Std. 248-11, Type S and T; UL Listed (0-6 1/4) Guide JFHR, File E56412 (7-30A) Guide JEFV, File E12112; CSA Certified, Class 1423-01, File 53787.

Features and benefits:

- Time-delay, dual-element T Edison base plug fuses provide small motor overload protection when used with box cover units.
- Time-delay, dual-element S plug fuses provide a rejection feature (when used alone or with Fustat adapters to retrofit Edison base holders) to prevent overfusing of branch circuits.

Typical applications:

- S — residential load centers
- T — box cover units for small motor overload protection
- Applications benefiting from fuse rejection (S only)

P and TC

Specifications:

Description:

P - Type P dual-element fuse

TC - Type D dual-element, time-delay fuse

Dimensions:

Edison base

Construction: Brass threads with plastic body.

Ratings:

Volts — 125Vac or less

Amps — 15-30A

IR — 10kA

Agency information:

P - CSA Certified

TC - CSA Certified (Class 1423-01, File # 53787)

Low voltage
branch circuit
fuses

Features and benefits:

P

- "P" rating for Canadian applications.
- Non-time delay for non-inductive loads

TC

- "D" rating for Canadian applications
- Heavy duty TC fuses are industrial strength products, featuring dual-element construction.
- This spring loaded design provides superior short-circuit and overload protection.
- The TC fuses have more time-delay than the medium duty fuses in order to better protect industrial motors and residential circuits.

Typical applications:

- P — Non-inductive loads, residential load centers
- TC — Box cover units for small motor overload protection

P catalog numbers (amps)

Low voltage, branch circuit fuses

Plug fuses

MB Edison base circuit breakers

Specifications:

Description: Edison base manual reset circuit breakers.

Dimensions: Edison base

Construction: Brass threads with plastic body

Ratings:

Volts — 125Vac only

Amps — 15-20A

IR — 10kA RMS Sym.

Agency information: UL Listed, File E14942

Features and benefits:

- Fit standard Edison base fuse receptacles.
- Resettable upon overload event.

Typical applications:^{*}

- Replacing Edison base plug fuses in residential fuse panels.

Catalog numbers^{*} (Amps)

MB-15

MB-20

* Not for use in box cover units or for inductive loads.

SA Fustat fuse adapters

Specifications:

Description: Adapters for using Type S and SL rejection fuses in Edison base fuse sockets.

Agency information: UL Listed, File E12853; CSA Certified File #6225-01, File #47235.

Features and benefits:

- Fustat adapters screw into the "Edison" thread fuse sockets of standard fuse boxes making it easy to retrofit existing fuse installations
- Available in various amp ratings to cover a wide range of rating requirements

Typical applications:

- Plug fuse installations where it is desirable to restrict fuse amp ratings

Solar fuses

13/32" x 1 1/2" Midget PV fuses

PVM

Specifications:

Description: A range of UL 2579 fast-acting 600Vdc Midget fuses specifically designed to protect solar power systems in extreme ambient temperature, high cycling and low level fault current conditions (reverse current, multi-array fault).

Dimensions: 13/32" x 1 1/2"
(10.3 x 38.1mm).

Ratings:

Volts — 600Vdc to UL 2579
Amps — 4-30A
IR — 50kA DC (4-30A)

Agency information: UL Listed 2579, Guide JFGA, File E335324, CSA Component Certified C22.2. RoHS compliant.

Features and benefits:

- Specifically designed to protect solar power systems in extreme ambient temperature per UL 2579 listed
- Capable of withstanding high cycling and low level fault current conditions

Typical applications:

- Solar combiner boxes
- Solar string protectors

Power loss (watts)

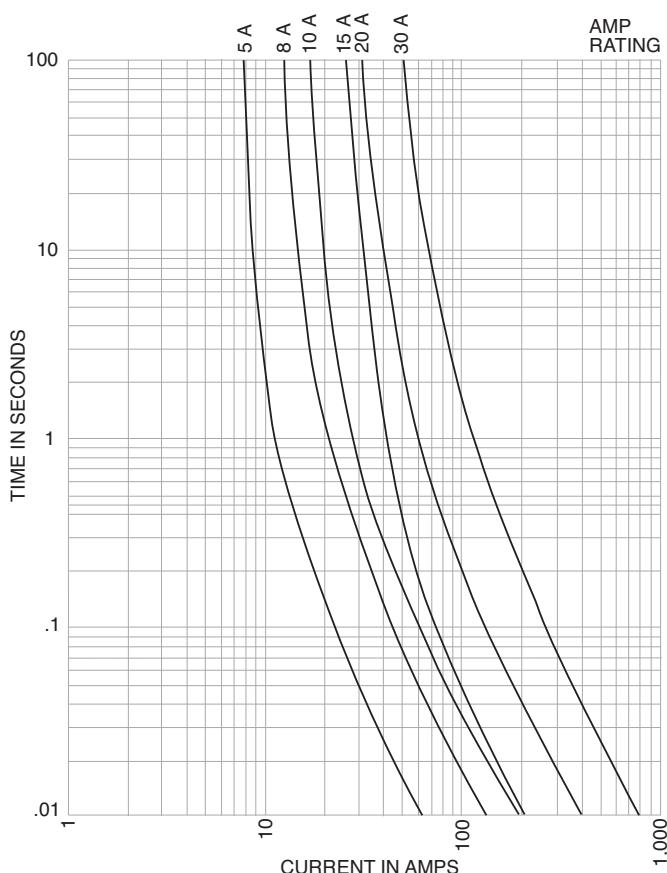

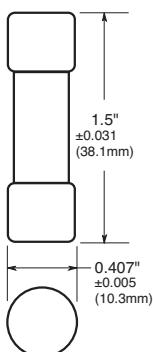

Catalog number	Amp rating	Power loss (watts)	
		0.8 x I _n	1.0 x I _n
PVM-10	10	1.0	1.9
PVM-15	15	1.0	1.7
PVM-30	30	1.6	2.9

PVM-6	PVM-9	PVM-15	PVM-30

Dimensions - (mm)

Data Sheet: 2153

Recommended fuse holders and blocks for the PVM fuse

- See page 1-2

PVCF 600V**Catalog symbol:** PVCF_RN

Fast-acting fuse: 6 minutes maximum clearing time at 200% rated current for 30 to 60A fuse
8 minutes maximum clearing time at 200% rated current for 70 to 100A fuse

Ratings:

Volts — 600Vdc
Amps — 35-100A
IR — 50kA DC (UL and CSA)

Agency information:

- UL 2579 Listed Fuse: Guide JFGA, File E335324
- CSA Certified Fuse: Class C22.2
- RoHS compliant

Other ratings/specifications:

Watts loss at rated current: PVCF35RN: 5.45W
PVCF60RN: 7.27W
PVCF100RN: 11.50W

Operating and storage temperature range: -40 to 90°C**Material specifications:**

- Case: glass filled PES (Polyethersulfone)
- Terminals: copper alloy
- Terminal plating: electroless tin

Carton quantity and weight

Amp rating	Carton qty.	Weight per carton	
		lbs	kg
PVCF-35-60A	12	1.42	0.65
PVCF-70-100A	6	1.74	0.79

Features and product benefits:

- Maximize uptime and reliability using fuses designed and listed to UL 2579: *Low Voltage Fuses - Fuses for Photovoltaic Systems*.
- Minimize chances of equipment failure and personnel injury when using full range fuses having the industry's fastest response time to low-magnitude faults.
- Maximize return on investment with fuses proven to withstand harsh temperatures.
- Minimize design time, operating outage time and replacement cost with fuses qualified in excessively changing environmental conditions.
- Simplify compatibility with readily available industry standard Class CF holders.
- Temperature derating: designed to maximize rated capacity in elevated environmental temperatures.
- Overload protection: proven to clear faults faster than the UL requirement.
- Power loss: minimal energy consumption leading to increased efficiency.

PVS-R (600Vac/dc) Class RK5**Specifications:**

Description: A range of UL 2579 fast-acting 600Vdc Class RK5 fuses specifically designed to protect solar power systems in extreme ambient temperature, high cycling and low level fault current conditions (reverse current, multi-array fault).

Dimensions: See page 1-3 for Class RK5 dimensions.

Ratings:

Volts — 600Vac to UL 248-12

600Vdc to UL 2579

Amps — 20-400A

IR — 200kA RMS Sym. AC

20kA DC (20-60A)

10kA DC (70-400A)

Agency information: UL Std. 248-12, Class RK5, UL Listed, Guide JFGA, File E335324. Photovoltaic to UL 2579, CSA Component Certified C22.2.

Features and benefits:

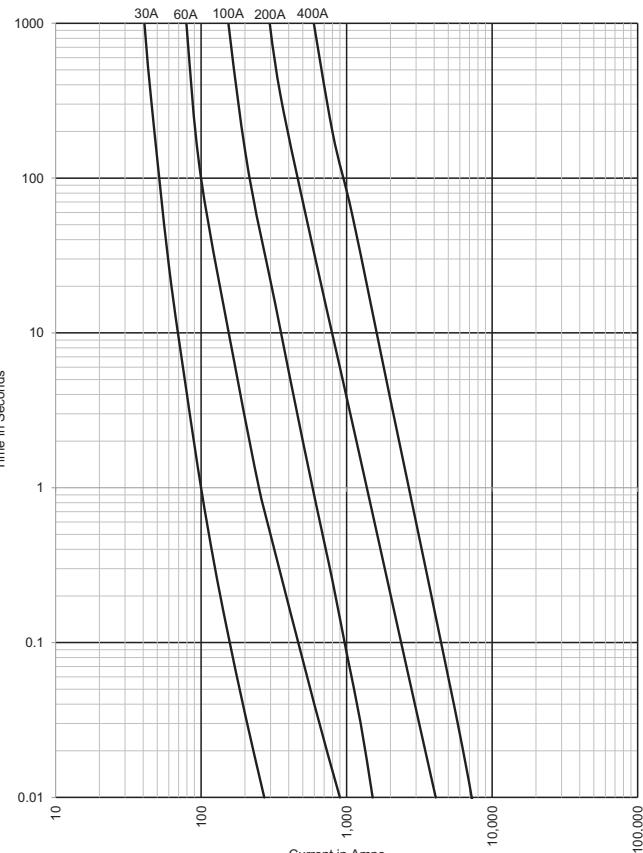

- Current limitation for non-inductive circuits provides Class RK5 current-limiting response to ground fault and short-circuit conditions.
- Designed for the protection and isolation of photovoltaic systems.

Typical applications:

- Photovoltaic systems
- Inverters
- Solar DC safety switches
- Recombiner boxes

Solar fuses

10x38mm photovoltaic fuses

10x38mm fuses — 1000Vdc, 1-30A

Description:

A range 10x38mm, 1000Vdc PV fuses for the protection and isolation of photovoltaic strings. The fuses are specifically designed for use in PV systems with extreme ambient temperature, high cycling and low fault current conditions (reverse current, multi-array fault) string arrays. Available with four mounting styles for application flexibility.

Basic fuse size:

- 10x38mm

Catalog symbols:

- | | |
|----------|---|
| 1-20A* | — PV-(amp)A10F (cylindrical) |
| | — PV-(amp)A10-T (bolt mounting) |
| | — PV-(amp)A10-1P (single PCB tab) |
| | — PV-(amp)A10-2P (dual PCB tab) |
| | — PV-(amp)10F-CT (in-line, crimp terminals) |
| 25-30A** | — PV10M-(amp) (cylindrical) |
| | — PV10M-(amp)-CT (in-line, crimp terminals) |

*Ceramic tube construction. **Melamine tube construction.

Time constant:

- 1-3ms

PV Fuse coordination:

With thin film cells and 4", 5" and 6" crystalline silicon cells

Agency information:

- UL Listed to 2579*, Guide JFGA, File E335324
- IEC 60269-6 (gPV)
- CSA File 53787, Class 1422-30 (1-15A), 20-30A Pending
- CCC (1-20A) (25-30A pending)
- RoHS Compliant

* Except crimp terminal version that is UL Recognized to UL 2579, Guide JFGA2, File E335324.

Features and benefits:

- Meets UL and IEC photovoltaic standards for global acceptance
- Low watts loss performance for energy efficiency
- Low temperature rise performance for more precise sizing
- In-line crimp terminal version is easy to apply in wire harness construction

Typical applications:

- Combiner boxes • Inverters • PV wire harnesses

Recommended fuse blocks, holders and fuseclips:

Part number	Description	Data Sheet #
BPVM_	1000Vdc modular fuse block with optional cover	10265
CHPV_	1- and 2-pole modular fuse holders with optional open fuse indication	Lit # 3185

HPV — 1000Vdc**Catalog symbol:**

HPV-DV-(amp)A

**Description:**

Single-pole, non-serviceable photovoltaic in-line fuse holder and fuse assembly in an IP67 dust tight and temporary water immersion resistant insulating boot for use in photovoltaic wire harnesses.

Ratings

Volts — 1000Vdc

Amps — 1-20A

IR — 33kA

Agency information

- UL Listed to 4248-1 and 4248-18.
File # E 348242
- CSA Component Acceptance,
Class 6225 30, File # 47235
- CE, RoHS Compliant, IP20 Finger-safe, IP67

Conductors

- 75°C/90°C Cu Stranded 12-10AWG PV wire

Terminals

- Crimp connection for single, stranded 12-10AWG PV conductor

Boot material

- UL 5VA flammability resistant rated elastomer.
- UV resistant to UL F1 suitable for outdoor use.

Operating and storage temperature range

- 40°C to +90°C

Packaging

Bulk packed in cartons, 180 fuse assemblies per carton. Carton weight 19.3 Lbs (8.754kg).

Fuse assemblies poly bagged with PV fuse element, two insulating boots (for lineside and loadside), and one pressure sensitive label to be applied on outside after complete assembly to the wire harness.

Solar fuses

14x51mm photovoltaic fuses

14x51mm fuses — 1000/1100Vdc, 15-32A

RoHS

Description:

A range of 14x51mm PV fuses specifically designed for protecting and isolating photovoltaic strings. These fuses are capable of interrupting low overcurrents associated with faulted PV systems (reverse current, multi-array fault).

Ratings:

- Volts — 1000Vdc (25 and 32A)
- 1100Vdc (15 and 20A)
- Amps — 15-32A
- IR — 10kA

Agency information:

- UL Listed, Guide JFGA, File E335324. Photovoltaic to UL 2579
- IEC 60269-6 gPV
- CSA Pending
- CCC Pending

Catalog numbers/electrical characteristics:

Catalog number	Rated amps	Rated volts DC	I^2t (A's)		Watts loss	
			Pre-arcng	Total @ rated volts	$0.8I_n$	I_n
PV-15A14F	15	1100	14	265	2.1	4

PV-32A14F	32	1000	120	1740	3.3	6.2

Features and benefits:

- Specifically designed to provide fast-acting protection under low fault current conditions associated with PV systems
- High DC voltage rating
- Demonstrated performance in extreme temperature cycling conditions

Typical applications:

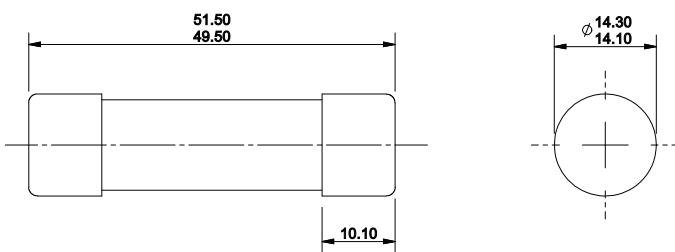

- Combiner boxes
- Inverters

Recommended fuse holder:

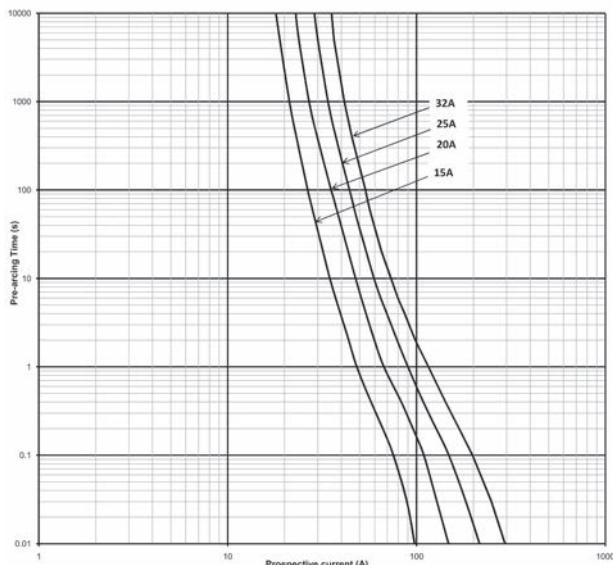

CH141B-PV DIN-Rail modular fuse holder

See data sheet # 720148 for more information.

Dimensions - mm

Time-current characteristic curves—average melt

Available current (amps), DC-time constant 1-3ms

Recommended fuse holders and blocks for 14x51mm fuses

PV-400ANH3	NH3	400	67,500	550,000	30	50

See data sheet No. 720133 for complete details.

Features and benefits:

- Compact size saves panel space and extends design flexibility
- Bolt-on versions have common hole centers for standardizing busbar designs across 63-400 amp range
- Low power loss for greater efficiency and lower operating temperature
- Global agency standards simplifies design considerations for worldwide markets
- Dual indication feature and optional microswitches make system monitoring easier

Typical applications:

- Recombiner boxes
- Inverters

Recommended fuse blocks*:

Fuse size	Fuse block
NH1	SD1-D-PV
NH2	SD2-D-PV
NH3	SD3-D-PV

See data sheet # 720149 for more information.

Optional microswitches*:

Data Sheet: 10201

Features and benefits:

- Specifically designed to provide fast-acting protection under low fault current conditions associated with PV systems
- High DC voltage rating
- Variety of mounting options for flexibility
- Demonstrated performance in extreme temperature cycling conditions

Typical applications:

- Recombiner boxes
- Inverters

Recommended fuse holders:

Fuse size	Part number	Description
01XL	SB1XL-S	1-pole block
1XL	SB1XL-S	1-pole block
2XL	SB2XL-S	1-pole block
3L	SB3L-S	1-pole block

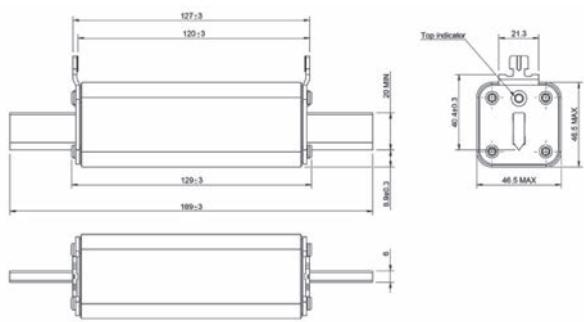

See data sheet # 10066 for more information.

Optional microswitches:

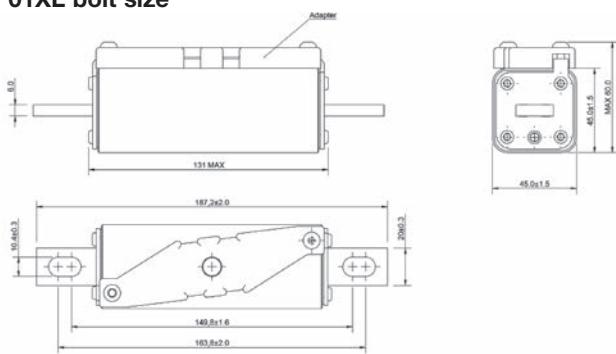

- Blade — 170H0235 or 170H0237 for size 01XL
— 170H0236 or 170H0238 for sizes 1XL, 2XL and 3L
Bolt-in — 170H0069 for all sizes

Dimensions - mm (not to scale)

14x65mm fuses — 1300/1500Vdc, 2.25-32A

RoHS

Description:

A range of 14 x 65mm package PV fuses specifically designed for protecting and isolating photovoltaic strings. These fuse links are capable of interrupting low overcurrents associated with faulted PV systems (reverse current, multi-array fault).

Available in four mounting styles for application flexibility.

Basic fuse size:

14x65mm

Catalog symbols and mounting style:

- PV-(amp)A14LF (cylindrical)
- PV-(amp)A14L-T (cylindrical with tags)
- PV-(amp)A14LF10F (cylindrical with 10mm fixings)
- PV-(amp)A-CT_ (in-line with crimp terminals)

Agency information:

- UL Listed, Guide JFGA, File E335324, Photovoltaic to UL 2579*
- IEC 60269-6 gPV
- CSA pending
- CCC pending
- RoHS compliant

* Crimp terminal version is UL Recognized to UL 2579.

Catalog numbers (amp)/electrical characteristics:

Features and benefits:

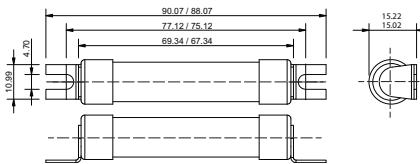

- Specifically designed to provide fast-acting protection under low fault current conditions associated with PV systems
- Variety of mounting options for flexibility
- Fuses meet UL and IEC photovoltaic standards for global product acceptance
- Low watts loss for greater PV system efficiency
- Low heat rise permits more precise sizing
- In-line crimp terminal version is easy to apply in wire harness construction.

Typical applications:

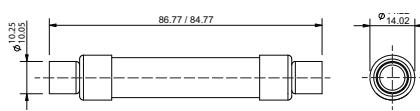

- Combiner boxes • Inverters • PV wire harnesses

Dimensions/configurations - mm:

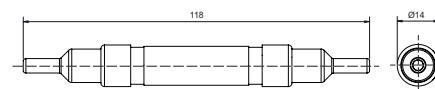

Cylindrical PV-(amp)A14LF

Cylindrical with tags PV-(amp)A14L-T

Cylindrical with 10mm fixings PV-(amp)A14LF10F

Solar fuses

1500Vdc XL photovoltaic fuses

XL PV fuses — 1500Vdc, XL01, 1, 2, 3, 50-400A

RoHS

Description:

A range of XL size PV fuses specifically designed for protecting and isolating photovoltaic array combiners and disconnects. These fuses are capable of interrupting low overcurrents associated with faulted PV systems (reverse current, multi-array fault). Available with optional microswitches for use in monitoring systems.

Catalog symbols:

Blade — PV-(amp)A(size)XL-15

Bolt-In — PV-(amp)A(size)XL-B-15

Agency information:

- UL Listed, Guide JFGA, File E335324. Photovoltaic to UL 2579
- IEC 60269-6 gPV
- CSA Class 1422-30, File 53787
- RoHS compliant

Features and benefits:

- Specifically designed to provide fast-acting protection under low fault current conditions associated with PV systems
- Variety of mounting options for flexibility

Typical applications:

- Recombiner boxes
- Inverters

Recommended fuse holders:

Fuse size	Part number	Description
01XL	SB1XL-S	1-pole block
1XL	SB1XL-S	1-pole block
2XL	SB2XL-S	1-pole block
3L	SB3L-S	1-pole block

See data sheet # 10066 for more information.

Optional microswitches:

Blade — 170H0235 or 170H0237 for size 01XL

— 170H0236 or 170H0238 for sizes 1XL, 2XL & 3L

Bolt-in — 170H0069 for all sizes

Low voltage, supplementary fuses

Cable limiters and welder limiters

K 600V

Specifications:

Description: Cable limiters.

Ratings:

Volts — 600Vac
IR — 200kA RMS Sym.
@ 600Vac

Agency information:

UL Listing: KDM, KDR, KDP and KFM, KCM, KCM-B and KCR.

Features and benefits:

- Sizes and ratings available to meet many applications.

Typical applications:

- Protecting low voltage distribution and service entrance cables against short-circuit currents.

64000 and 68000

Specifications:

Description: Welder limiters.

Ratings:

Volts — 600Vac (or less)
IR — 200kA RMS Sym.

Features and benefits:

- Current-limiting devices designed specially for use on welder circuits only
- Time-current characteristics are designed to hold on the intermittent overloading encountered in welder operation, while providing short-circuit protection to the circuit and equipment

• Typical applications:

- Welder circuits
- Because welder limiters have special characteristics, they are not intended for application on general-use circuits

KTK-1/2	KTK-3	KTK-9	
KTK-6/10	KTK-3-1/2	KTK-10	

Features:

- Color coded black for 600Vac voltage rating
- Fast-acting for resistive loads
- Melamine tube construction
- Nickel-plated bronze endcaps

Typical applications:

- Control circuits
- Lighting circuit protection
- Meter circuits

For superior electrical protection, Eaton recommends upgrading KTK fuse applications to Bussmann series Low-Peak LP-CC fuses See page 1-7.

Data Sheet: 1011

Low voltage
supplementary
fuses

Recommended fuse blocks/fuse holders for 13/32" x 1 1/2" fuses

- See page 3-2

KLM**Description:**

Fast-acting supplemental fuse.

For superior protection, Eaton recommends upgrading to Bussmann series Low-Peak™ Class CC fuses. See data sheet # 1023.

For protecting DC photovoltaic systems, Eaton recommends using Bussmann series PVM 10x30mm PV fuses. See data sheet # 10121.

FNM-3/4	FNM-2-1/4	FNM-6	FNM-30

Features:

- Color coded green for 250Vac maximum voltage rating
- Melamine tube construction
- Nickel-plated brass endcaps

Typical applications:

- Circuits with high inrush currents (motor/transformer loads)
- Supplemental protection for 125Vac and 250Vac inductive circuits.

For superior electrical protection, Eaton recommends upgrading FNM and FNQ fuse applications to Bussmann series Low-Peak LP-CC fuses See page 1-7.

Recommended fuse blocks and fuse holders for 13/32" x 1 1/2" fuses • See page 3-2

Data Sheet: 2028

FNQ

Description:

Time-delay supplemental fuse.

For superior protection, Eaton recommends upgrading to Bussmann series FNQ-R Class CC fuses. See data sheet # 1014.

Catalog symbol / color code:

- FNQ - Orange (500Vac maximum voltage)

Ratings:

Fuse amp range	Interrupting rating at rated voltage		Agency information	
	500Vac	UL	CSA	
1/10 to 30	10kA	X	X	

Agency information:

5A/125Vac, 10,000 AIC Class 1422-01, File 53787.

Features and benefits:

- Type GBA has a "red" pin indicator providing visual identification of failed circuits, resulting in faster troubleshooting (reduced circuit downtime).
- Type GLD has a plated pin to activate transmitting a electrical signal to indicate the location of opened circuits, resulting in reduced downtime.

Typical applications:

- Control circuits
- Electronic circuits

MIS

Specifications:

Class: Supplemental

Description: Non time-delay pin indication fuse.

Dimensions: $1\frac{3}{32}$ " x 2"
(10.3 x 50.8mm).

Ratings:

Volts	— 600Vac
Amps	— 1-12A
IR	— 200kA

Features and benefits:

- Type MIS has a pin indicator providing visual identification of failed circuits, resulting in faster troubleshooting (reduced circuit downtime).
- Type MIS can be used in circuits rated 600V or less.
- Type MIS has an interrupting rating of 200kA.

Typical applications:

- 480V control circuits
- PLC circuits

KAZ

Specifications:

Description: Non-fuse actuator.

Dimensions: $1\frac{3}{32}$ " x 2"
(10.3 x 50.8mm).

Ratings:

Volts	— 600Vac
Amps	— N/A
IR	— 200kA

Agency information:

CE, UL Listed, Guide JDVS, File E58836.

Features and benefits:

- Bussmann series signal blocks 2778, 2837 or 2838 with KAZ actuators mounted in parallel with fuses having a rating of 50A or larger to provide blown fuse dropout of shunt-trip fused switches.
- Type KAZ can be used in circuits rated 600V or less.
- Type KAZ has an interrupting rating of 200kA.

Typical applications:

- Large, shunt-trip fused switches
- Fuse protected circuits rated 50A or larger with shunt-trip devices.

Catalog number: KAZ

Recommended signal block for

$1\frac{3}{32}$ " x 2" indicating fuses

GLR-5	HLR		

1) Carrier is UL Recognized, Guide IZLT2, File E14853 and CSA Certified, Class 6225-01, File 47235 12A, 300Vac.

2) Units can be panel-mounted either in a knockout hole with a separate steel clip (BK/A-104) or in a keyhole punch using separate mounting clip #6374 for panels of thickness 0.043" to 0.062" or #4909 for thickness 0.030" to 0.042".

* For two leads (one each for line and loadside) order HLR-2A, 15A, 300V

- An alternative to the HLR fuse holder is the A fuse holder. The A fuse holder comes *WITHOUT* leads. The customer inserts #18 insulated solid copper wire into the line side receptacle as well as into the load side receptacle. It has the same body dimensions, utilizes the same mounting hole, and takes the same mounting clips as the HLR. The A fuse holder is UL Recognized, 10A, 300Vac, Guide IZLT2, File E14853 and CSA Certified, 10A, 300Vac, Class 6225-01, File 47235.
- Do not put tension on line (rear) terminal of fuse holder.

Data Sheet: 2032

HLR-2A fuse holder

GMF

Specifications:

Class: Supplemental

Description: Time-delay, non-rejection, in-line fuse.

Construction: Glass tube.

Ratings:

Volts — 300Vac (or less)

Amps — 1/10-10A

IR — 10kA

Agency information: CE, UL Listed Std. 248-14 0-10A, (Guide JDYX, File E19180), CSA Certified, (Class 1422-01, File 53787).

Features and benefits:

- In-line, time-delay circuits protection.

Typical applications:

- In-line lighting ballast protection

HLR fuse holder

ATC fuse**Specifications:**

Description: Fast-acting blade fuse.

Construction: Colored plastic housing with zinc fuse element.

Ratings:

Volts — 32Vdc
Amps — 1-40A
IR — 1000A

Agency information: UL Recognized, (1-40A) (Guide JFHR2, File E56412), SAE Standard J1284.

Features and benefits:

- Color coded plastic housing for easy identification of fuse ratings

Typical applications:

- Automotive

HHA, HHC, HHD, HHF, HHG, HHR, HHS and ATC-FHID**easyID™ LED indicating holder****Specifications:**

Description: In-line fuse holders for ATC™ blade-type fuses.

Dimensions: See dimensions illustration.

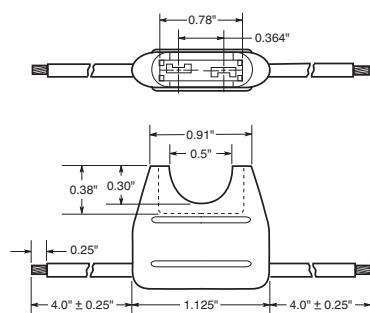

Ratings:

Volts: — 32Vdc
Amps: — 80% continuous of fuse rating. See catalog numbers table for individual fuses sizes.

Catalog numbers

Catalog numbers	Fuse holder description	Fuse amps	Electrical connection
HHA	Black w/ cover	1-40	#16 red leadwire
HHC	Yellow	1-20	#16 black leadwire
HHD	Black	1-30	#12 yellow leadwire
HHF	Black w/ cover	1-20	#16 yellow leadwire
HHG	Black w/ cover	1-30	#12 yellow leadwire
HHR	Black w/ cover	1-30	#12 red leadwire
HHS	Blue w/ cover	1-20	#18 to 14 black leadwire
ATC-FHID	Indicating holder	1-20	#16 black leadwire
	Black w/ cover		

A fuse must be properly and fully inserted into the holder to provide a solid connection. Poor or improper insertion of the fuse can result in failure of the fuse and holder, thus not protecting the device for which it was intended.

Axial leads, put "V" in P/N.

S506-V (GDC-V)* (axial leads)**S506 (GDC)*****Specifications****Description:** Time-delay, low-breaking capacity fuse.**Construction:** Glass tube, nickel-plated brass endcaps.**Ratings:**

Volts — 250Vac (or less)

— 32Vdc (self certified)

Amps — 32mA-15A**

IR — 35A @ 250Vac

RoHS

Agency information: UR, CSA, cURus, SEMKO, VDE, BSI, IMQ, PSE/JET, CCC.

See data sheet for complete agency information. Not all approvals apply to all ratings.

Features and benefits

- Time-delay compatibility for inductive circuits
- Conforming to IEC standards

Typical applications

- Electronic circuits

Data Sheet: 2004**MDQ-V (axial leads)****MDQ****Specifications****Description:**

Dual-element, time-delay fuse.

Dimensions: 1/4" x 1 1/4" (6.4 x 31.7mm).**Construction:** Glass tube with nickel-plated brass endcaps.**Ratings:**

- Volts — 250Vac (1/100-7A)
 - 32Vac (7 1/2-15A)
 - 32Vdc (Self Certified)
- Amps — 1/100-15A
 - IR — 35A (1/100-1A @ 250Vac)
 - 100A (1 1/2-3A @ 250Vac)
 - 200A (4-7A @ 250Vac)
 - 1000A (7 1/2-12A @ 32Vac)

Agency information: Std. 248-14, UL Listed, File E19180; Guide JDYX, 1/16-7A CSA Certification, File 47233, Class 1422-01, 1/16-7A, UL Recognized, Guide JDYX2, File E19180, 7.1-30A.

Features and benefits

- Dual-element design allows closer sizing to inductive circuits than any other fuses.

Typical applications

- Electronic relay and control circuits

 - 10kA (20-30A @ 125Vdc)

**Interrupting ratings were measured at 70% – 80% power factor on AC, and at a time constant described in UL 248.

Agency information: CE, Std. 248-14, UL Listed, Guide JDYX, File E19180, 0-20A CSA Certification, Class 1422-01, File 53787, 0-20A. UL Recognized, Guide JDYX2, File E19180, 25-30A, CSA Component Acceptance, Class 1422-30, 25-30A.

Features and benefits

- Ceramic body allows for higher amp/volt rating combinations.
- Inventory consolidation by replacing MDL fuses allows for reduced SKU investment and minimizing potential for misapplying fuse.

Typical applications

- Electronic circuits

Worldwide circuit protection solutions

Eaton is a world-leading supplier of Bussmann series medium voltage fuses. Each product is backed by an efficient worldwide distribution network with unrivaled service and technical support. Eaton circuit protection solutions comply with major international standards: ANSI, BS, DIN, IEC and UL.

Fuse types

Medium voltage fuses generally fit into two categories – expulsion fuses and current limiting fuses. The definitions per ANSI C37.40 are:

Expulsion fuse: “A vented fuse in which the expulsion effect of the gases produced by internal arcing, either alone or aided by other mechanisms results in current interruption.” Expulsion fuses will limit the duration of an overcurrent event, but they will not limit the magnitude of fault current.

Current-limiting fuse: “A fuse unit that, when in its current-responsive element is melted by a current within the fuse’s specified current-limiting range, abruptly introduces a high resistance to reduce current magnitude and duration, resulting in subsequent current interruption.” A current limiting fuse will reduce the magnitude of a fault current as well as limit the duration of the overcurrent event when operating in its current limiting range. Eaton offers a broad range of current limiting fuses for protection of feeders, transformers and motor circuits designed to ANSI, BS, DIN and IEC standards.

Medium voltage current-limiting fuses

Current limiting fuses are classified into three categories:

1. Full range – defined by ANSI C37.40 as “a fuse capable of interrupting all currents from the maximum rated interrupting current down to the minimum continuous current that causes the melting of the fusible element(s), when the fuse is applied at the maximum ambient temperature specified by the manufacturer.” It is able to interrupt any current that will melt its element.

2. General purpose – defined by ANSI C37.40 as “a fuse capable of interrupting all currents from the maximum rated interrupting current down to the current that causes melting of the fusible element(s) in one hour.” Not all currents fall within this range. It is possible for the fuse to be exposed to an overcurrent lower than the value given by the one hour criteria. In that case, a different overcurrent protection device would be required to interrupt the overcurrent.

3. Back-up – defined by ANSI C37.40 as “a fuse capable of interrupting all currents from the maximum interrupting rating current down to the minimum interrupting current.” The minimum interrupting current is the lowest current that the fuse will be able to clear properly. This creates a need to place a low current interrupting device, such as motor overloads, in series with the back-up rated fuse.

E- and R-Rated fuses

In North America, current limiting fuses typically fall into the category of E-Rated fuses and R-Rated fuses. Eaton also offers a wide range of current limiting fuses designed to BS, DIN and IEC standards.

E-Rated fuses are used to protect feeder circuits, power transformers and potential transformers. E-Rated fuses have defined current response times specified by ANSI C37.46. E-Rated fuses 100A and below must melt in 300sec at an rms current within the range of 200% to 240% of the continuous current rating. E-Rated fuses above 100A must melt in 600sec at an rms current within the range of 240% to 264% of the continuous current rating of the fuse. Eaton offers a wide variety of full range and general purpose E-Rated fuses from 2.4kV up to 38kV.

R-Rated fuses are back-up fuses that provide short-circuit protection for motor circuits. They are applied with MV motor starters which provide the overload protection for the circuit. R-Rated fuses also have defined current response times specified by ANSI C37.46. R-Rated fuses will melt in a range of 15 – 35sec at a current equal to 100 times the “R” rating. Eaton offers 2.4kV, 5.08kV, 7.2kV and 8.3kV R-Rated fuses for motor circuit protection.

2.75kV E-Rated fuses**Description:**

- E-Rated, current-limiting, medium voltage fuses for feeder circuit, switchgear and transformer protection.

Catalog symbols:

- 2CLE-_E
- JCX-_E

Ratings:

- Volts — 2.75kV
- Amps — 10 to 450A
- Interrupting ratings
 - 50kA RMS Sym (2CLE-_E)
 - 40kA RMS Sym (JCX-_E)

Agency information:

- E-Rated fuses meet the performance characteristics of ANSI C37.46

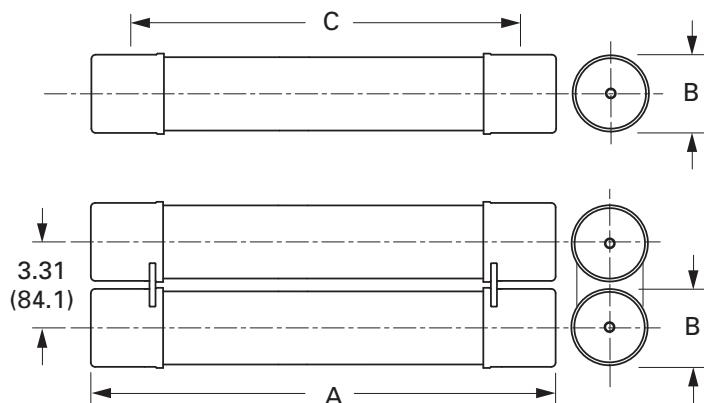

Recommended fuse holders:

* 250A and 300A ratings may also be applied at 280 and 325 amps respectively, but fuses will no longer be complaint with ANSI E Rating criteria.

** Does not comply with ANSI C37.46 for "E" rating.

5.5kV E-Rated fuses**Description:**

- E-Rated, current-limiting, medium voltage fuses for feeder circuit, switchgear and transformer protection.

Catalog symbols:

- General purpose:
 - 5CLE_E-D (10-25A)
 - 5CLE_E (10-1350A)
 - 5HLE_E (10-450A)
 - JCY_E (1-25A)
- Full range (per ANSI C37.40)
 - MV055F_ (10-450A)

Ratings*:

- Volts — 5.5kV
- Amps — 1 to 1350A
- Interrupting ratings — 40 to 63kA RMS Sym

* See catalog number tables for voltages, ampacities and interrupting ratings by catalog number.

Agency information:

- E-Rated fuses meet the performance characteristics of ANSI C37.46
- UL Listed, Guide JEEG, File E240398. See catalog numbers.

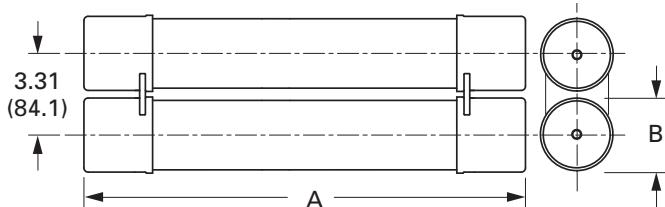

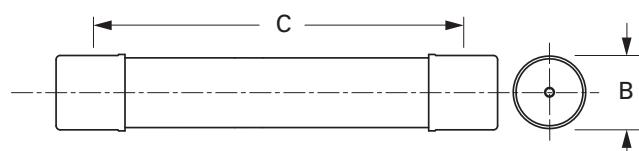

Recommended fuseclips and holders:

8.3kV E-Rated fuses**Description:**

- E-Rated, current-limiting, medium voltage fuses for feeder circuit, switchgear and transformer protection.

Catalog symbols:

- 8CLE-_E-D (10-25A)
- 8CLE-_E (10-350A)
- 8HLE-_E (10-350A)

Ratings*:

- Volts — 8.3kV
- Amps — 10 to 350A
- Interrupting ratings — 50kA RMS Sym

* See catalog number tables for voltages, ampacities and interrupting ratings by catalog number.

Agency information:

- E-Rated fuses meet the performance characteristics of ANSI C37.46

Recommended fuse holders:

Amp rating	Fuse mounting type	Voltage BIL (kV)	Approximate dimensions - in (mm)			Catalog number		
			Diameter A	Clip center B	Length C	Mounting (including live parts, end fittings)*	Live parts (including end fittings)	End fittings (disconnect only)
CLE								
10E-D-25E-D Single barrel	Non-disconnect	75	3.0 (76)	14 (356)	17.9 (455)	8CLE-PNM-D	8CLE-GNM-D	CLE-NL-D
	Disconnect**	75				8CLE-PDM-D	8CLE-GDM-D	CLE-DL-D
15E-25E Single Barrel	Non-disconnect	75	2.0 (51)	14 (356)	15.5 (394)	8CLE-PNM-C	8CLE-GNM-C	CLE-NL-C
	Disconnect**	75				8CLE-PDM-C	8CLE-GDM-C	CLE-DL-C
200E-350E Double barrel	Non-disconnect	75	3.0 (76)	14 (356)	17.9 (455)	8CLE-PNM-E	8CLE-GNM-E	CLE-NL-E
	Disconnect	75				8CLE-PDM-E	8CLE-GDM-E	CLE-DL-E
HLE								
10E-175E Single barrel	Non-disconnect	75	3.0 (76)	12 (305)	15.9 (404)	8HLE-PNM-D	8HLE-GNM-D	CLE-NL-D
	Disconnect**	75				8HLE-PDM-D	8HLE-GDM-D	CLE-DL-D
200E-350E Double barrel	Non-disconnect	75	3.0 (76)	12 (305)	15.9 (404)	8HLE-PNM-E	8HLE-GNM-E	CLE-NL-E
	Disconnect**	75				8HLE-PDM-E	8HLE-GDM-E	CLE-DL-E

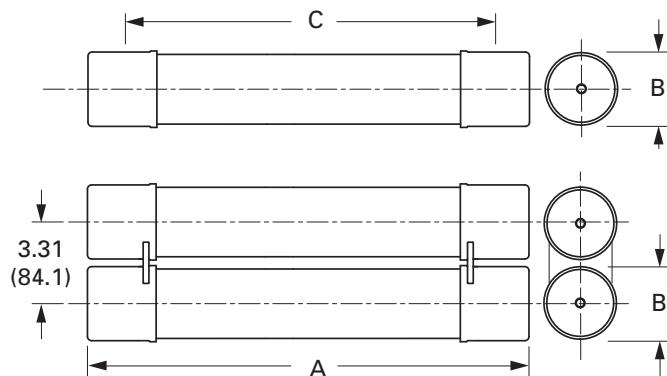

* End fittings supplied only when required

** Disconnect mountings provide a means for fuse extraction only. Do not use a disconnect mounting for load switching or fuse removal while energized.

Recommended fuseclips:

Description	Fuse diameter - in (mm)	Catalog number
Enclosed fuseclip	2 (51)	A3354710*
Enclosed fuseclip	3 (76)	A3354730*
Open fuseclip	3 (76)	1A0065
Spring loaded open fuseclip	3 (76)	9078A67G04

*For single barrel applications only. Not sold in pairs.

E-Rated medium voltage specialty mount fuses**Catalog symbols:**

- 15BHLE-E (bolt-on version)
- 15HCL-E (clip-lock version)

Ratings*:

- Volts — 15.5kV
- Amps — 10 to 300A
- Interrupting ratings — 50 to 63kA RMS Sym

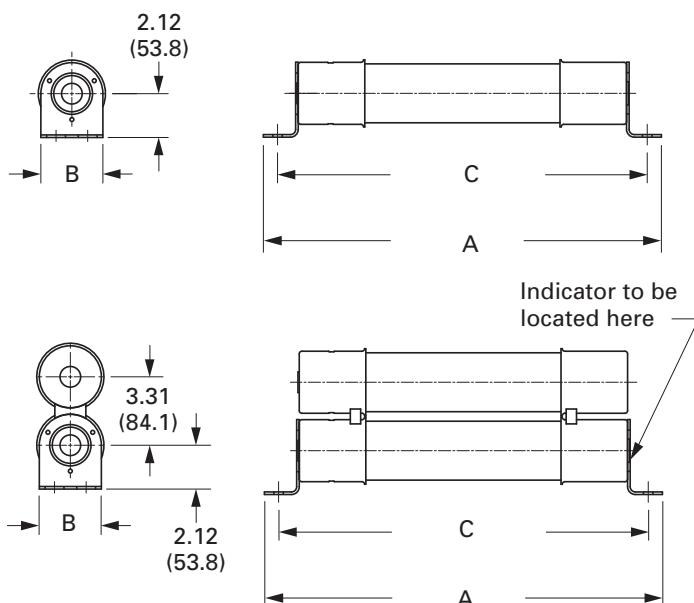

* See catalog number tables for voltages, ampacities and interrupting ratings by catalog number.

Agency information:

- E-Rated fuses meet the performance characteristics of ANSI C37.46

Recommended live parts for clip-lock fuses

- Catalog number HCL-NL-1

Dimensions - in (mm)**BHLE**

Medium voltage fuses

Current-limiting

2.4kV R-Rated fuses

Description:

- Indoor/enclosure, R-Rated medium voltage, current-limiting fuses for motor circuit protection.

Catalog symbols:

Code-(amps)R Construction

2CLS-25	Standard (25A only)
2ACLS-25	AMPGARD Hookeye (25A only)
JCK_R	Standard (2R-24R)
JCK-A_R	AMPGARD Hookeye* (2R-24R)
2HCLS_R	Hermetically sealed AMPGARD Hookeye* (25A/2R-24R)
2BCLS_R	Bolt-on (25A/2R-24R)

* For use in 400 amp AMPGARD motor starters.

Recommended fuse clips/holders for standard constructions:

Amp range	Description	Cat. No.
Fuseclips		
25-230A	3" Enclosed fuseclip*	A3354730
	3" Open fuseclip	1A0065
25-450A	3" Spring loaded open fuseclip	9078A67G04
Fuse holders		
25-230A Single barrel	Non-disconnect holder, porcelain	2CLE-PNM-D
	Non-disconnect holder, glass polyester	2CLE-GNM-D
	Disconnect holder, porcelain	2CLE-PDM-D
	Disconnect holder, glass polyester	2CLE-GDM-E
390-450A Double barrel	Non-disconnect holder, porcelain	2CLE-PNM-E
	Non-disconnect holder, glass polyester	2CLE-GNM-E
	Disconnect holder, porcelain	2CLE-PDM-E
	Disconnect holder, glass polyester	2CLE-GDM-E

* Single barrel only, not sold in pairs.

† Disconnect mountings provide a means for fuse extraction only. Do not use a disconnect mounting for load switching or fuse removal while energized.

Fast-acting PT fuses

**HVA, HVB,
HVJ, HVL, HVR,
HVT, HVU,
HVW & HVX**

Specifications

Description:

Medium voltage, non-time delay, fast-acting fuses.

Dimensions: See basic catalog numbers table.

Ratings:

Volts: — 1-10kV (see basic catalog numbers table)

Amps: — $\frac{1}{16}$ -10A (see basic catalog numbers table)

Features and benefits

- Physical size varies with electrical rating of fuse to prevent over-fusing.
- Space saving size.

Typical applications

- Medium voltage instrument protection
- Medium voltage circuit protection

Test specifications

Basic catalog numbers	Load / opening time
HVA, HVB, HVJ, HVL	110% / 4 hours (min) 135% / 1 hour (max)
HVR, HVT, HVU, HVW, HVX	100% / 4 hours (min) 150% / 1 hour (max)

Fuse blocks: 4528, 4529

Voltage rating: 1000 to 10,000V

Basic catalog numbers	Fuse block catalog number	Fuse clip catalog number
HVA, HVR	4528	5960
HVB, HVT	4529	5960
HVJ, HVU	N/A	4180
HVL, HVX	N/A	4180

Use #8 screws on blocks 4528 and 4529.

British standard dimensioned IEC fuses for motor circuit protection

The Bussmann series range of motor fuses are designed to meet the specific requirements necessary for motor protection. During the starting cycle of direct on-line motors, the fuse elements will reach a considerably higher temperature than during normal operation; (this is due to the high amount of current the motor will draw as it starts, typically, six times its normal load current value). This results in expansion and contraction of the fuse elements and could cause premature operation of the fuse.

Bussmann series of motor fuses encompass an advanced design to minimize this effect. This therefore, negates the need to over specify the fuse rating due to high values of motor starting current.

Bussmann series of motor fuses operate extremely quickly under heavy fault currents, resulting from the time / current characteristic. Low power dissipation ensures low temperature rise, important in multi-tier starters for example. Switching (arc), voltages are lower than permitted values, therefore, 5.5kV fuses are also suitable for 4.8kV and 2.4kV circuits.

Table of ratings

Basic cat. number	Volts	Breaking capacity	Amp ratings	Dimensions - in (mm)		Dimensional standard
				Length	Diameter

Recommended fuseclips for DIN style fuses – 270303, A3354745 see page 120.

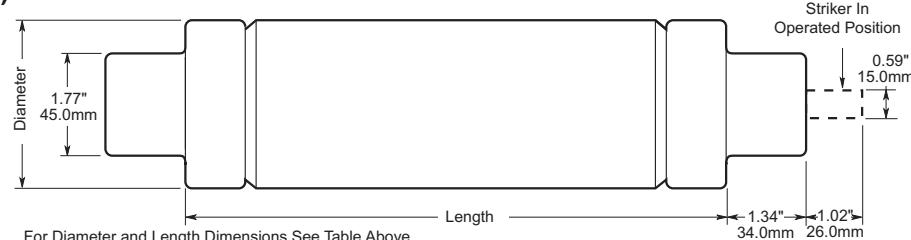

*Not compliant with VDE 0670, part 402.

¹-IR RMS Sym is 63kA

²-IR RMS Sym is 40kA

³-IR RMS Sym is 20kA

Dimensions - In (mm)

Volts: — See voltage associated with the basic catalog numbers in the table.

Amps: — See amp rating associated with the basic catalog numbers in the table.

IR: — See IR associated with the basic catalog numbers in the table.

Agency information: Comply with DIN dimensional standard DIN 43625, VDE 0670 part 4, VDE 0670 part 40Z and with IEC 60282-1 (2005).

Features and benefits

- DIN dimensioned for retrofitting in existing hardware
- Open fuse indicator for ease in troubleshooting
- Designed for use in IEC equipment

Typical applications

- Medium voltage IEC designed equipment

Expulsion fuse links for use in high voltage distribution cut-outs

Specifications

Description: Expulsion fuse links available in a wide range of options from 15kV to 72kV in ANSI T and K characteristics.

Ratings:

Volts: — 15 to 72kV

Amps: — 1 to 100A

Breaking capacity: depends on voltage but is approximately 8kA

Agency information:

Type T: complies with ANSI C37-42
Type K: complies with ANSI C37-42

Features and benefits

- Wide range of options available from 15kV to 72kV in ANSI T and K characteristics.
- Extra rapid option also available.

Packaging:

Up to and including 50A: 25 in a carton

From 60A to 100A: 10 in a carton

To avoid incorrect replacement the fuse links have colour coded labels:

Pink label: Type XA

Yellow label: Type K

Green label: Type T

Typical applications:

- Primary side transformer protection
- Feeder protection
- Capacitor bank protection

Use of application

Expulsion fuse links current ratings should be selected on the basis of maximum expected transient no damage currents rather than on full load current. In addition, the selection of higher current ratings will reduce the possibility of supply interruption due to transient surges such as those due to lightning strikes.

Links should be handled with a reasonable degree of care when installing. Excessively rough handling may damage the element.

It is normal, under certain fault conditions, for arc extinguishing material and/or metal particles to be expelled from the fuse assembly. It is therefore recommended that reasonable precautions be taken to prevent the installation being approached by unauthorised persons.

How to order - parts referencing system

Rated voltage (kV)	1st letter Type of current characteristics	2nd letter Type of termination	Rated current (A)
15	T = complies with ANSI C 37-42 requirements for slow acting T characteristics	B = a fixed NEMA button head link	1, 2, 3, 4, 5, 6, 7.5, 8, 10,
25		U = a universal link, with double tail and slip off NEMA button head	12, 15, 20,
46		D = double tailed link without NEMA button head	25, 30, 40,
72	K = complies with ANSI C 37-42 requirements for fast acting K characteristics		50, 60, 65,
	XA = this type of expulsion fuse link has an extra rapid characteristic. It is suitable for applications where a high degree of system protection is required at the expense of discrimination	BR = as pattern B but the button head is attached via a 1/4 UNF thread to allow use of an extension rod.	75, 80, 100
	S = Solid links rated at 100A are also available in both button head and universal versions for fitting into expulsion fuse carriers where required. These can be ordered in a similar way using the abbreviation S, e.g. 15SB, etc	See outline drawings opposite page for reference	

Thus a typical ordering reference for a 15kV NEMA Type K, button head 30A fuse link would be 15KB30 expulsion fuse link.

The fuse link assembly for a given range is standard to all rated voltages. The exception is that the tail length is varied to suit the dimensions of expulsion carrier of different ratings.

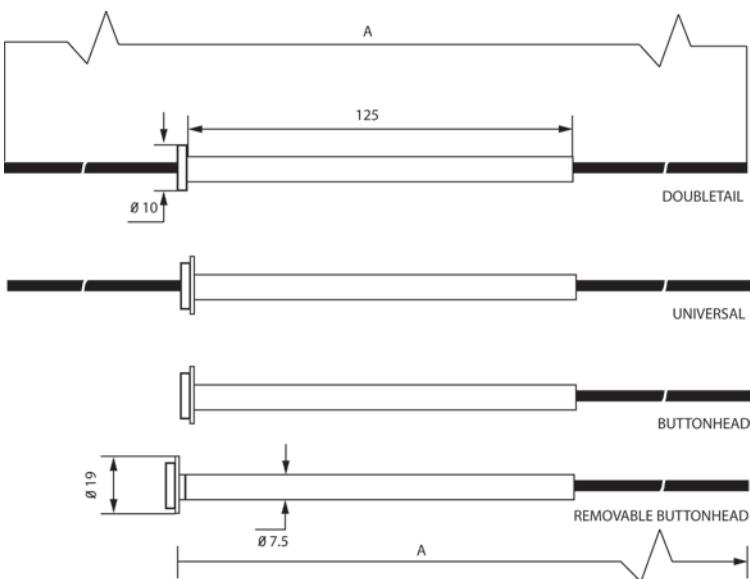

Expulsion fuse links for use in high voltage distribution cut-outs

Dimensions - mm (in)

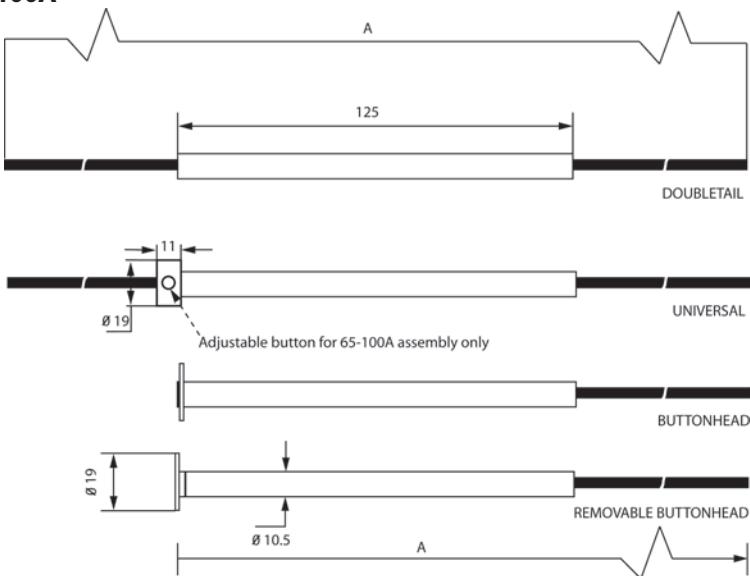

Type kV	A
15kV	533 (21")
25kV	660 (26")
46kV	787 (31")
72kV	1016 (40")

Notes: Type BR is similar to button head shown, except that the button head is attached via a $\frac{1}{4}$ UNF thread.
Tails can be cut to any length.

1-50A

60-100A

EEI-NEMA Type K and T — Type H and N

FL: Type H and EEI-NEMA Type K and T fuses

Specifications

Description: Medium voltage fuses: Type H (high surge), EEI-NEMA Type K (fast-acting), EEI-NEMA Type T (slow-acting).

Ratings:

Amps: — 1-200A
(See catalog numbers tables)

Features and benefits

- Wide range of EEI-NEMA type fuse links for use in open fuse cutouts
- Voltage ratings up to 27kV.
- Can be coordinated with other overcurrent protective devices for sectionalizing to isolate feeder branches.

Typical applications

- Medium voltage fused cutouts

High-surge Type H fuses

High-surge, Type H fuses are manufactured in ratings of 1, 2, 3, 5, and 8A. They have been developed principally for primary fusing of small-sized transformers. Type H links are manufactured in the universal buttonhead design.

Type N fuses

Type N fuses conform to previous NEMA standards and have been superseded by Type K and T links. Type N fuses are manufactured in the universal button design in ratings of 5 through 200A for use in NEMA standard dimensioned cutouts rated through 27kV.

High speed
fuses

Rated voltage

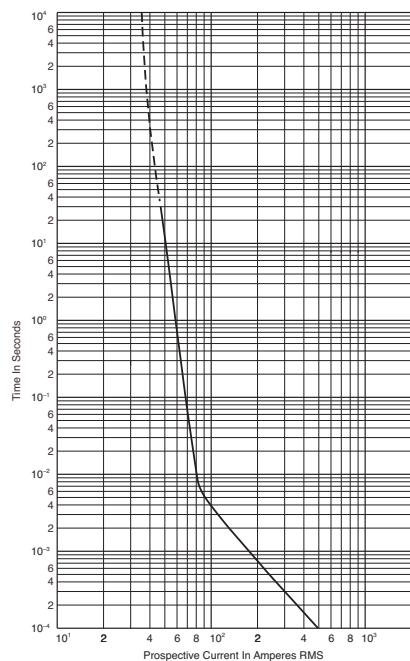

The AC voltage rating of Eaton fuses is given in volts rms. Fuses tested to IEC are tested at 5% above their rated voltage. British Style BS 88 fuses are tested at 10% above its rated voltage. UL recognition tests are performed at the rated voltage.

Rated current

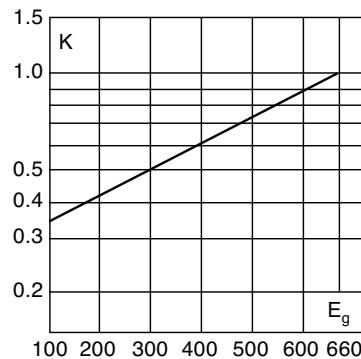

Rated current is given in amps rms. Eaton fuses can continuously carry the rated current.

Melting characteristic

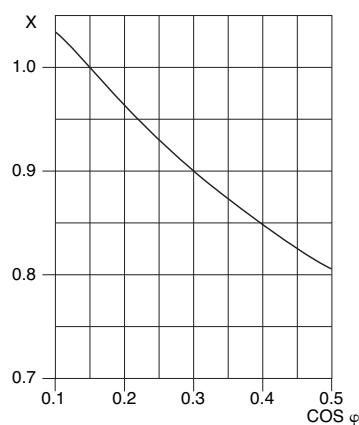

The melting characteristic shows the virtual melting time in seconds as a function of the prospective current in amps rms. The fuses are specially constructed for short-circuit protection against high level fault currents. Loading and operation of the fuse in the non-continuous/dashed section of the melt curve must be avoided. The curve can also be read as the real melting time as a function of the RMS value of the pre-arc current.

**Clearing integrals**

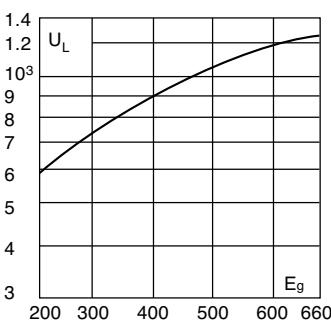

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

**Power factor**

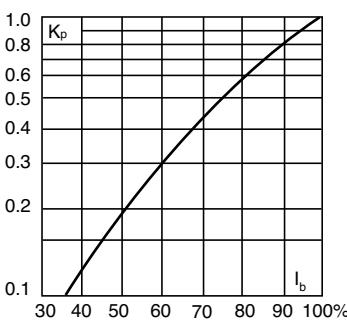

For other power factor values, the total clearing integral can be calculated as a multiple of the clearing integrals, the correction factor K and the correction factor X.

**Arc voltage**

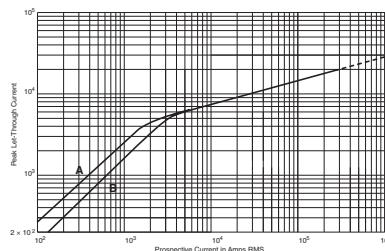

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

**Power losses**

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

**Cut-off current**

A fuse operation relating to short-circuits only. When a fuse operates in its current-limiting range, it will clear a short-

circuit in less than $\frac{1}{2}$ cycle. Also, it will limit the instantaneous peak let-through current to a value substantially less than

that obtainable in the same circuit if that fuse were replaced with a solid conductor of equal impedance.

A asymmetrical current

B symmetrical current

Parallel connection

When fuses are connected in parallel it is recommended that the applied voltage does not exceed $0.9 U_N$ (the rated voltage of the fuse). This is due to the fact that the energy released within the fuses may be unevenly shared between the parallel connected barrels.

When fuses are connected in parallel, one must take into account that the current sharing is not necessarily equal. And it must be checked, that the maximum load current is not exceeded.

Series connection

Fuses in series may not equally divide the applied voltage. It is recommended that series connected fuses should only be operated at fault currents that yield melting times less than 10 ms and a recovery voltage per fuse of less than or equal to $0.9 U_N$ (the rated voltage of the fuse).

Mounting guidance

The recommendations below have to be followed when mounting a Bussmann series fuse with end plate threaded holes.

1. Screw in studs: 5 N·m Max, 3 N·m Min

2. Attachment of the fuse to bussbar by means of nut and washer:

Thread configuration	Torque (N·m)* max	Torque (N·m)* min
$\frac{5}{16}'' - 18, M8$	25	20
$\frac{3}{8}'' - 16, M10$	45	40
$\frac{3}{8}'' - 24$	45	40
$\frac{1}{2}'' - 13, M12$	65	50
$\frac{1}{2}'' - 20$	65	50

*1 N·m = 0.7375 lb·ft

Overloads

The design of Eaton fuses is such that they can be operated under rather severe operating conditions imposed by overloads (any load current in excess of the maximum permissible load current).

In applications, there will be a maximum overload current, I_{max} , which can be imposed on the fuse with a corresponding duration and frequency of occurrence.

Time durations fall into two categories:

1. Overloads longer than one second

2. Overloads less than one second termed "impulse" loads.

The following table gives general application guidelines which, in the expression $I_{max} < (\% \text{ factor}) \times I_t$. I_t is the

melting current corresponding to the time "t" of the overload duration as read from the time-current curve of the fuse. The guidelines in the table below determine the acceptability of the selected fuses for a given I_{max} :

Frequency of Occurrence	Overloads (> 1 sec)	Impulse Loads (< 1 sec)
Less than once per month	$I_{max} < 80\% \times I_t$	$I_{max} < 70\% \times I_t$
Less than twice per week	$I_{max} < 70\% \times I_t$	$I_{max} < 60\% \times I_t$
Several times per day	$I_{max} < 60\% \times I_t$	—

When impulse loads are an intrinsic/normal parameter of the load current either as single pulse or in trains of pulses or when their level is higher than the melting current at 0.01 seconds (per time-current curve), contact Eaton for application assistance.

In addition to the parameters set forth in the preceding table, the RMS value of the load current as calculated for any period of 10 minutes or more should not exceed the maximum permissible load current.

Furthermore, it is important that a fuse should not be applied in the non-continuous/dashed portion of the associated time-current curve.

Any time-current combination point which falls in the non-continuous/dashed portion of the time-current curve is beyond the capability of the fuse to operate properly.

DC operation

Depending upon the short-circuit time constant and the magnitude of the prospective short-circuit current, the dc voltage at which a fuse can be applied may be less than its ac rating. Long time constants require a lower dc voltage. Conversely, however, higher available prospective short-circuit currents result in faster fuse openings and thus permit a fuse to be operated at a higher DC voltage.

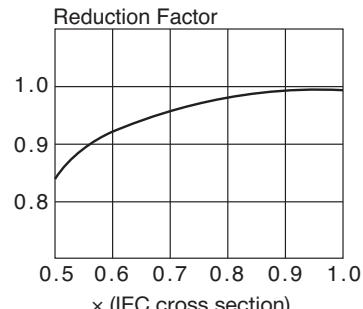

Consult Eaton for additional information and application assistance when fuses have to operate under DC conditions.

Load current versus conductor cross section

Reduction of permissible load current when the conductor cross section is less than that given in IEC Publication 269-1 and 4 valid for Bussmann series high speed fuses.

Application assistance

If you have application problems or need a fuse outside our standard program, please contact the nearest Eaton representative.

General information

Eaton offers a complete range of North American blade and flush-end style fuses and accessories. Their design and construction were optimized to provide:

- Low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability
- Low arc voltage
- Excellent DC performance

North American style fuses provide an excellent solution for medium power applications. While there are currently no published standards for these fuses, the industry has standardized on mounting centers that accept Bussmann series fuses.

Voltage rating

All Eaton North American style fuses are tested at their rated voltage. Eaton should be consulted for applications exceeding those values.

Accessories

External and internal open fuse indication is available for selected portions of the North American line. Fuse blocks are available for most applications.

DFJ Class J**Specifications**

Description: High speed, current-limiting fuse. The Bussmann series DFJ drive fuse will provide maximum protection for AC and DC drives and controllers and meet NEC® branch circuit protection requirements. The drive fuse has the lowest I^2t of any branch circuit fuse to protect power semiconductor devices that utilize diodes, GTOs, SCRs and SSRs.

Dimensions: See page 1-5 for Class J dimensions.

Construction: Melamine tube with silver fuse element.

Ratings:

Volts — 600Vac (or less), 450Vdc (or less, 15-600A)

Amps — 1-600A

IR — 200kA RMS Sym., 100kA DC

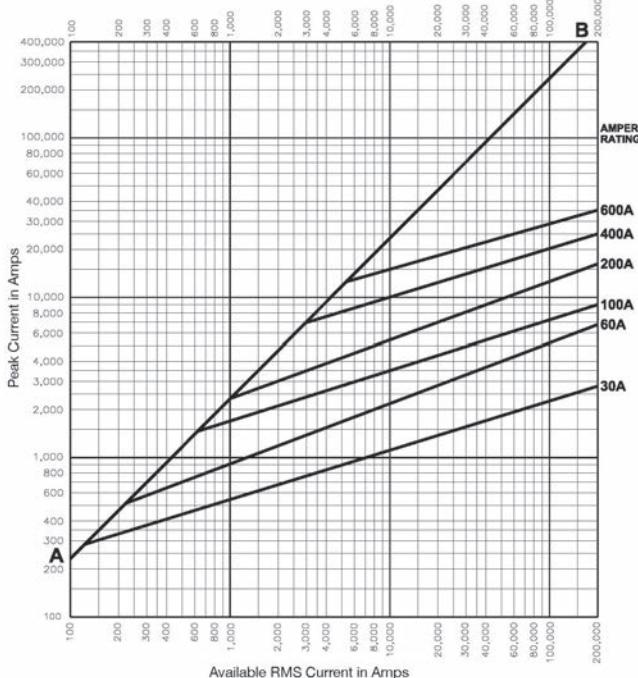

Agency information: CE, UL Listed, Std. 248-8, Class J, Guide JDDZ, File E4273, CSA Certified, Class 1422-02, File 53787.

Features and benefits

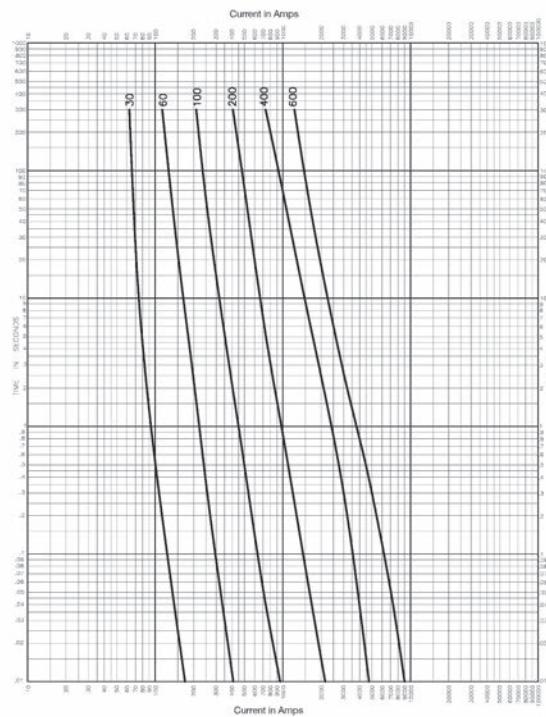

- Easily coordinated with existing and new variable speed drives and electric controllers.
- Standard Class J dimensions allowing the use of readily available fuse blocks, holders, and switches.
- Allows the lowest let-thru energy of any branch circuit overcurrent protective device.

Typical applications

- Protection of AC and DC drives
- Equipment using power semiconductor devices

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

**Power losses**

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

Fuse bases (blocks)

Modular style

Eaton offers a comprehensive line of fuse bases that provide the user with design and manufacturing flexibility. Two identical half bases make up a Bussmann series modular fuse base. These "split" units can be panel mounted any distance apart to accommodate any length fuse.

Stud Type (not sold in pairs)

The simpler design is the C5268 modular fuse base. With this design, the fuse terminal and cable (with termination) are mounted on the same stud, minimizing labor needed for installation. The stud type base is available in the configuration shown in the table below.

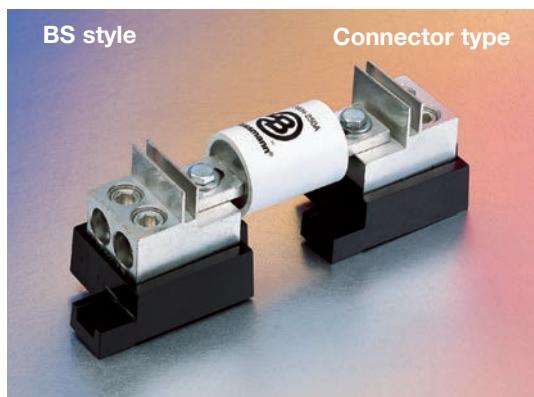

Catalog number	Max fuse amp rating	Stud height (in)	Stud dia. & threads
C5268-1	200	1.00	5/16"-18
C5268-2	200	1.75	5/16"-18
C5268-3	200	0.75	5/16"-18
C5268-4	100	1.00	1/4"-20
C5268-5	100	1.75	1/4"-20

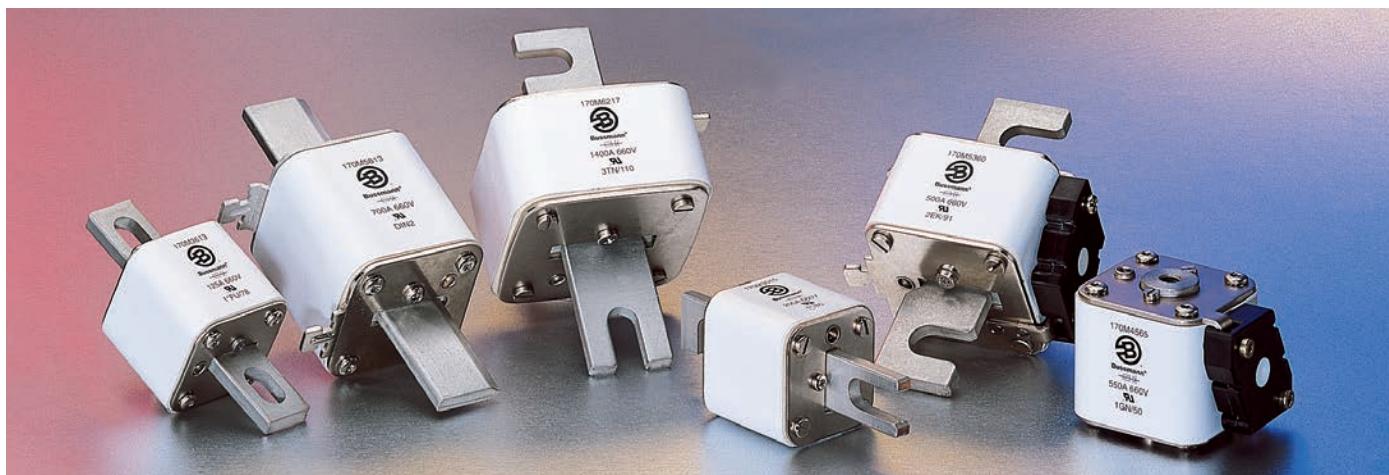

Connector type

Eaton also offers a modular style fuse base that utilizes a tin-plated connector (for wire termination and heat dissipation) and a plated-steel stud (for fuse mounting). The connector type fuse base is available in the configurations shown below. Consult Eaton for additional product details.

General information

Designed and tested to:

- IEC 60269: Part 4
- UL Recognized

Eaton offers a complete range of square body style fuses and accessories. Their unique design and construction provide:

- Minimal energy let-through (I^2t)
- Low operating temperature
- Low watts loss

Square body style fuses are a very attractive solution for high power applications which require a compact design with superior performance. The construction and design of square body style fuses make it easy for Eaton to manufacture custom products. Our cataloged offering provides only a sample of the wide variety of product which is available.

Each square body style fuse is available with a number of different end fittings. Options include:

- DIN 43 653
- DIN 43 620
- Flush End (Metric/US)
- French Style
- US Style

Voltage rating

All Bussmann series square body style fuses are tested to IEC 60269: Part 4. This standard requires a test voltage which is 5% higher than the rated voltage. In North America, fuses are required to clear only their rated voltage.

Accessories

Square body style fuses are available with three different open fuse indicator systems. Options include visual indication and indication utilizing a microswitch. Fuse blocks are also available for most applications.

High speed fuses

Square body applications

Maximum permissible load current

The rated current value of Bussmann series fuses is based on the ambient temperature in the space immediately below the fuse of 20°C. The following graph gives correction factors (k) for a range of temperatures (-40°C to +80°C). Maximum permissible continuous load currents can be calculated by applying the following formula:

$$I_b \leq I_n \approx k \approx (1 + 0.05 V) \times K_b$$

where

I_b = Maximum permissible continuous load current

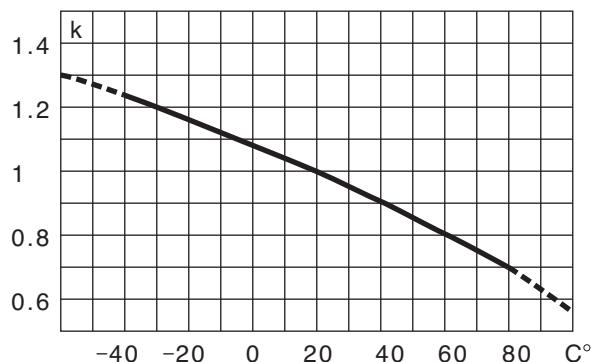

I_n = Rated current of fuse

k = Temperature correction factor

v = Velocity of cooling air in m/s (max. 5 m/s).

K_b = Fuse load constant 1.0

Temperature Correction Curve

The maximum permissible continuous load current I_b of a fuse can be checked empirically (i.e., by satisfying the formula below) by making simple voltage and temperature measurements under actual operating conditions after the fuse has been installed in its operating location and loaded at the calculated I_b value:

$$\frac{E_2}{E_1} \approx (0.92 + 0.004t) \leq N$$

where

E_1 = Voltage drop across fuse after 5 seconds

E_2 = Voltage drop across fuse after 2 hours

t = Air temperature at start of test (°C)

N = Constant

Fuse Rated Voltage (IEC)	N
690	1.5
1250	1.6

Body cross section

Standard fuse program includes barrels with different cross sections.

Size	000	00	1	1	2	3	4
Maximum cross-section (mm)	21 × 36	30 × 47	45 × 45	53 × 53	61 × 61	76 × 76	105 × 105

Example application of square body high speed fuses subject to overload and impulse loading

Select a short-blade indicating fuse with indicator/adapter to permit the use of a single-pole microswitch for remote indication and determine if the fuse selected will meet the following application parameters.

Application parameters

Load currents expected

Load type	Duration	Frequency of occurrence	Amps
(1) Normal	Continuous	—	300A
(2) Overload	60 Seconds	Once per hour	500A
(3a)	10 Seconds	2-3 times per week	
(3b)	20 Seconds (max.)	Once per month	700A
(4) Impulse	0.5 Seconds	Less than once per month	1100A

Voltage data

(5) voltage applied to fuse during fault conditions (+10%)	400V
---	------

Temperature data

(6) Temperature inside cubicle in which fuse is located (natural convection cooling only)	60°C
---	------

Thyrister data

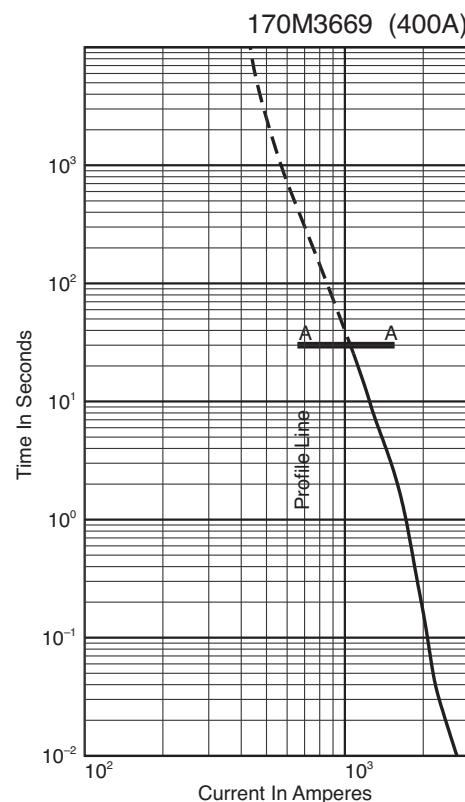

(7) Thyrister peak voltage withstand	1000V
(8) Thyrister I^2t withstand at 10 milliseconds*	90,000A s

*Note: The I^2t withstand of the thyristor may be given for other impulse durations (i.e., 1.5 ms, 3.5 ms, or 8.3 ms); however, the stated fuse I^2t is valid for all impulse durations of 10 ms or less.

Application procedure

Step	Procedure	Remarks
(1) Select a short-blade fuse to permit mounting of microswitch 170H0069	1.1 Taking into consideration only the continuous load current and ambient temperature, from Table on page 127 tentatively select fuse 170M3669 400A, 690V.	—
(2) Determine I^2t (total clearing) at 440V.	2.1 See table, page 127. Note I^2t is 105,000A s at rated voltage of 690V. 2.2 From the figure on page 126, note that correction factor K = 0.65. 2.3 $I^2t_{660V} \times K = I^2t_{440V}$ $105,000 \times 0.65 = 68,250$	OK
(3) Determine maximum arc voltage at 440V	3.1 From the figure on page 126, note that maximum voltage at 440V is 900V	OK
(4) Determine maximum permissible continuous load current I_b	4.1 Per page 115 data, $I_b = I_n \times k \times (1 + 0.05V) \times K_b$ $I_b = 400A \times 0.8 \times (1 + 0) \times 1$ $I_b = 320A$	—
(5) Plot a "line profile" showing the expected load and overload currents. Determine that overload and impulse load currents do not exceed their maximum permissible values.	5.0 Calculate I_{max} per Table, High Speed Fuse Application Guide page 16, for each overload and impulse load.	—
(Item 2)	5.1 $I_{max} < 60\% \times I_t$ 500A < 60% \times 950A 500A < 570A	OK
(Item 3a)	5.2 $I_{max} < 60\% \times I_t$ 700A < 60% \times 1360A 700A < 780A	OK
(Item 3b)	5.3 $I_{max} < 70\% \times I_t$ 700A < 70% \times 1150A 700A < 805A	OK
(Item 4)	5.4 $I_{max} < 70\% \times I_t$ 1100A < 70% \times 1800A 1100A < 1260A	OK

The tentatively selected fuse 170M3669 with microswitch 170H0069 meets all application parameters; no further selection would be necessary.

Calculation of watt loss

From the table on page F-35, watt loss at 400 amps is 60 watts. The continuous load current of 300A is 75% of rated current (400A). From page F-34, the correction factor $K_p = 0.5$.

$$\begin{aligned}\text{Watt Loss } 75\% &= \text{Watt Loss } 100\% \times K_p \\ &= 60W \times 0.5 \\ &= 30 \text{ watts}\end{aligned}$$

Special fuses

Other high speed fuses are available from Eaton with voltage ratings of 380 to 10,000V and current ratings up to 10,000A in a single unit configuration. Fuses can be supplied with open fuse, "pin" indicators. Various types of microswitches are also available (see page 6-92).

High speed fuses

Square body DIN 43 653

690V/700V (IEC/UL) 10-400A

Specifications

Description: Square body DIN 43 653 stud mount high speed fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 690Vac (IEC)
— 700Vac (UL)

Amps: — 10-400A

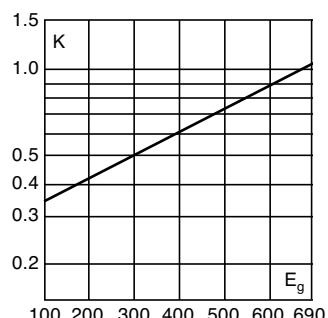

IR: — 200kA RMS Sym.

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2, CSA Certified: Class 53787, File 1422-30 on Size 000.

Electrical characteristics

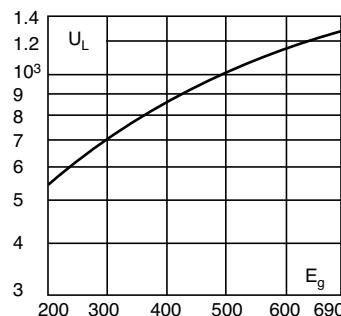

Total clearing I^2t

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

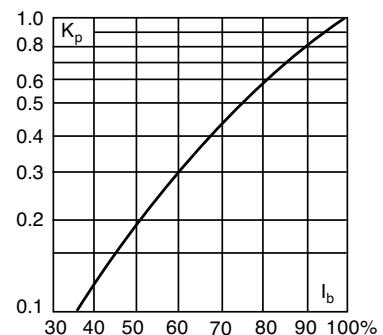

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

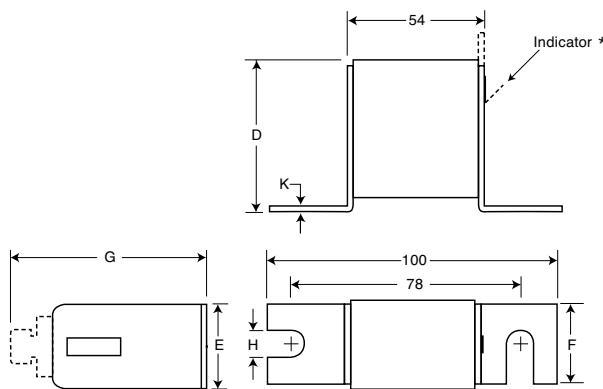

Dimensions - mm

Type -U/80, -/80, -TN/80

Size	D	E	F	G	H	K
00	40	21	20	51	8	2
00	51	30	28	67	10	2

1mm = 0.0394" / 1" = 25.4mm

Features and benefits

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC Common bus
- DC Drives
- Power converters/rectifiers

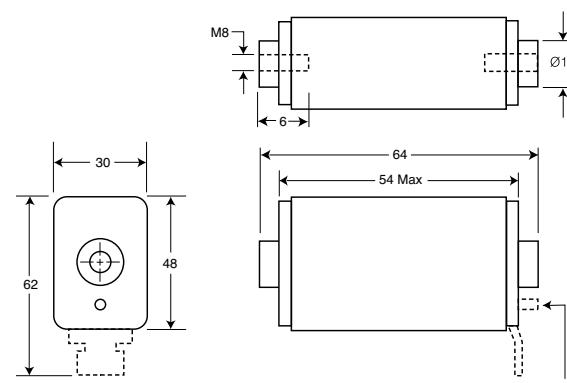

For other voltage ratings in this body style

- See page 6-53 (1000V)

690V (IEC/UL) 10-315A**Specifications**

Description: Square body DIN 43 620 blade style high speed fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 690Vac

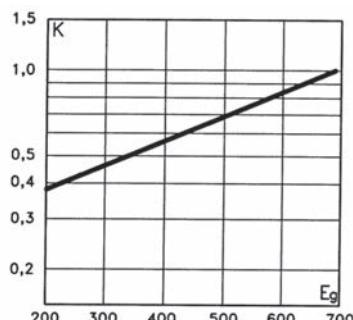

Amps: — 10-315A

IR: — 200kA RMS Sym.

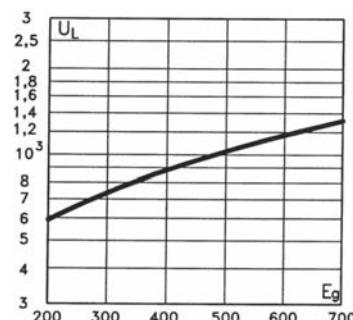

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2, and CSA Component Acceptance file Class 1422-30, (53787)

Electrical characteristics**Total clearing I^2t**

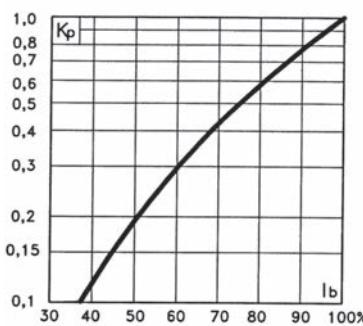

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

**Arc voltage**

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

**Power losses**

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

**Features and benefits**

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

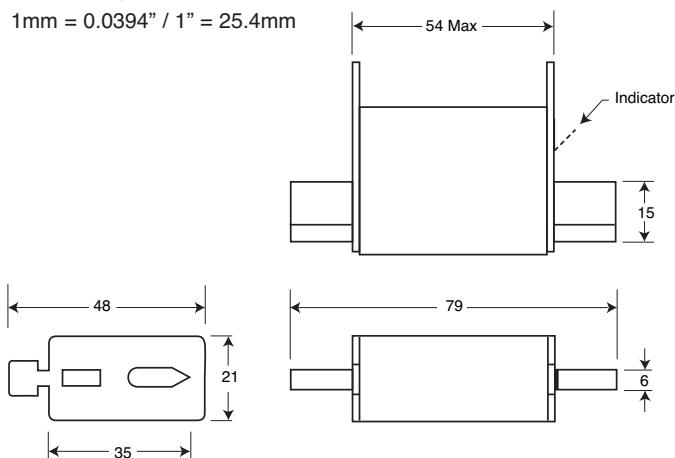

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

Rated current

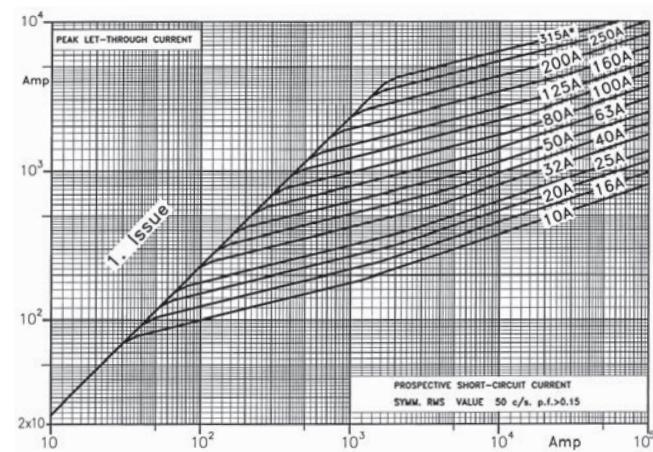

The rated current of this fuse range has been given with copper conductors that have a current density of 1.3A/mm² (IEC 60269-4). For conductor cross section according to IEC 60269-1, the fuses with a rated current higher than 125A must be derated. Please contact Eaton for application assistance.

†Rated voltage (IEC) 600V.

‡Rated voltage (IEC) 550V.

• Watts loss provided at rated current.

• Microswitch indicator ordered separately. See accessories on pages 6-92 and 6-93.

• For fuse curves see pages 6-38 and 6-39.

High speed fuses

Square body flush end contact

690V/700V (IEC/UL) 40-2000A

Specifications

Description: Square body flush end contact high speed fuses.

Dimensions: See dimensions illustrations.

Ratings:

- Volts: — 690Vac (IEC)
- 700Vac (UL)

Amps: — 40-2000A

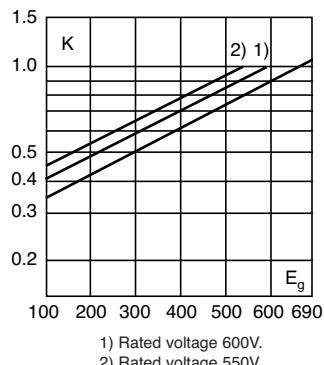

IR: — 200kA RMS Sym.

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2, CSA Certified: Class 53787, File 1422-30.

Electrical characteristics

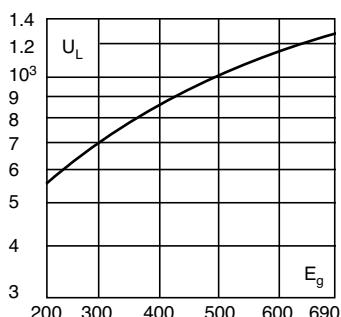

Total clearing I^2t

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

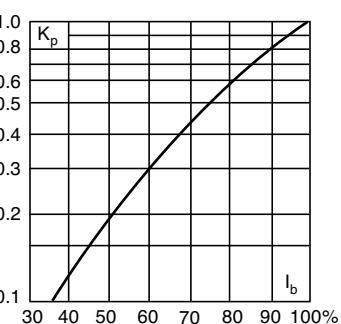

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

Features and benefits

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

For other voltage ratings in this body style

- See pages 6-56 (1000V) and 6-69 (1250V/1300V)

Dimensions - mm

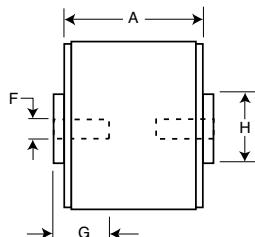

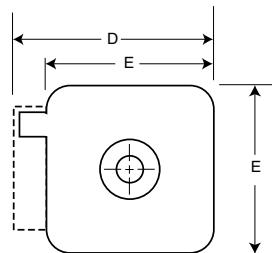

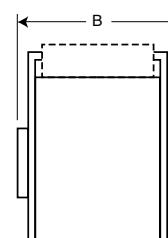

Type -B/-, -BKN/-, -G/-, -GKN/-

High speed fuses

Square body French style

690V/700V (IEC/UL) 40-1500A

Specifications

Description: Square body French style high speed fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 690Vac (IEC)
— 700Vac (UL)

Amps: — 40-1500A

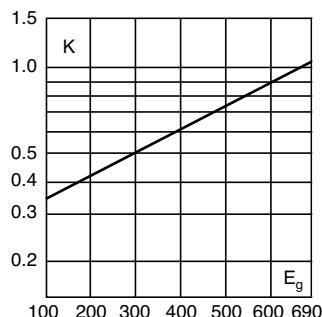

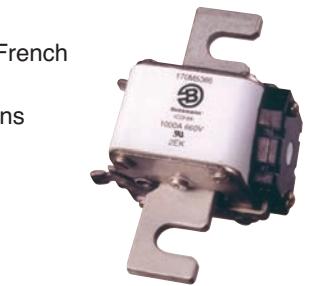

IR: — 200kA RMS Sym.

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2 and CSA Component Acceptance file Class 1422-30, (53787) on Sizes (1, 2, 3) only

Electrical characteristics

Total clearing I^2t

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

Dimensions - mm

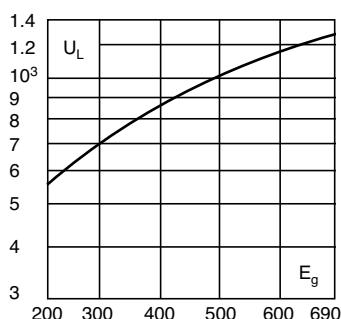

Type -E/-, -EKN/-

Size	A	B	C	D	E	H	I	J
1*	50	102	76	59	45	18	9	13
1	50	111	86	69	53	25	11	11

3	51	126	91	92	76	36	13	13

1mm = 0.0394" / 1" = 25.4mm

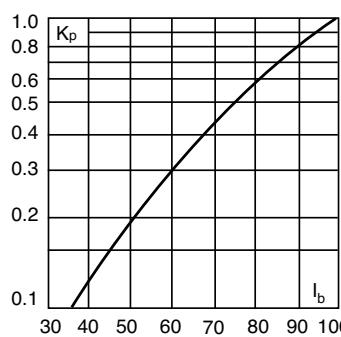

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

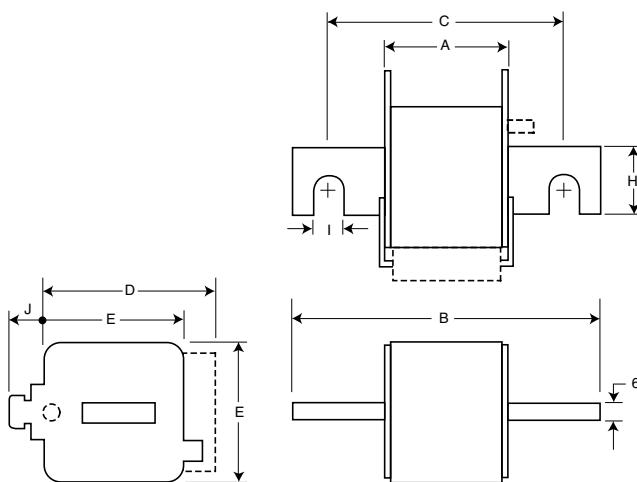

Features and benefits

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

† Not CSA rated.

• Watts loss provided at rated current.

• Microswitch indicator ordered separately. See accessories on pages 6-92 and 6-93.

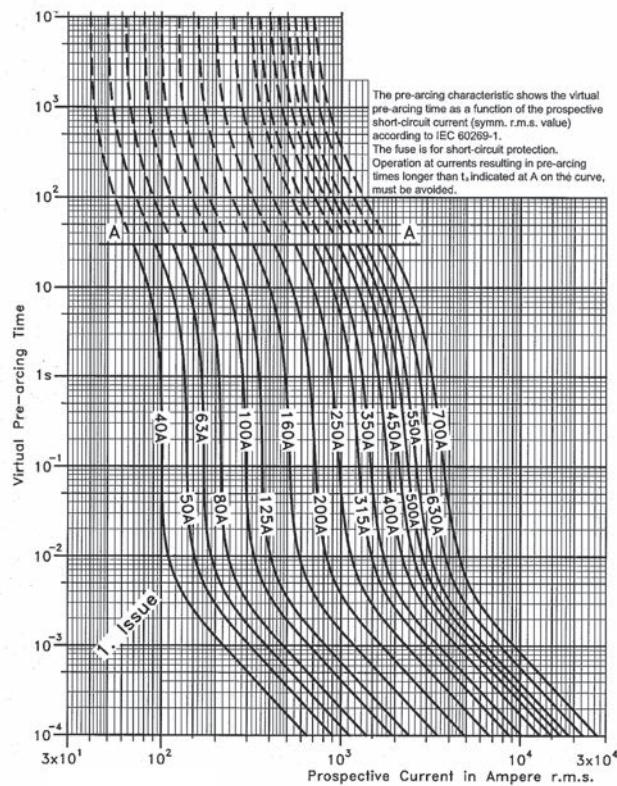

• For fuse curves see page 6-42.

Rated current

The rated current of this fuse range has been given with copper conductors that have a current density of 1.3A/mm² (IEC 60269-4). For conductor cross section according to IEC 60269-1, the fuses must be derated. Please contact Bussmann for application assistance.

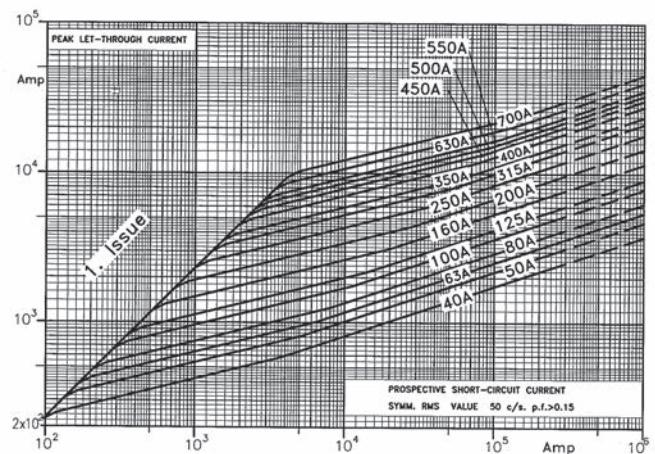

Size 1* — 40-630A: 690V

Time-current curve

The pre-arc time characteristic shows the virtual pre-arc time as a function of the prospective short-circuit current (symm., r.m.s. value) according to IEC 60269-1.
The fuse is for short-circuit protection.
Operation at currents resulting in pre-arc times longer than t₁ indicated at A on the curve, must be avoided.

• Liquid cool. = Liquid cooling. Temperature on the terminals not to exceed 60°C.

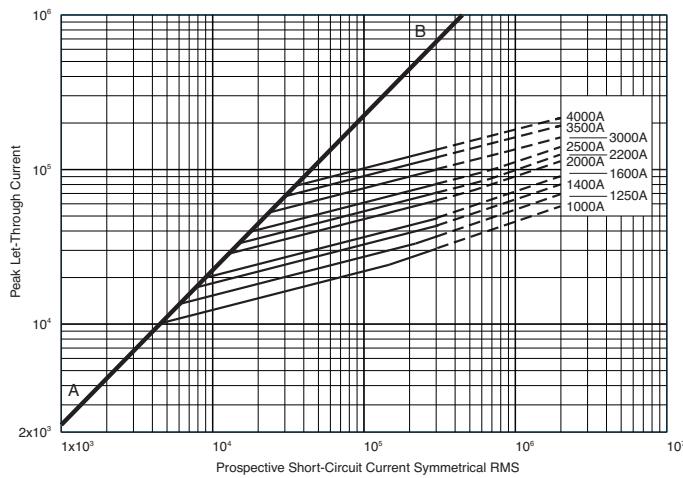

• Microswitch indicator ordered separately. See accessories on pages 6-92 and 6-93.

Size 4 — 1000-4000A: 690V

Time-current curve

Peak let-through curve

4000A fuse is derated to 500V (IEC).

Data Sheet: 17056328

High speed fuses

Square body flush end contact size 23, 24

660V (IEC) 1000-7500A

Specifications

Description: High speed square body fuses, for the protection of the power rectifier section of the equipment.

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 660Vac

Amps: — 1000-4000A

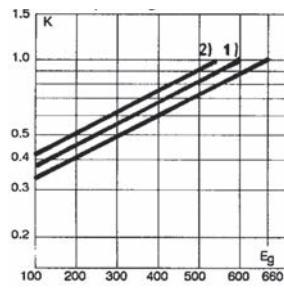

IR: — 300kA RMS Sym.

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2.

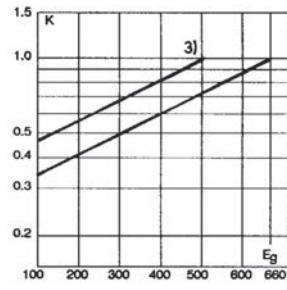

Electrical characteristics

Total clearing I^2t

Size 23

Size 24

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

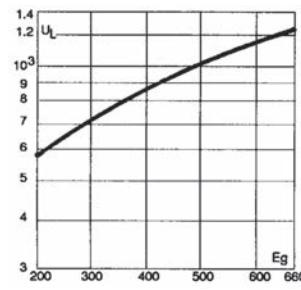

Features and benefits

- Low watts loss
- Superior cycling capability

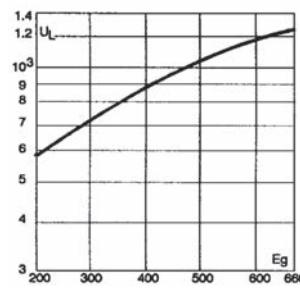

Typical applications

- Power converters/rectifiers
- Reduced voltage starters

Arc voltage

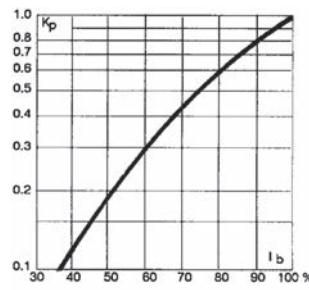

Size 23

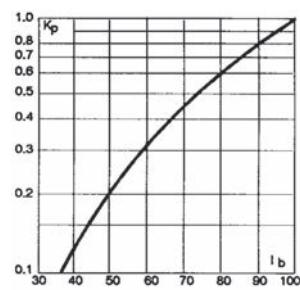

Size 24

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage E_g , (rms) at a power factor of 15%.

Power losses

Size 23

Size 24

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

For other voltage ratings in this body style

- See pages 6-65 (1000V) and 6-78 (1250V)

High speed fuses

Square body DIN 43 620, Class gR — full range fuses

690V (IEC) 10-800A

Specifications

Description: Square body DIN 43 620 blade style high speed fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 690Vac (IEC)

Amps: — 10-800A

IR: — 300kA RMS Sym.

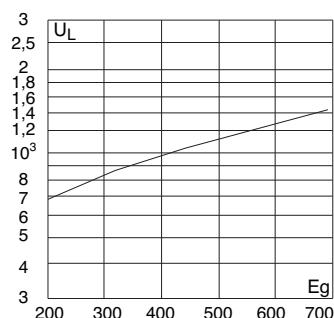

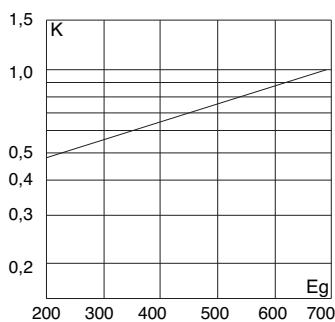

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2.

Electrical characteristics

Total clearing I^2t

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

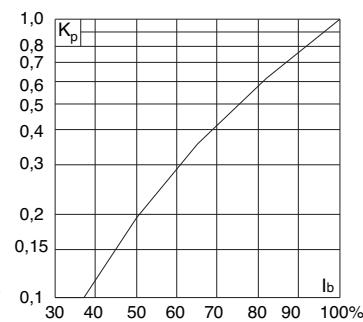

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage E_g , (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

Features and benefits

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

• For fuse curves see pages 6-60 and 6-61.

High speed fuses

Square body flush end contact

1000V (IEC) 50-1400A

Specifications

Description: Square body flush end contact high speed fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 1000Vac.

Amps: — 50-1400A

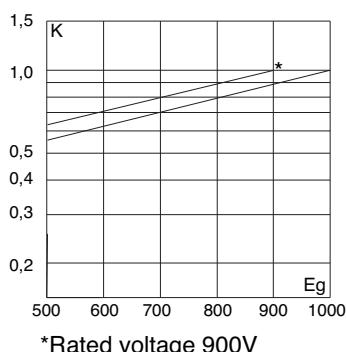

IR: — 150kA (Est. 300kA) RMS Sym.

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2.

Electrical characteristics

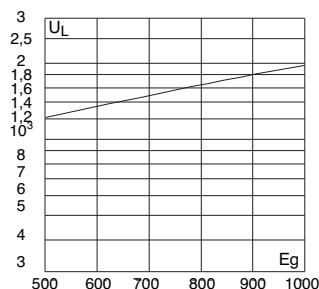

Total clearing I^2t

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

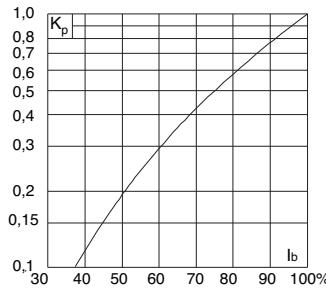

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage E_g , (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

Features and benefits

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

For other voltage ratings in this body style

- See pages 6-32 (690V/700V) and 6-69 (1250V/1300V)

2000-3500A

4200-5000A

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

Features and benefits

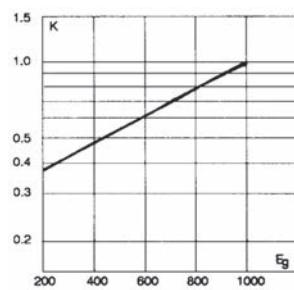

- Low watts loss
- Superior cycling capability

Typical applications

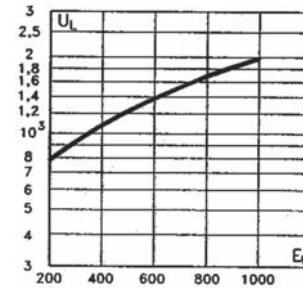

- Power converters/rectifiers
- Reduced voltage starters

Arc voltage

2000-3500A

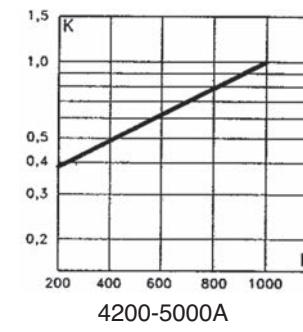

4200-5000A

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage E_g , (rms) at a power factor of 15%.

2000-3500A

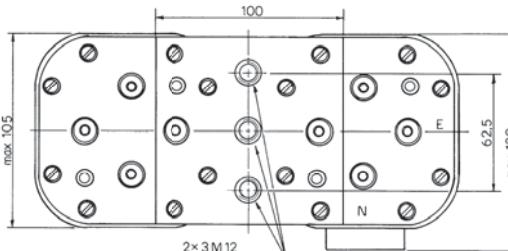

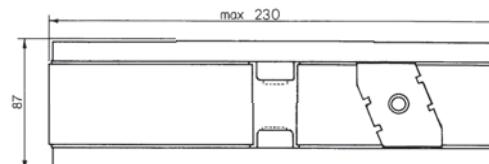

4200-5000A

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

High speed fuses

6

Square body US style

1250V/1300V (IEC/UL) 50-1400A

Specifications

Description: Square body US style high speed fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 1250Vac (IEC)
— 1300Vac (UL)

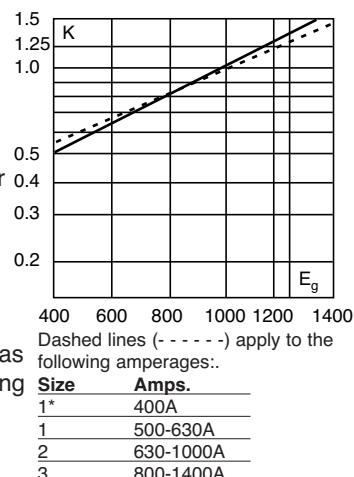

Amps: — 50-1400A

IR: — 100kA RMS Sym.

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2, CSA Certified: Class 53787, File 1422-30.

Electrical characteristics

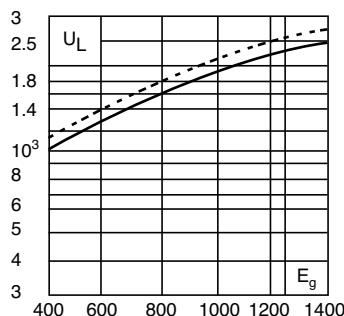

Total clearing I²t

The total clearing I²t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I²t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g, (rms).

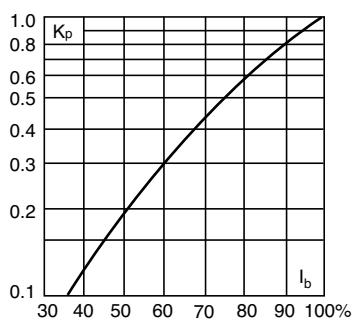

Arc voltage

This curve gives the peak arc voltage, U_L, which may appear across the fuse during its operation as a function of the applied working voltage, E_g, (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_P, is given as a function of the RMS load current, I_b, in % of the rated current.

Features and benefits

- Excellent DC performance
- Low arc voltage and low energy let-through (I²t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

For other voltage ratings in this body style

• See pages 6-33 (690V/700V) and 6-58 (1000V)

1250V (IEC) 1400-2500A**Specifications**

Description: High speed square body fuses, for the protection of the power rectifier section of the equipment.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 1250Vac (IEC)

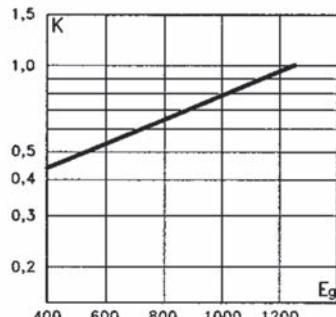

Amps: — 1400-2500A

IR: — 125kA RMS Sym.

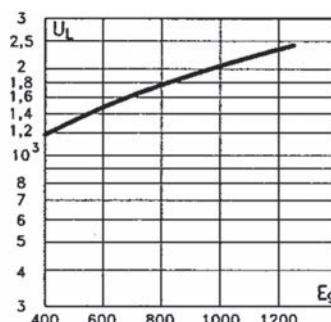

Agency information: CE, Designed and tested to IEC 60269: Part 4. UL Recognized E125085.JFHR2. CSA Certified E125085.JFHR2.

Electrical characteristics**Total clearing I^2t**

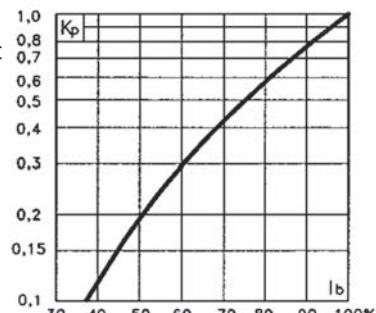

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

**Arc voltage**

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage E_g , (rms) at a power factor of 15%.

**Power losses**

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

**Features and benefits**

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

For other voltage ratings in this body style

Electrical characteristics

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage E_g .

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

Features and benefits

- Excellent DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss
- Superior cycling capability

Typical applications

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

Indicator systems

Typower ZILOX fuses are available with three different indicator systems.

1. Visual indicator

The indicator situated in one cover plate is clearly visible as soon as the fuse has operated. The minimum voltage for operating the indicator is 20V.

2. Type T indicator

The indicator is situated on one cover plate with a cover plate tag to accommodate an auxiliary switch. The minimum voltage for operating the indicator is 20V. A special low voltage indicator (1.5V) is available on request.

3. Type K indicator

This indicator is situated on the fuse body. It is covered by an adapter for snap-on mounting of an auxiliary switch. The operating voltage of the indicator is 1.5V. As a matter of safety, the factory mounted adapter must not be removed from the fuse.

Microswitch

The Typower ZILOX fuses with either type T indicator or type K indicator can be equipped with a microswitch for remote electrical indication of fuse operations. All microswitches have one normally open and one normally closed contact. Ratings are 2A, 250Vac.

High speed fuses

Square body fuse accessories

Fuse bases (blocks)

DIN 43 653 fuse bases

For the Typower ZILOX fuses according to DIN 43 653, the following fuse bases are available:

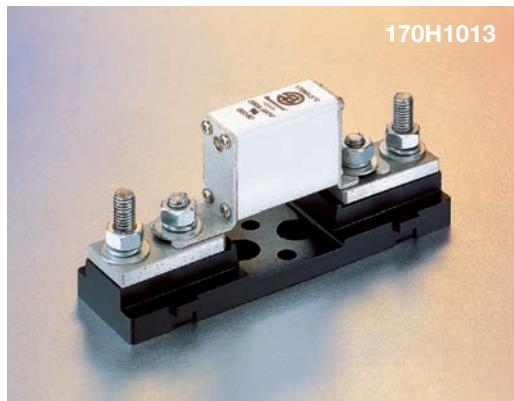

Catalog number	Max volts	Amp rating	Center distance
170H3003	1000	630	80mm
170H3004	1000	1250	80mm
170H3005	1400	630	110mm
170H3006	1400	1250	110mm

The fuse bases rated 1250A can also be used for the fuses with higher rated current if the maximum load current is derated according to the table below:

Fuse amp rating	Max amp load in fuse base
1400	1325
1500	1400
1600	1500
1800	1650
2000	1800

Fixed center base style	Max volts	Max. fuse amp rating	Fuse size
170H1007	1000	400	00, 000
170H1013	660	200	0000,000

UL Recognized to UL 512.

Universal fuse bases

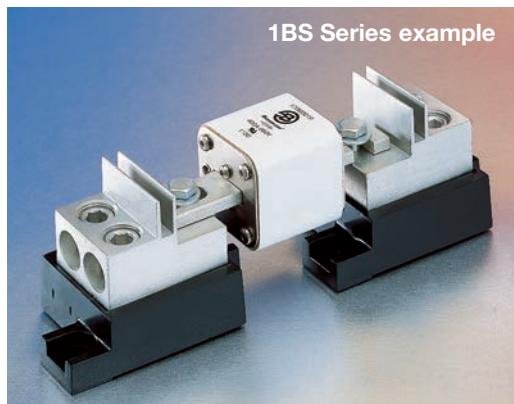

For the Typower ZILOX fuses according to DIN 43 653, French style and North American style, the following fuse bases are available:

Modular base style	Max volts	Max. fuse amp rating	Data Sheet
1BS101	600	100	1206
1BS102	600	400	1207
1BS103	600	400	1208
1BS104	600	600	1209
BH-0xxx	700	100	1200
BH-1xxx	2500	400	1201
BH-2xxx	5000	400	1202
BH-3xxx	1250	700	1203

Modular fuse bases are UL Recognized to UL 512 and meet the spacing requirements of UL 347. Contact your Eaton sales representative for more complete ordering information.

General information

Designed and tested to:

- BS 88: Part 4
- IEC 269: Part 4
- UL Recognized

Eaton offers the industry's widest range of British style semiconductor fuses and accessories.

Eaton's Bussmann series British style products use innovative arc quenching techniques and high grade materials to provide:

- Minimal energy let-through (I^2t)
- Excellent DC performance
- Good surge withstand profile

British style fuses are typically found in equipment manufactured in the United Kingdom or British Commonwealth countries. However, North American manufacturers have begun to specify British style fuses — particularly in UPS applications at 240V or less — to take advantage of their size, performance and cost benefits.

Voltage rating

All Bussmann series British style fuses are tested to IEC 269: Part 4. This standard requires a test voltage which is 5% higher than the rated voltage. In North America, fuses are required to clear only their rated voltage.

Accessories

Trip-indicator fuses are available for use in parallel with the main fuse. Indicator fuses can be attached to the associated fuselink, or mounted separately in panel-mounted fuseclips. In addition, a push-on adapter and microswitch attachment are available, to provide remote indication. Fuse blocks are also available for most applications.

LCT, LET, LMT, LMMT – 240V: 6-900A**Specifications**

Description: BS 88 style stud-mount fuses.

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 240Vac/150Vdc

Amps: — 6-900A

IR: — 200kA RMS Sym.

Agency information: CE, Designed and tested to: BS 88 Part 4, IEC 269 Part 4, UL Recognized. All fuses above have been tested at 318Vac. Consult Eaton for specific UL Recognition status.

Electrical characteristics**Total clearing I^2t**

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

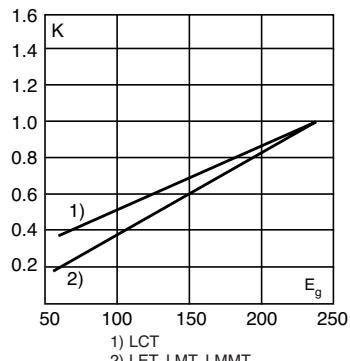

**Dimensions - mm**

Indicator system

Trip-indicators

Trip-indicators are available for use in parallel with the main fuse. They can either be attached to the associated fuse or mounted separately in panel mounted fuse clips, reference CL1. A push-on adapter and microswitch attachment is available for use with the trip indicator to give the facility of remote indication, reference MAI.

Fuse ratings of 20A and below cannot usually accommodate a trip-indicator.

When a trip-indicator is to be attached to the main fuse an accessory pack comprising a pair of mounting clips and an appropriate trip indicator would be required. The clips are snapped onto the fuse end caps and the indicator is pressed into clips as shown.

Electrical specifications

Type	TI500	TI700
Maximum RMS voltage	500	700
Maximum peak voltage	700	1000
Maximum DC voltage	130	350
Cold resistance (ohms)	0.3	0.45
Maximum permissible steady-state current	1.5A	1.5A
Interrupting capacity (RMS Symm.)	100,000	100,000
Pre-Arcing I^2t	23	23
Total I^2t (max volts)	46	46

Fuse Indicator Kits

Kit. ref.	Details	RMS volts	For use with fuse ref.
EC-250	Fuse mount	250	LET
MC250	Indicator kits (Includes one indicator and two clips)	250	LMT and LMMT
EC-600		660	FE, FEE and ET
MC600		660	FM and FMM
MC700		700	MT and MMT

Microswitch adapter – MAI

We offer a microswitch, complete with adapter for securing the indicator. The microswitch is provided with double pole, single throw contacts, having both a normally open and a normally closed position. A special material has been employed in the construction of the adapter to provide reliable operation in the range of temperatures associated with standard operating conditions and during fuse operation.

Microswitch and adapter Type MAI

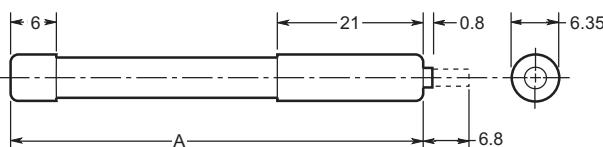

Current rating:	
AC 50/60Hz resistive load @ 250V RMS	4A
AC 50/60Hz resistive load @ 127V RMS	6A
DC, resistive load @ 110Vdc	0.7A DC
DC, resistive load @ 30Vdc	2A DC
Maximum working voltage:	
Contact-to-contact (RMS)	1000V
Contact-to-contact (RMS)	1500V
Maximum DC volts:	110Vdc

CL1 panel mount clips

CL1 panel mount fuse clips are available for mounting a trip-indicator when mounting directly on the fuse is impractical. Order part number CL1.

General information

Eaton offers a full line of ferrule style (cylindrical clip-mounted) fuses, designed and tested to meet standards and requirements in various locations around the world. Their unique design and construction provide:

- Superior cycling capability
- Low energy let-through (I^2t)

Ferrule fuses provide an excellent solution for small UPS, small AC drives and other low power applications where space is at a premium.

Voltage rating

All Bussmann series ferrule fuses — except 690V — have been tested at their rated voltage. The 690V ferrule fuse has been tested to the IEC 60269 standard, which requires clearing at the rated voltage +5%.

Accessories

Ferrule fuses may be mounted in fuseclips, fuse holders, fuse blocks or fused switches. A variety of products are available. Please consult Eaton Application Engineering to discuss your requirement.

High speed fuses

Ferrule

FWA 150V: 5-30A (10 x 38mm) 35-60A (21 X 51mm)

Specifications

Description: Ferrule style high speed fuses.

Dimensions: See dimensions illustration.

IR: — 100kA Sym.

Agency information: CE, UL Recognized JFHR2.E91958.

Electrical characteristics

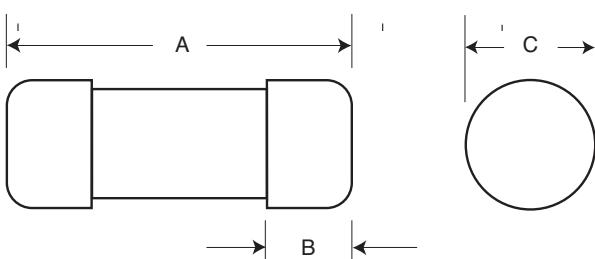

Total clearing I^2t

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

Dimensions - in (mm)

Amp range	Dimensions		
	A	B	C
5-30	1.5 (38.1)	0.375 (9.5)	0.406 (10.3)

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

Electrical characteristics

Total clearing I^2t

The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g , (rms).

Dimensions - mm (in)

Arc voltage

This curve gives the peak arc voltage, U_L , which may appear across the fuse during its operation as a function of the applied working voltage, E_g , (rms) at a power factor of 15%.

Power losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p , is given as a function of the RMS load current, I_b , in % of the rated current.

• See accessories on page 6-123.

Features and benefits

- Excellent cycling capability and DC performance
- Low arc voltage and low energy let-through (I^2t)
- Low watts loss in a compact size
- Used with finger-safe holders/blocks

Typical applications

- DC Common bus
- DC Drives
- Power converters/rectifiers
- Reduced voltage starters

Fuse holders**Specifications****Catalog Symbol:** CH**Description:** DIN-Rail mount fuse holders**Agency information:**

UL File E14853, Guide IZLT
Listed, IZLT2 Recognized
CSA: File 47235, CHPV and
CHM - Class 6225-30,
CHCC - Class 6225-01

Ratings: 600V/30A (UL)
690V/32A (IEC)

**Features and benefits**

- Finger-safe design - No exposed contacts
- DIN-Rail mount (35mm) - Fits standard mounting rails
- Optional open fuse indication lights tells fuse status at a glance
- Handle/fusepuller easily installs and removes fuses
- Available in single and multi-pole configurations
- Wire ready lugs and spade terminal connections save installation time
- CE marking
- Available up to 1000Vdc
- PLC device available for remote monitoring

Typical applications

- Switchboard panel, control consoles, small motors, transformers, and similar applications

Application data

The standard range of fuses for low voltage industrial and general purpose applications meet the requirements of BS 88 and IEC 60269. By using advanced fuse technology, current ratings up to 400A have compact dimensions, but retain standard dimensional and performance requirements. These designs are for 315/240V systems. The standard range of fuses are available from 2-1250A in the following tag forms: Offset Blade - Offset Bolted - Center Bolted.

Supplementary ranges cover applications up to 660Vac and 500Vdc including those with nonstandard tag fixings.

Bussmann series fuses are manufactured under quality systems independently assessed to BS 5750 (ISO 9002) and appropriate ratings carry the ASTA 20 endorsement.

Selecting fuses is relatively simple and effective. The following notes cover the majority of applications. For further information contact our Application Engineers toll free at: 855-287-7626 (855-BUSSMANN).

Circuit loading

The current rating of the fuse should not be less than the full load current of the circuit. The circuit should be so designed that small overloads of long duration will not be of frequent occurrence.

Cable ratings and protection

There is an increasing move away from 70°C PVC insulation to materials that are more environmentally friendly, for example 90°C XLPE. The ratings of fusegear, switches, accessories, etc. are generally based upon the equipment being connected to conductors intended to be operated at a temperature not exceeding 70°C in normal service.

In view of the above, it is recommended that the practice of designs based upon conductor temperatures of 70°C be regarded as the norm. The equipment manufacturer should be consulted to ascertain the reduction of nominal current rating of the equipment if conductor temperatures exceeding 70°C are used. In addition, an overriding factor is often voltage drop.

Fuses with gG characteristics protect associated cables against both overload and short-circuit current, provided that the current rating of the fuse 1_N is equal or less than the current carrying capacity of the cable 1_Z .

In motor circuits, the motor starter will provide the overload protection and the fuses will provide the short-circuit protection. The maximum fuse size that can be used depends upon the type of cable used and is determined using the appropriate K factor. The following table gives the maximum sizes of fuses that are recommended for two popular cables with copper conductors, 70°C PVC ($K = 115$) and 90°C thermosetting ($K = 143$).

Cable size (mm ²)	Max. fuse rating (amps)	
	K = 115	K = 143
1	16	16
1.5	20	25*
2.5	32*	32*
4	50*	50*
6	63*	63*
10	100*	125*
16	125*	160*
25	200*	250*
35	315*	355*
50	400*	500
70	560	630
95	710	800
120	800	1000

* Extended Motor Circuit dual ratings can be used.

Protection against electrical shock

For a TN System, a disconnecting time not exceeding 5s is permitted for a distribution circuit. The maximum values of earth fault loop impedance (Z_s) of 240V for Bussmann series gG fuses to BS 88: Parts 2 and 6 are:

Rating (A)	Z _s (Ohms)	Rating (A)	Z _s (Ohms)	Rating (A)	Z _s (Ohms)
6	14	50	1.1	250	0.16
10	7.7	63	0.86	315	0.13
16	4.3	80	0.60	400	0.096
20	3.0	100	0.44	500	0.073
25	2.4	125	0.35	630	0.054
32	1.9	160	0.27	800	0.044
40	1.4	200	0.20		

Ambient temperature

The derating, in terms of current, of 0.5% per °C above an ambient of 35°C is recommended.

Interrupting rating

The standardized interrupting rating values are 80kA for voltages of 415Vac and above, and 40kA for DC applications. The 240Vac designs have an interrupting rating of 50kA.

Coordination ratio

All fuses to BS 88 Parts 2 and 6 will give a coordination ratio of 2:1; and for most practical situations a ratio of 1.6:1 (two steps in the R10 series). Example: an upstream fuse rated at 160A will coordinate with a downstream fuse rated at 100A.

Current and energy limitation

The range of fuses have pre-arcing I_t values towards the bottom limits of BS 88 Parts 2 and 6. This ensures excellent current and energy limitation. They also have lower power losses at rated current. This assists in the appropriate interchangeability with other makes of fuses.

Transformers

When fuses are used on the primary side of transformers, the normal fuse current rating should be at least twice the nominal transformer primary current.

Fluorescent lighting

The normal fuse current rating should be at least twice the normal full load current of the maximum number of lights to be simultaneously switched.

Capacitor circuits

For power factor correction in capacitor circuits, the fuse should be chosen with a current rating greater than 1.5 times the rated capacitor current. This takes into account the high inrush current, circuit harmonics and capacitor tolerances.

Motor circuits

In motor circuits, the fuse has to withstand the motor's starting current and often requires a higher rating than the motor's full load current. Coordination recommendations are made by the manufacturers of motor starters in accordance with IEC 60947-4-1. To get Type 2 coordination with fuses, tests are performed with the latest gG or gM fuses to BS 88 or IEC 60269 that have pre-arcng I_t values towards the bottom of specified limits. This means that Bussmann series fuses are suitable to provide Type 2 coordination.

Extended dual ratings of motor circuit protection fuses with gM characteristics are available in most popular fuse sizes to extend the use of associated equipment with appropriate economies. In the majority of applications, gG fuses are used. It is not essential to use gM fuses for motor circuit protection, they simply extend the utilization of standard equipment.

Below is a table of recommended fuses at 415V. In most applications, the run-up time is less than 5 seconds and duty is infrequent - no more than twice per hour. The next larger rating should be used for more demanding applications.

Rating motor kW	Direct on-line		Asst. start standard (gG)
	Standard (gG)	Motor circuit (gM)

CDS, CDN and PON Type P and D**Specifications**

Description: CSA time-delay Type D and P fuses.

Dimensions: See catalog numbers table and dimensions illustration.

Ratings:

- Volts: — 250Vac (CDN and PON)
- 600Vac (CDS)

Amps: — 10-600A

IR: — 10kA minimum

Agency information: CE, CSA Certified to C22.2 No. 59.1.

Features and benefits

- Economical fuse in a variety of ratings for applications not requiring time-delay.

Typical applications

- Lighting, heating and other circuits not subject to temporary surges and where available short-circuit current are relatively low.

Basic catalog numbers**Time-Delay CSA Type "D" fuses**

Catalog numbers	Volts	Amp ratings
CDN*	250Vac	10, 12, 15, 20, 25, 30, 35, 40, 45, 50, 60, 70, 80, 90, 100, 110, 125, 150, 175, 200, 225, 250, 300, 350, 400, 450, 500, 600
		10, 12, 15, 20, 25, 30, 35, 40, 45, 50, 60, 70, 80, 90, 100, 110, 125, 150, 175, 200, 225, 250, 300, 350, 400, 450, 500, 600
CDS**	600Vac	10, 12, 15, 20, 25, 30, 35, 40, 45, 50, 60, 70, 80, 90, 100, 110, 125, 150, 175, 200, 225, 250, 300, 350, 400, 450, 500, 600
		10, 12, 15, 20, 25, 30, 35, 40, 45, 50, 60, 70, 80, 90, 100, 110, 125, 150, 175, 200, 225, 250, 300, 350, 400, 450, 500, 600

* Below 10 amps, use FRN-R.

** Below 10 amps, use FRS-R.

One-time CSA Type "P" fuses

Catalog number	Volts	Amp ratings
PON	250Vac	15, 20, 25, 30, 35, 40, 45, 50, 60

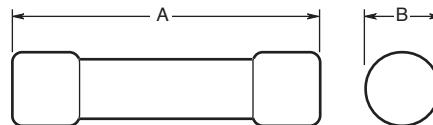

To Order

To order, specify basic catalog number and amp rating.

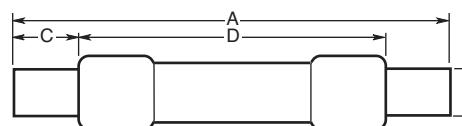

Example: CDN-30, CDS-110 or PON-40.

CGL Form II Class C**Specifications**

Description: Current-limiting HRCII-C fuses designed to withstand inrush currents on typical motor start-ups while offering high current limitation in the short-circuit region.

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 600Vac
250Vdc (1-30A)

Amps: — 1-600A

IR: — 200kA
40kA DC

Agency information: CE, CSA Certified, C22.2 No. 106, Class 1422, File 53787.

Features and benefits

- Close sizing to loads allows using smaller and less costly switches
- Provides a higher degree of short-circuit protection
- Helps protect motors against burnout from overloads

Typical applications

- For use in circuits subject to surge currents such as those caused by motors, transformers and other inductive loads

CIF21 HRCI-CA**Specifications**

Description: The HRCI-CA fuse provides both overload and short-circuit protection to HRCI requirements. Offset blades for bolt-on mounting. CIF21 fuse fits the Bussmann series Rep Spot fuse holder (data sheet 10083) and CAMaster fuse holder (data sheet 4132).

Dimensions: See dimensions illustration.

Construction: Ceramic body.

Ratings:

Volts: — 600Vac
250Vdc

Amps: — 1-30A

IR: — 200kA RMS Sym.

Agency information: CE, CSA C22.2, No. 106-M92.

Mounting: Bolt-on.

Red Spot P/N RS20_(1-20A)

CAMaster P/N CM20CF (1-30A)

CIF06 HRCI-CB**Specifications**

Description: A miniature industrial fuse that provides both short-circuit and overload protection and the CIF06 fits the 30A SAFEloc fuse holder (data sheet 4133).

Dimensions: See dimensions illustration.

Construction: Ground ceramic body with plated end caps.

Ratings:

Volts: — 600Vac
250Vdc

Amps: — 1-30A

IR: — 200kA RMS Sym.

Agency information: CE, CSA C22.2 No. 106-M92 (3-30A only).

Mounting: Clip-in offset blades.

IEC and British Standard fuses

HRCI-J fast-acting fuses

CJ HRCI-J

Specifications

Description: HRCI-J fast-acting fuses are industrial duty fuses with the excellent current-limiting characteristics of fast-acting HRCI-J fuses to limit damage to equipment and installations by the thermal and magnetic energy associated with a large short-circuit fault current. Overload characteristics limit cable damage due to low overload currents.

Dimensions: See catalog numbers table and dimensions illustrations.

Construction: Ceramic body fuse.

Ratings:

Volts: — 600Vac (or less)
250Vdc

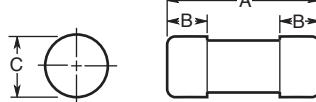

Amps: — 1-600A

IR: — 200kA

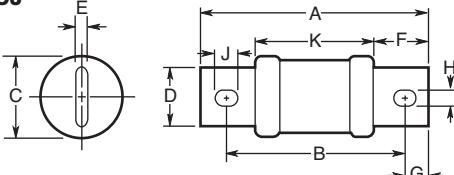

Agency information: CSA C22.2 No. 106 M92; designed to BS 88:2, IEC 60269-2.

IEC and British Standard fuses

HRC Form II current-limiting fuses

HRC Form II

Specifications

Description: HRC Form II current-limiting fuses.

Dimensions: See catalog numbers table and dimensions illustrations.

Construction: Ceramic body.

Ratings:

Volts: — 600Vac (or less)
— 250Vdc

Amps: — 2-600A

IR: — 200kA RMS Sym.

Agency information: CE, CSA C22.2 No.106_M92;
BS 88:2, IEC 60269:2.

Typical applications

- Used to protect motor control circuits, together with contactors and overload protection relays to provide Type 2 coordination - per IEC 60947-4.

Data Sheet: 4131

SSD, NSD, ESD BS 88 Part 1**Specifications**

Description: The NSD and ESD are low voltage fuses complying with general purpose gG characteristics.

Construction: Ceramic body.

Ratings:

- Volts: — 240-550Vac (see catalog numbers table)
- Amps: — 2-63A (see catalog numbers table)
 - 20M25-63M100A motor starter ratings (see catalog numbers table)
- IR: — 33kA (SSD)
- 80kA (NSD, ESD)

Agency information: CE, meets the requirements of BS 88 Part 1 and IEC 60269-1.

Mounting: Offset blades.

**Basic catalog numbers**

Basic catalog numbers	Amp ratings	Max AC voltage ratings	BS 88 ref.
SSD	2, 4, 6, 10, 16, 20, 25, 32	240	E1

Amps: — 2-400A (see catalog numbers table)

— 63M80-400M500A motor starter ratings (see catalog numbers table)

IR: — See catalog numbers table

Agency information: CE, meets the requirements of BS 88 Parts 1 and 2 and IEC 60269-1.

Mounting: Center bolted blades, two-hole mount.

EF, FF, FG, GF, GG, GH BS 88

Specifications

Description: Low voltage fuses complying with general purpose gG characteristics and available up to 400A with two hole mount and up to 1250A with four hole mount.

Construction: Ceramic body.

Ratings:

Volts: — 415/690Vac, 250/400Vdc (see catalog numbers table for details)

Amps: — 355-1250

IR: — see catalog numbers table

Agency information: CE, meets the requirements of BS 88 Parts 1 and 2 and IEC269-1.

Mounting: Center bolted blades, four-hole mount.

D16, D27, D33, D125 Type D**Specifications**

Description: DIN style Type D low voltage fuses.

Dimensions: See catalog numbers table and dimensions illustrations.

Construction: Ceramic body.

Ratings:

Volts: — 500Vac

Amps: — 2-100A

IR: — 50kA

Agency information: CE, "D" type fuses complying with DIN 49360 Part 2 and DIN 49515, operating class gL.

IEC and British Standard fuses

NH HRC fuses

NHG B

Specifications

Class: gG/gL

Description: DIN square bodied, dual indication industrial fuses.

Construction: Steatite insulator, corrosion-proof (aluminum) metal parts with full-contact, silver-plated copper blades.

Sizes: DIN 000 to 4.

Selectivity ratio: 1:1.6 up to 500Vac.

Ratings:

Volts: — 500Vac

— 690Vac

Amps: — 2-1250A

IR: — 120kA

Frequency: — 50Hz

Operating frequency: — 45-62Hz

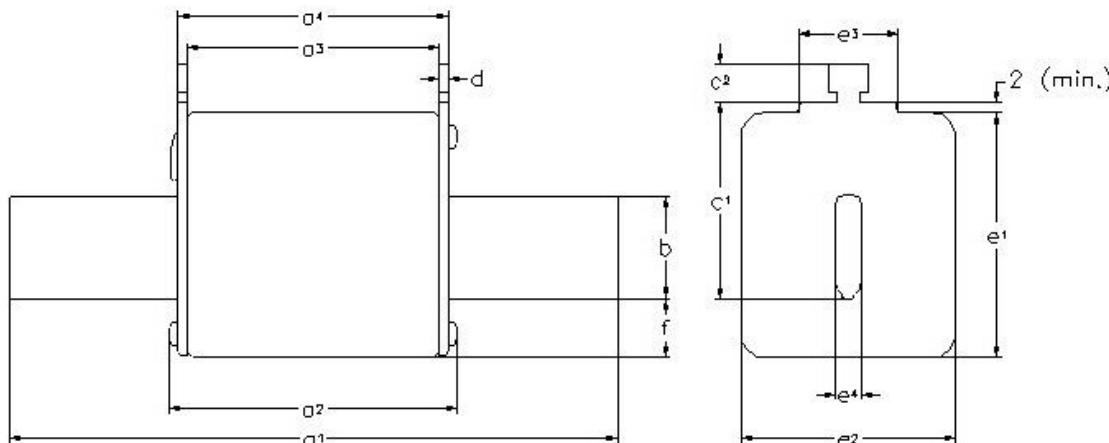

Agency information: IEC 60269, VDE 0636, DIN 43620 Part 1 to 4, VDE Mark and CE.

NH fuse bases

SD*-D, SD*-S

**Up to 690V / 160 - 1250A
sizes 000 to 4**

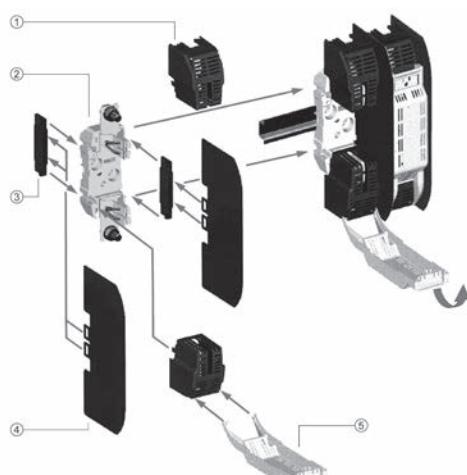

Description: NH fuse bases with thermoplastic bodies. DIN-Rail and screw mounting (size 4 screw fix). Range of protection accessories for live parts in order to obtain IP20 protection standard.

Ratings:

- Volts: up to 690Vac
- Amps: up to 1250A

Applications: Protection of industrial circuits and electrical apparatus

Standards and approvals: IEC 60269, DIN 43620

IEC and British Standard fuses

HRC fuse holders

CAMaster

Specifications

Catalog symbol:

See table below.

Description:

The Bussmann series CAMaster HRC fuse holder features a unique cam-action for easy fuse removal while allowing significantly improved contact pressure between fuse carrier and base contact that enhances electrical performance. A range of lockable safety carriers for the fuse holder (catalog reference: LSC), are available.

Ratings:

Volts: — 690V

Amps: — up to 100A (see catalog number table for details)

Agency information: CE, CSA C22.2 No. 39; IEC 269 AND BS 88.

Mounting: 35mm DIN-Rail or single screw mounting.

Bussmann series Red Spot fuse holders

These versatile CSA Certified and IP20 finger-safe fuse holders for BS88 HRC industrial fuses are available in ratings from 20 to 400 amps.

Padlock inserts, warning carriers and fuse adapter accessories enhance safety and application flexibility.

See data sheet 10083 for details.

SAFEloc

Specifications

Catalog symbol:

See table below.

Description:

The Bussmann series SAFEloc HRC fuse holders (for use with HRCI-CB fuses) provides a positive, stress-free fuse fitting and locks it in position to ensure safe insertion and withdrawal from the base. Base contacts are fully shrouded to help protect against electric shock. Shrouds utilize simple slide/snap action allowing access to the contact terminal screws.

Ratings:

Volts: — 600V

Amps: — 30-60A (see catalog number table for details)

Agency information: CE, designed to accommodate the compact range of offset blade fuse to CSA C22.2 No. 106, HRCI-CB.

Mounting: 35mm DIN-Rail or single screw mounting.

Quik-Spec™
electrical
gear

Specifications:

Description: Configurable fusible panelboard with 30-400A mains and branches from 1-100A rated 600Vac.

Ratings:

Volts: — 600Vac (or less), 125Vdc (or less)**

Bus Amps: — 30, 60, 100, 200, 225 or 400A

Options:

- Main: — MLO (main lug only)
- Fused disconnect switch
- Non-fused disconnect switch

Enclosure: — NEMA 1 or 3R

- Standard size panelboard (20" W x 5" D x various heights)*
- For other ratings consult factory

- Panel: — Feed; Top & Bottom***
 — Mounting; Surface or Flush****
 — Door/Trim; Regular or Door-in-Door****

- Branch: — Circuits; Up to 18, 30 and 42*
 — Amps; Up to 100A
 — Type; 1-, 2- and 3-Pole

- Fuse: — Six-fuse spare fuse compartment
 — Time-delay or UPS/critical applications (fast-acting) CUBEFuse™

Assembly

- SCCR:— 200kA, 100kA or 50kA AC, 100kA or 20kA@125Vdc*

Through-Lugs**& Loadside**

- Disconnect:— Feed-Through - single and double
 — Fused loadside disconnect, $\geq 100A \leq 200A$ (400A panels only)

Neutrals:— 200, 400 and 800A unbonded and bonded

Ground:— Non isolated or isolated

*Depending on configuration

**125Vdc rating applicable to 80 amp or less CCPBs on MLO panels only.

***Top feed not available on NEMA 3R enclosure

****Flush mount and door-in-door not available with NEMA 3R enclosure

QuikShip 
Made To Order

Agency information: UL Listed to UL 67, complies with NFPA 70 (NEC®, National Electrical Code).

Features and benefits:

- UL Listed and cULus to CSA Standard 22.2, No. 29-M1989 make it easy to address NEC® and CEC selective coordination requirements in an all fused system or upstream Eaton circuit breakers
- Value-engineered for greater flexibility with up to 400A mains, 200kA SCCR, 100A branches with 18, 30 and 42 branch positions
- Same size footprint as traditional circuit breaker panelboards and 40% smaller than standard fusible panelboards: 20" W x 5 ¾" D x various heights (depending on configuration)
- Increase safety with current-limiting finger-safe Class CF CUBEFuse that helps reduce arc flash hazard levels
- Quik-Quote online configurator makes specifying and ordering easy – delivers a full bill of material and submittal drawings for an entire project
- NEMA 1 version available for 10 day shipment with QuikShip™ service

Ordering:

The QSCP is factory configured to the specific electrical system. Contact your Eaton distributor or representative to place your order. Have all relevant electrical and circuit information on hand.

QuikShip – 10 Business Day Shipment on all NEMA 1 configurations.

Specifications:

Description: Fusible panelboard with 600, 800 and 1200A mains and branches from 1-600A, rated 600Vac.

Ratings:

Volts: — 600Vac (or less), 125Vdc

Amps: — 600, 800 and 1200A

Options:

Main: — Main lug only

Enclosure: — NEMA 1 floor mount

Branch: — 1-, 2- and 3-pole, 15-600A branch disconnect

- Fuse: — Time-delay, non-indicating (Class CF TCF_R and/or Class J LPJ_SP)
- Time-delay, indicating (Class CF TCF_ and/or Class J LPJ_SPI)
- Fast-acting, non-indicating (Class CF TCF_RN and/or Class J JKS)
- DFJ high speed Class J fuses

Agency information: Complies with NFPA 70 (NEC®;

National Electrical Code®) UL Listed to UL 67,

Features and benefits:

- Configurable panelboards with options for 600, 800 and 1200A mains and branches from 1-600A all rated 200kA SCCR at 600Vac
- Smallest standard fusible panelboards in the industry
- Featuring the finger-safe UL Class CF CUBEFuse with 1-100A ampacity rejection features that help prevent over fusing
- Available with time-delay or UPS/Critical application fast-acting fuses

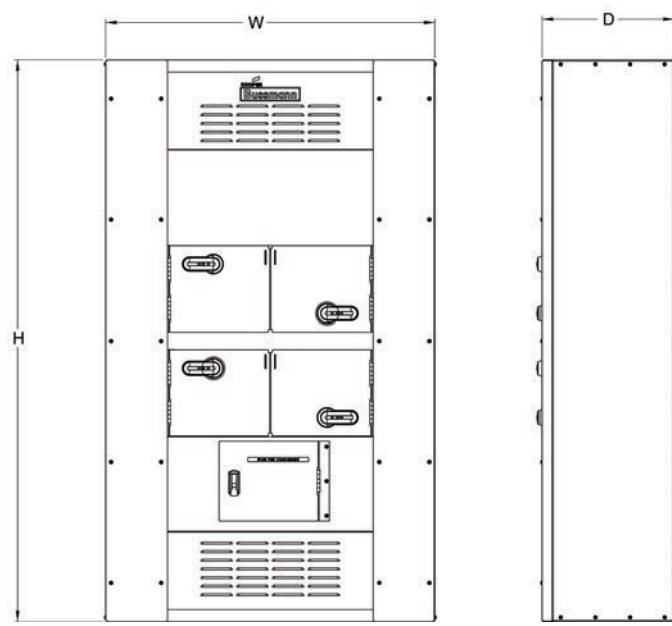

- UL listing makes it simple to address NEC® selective coordination system requirements in an all fused system
- Quik-Quote online configurator makes specifying and ordering easy – delivers a full bill of material and submittal drawings for an entire project

Ordering:

The QSCP is factory configured to the specific electrical system. Contact your Eaton distributor or representative to place your order. Have all relevant electrical and circuit information on hand.

Quik-Spec™
electrical
gear

PS and PMP

Bussmann series Quik-Spec Power Module

Specifications:

Description: Fusible power switch or panel with shunt trip and fire safety interface to allow for single point tie in with fire alarm system.

Ratings:

Volts: — 600Vac, 3Ø

Amps: — 30-400A (PS)

- 30-200A (PMP feeder switches)

- 400-800A (PMP main switches*)

Assembly

SCCR: — 200kA RMS

*Contact Eaton for applications greater than 800A.

Agency information:

Complies with NFPA 70 (NEC®), National Electrical Code®,

- Elevator shutdown
 - ANSI/ASME A17.1, 2.8.3.3.2
 - NEC® 620.51(B) (elevator shutdown)
 - NEC® 240.12 (orderly shutdown)
- Shunt trip voltage monitoring – NFPA 72, 6.16.4.4
- Selective coordination – NEC® 620.62
- Auxiliary contact (hydraulic elevator) – NEC® 620.91(C)

- Power Module Switch (PS); UL Listed (UL 98) enclosed and dead front switch Guide 96NK3917, File E182262, NEMA 1, UL 50 Listed enclosure**, cUL per Canadian Standards C22.2, No. 0-M91-CAN/CSA C22.2, No. 4-M89 Enclosed switch.

**NEMA 12, 3R, and 4 enclosures also available

- Power Module Panel (PMP); UL 98 enclosed and deadfront switches.

Features and benefits:

- Internally powered, relay activated shunt trip system
- Mechanically interlocked auxiliary contact
- Self-contained adherence to elevator consensus standards, NFPA 70 (NEC®), NFPA 72, ANSI/ASME A17.1
- Shunt trip capability
- Selective coordination
- Fire safety signal interface
- Shunt trip voltage monitoring
- Component protection via Bussmann series Low-Peak™ Class J fuses
- UL 98 Listed for 200kA short-circuit current rating
- Lockable in the open position with three-lock capability
- Optional key-test switch and optional pilot light for easy inspection
- No annual calibration or testing of overcurrent protection required
- Padlockable for service-work safety and open-door “override” for troubleshooting

Data Sheets: 1145 (PS), 1146 (PMP)

PS Data Sheet: 1145 **PMP Data Sheet:** 1146

Typical applications:

- Elevator disconnects
- Computer room shunt trip disconnect
- Fire safety interface relay

Accessories:

- For added safety, use the Bussmann series SAMI™ fuse covers to improve maintenance personnel protection (OSHA 1910.333, paragraph C)

Ordering:

The Quik-Spec™ Power Module Switch and Panel are factory configured to the specific application. Contact your Eaton representative to place your order. Have all relevant electrical and circuit information on hand.

PS*

The Quik-Spec™ Power Module Switch (PS) for single elevator applications.

PMP*

The Power Module™ Panel (PMP) for multiple elevator applications.

*Fused main disconnect requires Class J fuses, not supplied with switch.

Hydraulic elevators

Hydraulic elevators need battery backup to help prevent stranding passengers. To keep the elevator from moving when it's been manually shut down for maintenance, the NEC® requires battery backup be connected to the elevator disconnecting means through an auxillary contact.

However, an unintended consequence can be passengers getting stranded because of devices that open automatically (circuit breakers and disconnects utilizing a

molded case switch with a trailing fuse block) will operate with a fault on their loadside. That operation also disables the battery backup and strands passengers. That's why the Power Module has a non-automatic fusible shunt trip switch. If the Power Module has a fault on its loadside, the fuses open and the battery stays enabled. Thus the Power Module ensures that battery power is enabled when the passengers need it to exit - and disabled to allow safe maintenance of the elevator and hoistway.

Scenario	Battery lowering required	Reason	Offered by Power Module™	Offered by other elevator disconnects
Power failure	Yes	Need to lower elevator to allow passengers to exit.	Yes	Yes
Fire in shaft or machine room	No	Recall is initiated by smoke detector and lowers elevator to a safe floor. Battery not needed.	Yes	Yes
Disconnect manually opened	No	Worker to perform maintenance. Elevator must remain stationary to prevent injury.	Yes	Yes
Fault on loadside of disconnect	Yes	Need to lower elevator to allow passengers to exit.	Yes	No

Isolating DC circuits has never been easier or safer

- Flexibility of application
- Enhanced finger-safe design
- Meets UL and NEC® requirements
- Flange handle operation
- Current-limiting fuses reduce arc flash hazard

NEC 690.17 compliant label

Warns that the switch terminals may be energized in the open position

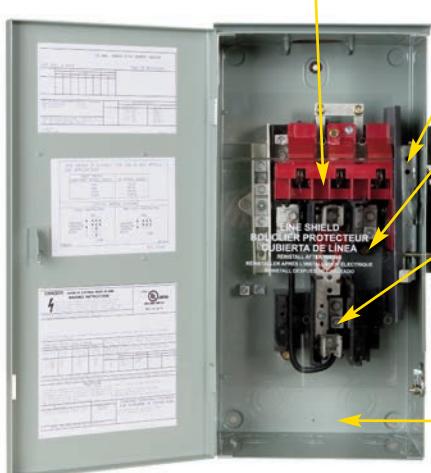

NEMA 3R, 12 and 4X enclosures

Meet many application requirements. 3R and 4X stainless steel well suited for isolating outdoor solar power installations

High visibility padlockable handle

Easy to operate with gloves and up to three padlocks to protect maintenance personnel

Visible switch contacts

Positive visual identification of switch state

Door interlock

Prevents opening door while energized, but can be manually overridden for testing or inspection.

Clear polycarbonate deadfront

Covers energized parts to provide added protection against electrical hazards. Lineside stays in place during fuse servicing.

Fused version for added protection

Fuse clips located on switch center pole to ensure both clips are de-energized in OFF position. Meets NEC® Article 690.16 that requires isolating the fuse from all potential supply sources. Eaton recommends using the Limitron fast-acting, current limiting PVS-R Class RK5 fuse (order separately.)

Conduit knockouts

For easy conductor installation

Dimensions - in

CUBEFuse™ safety switch**Specifications:**

Description: The Bussmann series CUBEFuse™ Safety Switch equipped with finger-safe CUBEFuse provides superior safety and reliability for industrial customers.

Utilizing the Bussmann series Class CF time-delay and fast-acting CUBEFuse, the CUBEFuse Safety Switch provides Class J fuse performance characteristics that can help mitigate incident energy and arc flash hazard, and offers excellent component protection.

The finger-safe Bussmann series CUBEFuse requires no tools to install or replace.

Agency Information:

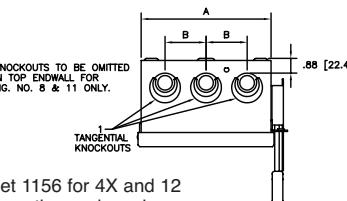

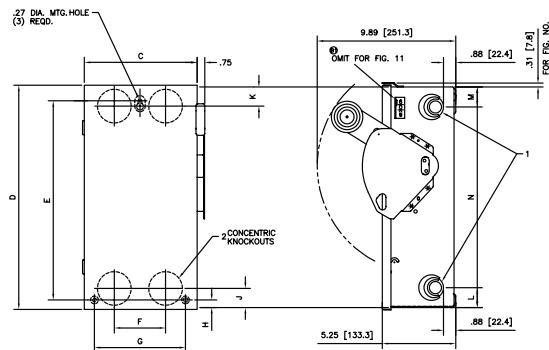

- UL 98 standard for enclosed deadfront switches.
- UL 50 standard for enclosures for electrical equipment.
- NEMA KS 1.
- UL Listed, File E5239.
- cUL Listed to C22.2 No.4-M89.

Standard features:

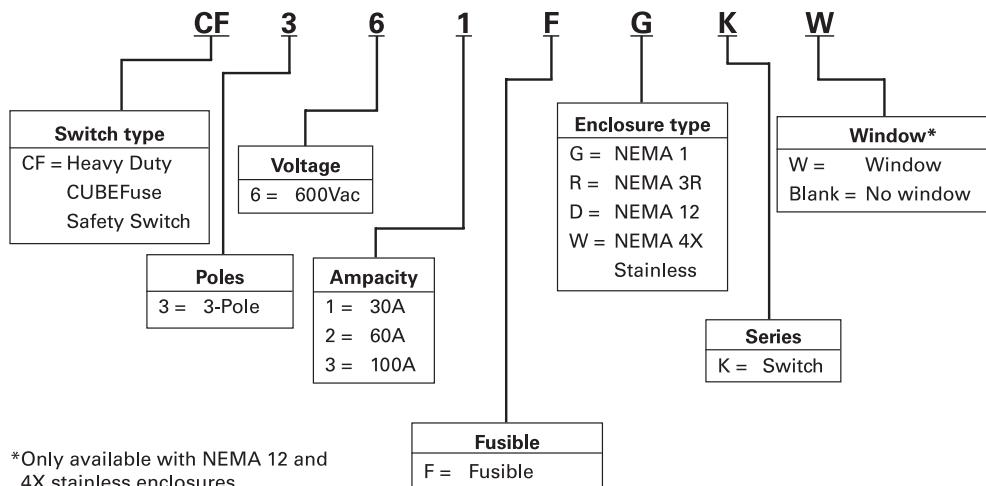

- Extended line terminal shield and finger-safe 30, 60, or 100A Bussmann series CUBEFuse™
- 200kA short-circuit current rating
- Visible double break quick-make, quick-break rotary blade mechanism
- Triple padlocking capability
- Mechanically interlocked door
- 600Vac/250Vdc maximum

Optional features:

- Viewing window for visible blades and open fuse indication
- NEMA 1, 3R, 12, 4X (stainless)
- Suitable for use as service equipment (with neutral kit)

Dimensions - inches (mm)***NEMA 1 and 3R**

*See Data Sheet 1156 for 4X and 12 dimension information and maximum horsepower ratings.

CUBEFuse Safety Switch Catalog Numbering System

*Only available with NEMA 12 and 4X stainless enclosures.

Series B22**Specifications:**

Description: Fused and non-fused rainproof pullout air conditioner units.

Dimensions: See catalog numbers table.

Construction: NEMA 3R metal housing with weather resistant coating.

Wire Range: 14-3 AWG, Al/Cu

Ratings:

Phase: — Single, 2-wire

Volts: — 240Vac

Amps: — 30-60A

Agency information: UL Listed to UL 1429, cUL Certified, UL Guide WGEW

Features and benefits:

- A/C disconnects meet NEC® requirements under articles 440.14. GFCI units meet NEC® requirements under articles 210.63, 210.8, and 406.8(B)(1).
- NEMA 3R rainproof enclosures withstand outdoor environment.
- Padlockable with two-position pullout handle to lock safety shield when in the ON position. (Not available on GF or NA units.) For added safety, pullout handle can be stored in the compartment in the off position.

Metallic non-fused disconnect with weather resistant-tamper resistant GFCI receptacle.

**Typical applications:**

- Residential, light industrial/commercial A/C and heat pump service.
- Spas/whirlpools, swimming pools, pump houses.
- Suitable for service entrance equipment applications with field installable ground bar, kit number DPFG.

RED indicates NEW information

CH Series - 8x32, 10x38, 14x51, 22x58, Class CC

Specifications

Description: The 'CH' line of modular fuse holders accommodates many fuses from around the world, including North American Class-CC, Midget, Class gR, aR HSF, and IEC Industrial Ferrule (Class gG and aM) in four physical sizes: 8x32, 10x38, 14x51 and 22x58mm.

Agency information: UL File E14853

Guide IZLT Listed, IZLT2 Recognized

CSA: File 47235, CHPV and CHM - Class 6225-30, CHCC - Class 6225-01. RoHS compliant. CE, CCC.

Ratings:

600V/30A (UL)

690V/32A (IEC)

Wire range:

#18 to #4 (0.8mm² to 21.1mm²)

Torque ratings:

30 Lb-In (3.4 N•m) maximum

Flammability ratings:

UL 94V0, self-extinguishing

Storage and operating temperature range:

-20°C to +90°C (indicating)

-20°C to +120°C (non-indicating)

RoHS

Features/benefits

- High SCCR rated, UL Listed Class CC holder with indicator option for 600Vac/dc and 48Vdc.
- UL Recognized midget and 10 x 38 holders with factory assembled neutral pole option.
- Agency ratings up to 1000Vdc for use with 10 x 38 solar PV fuses.
- Available remote PLC indication with the CH-PLC module.
- Terminals rated for use with 75°C or 90°C wire, fine stranded wire, spade terminals and comb-bus bars. Use any higher temperature rated wire with appropriate derating.
- Complete range of UL Listed and high SCCR rated 1-phase and 3-phase finger-safe comb-bus bars and power feed lugs.

Make it Simple with the Bussmann series resettable three-phase remote fuse monitor that integrates with a Programmable Logic Controller (PLC) or other monitoring and control equipment.

Specifications:

- Power input: 24Vdc / 5mA
- Sensing voltage: 600V/30mA
- Output signals: Digital 0Vdc (low), 24Vdc (high)
 - 0Vdc Low – fuse is good
 - 24Vdc High – fuse has opened

When the fuse opens, the output signal is sent high and will remain high until the unit is reset
- Rated impulse voltage: 8kV
- Local indication: Two distinct LEDs indicate unit power (green) and open fuse (red). Upon the replacement of the fuse, the actuation of the reset switch will reset the open fuse LED
- Flammability rating: UL 94V0

Wiring:

- For power, signal and ground connections use shielded twisted pair 22-24AWG (0.25mm²) 300V rated wire

Emissions and immunity testing:

- Electrostatic discharge IEC 61000-4-2
- Electrical fast transient/burst IEC 61000-4-4
- Surge immunity IEC61000-4-5

Packaging:

- The CH-PLC is packaged individually
- A single unit monitors up to three phases
- Package includes 0.11" (2.8mm) quick connects for power, signal and ground connections

Minimum circuit voltage:

- Minimum circuit voltage required across the CH holder is 100Vac for the remote indication device to operate

Installation technique:

- Mounts on the left side of the fuse holder and mechanically interlocks with the fuse holder switch handle with hardware provided

IP20 rating: Yes

Environmental data:

- Storage and operating temperature: -20°C to 75°C

Agency information:

- UL 508
- cULus to CSA Standard 22.2 No.14

PLC programming:

- The CH-PLC signal line is designed to provide a digital input to a PLC I/O card.
- Programmable Logic Control program must be written to properly interpret the input signal to the PLC.
- The PLC program should check for consecutive high signals before taking action on a critical process.

De-energize all circuits before installing or removing any CH-PLC devices and follow all prescribed safety procedures.

For additional information see reorder #3185

Fuse holders and blocks

Global modular fuse holders - comb-bus bar specifications and selection guide

Specifications

Agency information: UL 508, File E195399
Pitch: 17.8mm
SCCR: 10kA (default)
 100kA (with upstream Class J 200A fuses)
Max current: 100A (power feed from end);
Max voltage: 600Vac/dc (three phase)
 1000Vdc/600Vac (single phase)

Features and benefits

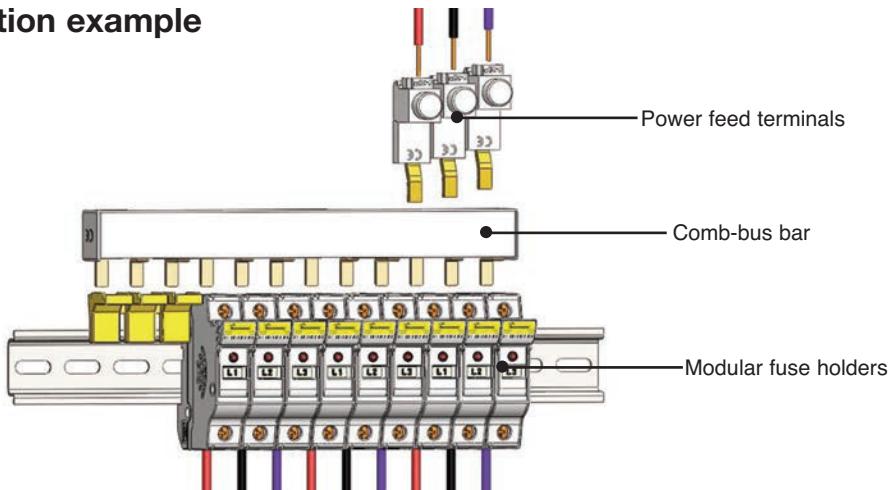

- Easily distribute power in single-phase or three-phase configurations
- Flexible cut-to-length solutions without compromising on the product's finger-safe features
- 100kA SCCR (Short-Circuit Current Rating) when protected by a 200A Class J fuse
- Single-phase bus bars rated to 1000Vdc and 100A in end-fed configuration
- Three-phase bus bars rated to 600Vac/dc and 100A in end-fed configuration
- Power feed terminals for single-phase and three-phase service

Selection guide

Part number	Description
BB1P100M3	Single-phase 1000Vdc busbar, 100A, 3 pins, assembled endcap
BB1P100M6	Single-phase 1000Vdc busbar, 100A, 6 pins, assembled endcap
BB1P100M9	Single-phase 1000Vdc busbar, 100A, 9 pins, assembled endcap

CH __ J __**Specifications**

Description: IP20 finger-safe, 1- to 3-pole Class J fuse holder with DIN-Rail or panel mounting.

Ratings:

Volts: — 600Vac/dc (or less)

Amps: — 30A (30A version)

— 60A (60A version)

SCCR: — 200kA

Wire range: Cu solid and stranded conductors with single (1-18AWG) and dual (3-18AWG) wire ratings. See catalog numbers table for details.

Torque rating: 10-18AWG 24 lb-in.

1-8AWG 35 lb-in.

Poles: 1-, 2- or 3-pole.

Storage and operating temperature range*:

-20°C to 75°C.

Agency information: CE, UL 4248/CSA 22.2 No. 4248.P

UL Listed, Guide IZLT, File E14853.

Flammability rating: UL 94V0.

Catalog numbers

See catalog numbers table below.

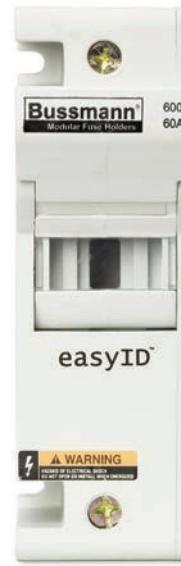

Features and benefits

- Choice of local fuse indication; easyID™ viewing window (for seeing indicator on LPJ-SPI indicating fuse) or neon lamp.
- Versatile 1-, 2- and 3-pole versions for 0-30A and 35-60A fuses with dual wire rated connections simplify wiring.
- Improved electrical safety with IP20 finger-safe construction with lock-out/tag-out feature. 3-phase fuse extraction assures all phases are opened for service work.
- Flexible panel/35mm DIN-Rail mounting options

*For fuse selection on applications above or below 25°C, consult derating charts in Eaton publication "Selecting Protective Devices" (SPD).

*Rating varies depending on fuse used in module; 10kA default, higher SCCR requires testing and certification.

**Short-Circuit Current Rating

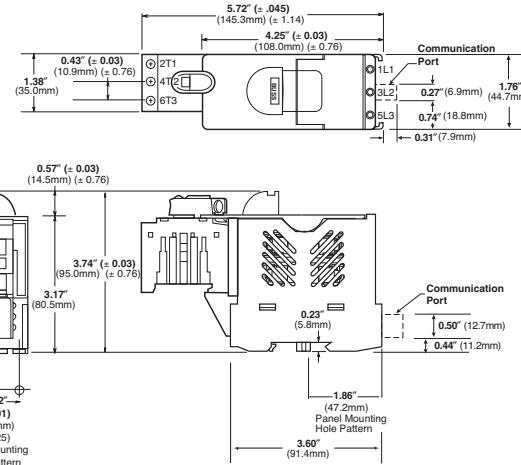

Features/benefits

- Padlockable with finger-safe terminals for safety. Qualified as IP20 per IEC 60529.
- Cam-action handle for easy module removal, offered with Class CC rejection clips or European 10 x 38mm clips to meet global needs
- Wire ready with 35mm DIN-Rail or screw panel mounting (#8 screw, 1 $\frac{1}{4}$ " long) saves installation time
- Fuse indication lights with option for remote fuse status available. See Data Sheet for additional wiring details.

Typical applications

- Industrial control
- Process control systems
- Automated warehouse systems
- Individual control circuits

OPM-1038

Catalog number build-a-code

Series	Fuse type	Communication
O P M - 1 0 3 8		
	Blank = 10 x 38mm or $1\frac{1}{2}$ " x 1 $\frac{1}{2}$ "	C = Communication feature
	R = Class CC	

Specifications

Description: 3-pole modular fuse holder for $1\frac{1}{2}$ " x 1 $\frac{1}{2}$ " (10 x 38mm) fuses.

Dimensions: See dimensions illustration.

Poles: 3

Agency information: CE, UL (see table), CSA Certified, C22.2 No. 4248, Class 6225-01, File 47235, IEC (see table).

Flammability rating: UL 94V0.

Recommended fuse types

Class CC	Midget (non-rejection)	European
LP-CC	KTK	BAF
KTK-R	FNM	KLM
FNQ-R	FNQ	C10M

Physical characteristics

- Small size matches 45mm IEC starter width
- Accepts #8-18 AWG stranded, #10-18 AWG solid wire
- 3-pole

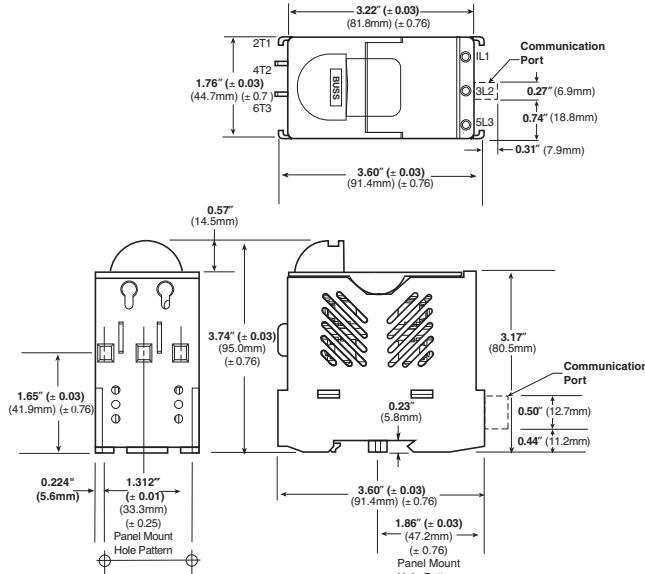

Features/benefits

- Padlockable with finger-safe terminals for safety. Qualified as IP20 per IEC 529.
- Cam-action handle for easy module removal.
- Offered with Class CC rejection clips or European 10 x 38mm clips to meet global needs
- Wire ready with 35mm DIN-Rail or screw panel mounting (#8 screw, 1 $\frac{1}{4}$ " long) saves installation time
- Fuse indication lights with option for remote fuse status indication. See Data Sheet for additional wiring details.

Typical applications

- Industrial control
- Process control systems
- Automated warehouse systems
- Individual control circuits

Fuse holders and blocks

Optima™ three-pole overcurrent protection module

OPM-NG-

Specifications

Description:

OPM-NG-SC3: 3-pole Class CC fuse holder for use with Class CC fuses (Bussmann series LP-CC, FNQ-R, KTK-R).

OPM-NG-SM3: 3-pole fuse holder for use with $\frac{13}{32}$ " x $1\frac{1}{2}$ " and 10.3 x 38mm fuses (Bussmann series types: $\frac{13}{32}$ " x $1\frac{1}{2}$ "; KTK, FNQ, KLM, FNM, BAF, 10 x 38mm; FWA, FWC, C10G_-, C10M_-).

Ratings:

- Volts: — OPM-NG-SC3: 600Vac (or less)
- OPM-NG-SM3: 600Vac (or less) UL and CSA 30A
- OPM-NG-SM3: 690Vac (or less) IEC 32A

Amps: — OPM-NG-SC3: 0-30A

— OPM-NG-SM3: 0-30A

SCCR: — OPM-NG-SC3: 200kA

— OPM-NG-SM3: Same as fuse IR, 200kA maximum.

Agency information: CE, UL; OPM-NG-SC3 UL Listed, UL 4248, File E14853, Guide IZLT. OPM-NG-SM3, UL Recognized, UL 4248, File E14853, Guide IZLT2. CSA Certified, C22.2 No. 4248, Class 6225-01, File 47235. IEC 60947-3 Utilization Category AC20B.

Handling and storage temperature: -10° to 65°C.

Features/benefits

- 45mm width matches IEC starters
- 35mm DIN-Rail or panel mounting feature. Maximum screw size #8 (M4)
- Pressure plate terminations with dual-wire rated terminals (see wire table) and optional auxiliary contacts
- Integrated collapsible handle and fuse carrier cannot be removed from holder base
- Padlockable and IP20 finger-safe to IEC60529

Typical applications

- Mass produced control systems
- Process control systems
- Automated warehouse systems
- Individual control circuits

Fuse holder wire range:

- 75°Cu only
- #18-12 Single/dual, torque 15lb-in
- #10-8 Single/dual, torque 20lb-in
- Dual wire with same gauge and type

	75° Cu only		C
	AWG	[mm ²]	(N·m)/lb-in
Solid		#18-8 x 1 #18-8 x 2	1-6 x 1 1-6 x 2
Stranded		#18-8 x 1 #18-8 x 2	1-6 x 1 1-6 x 2
Ferrules			1-4 x 1 1-4 x 2

Input power terminal wire range:

Wiring	Solid conductor	(1) #14 to #2 (1.5 to 25mm ²) conductor or (2) #14 to #6 (1.5 to 10mm ²) conductors
	Stranded conductor	(1) #14 to #2 (1.5 to 25mm ²) conductor or (2) #12 to #6 (2.5 to 10mm ²) conductors
Tightening torque:	Connector screw clamp	20lb-in (2.2 N·m) 15lb-in (1.7 N·m)

Materials:

- **Housing:** Thermoplastic - ULV2
- **Clip:** Tin-plated copper alloy
- **Contact lubricant:** Fluoroether grease
- **Saddle screw:** Plated steel
- **DIN-Rail springs:** Stainless steel

Optional accessories:

Comb bar (max current rating = 63A)

Safety J™ — JT(N)60030 and JT(N)60060**Specifications**

Description: Indicating and non-indicating finger-safe, DIN-Rail mount fuse holders for use with Class J fuses - (Bussmann series LPJ, JKs).

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 600Vac

Amps: — 0-60A (JT(N)60060)

— 0-30A (JT(N)60030)

SCCR:— 200kA RMS Sym.

— 300kA self certified using Bussmann series LPJ_SP fuses

Agency information: CE, Listed to UL 4248: Guide IZLT, File 14853, CSA Certified: Class 6225-01, File 47235. IP20 per IEC 60529.

Flammability rating: UL 94V0.

Indication: Min voltage: 90V; neon lamp “ON” when fuse opens, voltage source and current path are present.

Terminations: 30A dual port torque 20lb-in, 60A single port torque 45lb-in, terminal construction, tin-plated copper alloy.

Wire size: JT(N)60030 - rated for 75°C, AWG#18-#8; Cu only, JT(N)60060 - rated for 75°C, AWG#14-#4; Cu only.

(Note: For JT(N)60030 use both stranded or solid, in a variety of dual wire combinations of same wire size and type.)

Features and benefits

- Short-Circuit Current Rating of 300kA with Bussmann series LPJ_SP fuses.
- Rapid, flexible 35 mm DIN-Rail mounting.
- One piece interlocking design for assembling multiple pole blocks reduces inventory costs.
- Removable fuse carrier allows fuse replacement away from base while maintaining finger-safe rating.

Typical applications

- Industrial controls
- Process controls
- Small HP VFDs

Catalog numbers

Catalog numbers	Amps	Indication
JT60030	30	Non-indicating
JT60060	60	Non-indicating

Fuse holders and blocks

Class J (finger-safe) fuse holders

Dimensions for JT60030 and JTN60030 — in (mm)

Dimensions for JT60060 and JTN60060 — in (mm)

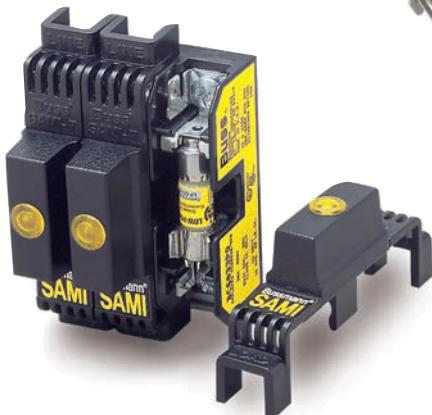

JT(N)600 series fuse blocks can be dovetailed together within the same current rating to provide multiple pole block configurations.

NOTE: JT(N)60030 cannot be dovetailed to JT(N)60060.

Fuse holders and blocks

SAMI™ fuse covers

SAMI fuse covers

Specifications

Description: Indicating and non-indicating fuse covers for Class J, RK1, RK5, H, K5, CC, G (0-30A) and midget-type fuses. Indicating feature requires a minimum of 90V to illuminate lamp. One cover required for each pole.

WARNING: To avoid electrical shock, turn power off before installing, removing or servicing.

Dimensions: See dimensions illustration.

Agency information: CE, UL Listed; SAMI-1I through SAMI-6I, SAMI-8I and SAMI-9I, SAMI-1N through SAMI-6N, SAMI-8N and SAMI-9N, UL Recognized; Guide JDVS2, File E58836, SAMI-7I and SAMI-7N, CSA Certified, File LR47235-93C.

Catalog numbers

*For indicating cover, add suffix "I", for non-indicating cover, add suffix "N".

Example: SAMI-7I = Indicating, SAMI-7N = Non-indicating.

**Available in non-indicating only.

†SAMI-8A adapter available for small Fusetron™ body design. SAMI-8I and SAMI-8N come standard with adapter (SAMI-8A).

††Not for use with KTS-R fuses.

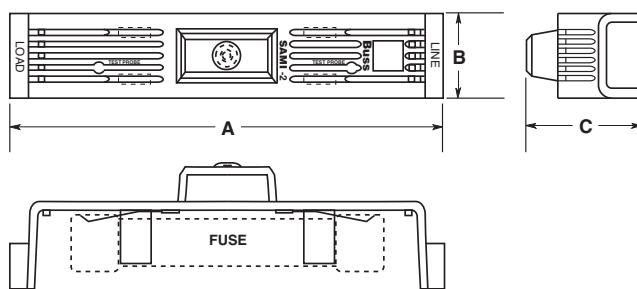

Features and benefits

- Insulated cover allows field conversion of fuses mounted in open fuse blocks.
- Optional open fuse indicating light aids in system troubleshooting.
- Units are re-usable.
- Allows visual marking of line and load side of fuses.

Typical applications

- Class H, R and J fuse blocks up to 100A
- Class T fuse blocks up to 60A
- Class CC, G and Midget, 30A fuse blocks

Dimensions

Cu/AI – 75°C/90°C (100 - 200A)
 Cu/AI – 75°C only (400 - 600A)

*Higher temperature rated wire can be used with appropriate derating.

RoHS

Features and benefits

- Integral dovetails allow snapping together multiple poles at point-of-use for greater application flexibility
- Factory assembled two- and three-pole configurations available
- Up to four mounting holes per pole increase installation flexibility
- Standard phase barriers between poles for additional safety
- Design meets UL creep and clearance requirements for Industrial Control Circuits (UL 508 and UL 845)
- 200 to 600A blocks meet the higher UL creep and clearance requirements for Industrial Power Distribution Standards (UL 98, UL 69, UL 489, UL 891 and UL 869A)
- Optional IP20 finger-safe covers available on entire knifeblade fuse block product line:
 - High-clarity see-through covers allow for inspecting wire terminations or thermography measurements without removing cover
 - Probe holes included for easy, safer testing and troubleshooting
 - Built-in lockout/tagout feature improves safety
- Standard fuse clip reinforcing springs enhance electrical contact

Typical applications

- Critical power, factory automation, renewable energy, HVAC, building/elevator controls, building entrance, process industries

Class J power distribution fuse block

Class J

Specifications

Description:

New Class J fuse block features power distribution capability. This patented design simplifies your panel layout and uses up to 50% less panel space. Additionally, it lowers inventory costs while reducing installation time and labor by 33%.

Fuse Class:

- Class J

Ratings:

Volts - 600V
Amps - 70-400A
Withstand - 200kA Sym RMS

Agency information:

- Blocks: - UL Recognized E14853 – IZLT2
- CSA Certified 47235 — 6225-01
- Covers: - UL Listed UL E58836 – JDVS2

Poles:

- 1-, 2-, 3-pole

Flammability ratings:

- Blocks: - UL 94V0, self-extinguishing
- Covers: - UL 94HB, self-extinguishing

Operating and storage temperature range:

- Blocks: -40°C to +120°C
- Covers: - Non-indicating -40°C to +120°C
- Indicating -20°C to +90°C

Materials:

- Base: - Thermoplastic
- Terminals: - Tin-plated aluminum

Features and benefits:

- Combination power distribution block and fuse block reduces wire connections and total panel components, using 50% less panel space and reducing installation time and labor by 33%.
- A 200kA withstand rating helps achieve a higher assembly short-circuit current rating (SCCR) for compliance with NEC® sections 110.10, 409.110(4), 409.22, 440.4(B), 670.3(A)(4) and 670.5.
- Optional see-through cover enhances safety with IP20 finger-safe protection, lockout/tagout capability and open circuit indication.

Wire:

- 75°C CU/AL*

* Conductors with higher temperature rating may be used, but at their 75°C ampacity.

Accessories:

- Optional IP20 finger-safe covers in indicating and non-indicating versions. Order one for each pole.
- Recommended fuses (order separately):
 - Time-delay Class J Low-Peak™ (see Data Sheet # 1007)
 - Indicating LPJ-(amp)SPI
 - Non-indicating LPJ-(amp)SP
 - Fast-acting Class J Limitron™ (see Data Sheet # 1027)
 - Non-indicating JKS-(amp)
 - High Speed Class J DFJ Drive Fuses (see Data Sheet # 1048)

Loadside view

Eaton power distribution fuse blocks are available preassembled into 1-, 2- and 3-pole versions. Individual blocks can be dovetailed together to achieve the desired number of poles. Use of covers requires ordering separately one cover for each pole.

Fuse holders and blocks

Fuse holders and blocks

Class H(K), J and R modular ferrule fuse blocks – 250 and 600V

Class H(K), J and R

Specifications

Description: HM Class H(K) JM Class J and RM Class R modular ferrule fuse blocks for fuses up to 60 amps.

These new Bussmann series fuse blocks contain multiple features that increase versatility, reduce labor and enhance safety for any panel or electrical system design.

Ratings:

- Volts Class H 250V, 600V
 Class J 600V
 Class R 250V, 600V
- Amps up to 60A
- Withstand Class J and R 200kA RMS Sym
 Class H(K) 10kA RMS Sym

Agency information:

Blocks:

- UL Listed E14853 - IZLT
- CSA Certified 47235-6225-01
- CE
- RoHS Compliant

Covers:

- UL Listed E58836 - JDVS
- CSA Certified 47235-6225-01
- RoHS Compliant

Poles:

- 1-, 2-, 3-pole units factory assembled
- Single-pole units snap together to create desired number

Flammability ratings:

- Blocks — UL 94V0, self-extinguishing
- Covers — UL 94HB, self-extinguishing

Operating and storage temperature range:

- Blocks -40°C to +120°C
- Non-Indicating covers -40°C to +120°C
- Indicating covers -20°C to +90°C*

* Indication requires minimum 90Vac/dc and closed circuit to illuminate.

Materials:

- Base — Thermoplastic
- Terminals — Tin-plated copper brass
- Covers — Thermoplastic

Features and benefits:

- Available in 1-, 2-, and 3-pole configurations to meet stocking requirements.
- To reduce inventory, assembly time and labor, modular single-pole blocks snap-together for tool-less assembly of multiple poles at point of use.
- DIN-Rail and panel mount versatility allows one product to be used for multiple applications with lower inventory cost.
- Save panel space with the smallest width dimension on the market.
- Optional see-through, IP20 finger-safe covers enhance safety with lock-out/tag-out capability.
- Optional open fuse indication on covers speeds troubleshooting.
- Easy circuit identification with available universal marker labels for blocks and covers.

Table 1. Terminals, conductors and torque values

Fuse holders and blocks

Class CC and supplemental modular ferrule fuse blocks

BCM and BMM

Specifications

Description: BCM (Class CC) and BMM (supplemental 13/32 x 1-1/2"/10x38) modular style fuse blocks with optional covers.

These new Bussmann series fuse blocks contain multiple features to add versatility, reduce labor and enhance safety of any panel design.

Ratings:

- Volts 600V
- Amps up to 30A
- Withstand 200kA RMS Sym

Agency information:

Class CC BCM Series

- UL Listed E14853 - IZLT
- CSA Certified 47235-6225-01
- CE
- RoHS Compliant

13/32" x 1-1/2" (Midget) BMM Series

- UL Recognized E14853 - IZLT2
- CSA Certified 47235-6225-01
- CE
- RoHS Compliant

Covers:

- Covers are included in the overall UL Listing/Recognition and CSA Certification
- IP20 finger-safe
- RoHS Compliant

Poles:

- 1-, 2-, 3-pole units factory assembled
- Single-pole units snap together to create desired number of poles

Flammability ratings:

Flammability ratings:

- Blocks — UL 94V0, self-extinguishing
- Covers — UL 94HB, self-extinguishing

Operating and storage temperature range:

- Blocks -40°C to +120°C
- Non indicating covers -40°C to +120°C
- Indicating covers -20°C to +90°C*

* Indication requires minimum 90Vac/dc and closed circuit to illuminate.

Materials:

- Base — Thermoplastic
- Terminals — Tin-plated bimetallic copper
- Covers — Thermoplastic
- Screws and pressure plates — Zinc-plated steel

Features and benefits:

- Available in 1-, 2- and 3-pole configurations to meet stocking requirements.
- Blocks are fully modular with a snap-together design that provides tool-less assembly of multiple pole blocks at point-of-use to reduce inventory and save assembly time and labor.
- DIN-Rail and panel mount versatility allows one product to be used for multiple applications, lowering inventory cost.
- Compact footprint consumes minimal panel space.
- Optional see-through cover enhances safety with IP20 finger-safe protection, lockout/tagout capability and open circuit indication.
- Easy circuit identification with available universal marker labels for fuse block covers.
- Tin-plated bimetallic copper fuse clips deliver superior fatigue resistance compared to traditional spring brass.
- Terminal options to meet application needs including 1/4" spade quick connect terminals for faster panel assembly.

1000Vdc modular photovoltaic ferrule fuse blocks

BPVM

Specifications

Description: BPVM modular style 1000Vdc fuse blocks for use with 10x38mm (13/32" x 1-1/2") photovoltaic fuses up to 30 amps. These new Bussmann series fuse blocks contain multiple features to add versatility, reduce labor and enhance safety of any panel design.

Ratings:

- Volts 1000Vdc
- Amps up to 30A
- Withstand 33kA

RoHS

Agency information:

Blocks:

- UL Listed E348242 - IZMR
- CSA Component Acceptance 47235-6225-01
- CE
- RoHS Compliant

Covers:

- Covers are included in the overall UL Listing and CSA Acceptance
- IP20 finger-safe
- RoHS Compliant

Poles:

- 1-, 2-pole units factory assembled
- Single-pole units snap together to create desired number of poles

Flammability ratings:

- Blocks — UL 94V0, self-extinguishing
- Covers — UL 94HB, self-extinguishing

Operating and storage temperature range:

- Blocks -40°C to +120°C
- Non-Indicating covers -40°C to +120°C
- Indicating covers -20°C to +90°C*

* Indication requires minimum 90Vac/dc and closed circuit to illuminate.

Materials:

- Base — Thermoplastic
- Terminals — Tin-plated bimetallic copper
- Covers — Thermoplastic
- Screws and pressure plates — Zinc-plated steel

Marker labels:

- Use Bussmann part number TM26CB

Features and benefits:

- Available in 1- and 2-pole configurations to meet stocking requirements.
- Blocks are fully modular with a snap-together design that provides tool-less assembly of multiple pole blocks at point-of-use to reduce inventory and save assembly time and labor.
- DIN-Rail and panel mount versatility allows one product to be used for multiple applications, lowering inventory cost.
- Compact footprint consumes minimal panel space.
- Optional see-through cover enhances safety with IP20 finger-safe protection, lockout/tagout capability and open circuit indication.
- Easy circuit identification with available universal marker labels for fuse block covers.
- Tin-plated bimetallic copper fuse clips deliver superior fatigue resistance compared to traditional spring brass.
- Listed to UL 4248-18 for photovoltaic applications

Fuse holders and blocks

Class T fuse blocks – 300V

T300

Specifications

Description: T300 (300V) fuse blocks for use with Class T fuses (Bussmann series JJN).

Dimensions: See dimensions illustrations.

Poles: 1 to 4

Ratings:

Volts: — 300Vac/dc

Amps: — $\frac{1}{2}$ - 600A

SCCR:— 200kA RMS Sym.

Agency information: CE, UL Listed UL 4248, Guide IZLT, File E14853, CSA Certified, Class 6225-01, File 47235.

Flammability rating: UL 94V0.

Features and benefits

- Provide 1-, 2- and 3-pole housing for 300Vac Class T fuses.
- Short-Circuit Current Rating of 200kA RMS Sym.
- Class T fuse blocks have a small foot print, providing substantial space savings in equipment

Typical applications

- 300Vac/dc or less control systems
- 300Vac/dc or less individual control circuits

Fuse holders and blocks

Class T fuse blocks – 600V

T600

Specifications

Description: T600 (600V) fuse blocks for use with Class T fuses (Bussmann series JJS).

Dimensions: See dimensions illustrations.

Poles: 1 to 3

Ratings:

Volts: — 600Vac/dc

Amps: — $\frac{1}{2}$ - 600A

SCCR:— 200kA RMS Sym.

Agency information: CE, UL Listed UL 4248, Guide IZLT, File E14853, CSA Certified, Class 6225-01, File 47235.

Flammability rating: UL 94V0.

Features and benefits

- Provide 1-, 2- and 3-pole housing for 600Vac Class T fuses.
- Short-Circuit Current Rating of 200kA RMS Sym.
- Class T fuse blocks have a small foot print, providing substantial space savings in equipment

Typical applications

- 600Vac/dc or less control systems
- 600Vac/dc or less individual control circuits

BH**Specifications**

Description: For use with Bussmann series high speed fuses.

Ratings:

SCCR: — 200kA RMS Sym. or fuse IR, whichever is lower.

Agency information: CE, UL Recognized, Guide EZLT2, File No. E14853 up to 700V, CSA Certified, Class 6225-01, File No. 47235 up to 700V.

BH series features and benefits

- BH fuse blocks provide a wide range of mounting configurations for Eaton high speed fuses.
- BH fuse blocks have a Short-Circuit Current Rating (SCCR) of any installed fuse up to 200kA RMS Sym.

Typical applications

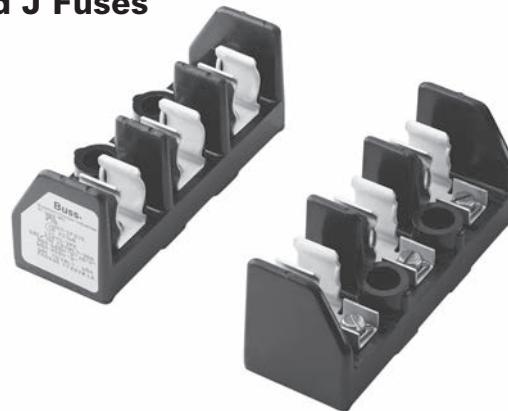

- Solid state control circuits
- VFDs
- UPS systems

Modular type fuse blocks for Class H and J Fuses**Specifications**

Description: 3-pole only, modular type fuse blocks for Class H and J fuses with standard reinforced retaining clips.

Ratings:

Volts: — 250V (0-60A see catalog numbers table)

— 600V (35-60A see catalog numbers table)

Amps: — 0-60A @ 250Vac/dc (see catalog numbers table)

— 35-60A@600V (see catalog numbers table)

SCCR: — Class J 200kA, Class H 10kA

Agency information: CE, UL Recognized, Guide IZLT2, File E14853, CSA Certified, Class 6225-01, File 47235.

Class H and J features and benefits

- H and J modular fuse blocks provide 3-pole 30 and 60 amp ratings for specific client requirements for separate line and load fuse clip configurations.

Typical applications

- Up to 60A, space confined, control circuits

Fuse holders and blocks

Box cover units for plug fuses

SOU, SRU, SSN, SSU, SOW, SRW, SSW, SOX, SRX, SSX, SOY, SRY, SSY, SSY-RL, SSY-L, STY, SCY and SOY-B

Specifications

Description: Bussmann series box covers for standard electrical boxes that provide fused outlet, fused switch or circuit fuse protection.

Ratings:

Volts: — 125V (see catalog numbers table)

Amps: — 0-15A (see catalog numbers table)

Agency information: CE, see catalog numbers table.

Features/Benefits

- Bussmann series box cover units provide a low-cost method of controlling and protecting small motors when used with Bussmann series Type T, Fusetron™, dual-element fuses.
- Provide low-cost supplementary protection and disconnection of 125V or less, single phase circuits.

Typical applications

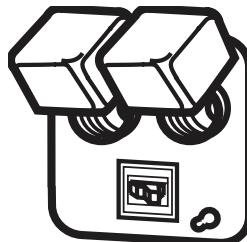

- Fractional horsepower, 125 volt single-phase motor circuits
- General 125 volt supplemental circuits

1 Switch turns power to fused load OFF or ON.

2 Switch light indicates power to load (dark when switch OFF or fuse open).

3 Double pole switch opens both sides of circuit. Can be used for two separate motors with common switch or a single motor (1/8hp, 250Vac max.).

Fuse holders and blocks

In-line fuse holders for 1/4" x 7/8" to 1 1/4" fuses

HFB and HFB-10

Specifications

Description: Water-resistant in-line fuse holder for 1/4" x 1 1/4" fuses.

Dimensions: See Dimensions illustration.

Construction: Thermoplastic rubber body with tin-plated, copper contacts.

Ratings:

Volts: — 32V

Amps: — 30A max

Catalog numbers

Catalog numbers	Description
BP/HFB-RP*	Standard pack (10-in)
BK/HFB	Bulk pack (100-in)
BK/1A2294	HFB replacement contact clip
1A2294-01	HFB-10** replacement contact clip

*HFB accepts #12 to #18 wire leads (not provided). See Data Sheet for recommended crimp tools.

**HFB-10 accepts #10 wire leads (not provided). See Data Sheet for recommended crimp tools.

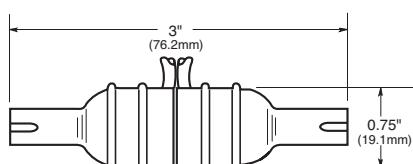

Features/benefits

- Simple assembly with one-piece thermoplastic (important information molded into body)
- High visibility yellow color for easy identification in dark or hard-to-access locations
- Ideal for shock and vibration environments; withstands many organic solvents; temperature range - 40/+150°C

Typical applications

- Supplemental, low voltage, low amperage control circuits

Dimensions - in (mm)

Data Sheet: 2102

HHB

Specifications

Description: Universal in-line fuse holder for 1/4" x 7/8", 1" and 1 1/4" fuses.

Dimensions: See dimensions illustration.

Construction: Nylon body with tin-plated, copper contacts.

Ratings:

Volts: — 32V

Amps: — 30A max

Flammability rating: UL 94V2.

Pull force: 5lbs minimum to separate fuse holder housing with fuse installed.

Features and benefits

- HHB Universal in-line fuse holder for 1/4" x 7/8", 1" and 1 1/4" fuses.

Typical applications

- Supplemental, low voltage, low amperage control circuits

Catalog numbers

† Not dual wire rated. One wire per opening.

To order:

Specify catalog symbol HEB and the loadside terminal code. Then select a lineside terminal code that is available with the loadside terminal.
Example: HEB-BB defines a non-breakaway holder with a loadside copper crimp terminal for a single #6 or two #10 wires with a lineside copper crimp terminal for a single #6 or two #10 wires.

Non-breakaway catalog number system

HEB - **A** **A**

Fuse carrier: Bayonet type

Data Sheet: 2110

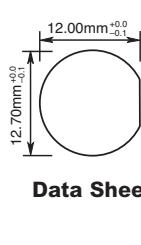

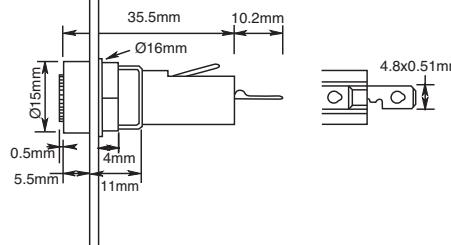

HTC-70M

Ratings:

Volts: — 250Vac

Amps: — 10A UL, 10A VDE

Fuse carrier: Bayonet type

Data Sheet: 2110

Specifications

Terminals: Tin-plated brass.

Molded materials: High temperature thermoplastic that meets the flammability ratings of UL 94V0; glow wire test: 960°C per IEC 60695-2-1.

Solderability: In accordance with IEC 68-2-20.

Agency information: cURus, VDE

Electrical: Contact resistance: ≤ 10 megohm; insulation resistance: $\geq 10M\Omega$; dielectric strength ≥ 2000 Vac.

Shock safety: PC2 (fuse holders).

Packaging: Standard qty 10 (No Prefix), bulk qty 100 (prefix catalog number with BK/).

Fuse holders and blocks

Panel mounted fuse holders for 1/4" x 1 1/4" fuses

Specifications

Terminals: Bayonet-type knob.

Vibration resistant.

For panels up to $\frac{5}{16}$ " (7.9mm) thick.

Agency information: CE (HKP, HKP-L, HKP-W, HKP-OO), UL Recognized — Guide IZLT2, File E14853, CSA Certified — Class 6225-01, File 47235

Replacement Parts: Cap: 9435-1/2

Plastic nut: BK/1A4287 (100 pieces minimum)

Metal nut: BK/1A4806-2 (100 pieces minimum)

Washer: 9732

Fuse holders and blocks

Panel mounted fuse holders for 5 x 20mm and 1/4" x 1 1/4" fuses

HTB

Specifications

Description: Fuse holders with knob-type carriers.

Dimensions: See dimensions illustrations.

Construction: High temperature, flame retardant thermoplastic; UL Component Recognized; UL 94V0; mounting nut, spacer-black polycarbonate. Terminals: tin-plated brass.

Electrical data: Insulation resistance (per IEC #257) — 10,000 ohms @ 500Vdc; contact resistance (per IEC #257) — 0.005 ohms Max @ 1A; standoff voltage (per IEC #257) — 480V/Mil @ 0.125" thickness.

Agency information: CE, UL Recognized — Guide IZLT2, File E14853, 1/4" dia fuse @ 20A, 5mm dia fuse @ 16A @ 250V, CSA — 16A @ 250V Class 6225-01 File 47235; VDE Certified: 136128, HTB-XXM, SEMKO Certification: Ref. #0146149/01, HTB-XXM.

Mounting: Withstands 15 to 20 Lb-In torque to mounting nut when mounting fuse holder to panel.

Environmental: Operating temperature range -55°C to 85°C.

Catalog Numbers	Description
4520	Integral clip and straight solder terminals
4393	Spare fuse block

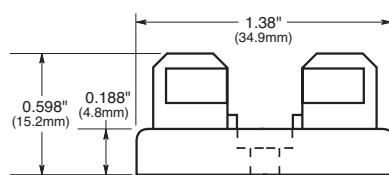

No. 4520 - Integral clip and straight solder terminals

Dimensions - in (mm)

No. 4393 - Spare fuse block

Dimensions - in (mm)

Fuse holders and blocks

Blocks for 13/32" x 1 1/2" fuses

3743

Specifications

Description: Add-on fuse blocks for 13/32" X 1 1/2" (10.3 X 38.1mm) fuses. Single pole blocks lock into each other and can be added at any time. Each has a single end barrier.

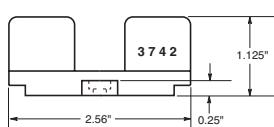

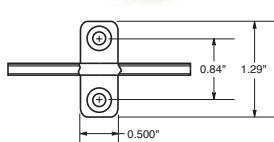

Dimensions: See dimensions illustration.

Ratings:

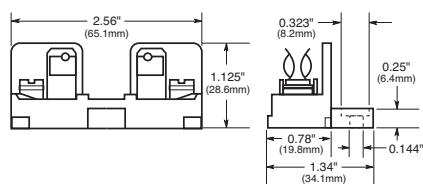

Volts: — 250Vac/dc

Amps: — 30A

Agency information: CE, UL
Recognized Guide IZLT2, File E14853.

3742—End barrier only

3723—Block and end barrier marking strip. Length is 9 3/8" (23.8cm).

Note: Mounting screw hole is 0.147" (3.7mm) dia. Counterbore, 0.636" (8mm) dia. Max. mounting screw no. 6.

3835

Specifications

Description: Multiple pole fuse blocks for 13/32" X 1 1/2" (10.3 X 38.1mm) fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 250Vac/dc

Amps: — 30A

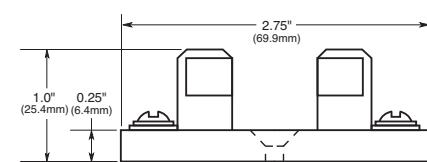

Agency information: CE

*Base length: 2 3/4" (69.9mm)

Dimensions - in (mm)

Note: Mounting screw hole diameter is 0.148" (3.7mm). Countersink, 0.313" (7.9mm). Max. mounting screw no. 6.

4421 and 4515

Specifications

Description: Single pole fuse blocks for 13/32" X 1 1/2" (10.3 X 38.1mm) fuses.

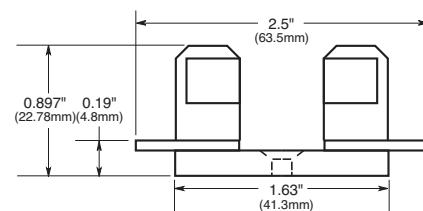

Dimensions: See dimensions illustration.

Ratings:

Volts: — 250Vac/dc (or less)

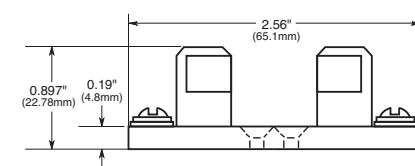

Amps: — 30A

Agency information: CE

4421—Solder terminals

Base width 5/8" (15.9mm)

4515—Screw terminals

Base width 3/4" (19mm)

Note: Mounting screw hole diameter is 0.147" (3.7mm). Countersink, 0.312" (7.9mm). Max. mounting screw no. 6.

NDNF1-WH**Specifications**

Description: Fuse holding rail mount terminal block.

Circuit jumper: JF1,
2 circuits

Fuse size: $\frac{13}{32}$ " X $1\frac{1}{2}$ "
(KTK, FNQ, PVM).

Poles: 1

Wire range: AWG #8-22 Cu.

Ratings:

Volts: — 600V

Amps: — 30A

Mounting options: 35mm DIN-Rail, C-rail

Fuse pullers: • PF1 (standard)
• LPF1 (lighted neon or incandescent bulb)

Torque rating: 18 lb-in

Operating temperature: 105°C

Catalog numbers

Catalog number	Color
NDNF1-WH	White

Lighted neon or incandescent lamp:

Catalog number	Voltage
LPF1-24	24
LPF1-120	120
LPF1-120-C	120
LPF1-220	220
LPF1-440	440

**NDNLFD1-WH****Specifications**

Description: Rail mount fuse holder.

Circuit jumper: JF1,
2 circuits.

Fuse Size: $\frac{1}{4}$ " X $1\frac{1}{4}$ "
(Bussmann series AGC,
MDL or equivalent).

Poles: 1

Wire range: AWG #8-22 Cu.

Ratings:

Volts: — 600V

Amps: — 30A (NDND1 non-fused)

— 15A (NDNFD1, 600V/CSA, fused)

— 15A (NDNLFD1*fused, indicating)

*WH24 - 24V White, WH-90Vdc-600Vdc, 115Vac-600Vac White

**Agency information:** CE

Mounting options: 35mm DIN-Rail, C-rail

Marking tape: MT12-1-2

Torque rating: 18 lb-in

Operating temperature: 105°C

Agency information: CSA File 15364

Power distribution
and terminal blocks

Simplify your panel design by combining circuit protection and power distribution.

The Bussmann series Class J power distribution fuse blocks are available from 100 to 400 amps with up to six dual wire rated loadside terminals and a high 200kA withstand rating. See page 9-22 for details.

Short-circuit current rated power distribution blocks

Eaton offers three distinctly different styles of short-circuit current rated power distribution blocks (PDBs) and power terminal blocks (PTBs) to match different application needs. The differences are whether the power distribution blocks are enclosed or not, and whether they are UL 1953 Listed PDBs or UL 1059 Recognized PTBs, which have different minimum spacing requirements. The table on this page can assist in the selection of the right series for your application requirements.

Why these are important

Equipment short-circuit current ratings (SCCRs) are now required in the 2011 NEC® and UL 508A Listed Industrial

Control Panels. Marking the SCCR on Industrial Control Panels (NEC® 409.110), Industrial Machinery Electrical Panels (NEC® 607.3(A)), and HVAC equipment (NEC® 440.4(B)) is required by the National Electrical Code. PDBs or PTBs not marked with a SCCR, typically are the weakest link and may limit an assembly to no more than 10kA SCCR. The PDBFS and PDB have increased spacing required where used in feeder circuits in equipment listed to UL508A (UL1059 PTBs must be evaluated for proper spacings). Also, for building wiring systems, the PDBFS and PDB power distribution blocks can be used to meet the new 2013 NEC® requirements in section 376.56(B) for PDBs in wireways.

Selection table

Description	Catalog page	UL	Enclosed	High SCCR*	Spacing** 1" air 2" surface	Industrial control panels UL 508A branch circuit	Industrial control panels UL 508A feeder circuit	HVAC UL 1995	Wireways NEC® 376.56(B) (requires UL 1953)
Series PDBFS	325	UL 1953 Listed	Yes [†]	Yes	Yes	Yes	Yes	Yes	Yes
Series PDB	326	UL 1953 Listed	No***	Yes	Yes	Yes	Yes	Yes	Yes w/optional cover

[†]IP20 Finger-safe under specific conditions, see datasheet 1149.

*When protected by proper fuse class with maximum ampere rating specified or less.

See **PDB spacing requirements for equipment table below.

***Optional covers are available. Not IP20, but provide a safety benefit.

****No, except: Yes, if single pole units installed with proper spacings.

PDB and PTB minimum spacing requirements for equipment

UL Standard	Spacing between live parts of opposite polarity		Spacing between live parts and grounded parts or enclosure @600V
	Through air @600V	Over surface @600V	
508A feeder circuits	1"	2"	1"
508A branch circuits	3/8"	1/2"	1/2"
1995 HVAC	3/8"	1/2"	1/2"

Note: Refer to specific UL standards for complete spacing details.

Feature/benefits

- Enclosed, safer installation; IP20 finger-safe under specific conditions
- High short-circuit current ratings up to 200kA: PDBs do not have to be the weak link in achieving high SCCR for an industrial control panel
- Small footprint saves panel space
- Listed to UL 1953 which has minimum spacing requirements at 600V of at least 1" through air and 2" over surface required for feeders in UL 508A Industrial Control Panels
- For 2D CAD drawings visit Eaton.com/bussmannseries

**Agency/standards**

- UL Listed 1953, Guide QPQS, File E256146
- CSA Certified, Class 6228-01, File 47235
- IEC 60947-7-1
- IEC 60529, IP20 (finger-safe) under specific wiring conditions

Electrical

- 600Vac/dc (UL 1953), 690Vac/dc (IEC)
- IP20 finger-safe under specific conditions
- Short-circuit current ratings up to 200kA, see table
- Ampacities up to 760 amps
- Cu/Al wire range 14 AWG to 500 kcmil or 2.5 to 240 mm²

Mechanical

- DIN-Rail or panel mount; PDBFS330 and PDBFS504 panel mount only
- Captive termination screws; screws do not get misplaced
- Wire ready: captive termination screws shipped backed out to save time on conductor installations
- Sliding DIN-Rail latch for easy mounting
- Single pole, gang mountable for multiple pole applications with interlocking dovetail accessory (optional)
- Flammability, UL 94V0
- Tin-plated Al connectors suitable for Cu/Al conductors
- Elongated hole for panel mounting; easier mounting with greater flexibility in matching up with drilled panel holes
- Part 2A1279: Interlocking dovetail pin accessory One pin interlocks two units, two pins to interlock three units
- DIN-Rail end anchors required to prevent damage to block when torquing

Ampacities 75°C per NEC® Table 310.16 and UL508A Table 28.1

*Class L 800A (KRP-C 800_SP) or less fuses suitable for this particular SCCR case.

** Class G 60A (SC-60) or less or Class CC 30A (LP-CC-30, FNQ-R-30, KTK-R-30) or less are suitable for all SCRRs in this table.

**Feature/benefits**

- High short-circuit current ratings up to 200kA. These PDBs do not have to be the weak link in achieving high SCCR for an industrial control panel
- Listed to UL 1953 which has minimum spacing requirements at 600V of at least 1" through air and 2" over surface required for feeder in UL 508A Industrial Control Panels
- For 2D CAD drawings visit Eaton.com/bussmannseries

Agency/standards

- UL Listed 1953, Guide QPQS, File E256146

Electrical

- 600Vac/dc (UL 1953)
- Short-circuit current ratings up to 200kA, see table
- Wire range 14 AWG to 350 kcmil Cu/Al
- Spacing between uninsulated opposite polarities or ground meets UL 1953 which requires at least 1" through air and 2" over surface
- Ratings available with circuit breakers

Mechanical

- Panel mount
- Flammability, UL 94V0
- Tin-plated Al connectors suitable for Cu/Al conductors

Optional covers

Covers are ordered for each individual pole, i.e., three 1-pole covers for 3-pole block, see table A. Except PDB321 blocks have one cover for 1-, 2- or 3-pole versions, see table B.

Table A

Block	Cover
PDB2XX-(pole):	CPB162-1
PDB3XX-(pole):	CPDB-1

Table B

Block	Cover
PDB321-1	CPDB-1
PDB321-2	CPDB-2
PDB321-3	CPDB-3

Ordering information

163 blocks are available in 1-, 2- or 3-poles. To order: basic catalog number + number of poles.

Examples: 16301-1 = one-pole block

16301-3 = three-pole block

11675**Specifications**

Description: Screw connection line side, (3) 0.250" quick-connect load side power terminal block.

Poles:

2- to 12-poles.

Wire range:

8 – 14 AWG Cu.

Ratings:

Volts: — 250Vac/dc

Amps: — Up to 40A

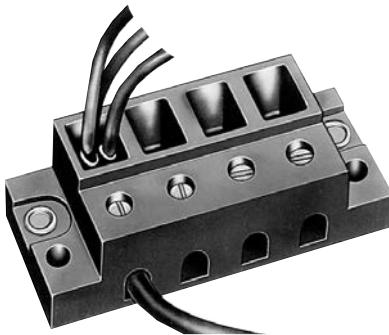

SCCR: — 10kA per UL 508A table SB4.1

Agency information: CE, Guide XCFR2, UL E62622; CSA 47235.

Torque rating: 9 lb-in max.

Tool							

**DP**

The DP features a generous design allowing for more wiring space and access. Additionally, this series features a larger wire contact area and larger conducting elements. Accessories include marking labels, partition plates, side insertion bridge and top screw-on bridge for improved reliability. Comes with matching shaped grounding blocks. Designed for 35mm DIN and 32mm G-Type rails.

IEC60947-7 and UL1059 compliant.

Internally jumpered (DDNS) and test blocks (DTST2)

**DDNS**

The DDNS10 is an internally jumpered terminal block. Internally jumpered double-level terminal blocks provide high-density power distribution in 3-in/1-out or 2-in/2-out or 1-in/3-out options with a single block. Add top and side insertion bridges to achieve any connection topology. IEC60947-7 and UL1059 compliant.

**Cut to length. Consult Eaton's Bussmann Division for details.

**Description**

- Pen is installed manually
- USB interface to PC
- 110-240Vac power supply
- WINDOWS® Operation System

System kit Includes:

- Plotter pens
- Support plate
- Software
- Plotter
- Power supplies
- USB Cable

Description

Support plate adjustable to accommodate various sizes of marking labels. The support plate is universal and suitable for TM2xCB marking label series.

Each plotter set includes one support plate, additional plates are available separately.

Description

Disposable black ink cartridge pen.
Single pen per pack.

TM28CB - mm

**NDN**

The NDN features a compact line of rail-mounted terminal blocks suitable for both 35mm DIN-Rail or C-Rail applications. Products easily snap onto the mounting rail for a quick, simple, low-cost solution. Available accessories include jumpers and marking tape.

**C-Rail**

C-Rail terminal blocks provide a low-profile, compact foot-print solution for various wire connection applications. Products feature an easy, snap-on installation method and an array of accessories including jumpers and marking strips.

Depluggable blocks

Depluggable terminal blocks are available for both 35mm DIN-Rail and C-Rail applications. These blocks provide a simple depluggable* option for panel wiring applications with the convenience of quick, easy, snap-on installation. Product accessories, such as jumpers and marking tape, are available for most products.

*The KT4 products are designed to be nested together to form one string of circuit connections. When used in series, order part numbers KT4-WH-A and KT4-WH-B.

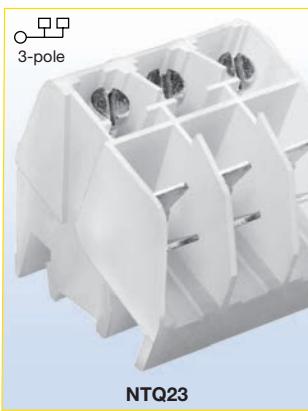

Quick connect blocks

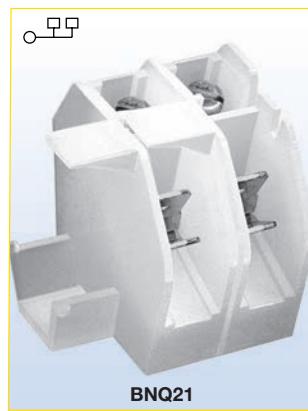

For a time saving alternative for electrical connections, the Cooper Bussmann quick connect terminal blocks offer a convenient solution. With male spade terminals, wire connections are made quickly and simply with these terminal blocks. Products are offered for C-Rail and panel mount applications.

Hardware options

Quick connects – assembled: TB300 only. Terminals 0.25" x 0.031". Maximum current rating 20 amps. For other orientations, contact Eaton.

Quick connects – bulk: (*TB300 only) minimum order per part number. – 100 pieces.

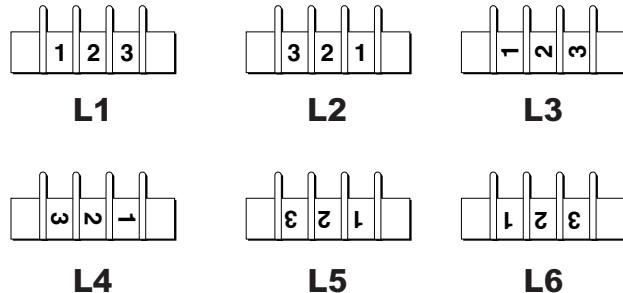

Jumpers – bulk: minimum order per part number – 100 pieces. Contact Eaton for jumper assembly.

Standard marking

Standard markings are applied directly to the side(s) of a block. The standard marking color is white. The standard numeral height is 0.125 inches (3.17mm).

Note: Blocks marked on both sides require a different code for each side. Example: Style L1 on one side of the block requires Style L2 on the other side to ensure common terminal marking. To order, add appropriate suffix (L1, L2, L3, L4, L5 and/or L6) to block catalog number in the proper sequence.

Special marking

Special markings are available at an additional charge. Drawing(s) must be submitted to ensure accuracy of part required. Consult Eaton for price and delivery.

Note: Marking is not available on TB400 products

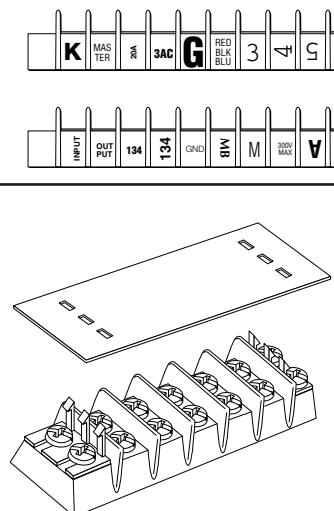

Connectors

Covers

Covers prevent personnel, screws and foreign items from contacting live terminals, and are available in white or clear plastic. Two cover clips are supplied with each cover. The cover width is 1.31 inches (33.3mm).

All covers must be ordered separately.

Example: 10 position cover, white, TB100 = catalog number **X12010**.

Top and bottom marking strips for double row terminal blocks

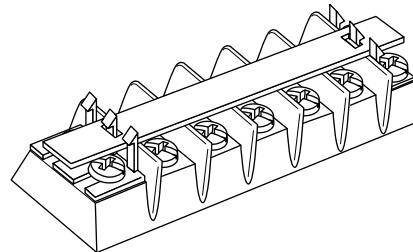

Top marker strips

Top mounting marker strips are available in white (opaque) plastic. Two cover clips are supplied with each marker strip.

All top marker strips must be ordered separately.

Example: 12 position cover, TB200, 0.032" x 0.312" = catalog number **X20312**.

Example: 12 position cover, TB200HB, 0.06" x 0.50" = catalog number **X23312HB**.

	303 - TB300 and TB345 (0.032 thk x 0.380 w)		

Note: Marking strips are not available on TB400 products

Bottom marker strips

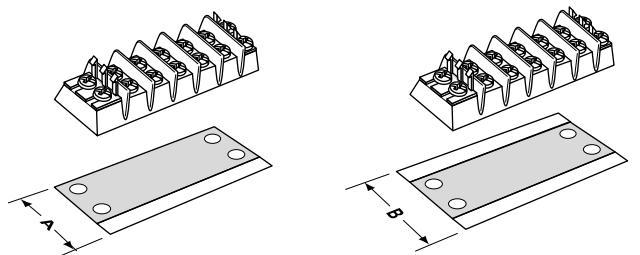

Bottom mounting marker strips are made of black PVC, 0.030" thick. Space is available to handle most marking situations. All marker strips must be ordered separately.

To order, specify part number and required marking orientation: (BF) bottom forward, (BR) bottom reverse, (TF) top forward, or (TR) top reverse. Consult factory for specials.

Example: 13 position strip, TB100 with no markings, space for marking one side = catalog number **X10513**.

Standard numeral height is 0.125". Standard markings are 0-99. Special markings are available on special order.

Drawing(s) must be submitted to ensure accuracy of part required.

C7021**Specifications**

Description: Power feed through terminal block with two rows 1/4-20 studs capable of accommodating the industry standard two-hole compression lugs on both studs in parallel.

**Ratings:**

Volts: — 300V

Amps: — 115/175A* per pole

Center spacing: 0.690" (17.5mm).

Wire range: AWG #3/0-8.

Poles: 1- to 6-poles.

Bolt Hole Spacing: 0.625" or $\frac{5}{8}$ " (15.88mm).

Stud: Standard 1/4-20 stud (tin-plated brass) or optional M6 stud.

Mounting: #6 thread cutting screws (not included) or optional mounting ears.

Torque rating: 36 lb-in.

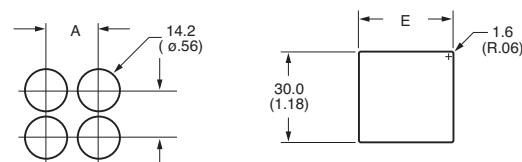

Operating temperature: 130°C.

Agency information: UL/CSA; CE Certified.

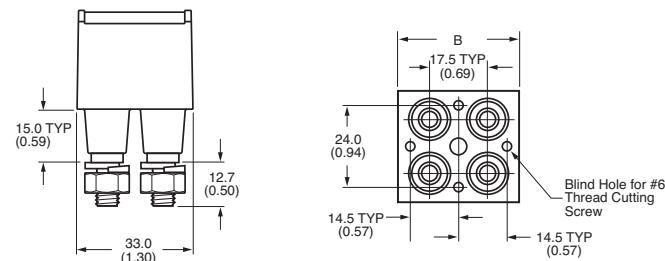

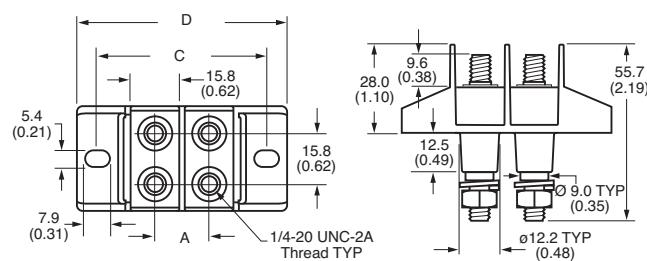

*175 achieved using both studs in parallel, 115A using a single stud per line.

Typical applications

- Applications requiring up to 175A utilizing a 2-hole compression lug on $\frac{5}{8}$ " centers
- Input/output block for telecommunications power panels
- Use to eliminate busbars

Specifications

Agency information

- CE compliant
- RoHS compliant
- For Class CC fuse versions
 - UL 98 Listed, File E302370, Guide WHTY
 - cULus to CSA Standard 22.2 No. 4-04, File 302370, Guide WHTY7
- For UL midget and 10X38 IEC fuse versions
 - UL 508 Listed, File E320230, Guide NRNT
 - cULus Certified 22.2 No. 14-05
 - IEC 60947-3 AC23A
 - IEC 60947-3 DC23A

Terminals

- Single/dual conductor box lug or spade terminal suitable for line, load or accessory connection

Torque

- 18-10AWG 20 Lb-In
- 8-4AWG 35 Lb-In

Storage and operating temperature

- 20°C to 75°C*

* For fuse performance under or above 25°C, consult fuse performance derating charts in the Eaton publication titled *Selecting Protective Devices (SPD)*, reorder #3002.

Flammability rating

- UL 94V0

Lockout/tagout provisions

- 4mm shank lock or Brady pin-out device, Part number 90850

Mounting

- 35mm DIN-Rail

Local open fuse indication minimum voltage**

- 90Vac for AC versions
- 12Vdc for DC versions

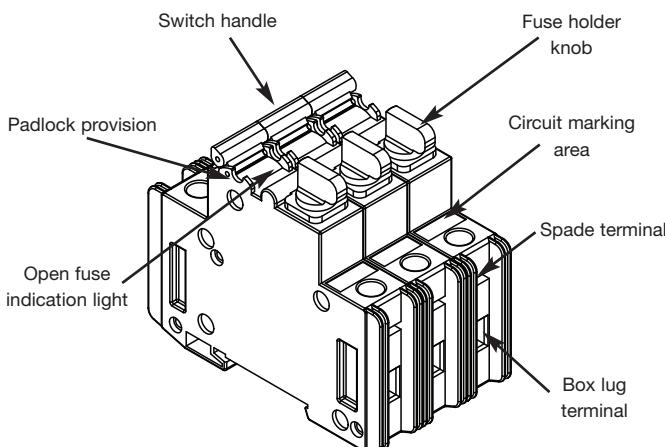

** Open fuse indication requires an open fuse to be in the CCP and the switch in the ON position.

Features

- IP20 Finger-safe construction with #10 or larger wire
- Switch interlock prohibits removing the fuse under load

Accessories

- Auxiliary contacts
- PLC wired remote fuse indication

Catalog symbol:

CCPLP-(poles)-(amps)-(terminal)

Description:

The revolutionary Bussmann® series Low Profile Compact Circuit Protector (CCPLP) fused disconnect switch is available in 1-, 2- and 3-pole versions for UL Class CC (1/10-30A), Class G (20A), 13/32" x 1-1/2" midget UL (1/10-30A) and IEC 10x38 aM/gG (0.16-32A) fuses.

The CCPLP has the smallest footprint of any UL 98 Listed fused disconnect switch along with up to a 200kA SCCR to help improve equipment SCCR.

Class CC and G versions are easily selectively coordinated with upstream CUBEFuses™ using published fuse ampacity ratio tables.

Unique panel mounting permits easy integration into many panel designs and provides a high SCCR alternative to low profile circuit breakers on the market.

Specifications:

Ratings

Frequency - 50/60Hz

Impulse voltage - 8kV

Volts - 600Vac (Class CC up to 30A, Class G 20A)
- 550Vac (10x38 IEC Class aM 0.16-16A)
- 500Vac (10x38 IEC Class gG 0.5-25A)
- 400Vac (10x38 IEC Class aM 20-32A, gG 32A)
- 240Vac (13/32" x 1-1/2" midget UL 30A)

Amps - Up to 30A (UL)
- Up to 32A (IEC)

SCCR - 200kA (Class CC)
- 120kA (10x38 IEC Class gG and aM)
- 100kA (Class G)
- 10kA (13/32" x 1-1/2" midget UL)

Poles

- 1-, 2- and 3-pole factory configured
- 2- and 3-pole versions feature ganged switches and phase barriers.

Data Sheet: 10372

Agency information

- Finger-safe IP20 from panel front
- CE compliant
- RoHS compliant
- For Class G fuse versions
 - UL 98 Listed, Guide WHTY
 - IEC 60947-3 AC-23A
- For Class CC fuse versions
 - UL 98 Listed, Guide WHTY
 - cULus to CSA Standard 22.2 No. 4-04, File 302370, Guide WHTY7
 - IEC 60947-3 AC-23A
- For UL midget and 10x38 IEC fuse versions
 - cULus Listed to CSA 22.2 No. 14-05
 - UL 508 Listed, File E230230, Guide NRNT
 - IEC 60947-3 AC-23A

Terminals and conductors 75°C/90°C Cu

- Screw terminal - #10-32 phil-slot screw with external tooth lock washer — use with properly rated/UL Listed ring or fork terminal
- Pressure plate terminal - #10-32 phil-slot screw — single 22-6AWG solid or stranded

Terminal screw torque

- 20 Lb-In (2.2 N•m)

Mounting

- Front panel mounting with customer supplied M3 screws
- Mounting screw torque 4-5 Lb-In (0.4-0.5 N•m)

Open fuse indication*

- Local open fuse indication provided by a orange neon lamp on each pole, minimum voltage 90Vac
- * Open fuse indication requires an energized, closed circuit with an open fuse in the CCPLP and the switch in the ON position.

Ambient storage and operating temperature

- -20°C to 90°C, 85% relative humidity non-condensing

Flammability rating

- UL 94 V2

Lockout/tagout provisions

- Brady pin-out device, P/N 90844

Circuit labeling provisions

- Accepts up to two universal marker labels (P/N TM26CB)

Carton quantity

- 12 poles (1-pole: 12 units, 2-pole: 6 units, 3-pole: 4 units)

Minimum enclosure size

- 6"x6"x4" per UL 98 Listing

RoHS

The revolutionary Eaton CCPB with CUBEFuse™ is designed as a fused branch circuit disconnect with fuse holder for the Bussmann series Quik-Spec™ Coordination Panelboard. The CCPB with CUBEFuse simplifies selective coordination and allows for isolation of individual branch circuit loads for safe work practices.

Product features and benefits

- Uses finger-safe Class CF Low-Peak™ CUBEFuse with current-limiting, time-delay Class J performance*
- High short-circuit current ratings at 200kA
- Disconnect rated to provide means for load isolation
- Full voltage rated at 600Vac
- UL 98 Listed and suitable for branch circuit disconnect and branch circuit protection
- 1-, 2- and 3-pole versions are horsepower rated
- Patented rejection feature helps prevent overfusing
- Complies with UL and cULUs
- Open fuse indication light per pole
- Additional open fuse indication can be provided by using the indicating CUBEFuse version
- Built-in switch/fuse interlock prohibits removing the fuse while energized
- Permanent lockout/tagout provisions

*See data sheet 9000 for CUBEFuse specifications.

**For fuse performance under or above 25°C, consult fuse performance derating charts.

Specifications:

- CCPB ampacity rejection breaks: 15A, 20A, 30A, 40A, 50A, 60A, 70A, 90A and 100A.
- 1-, 2- and 3-pole versions
- For systems 600Vac (or less)
- Box lug loadside terminal:
 - 18-6AWG single & dual rated, solid or stranded – 75°C, Cu only
 - 4AWG single – 75°C, Cu only
- Box lug loadside terminal torque: 18-10AWG 20 Lb-In (2.2 N·m), 8-4AWG 35 Lb-In (3.9 N·m)
- Spade terminal load connection:
 - Max. 30A suitable for use with #8-32UNC screw
- Bolt-on style bus connector, #10-32-UNC Hex flange Phillips screw, torque to 25 Lb-In (2.8N·m)
- Lockout/tagout: 4mm shank lock
- Bolt-mounted design into Quik-Spec Coordination Panelboard bus
- Local indication: illumination requires closed circuit and minimum 90Vac operating voltage
- RoHS compliant

*1A and 3A indicating CUBEFuse not available. Correct fit with CCPB disconnect requires indicating CUBEFuse with date code R38 or later.

**Any fuse with an amp rating less than or equal to the max fuse rating may be used. Example: TCF15 may be used with CCPB-1-20CF.

***Do not use UPS/Critical Application fast-acting CF with motors.

†Up to 80 amps. >80A rated 24Vdc.

Description

Bussmann series UL 98 and UL 489 fused disconnect switches “break” and “make” power circuits ON and OFF load.

The switches employ double break contacts per pole that help ensure complete isolation of the fuse when the switch is in the “OFF” position.

Features

- Make and break power under load
- Double break by pole
- DIN-Rail or panel mount (30-100A)
- Up to 200kA short-circuit current rating
- Finger-safe covers
- Compact footprints available
- Defeatable handles automatically re-latch when the panel door is closed
- Most disconnect switches are front, right side, flange or direct handle operable
- NFPA 79 compliant handle kits

Agency information

- UL 98, Guide WHTY, File E155130
- UL 489, Guide WJAZ, File E359801
- CSA 22.2 No. 4, File 257020
- Conforms with IEC 60947-3
- NFPA 79 (2002 Edition)

Disconnect switches

UL 98 non-fused rotary disconnect switches—30 to 1200A

Description

Eaton UL 98 non-fused rotary disconnect switches are versatile switches that “break” and “make” power circuits ON and OFF load.

Features

- Make and break power under load
- Up to 200kA SCCR
- Panel mount (30-100A compact DIN-Rail or panel mount)
- Disconnect switches are front, right side and direct handle operable (30-100A)
- Finger-safe (30-100A compact only)
- Fully visualized breaking (100-1200A)

Agency information

- UL98, Guide WHTY, File E155130
- CSA 22.2 No. 4, File 257020
- Conforms with IEC 60947-3

Online resources

(1) A/B: Category with index A = frequent operation; category with index B = infrequent operation.

(2) The power value is given for information only; the current values vary from one manufacturer to another.

(3) For a rated operating voltage, U_e = 400Vac.

Disconnect switches

UL 98 non-fused rotary disconnect switches—30, 60 and compact 100A

and ...				
Accessories	Terminal shrouds - includes terminal shroud for both lineside and loadside			
	Switch amp rating	Number of poles	Location on switch	
	All switches	1 (For switched 4 th pole)	Lineside and loadside	
Shrouds	All switches	3	Lineside and loadside	TSH3-3TB
and ...				
Sw. 4 th pole	Switched 4 th Pole - converts 3-pole switch to 4-pole			
	Switch amp rating		Part number	
	30		POLE98-30	
	60		POLE98-60	
	100		POLE98-100	

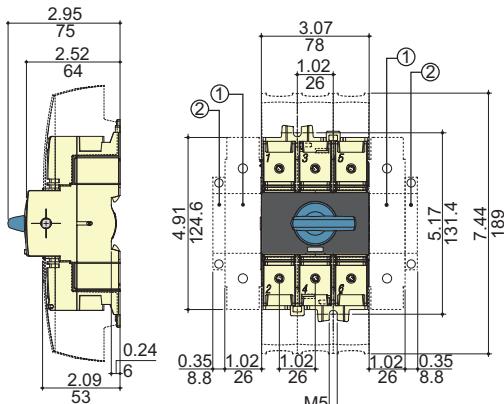

Auxiliary contact configurations

Possible 4th pole configurations

Dimensions - in (mm)

Direct handle operation

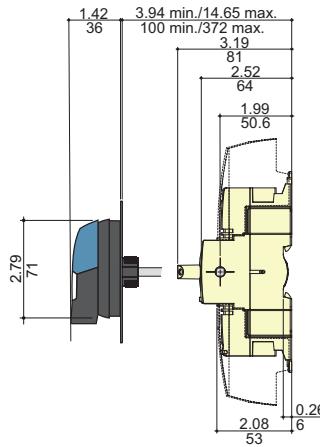

1. Position for 1 switched 4th pole (1 per device max.) or 1 auxiliary contact.

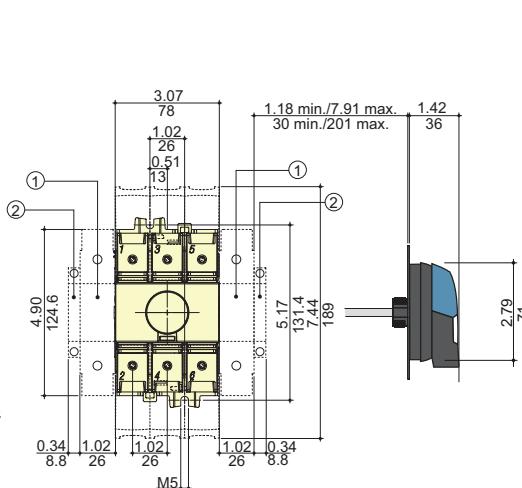

2. Position for 1 auxiliary contact only.

Note: Maximum of 4 Auxiliary contacts, or 3 Auxiliary contacts + one switched 4th pole.

External front operation

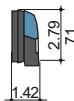

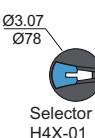

External right side operation

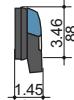

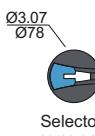

External front/right side operated selector handle, front operated pistol handle

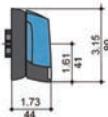

Handle type

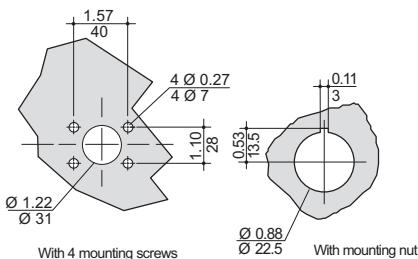

Direction of front operation

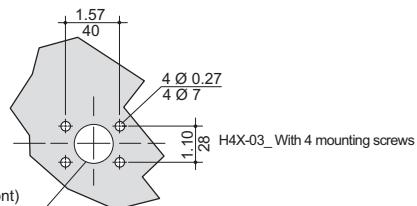

Direction of right side operation

Door drilling layouts

With 4 mounting screws

H4X-03_ With 4 mounting screws

For a complete assembly, please select:

Description

Eaton UL 508 load break disconnect switches allow safe control and safe disconnection of any motor application or to isolate a circuit within the panel.

These disconnect switches are compact and offer a wide variety of accessories like 4th poles, Auxiliary contacts, door mounting and 6/8-Pole kits.

Features

- Suitable as motor disconnect
- DIN-Rail or panel mount
- Door mount option
- Disconnect switches are front, right side or direct handle operable
- Finger-safe

Agency information

- UL508, Guide NLRV, File E155129
- CSA C22.2 No. 14, File 257020
- Conforms with IEC 60947-3

		6-pole conversion kit - creates a 6-pole switch by ganging two 3-pole switches of equal rating					Part number
		Switch amp rating					
Accessories		All switches					KIT-6POLE*
		* Kit ships with a direct handle. If external handle is needed order a selector handle <i>and</i> shaft for the UL 508 Rotary Disconnect Switches.					
		Note: To create an 8-pole switch from 16 to 40 amp switches, use two 3-pole switches of equal ratings plus two switched 4 th poles (part # POLE-40).					

Auxiliary contact configurations

Dimensions – in (mm)

Direct handle operation

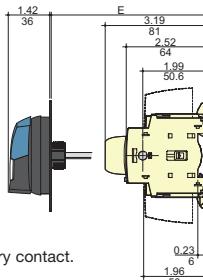

1. Position for 1 switched 4th pole (1 per device max.), or ground or neutral module (2 per device max.) or 1 auxiliary contact.

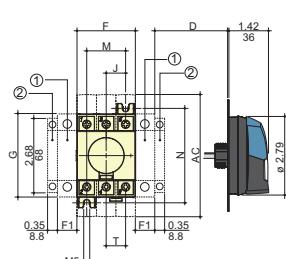

2. Position for 1 auxiliary contact only.

Note: Maximum of 4 Auxiliary contacts, or 3 Auxiliary contacts + one ground or neutral module, or one switched 4th pole.

External front operation

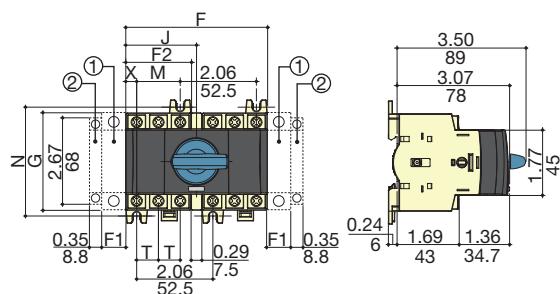

External side operation

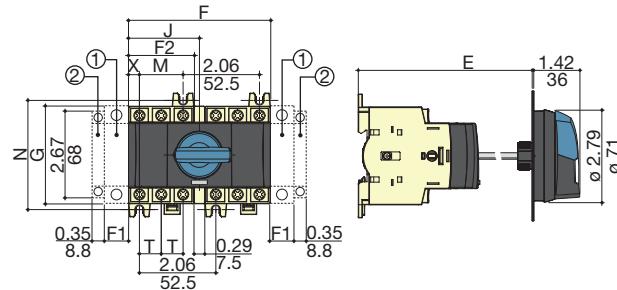

Switch rating (A)	Overall dimensions				Terminal shroud AC	Switch body				Switch mounting M	Switch mounting N	Connection T

Description

Fused and non-fused enclosed rotary disconnect switches from 16 to 1200A in NEMA 1, 3R, 4, 4X, 12 enclosures.

Features

- UL 98 Listed for general purpose, main disconnect, or branch circuit protection up to 600Vac/dc
- UL 508 Listed for motor disconnect applications up to 600Vac
- Multiple field installed accessories enhance the enclosed disconnect switches to fit the desired application
- Lockout/tagout: Up to three 1/4" shank padlocks can be installed on external handles

Ratings:

- Volts: 600Vac
250-600Vdc*
- Amps: 16-1200A
- Short-circuit current ratings: UL 98: 25kA-200kA
 UL 508: 10kA-65kA

*Some non-fused disconnect switches are not rated for DC applications.

Specifications

- Operating temperature: -20°C to 70°C
- 4X plastic enclosure flammability rating:
Polycarbonate UL 94-5VA-0
Fiberglass UL 94-5V

Agency information

- UL 98 Listed: File E182262, Guide WIAX, WIAX7
- UL 508 Listed: File E155129, Guide NLRV, NLRV7
- cULus Listed to CSA Standard 22.2, No. 14
- cULus Listed to CSA Standard 22.2, No. 4
- Conforms with IEC 60947-3
- CE compliant
- RoHS compliant

Field installed accessories

- Auxiliary contacts
- Terminal shrouds
- Switched 4th pole (UL 508 only)

15149**Specifications****Description:** Fused, dead front disconnect switches**Ratings:**

Volts: — 600Vac

Amps: — 30A

SCCR: — 200kA RMS Sym.

Dielectric voltage: 2200V**Motor rating:** 5Hp**Poles:** 2 to 3

Agency information: UL Recognized, file E120756 for General Industrial installations. Guide WGEU2. CSA certified, file LR37129-6. Examined under the new proposed standard UL 1429 which imparts a stricter set of test conditions than the former program that combined the applicable portions for UL 512 (fuse holders) and UL 98 (enclosed switches).

**Features and benefits**

- Fuse holders in the pull-out head eliminate possibility of electric shock while changing fuse.
- Accepts Class J fuses

Ordering information

To order, specify: 15149 + number of poles.
Example: 15149-2 = 2-pole device.

TPC and TPCDS

Specifications Descriptions:

— **TPC:** Telepower compact current-limiting fuses.

— **TPCDS:** Telepower compact fused disconnect

switch available in two disconnect switch profiles in addition to a variety of terminal styles. Recommended 0.75" center-to-center product spacing.

Dimensions: See Data Sheet 5023.

Ratings:

Volts: — 80Vdc

Amps: — 3-125A (see catalog numbers table for details)

IR: — 100kA

Agency information: CE, UL Recognized (investigated to UL 1801) as a disconnect switch for the interruption of load current by means of withdrawing the fuse pullout.

Recognized to US and Canadian requirements under the component recognition program of Underwriters Laboratories Inc. Files E219046 and E56412.

Flammability ratings: Fuse UL 94V0, 170°C RTI, Housing UL 94V0, 120°C RTI.

Typical applications

- Telecommunications DC power circuit protection
- Replacement of DC telecom circuit breakers
- Applications where venting of arc or molten metals and gases during opening would pose a problem to surrounding devices

Features and benefits

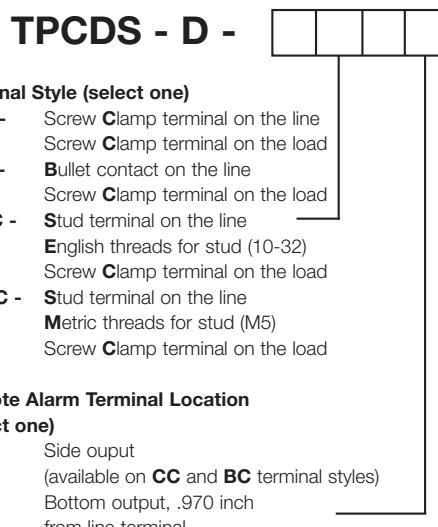

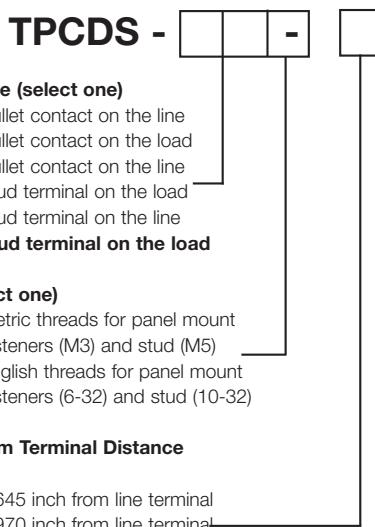

- Highest interrupting rating (100kA) available and complete system coordination for DC circuit protection for compact footprint providing a superior protection solution for replacement of existing DC telecom circuit breakers
- AmpColor ID™ System makes fuse replacement easy
- Local and remote open fuse indication. Local alarm indication provided by LED on TPC fuse
- Remote alarm terminal available in three positions common to DC circuit protection devices

TPM and TPMDS

Specifications

Description:

— **TPM:**
Telepower
miniature current-
limiting fuses.

— **TPMDS:**
Telepower
miniature fused
disconnect switch.

Dimensions: See Data Sheet 5022.

Ratings:

Volts: — 80Vdc

Amps: — 3-30A

IR: — 20kA

Agency information: CE, UL Recognized (investigated to UL 1801) as a disconnect switch for the interruption of load current by means of withdrawing the fuse pullout.

Recognized to US and Canadian requirements under the component recognition program of Underwriters Laboratories Inc. Files E219046 and E56412.

Flammability ratings: Fuse UL 94V0, 170°C RTI; Switch UL 94V0, 140°C RTI.

Features and benefits

- Smallest and most versatile fused disconnect switch available allowing for assembly into 1 U (1.75"/44.5mm) panel. Easy to connect; Load: $\frac{1}{4}$ " quick-connect or bolted connection with 10-32 (M5) captive nut, Line: $\frac{1}{4}$ " quick-connect or screw connection with clearance hole for #10 (M5) bolt.
- AmpColor ID™ System makes fuse replacement easy
- Switch design provides for easy panel mounting by single captive 4-40 (M3) nut and panel notch integral to switch footprint.
- Complete system coordination capability with local and remote open fuse indication. Local alarm indication provided by LED on TPM fuse (maximum alarm circuit current: 20mA)

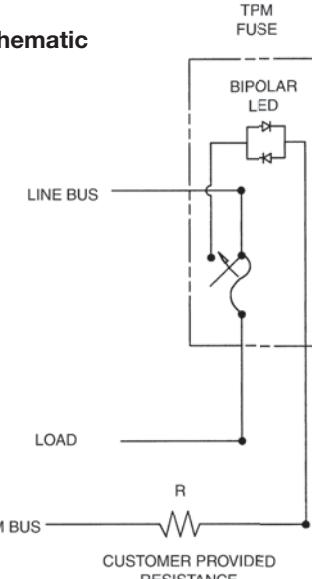

Typical applications

- Telecommunications DC power circuit protection
- Applications with restricted space, or mounting in 1 U panels

TPM alarm schematic

Notes:

1. The resistance, R, must be provided by the end-user to limit the alarm output current to a maximum of 20mA. The value, R, should be calculated using the system voltage value.
 - If remote alarm functionality is not required, the END-USER CIRCUITRY must still be supplied to provide a resistive path to the return for the local alarm to properly function.
2. The fuse is polarized to maintain proper orientation with the switch housing. The line and load terminals are identified on the switch housing.

TP15900-4**Specifications**

Description: 4-pole disconnect switch for use with Telepower fuses Type TPA and TPA-B.

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 145Vdc@40A per pole

— 80Vdc@50A per pole

Agency information: CE, UL Recognized File E97649 as a disconnect switch for interruption of load current by means of withdrawing the fuse carrier. UL Recognized as a component for telecommunication power distribution equipment (UL category QPQY2). UL Recognized fuses for branch circuit protection. CSA Component Acceptance for the system.

Flammability rating: UL 94V0, 140°C.

Features and benefits

- Ease of installation - connection directly to busbar, reduces external wiring per pole. Rear accessibility for line and load terminations
- LED alarm signaling (LED current 30mA max)
- Local and remote open-fuse indication along with fuse orientation rejection feature and fuse presence indication
- Alarm test probe point, to allow on-site checking of alarm circuitry

Typical applications

- Telecommunications DC power circuit protection

Catalog numbers

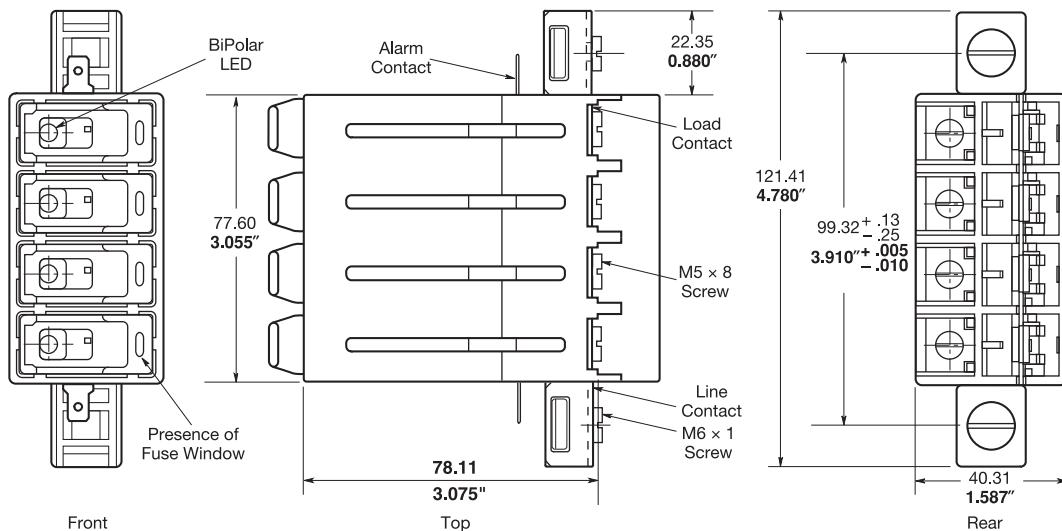

Catalog numbers	Description
TP15900-4	4-pole common disconnect switch
TP15900-41	4-pole common disconnect switch w/ split alarm, split line

Available fuses

Product	Ratings (amps)	Volts (Vdc)	IR
TPA	3, 5, 10, 15, 20, 25, 30, 40, 50	170	100kA
TPA-B	20, 25, 30	65	20kA

Accessories

- Spare fuse holders: catalog numbers 5TPH and TPSFH-AS.

Dimensions - mm (in)

TP15914**Specifications****Description:**

Modular 4-pole disconnect switch for TPA fuses — 4-poles per module up to four modules ganged together. Features open fuse indication and fuse presence indication along with fuse orientation rejection feature.

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 145Vdc

Amps: — 50A per pole

Agency information: CE, UL Recognized as a disconnect switch for interruption of load current by means of withdrawing the fuse carrier. UL Recognized as a component for telecommunication power distribution equipment (UL category QPQYZ), UL Recognized fuses for branch circuit protection, CSA component acceptance for the system. UL Recognized, Guide JFHR2, File E56412., CSA Certified, Class 1422-30, File 53787.

Flammability rating: UL 94V0, 150°C.

Features and benefits

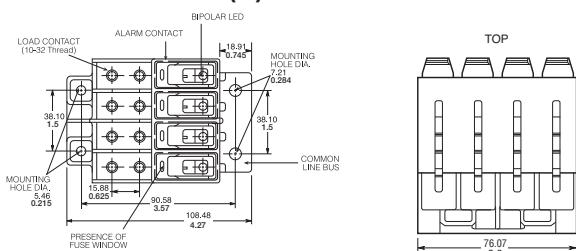

- Totally enclosed module directly connects to busbar for reduced external wiring—per pole and easy installation with front access load and line connection standard—double lug load connections 8 AWG wire
- LED alarm signaling (LED current 30mA max)
- Remote alarm with alarm test probe point to allow on-site checking of alarm circuitry

Typical applications

- Telecommunications DC power circuit protection

Catalog numbers

Catalog numbers	Hardware
TP15914	English
TP15914-1	Metric

Dimensions mm - (in)**Accessories**

- Spare fuse holders: catalog numbers 5TPH and TPSFH-A

TPA and TPA-B**Specifications**

Description: DC power distribution indicating fuses.

Dimensions: See dimensions illustration.

Ratings:

Volts: — 170Vdc TPA

— 65Vdc TPA-B

Amps: — 3-50A TPA

— 20-30A TPA-B

IR: — 100kA TPA

— 20kA TPA-B

Agency information: CE, UL Recognized, Guide JFHR2, File E56412, CSA Certified, Class 1422-30, File 53787.

**Features and benefits**

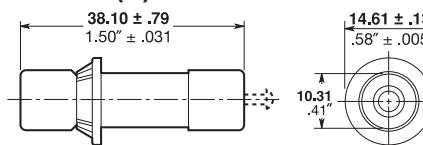

- Indication pin provides for local and remote indication when used with Bussmann series TP15900-4 and TP15914 disconnect switches
- Patented “orange ring” fuse orientation features assures correct fuse position
- The UL Recognized ratings and current-limiting capability make this fuse ideal for cable protection on existing DC power distribution systems
- A unique blue label is used on all Telepower fuses to designate their DC capability

Typical applications

- Telecommunications DC power circuit protection

Catalog numbers (amps)

- Spare fuse holders: 5 position holder; 5TPH; 6 position holder; TPSFH-AS
- Use with fused disconnect switches TP15900-4, TP15914

15800**Specifications**

Description: Fused disconnect switch for use only with the following fuses:
 Main: Telepower TPS 1 to 70 Amp.
 Alarm: Bussmann series GMT-A only (page 13-13).
 Recommend GMT-X Cover (page 13-13).

Dimensions: See dimensions illustration.

Ratings:

Volts: — 60Vdc
 Amps: — 3-70A
 SCCR: — 100kA

Agency information: CE, UL Recognized, Guide QPQY2, File E97649.

Flammability rating: UL 94V0, 150°C.

Features and benefits

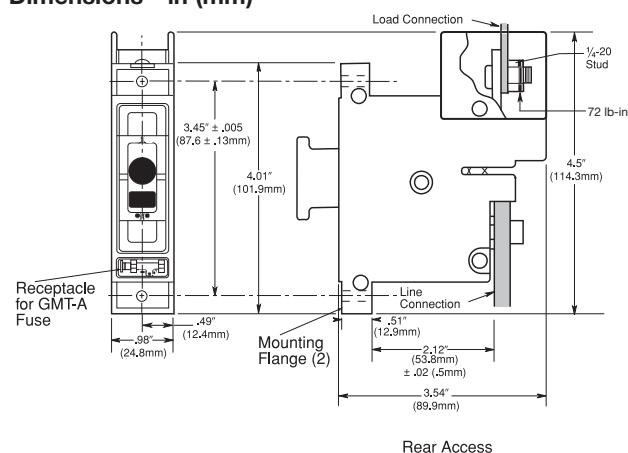

- Alarm output with wire wrap terminal or connection to 0.063" thick common alarm bus
- Spare alarm and power fuse compartment
- Mounting hardware included

Typical applications:

- Telecommunications DC power circuit protection

Catalog numbers

Catalog numbers	Access panel mounting
15800-R-200	Rear

- Spare fuse holder: TPSFH-AS, see page 15-6.

Data Sheet: 5009

TP158HC**Specifications**

Description: Panel mount, rear access high amp version of Bussmann series 15800 fused disconnect switch for use only with the following fuses; Main: Telepower TPL-B 70-250 Amps, Alarm: Bussmann series GMT-A.

Dimensions: See Data Sheet 5021.

Ratings:

Volts: — 80Vdc

Amps: — 70-250A

SCCR: — 100kA

Agency information: UL Recognized (investigated to UL 1801) as a disconnect switch for the interruption of load current by means of withdrawing the fuse pullout. Guide QPQY2, File E97649.

Flammability rating: UL 94V0, 150°C.

Features and benefits

- Similar profile, mounting method, and backplane configuration as 15800. The TP158HC can be installed into existing 15800 panels using the space of two 15800 disconnects
- Innovative new fuse pullout design eliminates need for tools to replace the Telepower type TPL-B fuse
- Alarm output with wire wrap terminal or connection to 0.063 inch (1.6mm) thick common alarm bus
- Hardware included: Load: washer, split lockwasher, and $\frac{5}{16}$ - 18 nut (metric-M8 x 1.25)

**Application notes**

- The line connection uses a $\frac{1}{4}$ -20 bolt (metric – M6X1) that threads into the line terminal. The line terminal is designed with a float of $\pm 0.02"$ ($\pm 0.50\text{mm}$) to allow for variation in the distance between the TP158HC mounting flange and the line busbar (see Dimensions). Equipment should be designed to eliminate any relative movement between the TP158HC mounting flange and the line busbar.
- The alarm circuit is not intended for precharging of capacitive circuits. Alarm circuit current 1A maximum.

Easy fuse replacement

**Typical applications:**

- Telecommunications DC power circuit protection

Catalog numbers

Catalog numbers	Hardware
TP158HC	English
TP158HC-M	Metric

Accessories

- Spare fuse holders: TPSFH-LB (TPL-B fuses) and TPSFH-T (GMT fuses).

15100**Specifications**

Description: Fused disconnect system for use with Telepower fuses Type TPL.

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 60Vdc

Amps: — 70-800A

SCCR: — 100kA

Agency information: CE, UL Recognized, Guide QPQY2, File E97649.

**Features and benefits**

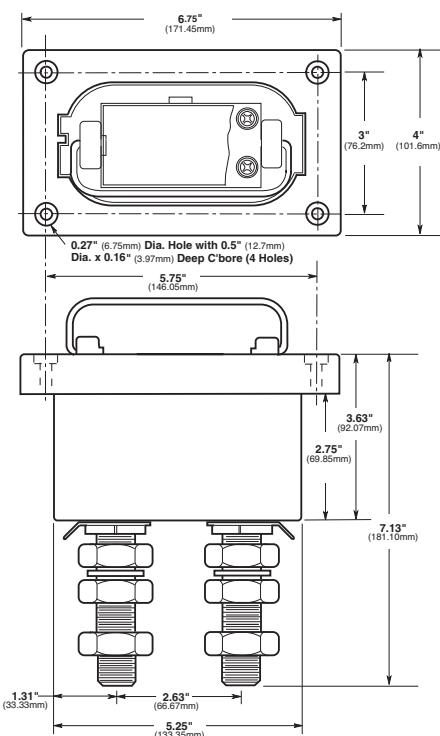

- Single-pole fusible disconnect switch for primary DC power distribution
- Robust housing and terminal construction for demanding applications
- Panel mounting
- Easily connected to line or load bus

Typical applications

- Telecommunications DC power circuit protection

Catalog numbers

Catalog numbers	For use with TPL fuses

15100-601	300-800A

Dimensions - in (mm)

TPHCS

TPHCS800-MAV (shown)

Specifications
Description: High current switch for use with Telepower fuses Type TPL-B, TPL-C and TPH.

Available as complete switch or pullout. Base may be purchased separately.

Dimensions: See dimensions illustrations.

Construction:**Ratings:**

Volts: — 80Vdc

Amps: — 70-800A

SCCR: — 100kA

Agency information: UL Recognized (investigated to UL 1801) as a disconnect switch for the interruption of load current by means of withdrawing the fuse carrier. UL Recognized to meet the requirements for Canadian Standards.

Features and benefits

- Innovative design eliminates need for tools to replace the Telepower™ Type TPL-B, TPL-C or TPH fuse
- Easy to install—captive fasteners allow for direct busbar mounting (bolts not included). Standard $\frac{1}{4}$ " male quick-connect terminal for effortless remote alarm connection.
- Optional new electronic alarm eliminates need for parallel indicating fuses while providing local and remote open-fuse indications (maximum remote alarm current: 20mA); Bipolar alarm: designed for both central office and Radio applications, Local LED alarm indication for ease-of-viewing.
- Fuse presence window allows for easy viewing of installed fuse amp rating

Typical applications

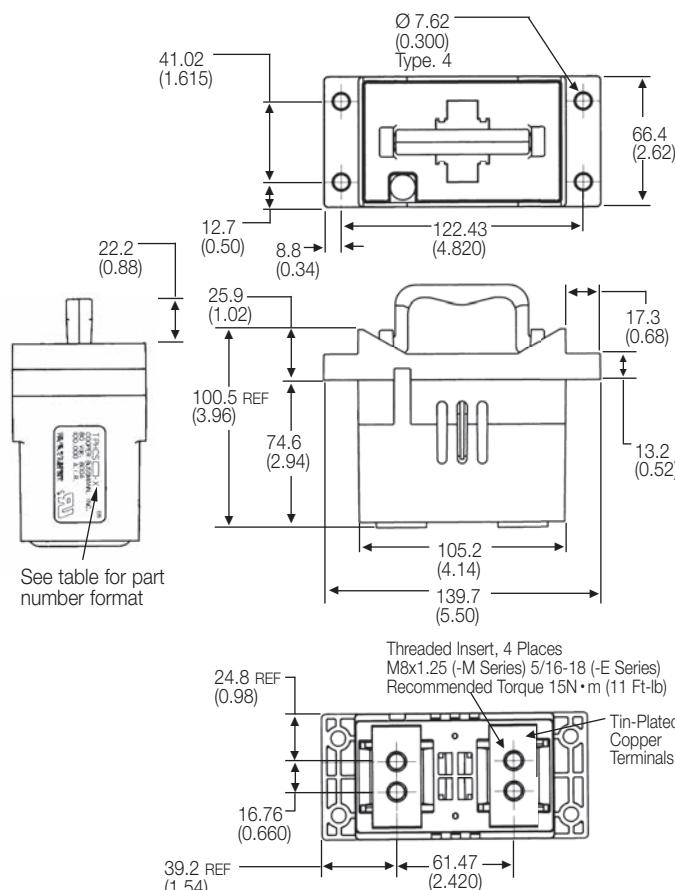

- Telecommunications DC power circuit protection
- Compact design is ideal for today's high power, high-density cabinets

TPHCS-B-M	Base only, metric	—	800 max
TPHCS-B-E	Base only, English	—	800 max
TPHCS-B-ML	Base only, metric, LED	—	800 max
TPHCS-B-EL	Base only, English, LED	—	800 max
TPHCS-B-MAV	Base only, metric, alarm	—	800 max
TPHCS-B-EAV	Base only, English, alarm	—	800 max

Dimensions - mm (in)**NOTES:**

- TPHCS250 and TPHCS800 pullouts and bases are the same with exception to the type of fuse, TPL-B, TPL-C or TPH the pullout will carry.
- Plastic rated UL 94V0, 140°C RTI.

TPL

Specifications

Description: DC power distribution fuses for use with Telepower 15100, 15200, TP158HC and TPHCS disconnect systems. For replacement of Bussmann series UBO fuses a TPL-TA adapter kit is necessary.

Dimensions: See dimensions illustrations.

Ratings:

Volts: – 170Vdc

Amps: – 70-800A

IR: – 100kA

Agency information: CE, UL Recognized Guide JFHR2, File E56412 Bellcore.

Features and benefits

- Current-limiting capability designed for DC power distribution systems
- Recognized branch circuit protection
- Complete system coordination capability
- Energy savings with low watts loss, low operating temperatures, and minimum I²t levels

Typical applications

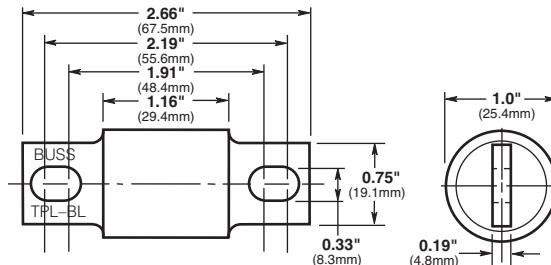

- Telecommunications power circuit protection

TPN

Specifications

Description:

Current-limiting DC power distribution fuses. The TPN fuse is dimensionally similar to Class R fuses making it easy to use standard Class R fuse blocks.

Dimensions: See dimensions illustrations.

Ratings:

Volts: — 170Vdc
Amps: — 1-600A
IR: — 100kA

Agency information: UL Recognized, Guide JFHR2, File E56412.

Features and benefits

- Current-limiting capability designed for DC power distribution systems
- Recognized branch circuit protection
- Complete system coordination capability
- Energy savings with low watts loss, low operating temperatures, and minimum I^2t levels

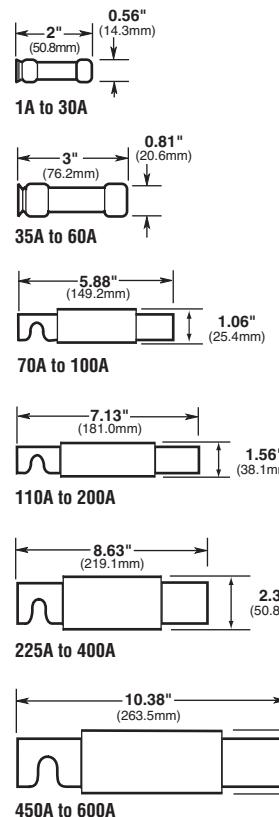

Typical applications

- Telecommunications power circuit protection

Selecting a Type 1 SPD

Electrical systems and connections

Step 1: Review the following system diagrams that show the SPD connection points for the Bussmann SPD models that may be applied.

Step 2: Locate the system diagram that matches your application, note the applicable SPD model numbers and then proceed to the product pages for their details.

Understanding the following will help assure that the correct surge protective device is specified.

- Typical North American electrical systems include single-phase, split-phase, Delta and Wye.
- Selecting the wrong SPD generally arises from misunderstanding the nominal system voltage, ground and neutral connections.

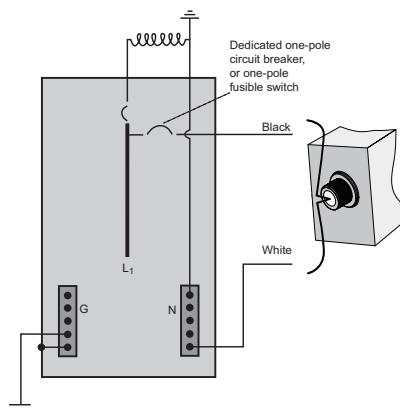

- General convention has it that a "ground" wire is not counted as a wire in the system description (e.g., 3 wire, 4 wire, etc.), but it is counted as a connection point if the SPD has a ground wire.
- Selecting a voltage rating for Wye systems must be based upon its nominal system voltage rating and not on the leg-to-leg voltages.
- Bonded N-G configurations do not require protection at the service entrance transformer, but protection is suggested in downstream bonded N-G systems if the length of conductor making the bond is greater than 10 feet (3m).

Two wire single-phase - 2 connection points

Application: Sub-panel or feeder panel

Volts: 120, 240, 347 (L-N)

Note: Must be installed within 10 feet (3m) of a bonded neutral-ground connection per IEEE C62.41-1991.

SPD models and part numbers:

SurgePOD HEAVY DUTY

- SPH50SP1120SN
- SPH50SP1240SN
- SPH50SP1347SN

SurgePOD PRO:

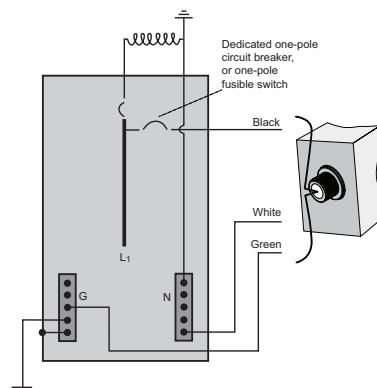

- SPP40SP1120SN

Three wire split-phase/two-pole - 3 connection points

Application: Service entrance panel

Volts: 120, 240, 347 (L-N)

Note: Installation for where the SPD is greater than 10 feet (3m) from a bonded neutral-ground connection.

SPD models and part numbers:

SurgePOD HEAVY DUTY:

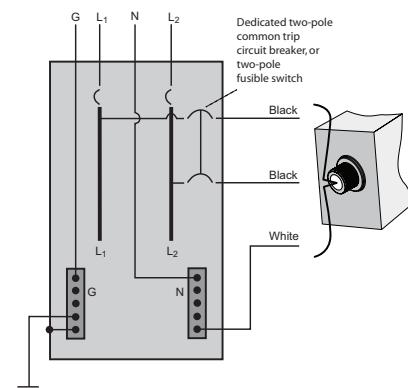

- SPH50SP2120SNG
- SPH50SP2240SNG
- SPH50SP2347S

Three wire split-phase/two-pole - 3 connection points

Application: Sub-panel or feeder panel

Volts: 120, 240 (L-N), 240, 480 (L1-L2)

Note: Installation at or less than 10 feet (3m) from the transformer and within 10 feet (3m) of a bonded-neutral ground connection.

SPD models and part numbers:

SurgePOD HEAVY DUTY:

- SPH50SP2240PN
- SPH50SP2480PN

SurgePOD PRO:

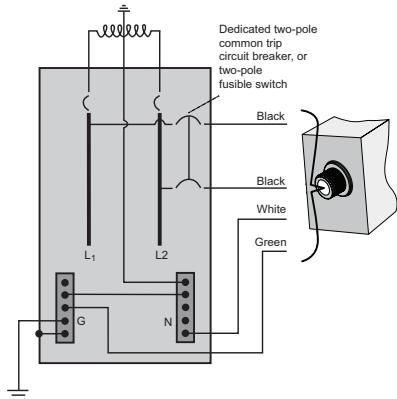

- SPP40SP2240PN

Three wire split-phase/two-pole plus ground - 4 connection points

Application: Service entrance equipment

Volts: 120, 240 (L-N), 240, 480 (L1-L2)

Note: Installation where greater than 10 feet (3m) of a bonded-neutral ground connection.

SPD models and part numbers:

SurgePOD HEAVY DUTY:

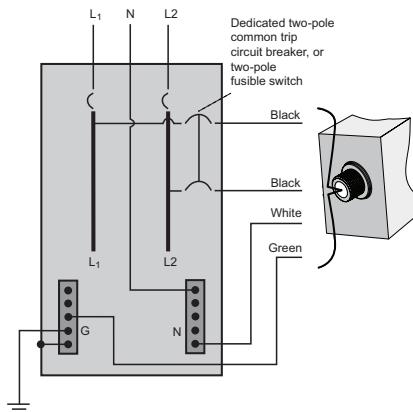

- SPH50SP3240PNG
- SPH50SP3480PNG

Three wire split-phase/two-pole plus ground - 4 connection points

Application: Sub-panel or feeder panel

Volts: 120, 240 (L-N), 240, 480 (L1-L2)

Note: For installation greater than 10 feet (3m) of a bonded-neutral ground connection.

SPD models and part numbers:

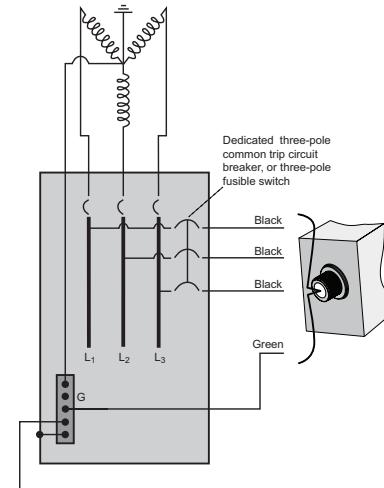

SurgePOD HEAVY DUTY:

Three wire Wye plus ground - 4 connection points

Application: Sub-panel or feeder panel

Volts: 208, 480, 600 (L-L)

Note: A common MCC configuration for pumping and water/waste water treatment.

SPD models and part numbers:

SurgePOD HEAVY DUTY:

- SPH50SP3208WYG
- SPH50SP3480WYG
- SPH50SP3600WYG

SurgePOD PRO:

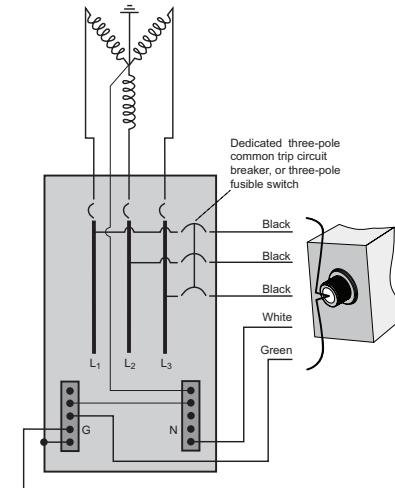

- SPP40SP3208WYG
- SPHP4SP3480WYG

Four wire Wye plus ground - 5 connection points

Application: Service entrance equipment

Volts: 120, 127, 277, 347 (L-N), 208, 220, 480, 600 (L-L)

Note: Common system configuration with Neutral pulled into facility and bonded to ground.

SPD models and part numbers:

SurgePOD HEAVY DUTY:

- SPH50SP4208WYNG
- SPH50SP4480WYNG
- SPH50SP4600WYNG

BSPD

Specify from build-a-code catalog number system:

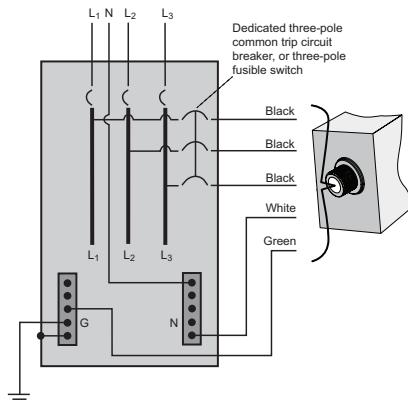

- Surge current capacity (I_{max}): 120kA, 200kA, 300kA or 400kA
- Voltage/system type: 208Y, 480Y or 600Y
- Configuration: Basic, Standard or Standard with Surge Counter
- Enclosure rating: NEMA 1 or NEMA 4X

Four wire Wye plus ground - 5 connection points

Application: Sub-panel or feeder panel

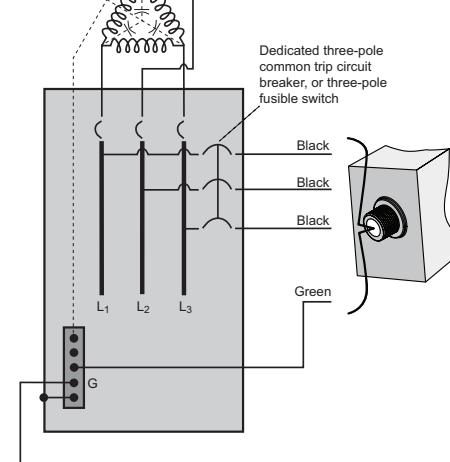

Volts: 120, 127, 277, 347 (L-N), 208, 220, 480, 600 (L-L)

Note: Common system configuration with Neutral pulled into facility and bonded to ground.

**Three wire Delta plus ground - 4 connection points**

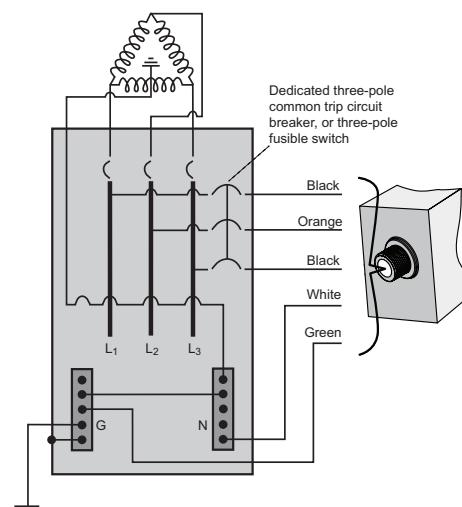

Application: Service entrance equipment, sub-panel or feeder panel

Volts: 240, 480, 600 (L-L)

**Four wire Highleg Delta - 5 connection points**

Application: Service entrance equipment

Volts: 120V (L1 / L3-N) / 240V (L-L), 240V (L1 / L3-N) / 480V (L-L)

- Standard and Standard with Surge Counter configurations are also UL Recognized, 1283 5th Edition, File E316410, Guide VZCA2, CSA Component Acceptance, Std. C22.2, No. 8-M1986, File 243397

Description

The BSPD Surge Protective Devices (SPDs) deliver reliable surge protection with high surge current capacity for system switchboards and power distribution panels.

Applications

BSPD units are available for common Delta and Wye system voltages in a variety of surge current capacity ratings from 120kA to 400kA. Available in three configurations, the BSPD Series' features and options make it easy to specify units for many electrical applications including service entrances, distribution switchboards, panelboards and point-of-use. All possible combinations of product attributes are available for ordering in the Catalog number system.

- BSPD uses Bussmann series SurgePOD™ thermally protected Metal Oxide Varistor (MOV) technology to safely shunt overvoltages to ground while its thermal disconnect capability eliminates the need for additional fusing.
- 200kA SCCR meets the highest NEC® requirements.
- Models available to meet the overvoltage protection needs of Wye and Delta electrical systems from 208 to 600 volts, 3-phase.
- BSPD has the highest Nominal discharge current (I_n) of 20kA per UL 1449 3rd Edition. This rating indicates the SPD's ability to handle a number of large-magnitude surges over a short period of time and remain operational.
- 120kA to 400kA surge current capacity (I_{max}) ratings meet the needs of larger switchgear and power distribution panel applications.
- Optional Form C contact relay, EMI/RFI filtering and surge counter available to meet additional system requirements.
- 200kA Short-Circuit Current Rating (SCCR).
- NEMA 1 or NEMA 4X enclosures.
- RoHS complaint.
- 10 year warranty.

Factory sealed to improve electrical safety

All BSPD units are factory-sealed to eliminate arc flash and shock hazards, as the user/installer has no chance of coming into contact with energized parts. The units also contain no user-serviceable parts or wire lugs that require periodic retightening to eliminate the need for periodic maintenance.

Eaton SurgePOD technology eliminates the need for additional fusing

BSPD uses Bussmann series SurgePOD modules that each contain an internal element that safely disconnects upon reaching an overvoltage breakdown condition.

Prewired

All BSPD units are factory wired for ease of installation. Simply install any necessary conduit runs, mount the unit and make all wire connections. No need for internal wiring or access to the unit's inside.

Compact size takes less space

Available in enclosures that are up to 50% smaller than other products with comparable ratings the BSPD Series come in NEMA 1 and 4X enclosures that differ in size according to their surge current capacity (I_{max}).

NEMA 1 BSPD Series units.

- The 120-200kA surge current capacity units are housed in a 74 square-inch enclosure that is only 3-1/2 inches deep.
- The 300-400kA surge current capacity units are housed in a 74 square-inch enclosure that is only 6 inches deep.

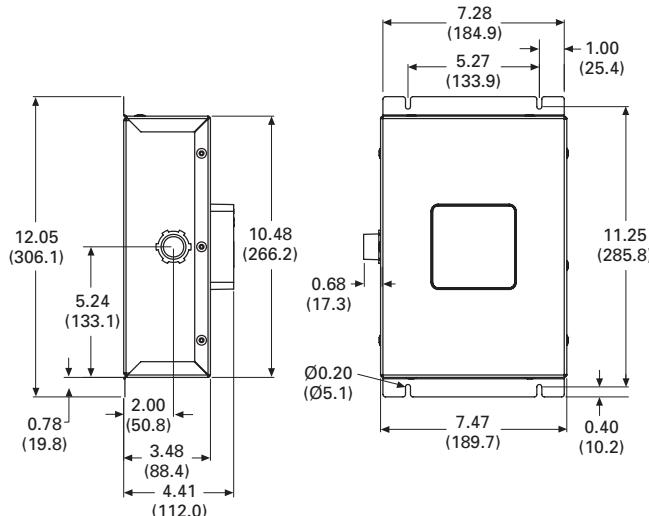

NEMA 4X BSPD Series units.

- The 120-200kA surge current capacity units are housed in a 108 square-inch enclosure that is only 5-3/8 inches deep.
- The 300-400kA surge current capacity units are housed in a 108 square-inch enclosure that is only 7-11/16 inches deep.

SURGEPOD™ HEAVY DUTY SPD for UL 1449 3rd Edition
Listed loadside and lineside protection

Description

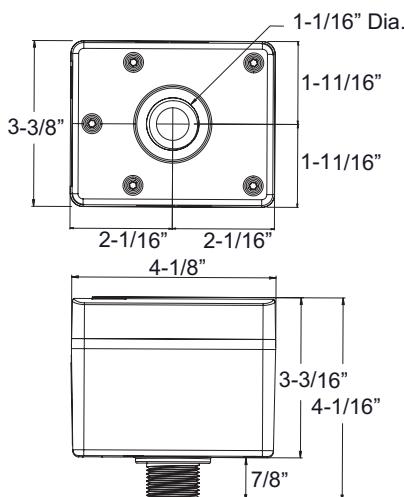

The Bussmann series SurgePOD™ HEAVY DUTY is a Type 1 UL Listed 1449 3rd Edition surge protective device suitable for installation on both the loadside or lineside of the service entrance overcurrent protective device.

Available in voltage and system specific versions to match electrical system and equipment requirements. The SurgePOD HEAVY DUTY delivers optimum surge protection using advanced patent pending SurgePOD™ module featuring thermal disconnect technology that eliminates the need for additional overcurrent protection.

Parallel connection to the electrical system permits the SurgePOD HEAVY DUTY SPD to be installed on any ampacity panel.

- Type 1 UL 1449 3rd Edition Listed SPDs are easily selected and installed on the loadside or lineside of the service entrance overcurrent protective device
- Patented Eaton SurgePOD module technology eliminates the need for additional fusing
- Voltage specific models precisely match and protect electrical systems and equipment up to 600Vac
- Compact UV resistant NEMA 4X for indoor or outdoor applications
- easyID™ LED status indicator provides surge protection status at a glance

^{††} 600V Wye version is not CSA Certified.

easyID™ LED status indicator

The easyID™ LED status indicator will illuminate when the unit is properly installed and the system or equipment being protected is energized. The following LED color/status indicates:

**Green LED = good**

The circuit is energized and *protected*.

**Red LED = replace**

The circuit is *energized and unprotected*.

The unit **needs** replacing.

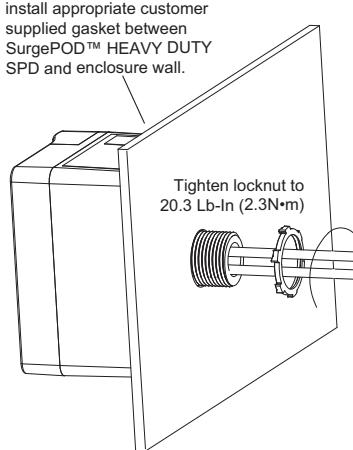

**LED is out / unlit:**

- The circuit is most likely deenergized
- The unit's leads are disconnected
- The unit is damaged

Authorized personnel should follow all prescribed lockout/tagout and safety procedures in troubleshooting the cause for the above conditions. Opening SurgePOD HEAVY DUTY enclosure will void UL listing and warranty.

Mounting

SurgePOD HEAVY DUTY is a panel mount device. It may also be mounted using a customer supplied bracket or directly onto a female threaded conduit fitting.

SurgePOD™ PRO SPD for UL 1449 3rd Edition Listed
loadside and lineside protection

Description

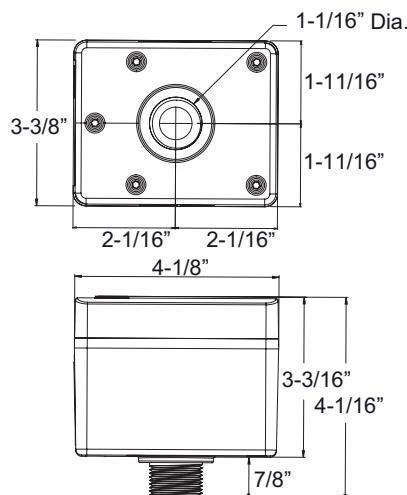

The Bussmann series SurgePOD™ PRO is a Type 1 UL Listed 1449 3rd Edition surge protective device suitable for installation on both the loadside or lineside of the service entrance overcurrent protective device.

Available in popular voltage and system specific versions to match common residential and light commercial electrical system and equipment requirements. The SurgePOD PRO delivers superior surge protection using MOV thermal disconnect technology that eliminates the need for additional overcurrent protection.

Parallel connection to the electrical system permits the SurgePOD PRO SPD to be installed on any ampacity panel.

- Type 1 UL 1449 3rd Edition Listed SPDs are easily selected and installed on the loadside or lineside of the service entrance overcurrent protective device
- Voltage specific models precisely match and protect electrical systems and equipment better than “one-size-fits-all” SPDs
- Thermal disconnect technology eliminates the need for additional fusing
- NEMA 4X enclosure for indoor or outdoor applications
- easyID™ LED status indicator provides surge protection status at a glance

**Specifications****Description**

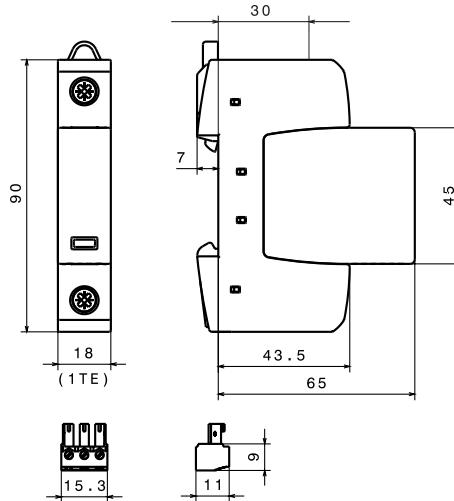

The Bussmann series single pole UL modular surge arresters for 120, 240 and 347Vac Single-phase systems feature local, **easyID™** visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

Features

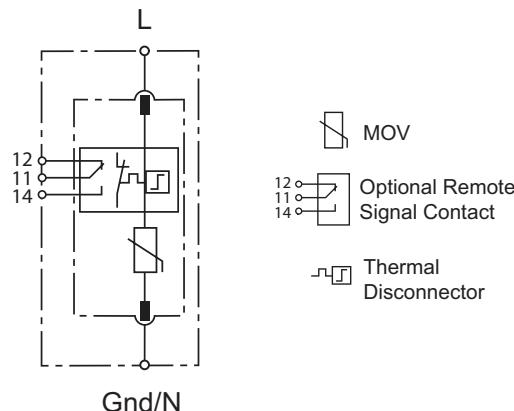

- Surge arrester according to UL 1449 3rd Edition, Type 2 Component Assembly helps meet UL 508A requirements
- Heavy-duty metal oxide varistors for high discharge capacity
- "Thermo Dynamic Control" SPD monitoring device ensures high reliability against surge events
- Module locking system with module release button makes module replacement easy without tools
- Up to 200kA Short-Circuit Current Rating (SCCR) makes higher assembly SCCR ratings possible
- Optional remote signaling of all protection modules makes status monitoring easy and accurate in any monitoring scheme
- No additional upstream overcurrent protection necessary to make installation easier and more economical
- Vibration and shock tested according to EN 60068-2 to withstand harsh environments

Optional remote signaling Form C contact

The remote signaling contact versions have a floating changeover contact for use as a break or make contact for easy adoption in any monitoring application.

- Surge arrester according to UL 1449 3rd Edition, Type 2 Component Assembly helps meet UL 508A requirements
- Heavy-duty metal oxide varistors for high discharge capacity
- "Thermo Dynamic Control" SPD monitoring device ensures high reliability against surge events
- Module locking system with module release button make module replacement easy without tools
- Up to 200kA Short-Circuit Current Rating (SCCR) make higher *assembly* SCCR ratings possible
- Optional remote signaling of all protection modules make status monitoring easy and accurate in any monitoring scheme
- No additional upstream overcurrent protection necessary to make installation easier and more economical
- Vibration and shock tested according to EN 60068-2 to withstand harsh environments

Optional remote signaling Form C contact

The remote signaling contact versions have a floating changeover contact for use as a break or make contact for easy adoption in any monitoring application.

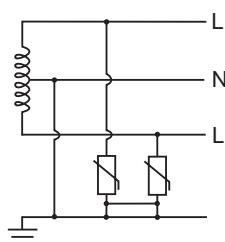

Circuit diagram**BSPM2240S3G, BSPM2480S3G**

Shown with optional remote contact signaling

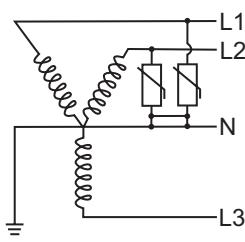

For remote signaling contact, add "R" suffix to the part number,
E.g., BSPM2480S3GR

BSPM_____WYG, BSPM_____DLG**Description**

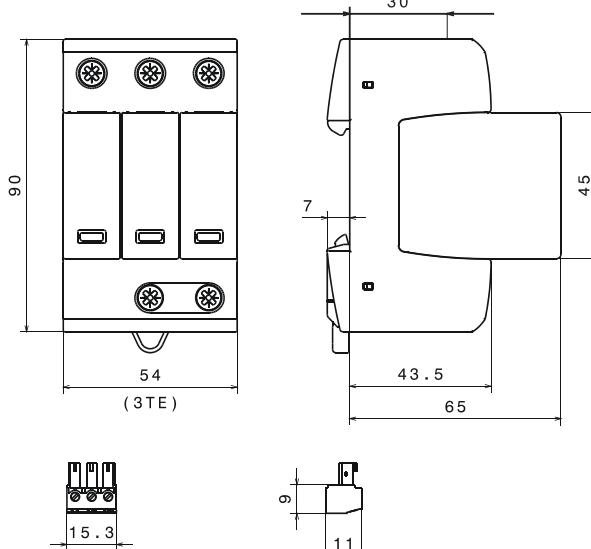

The Bussmann series 3-pole UL modular surge arresters for 240 and 480 3-phase Delta, and 120/208, 277/480 and 347/600Vac 3-phase Wye systems feature local, easyID™ visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

Features

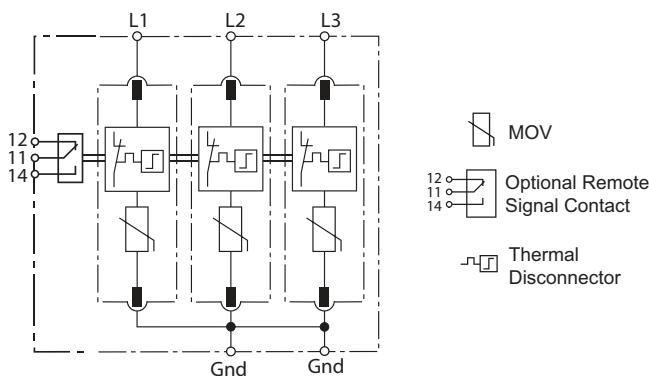

- Surge arrester according to UL 1449 3rd Edition, Type 2 Component Assembly helps meet UL 508A requirements
- Heavy-duty metal oxide varistors for high discharge capacity
- "Thermo Dynamic Control" SPD monitoring device ensures high reliability against surge events
- Module locking system with module release button make module replacement easy without tools
- Up to 200kA Short-Circuit Current Rating (SCCR) make higher assembly SCCR ratings possible
- Optional remote signaling of all protection modules make status monitoring easy and accurate in any monitoring scheme
- No additional upstream overcurrent protection necessary to make installation easier and more economical
- Vibration and shock tested according to EN 60068-2 to withstand harsh environments

Optional remote signaling Form C contact

The remote signaling contact versions have a floating changeover contact for use as a break or make contact, according to circuit concept.

**Description**

The Bussmann series UL Type 4 48Vac/60Vdc, 75Vac/100Vdc, 120Vac/200Vdc, 275VAc/350Vdc, 320Vac/420Vdc, 385Vac/500Vdc, 440Vac/585Vdc and 600Vac/dc single pole, modular surge arresters feature local, **easyID™** visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

LV power system arresters

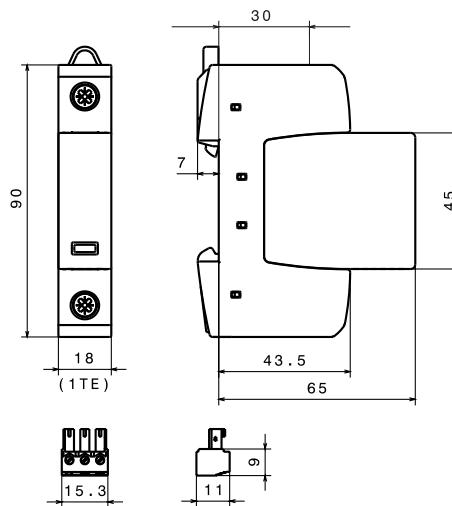

The features of these single-pole devices are for use as a single device or in combination with other devices for AC and DC voltage systems.

- Surge arrester according to UL 1449 3rd Edition, Type 4 Component Assembly for use in Type 2 applications helps meet UL 508A requirements*
- Proven MOV technology for reliable surge protection
- "Thermo Dynamic Control" SPD monitoring device ensures high reliability against surge events
- Module locking system with module release button make module replacement easy without tools
- Optional remote signaling of all protection modules make status monitoring easy and accurate in any monitoring scheme
- No additional upstream overcurrent protection necessary to make installation easier and more economical
- Vibration and shock tested according to EN 60068-2 to withstand harsh environments

Optional remote signaling Form C contact

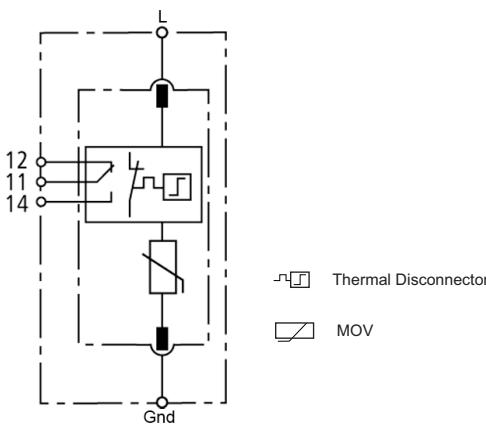

The remote signaling contact versions have a floating changeover contact for use as a break or make contact for easy adoption in any monitoring application.

* Except as noted in data sheets.

**Specifications****Description**

The Bussmann series UL Type 4 24Vac/dc, 48Vac/dc, 60Vac/dc, 120Vac/dc and 230Vac/dc, two-pole, modular surge arresters feature local, easyID™ visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

LV system arresters

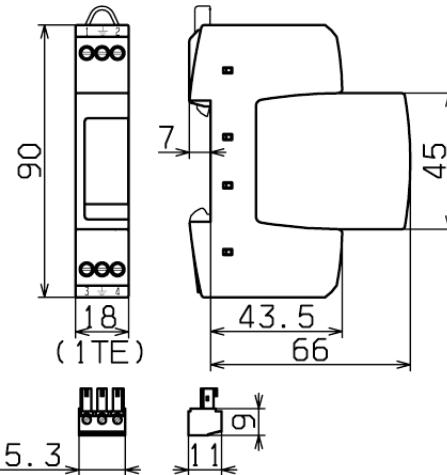

The features of these two-pole devices are for use in coordination with other upstream SPDs in UL 508A Applications*.

- Surge arrester according to UL 1449 3rd Edition, Type 4 Component Assembly for use in Type 3 applications helps meet UL 508A requirements
- Proven MOV and GDT hybrid technology for reliable surge protection
- "Thermo Dynamic Control" SPD monitoring device ensures high reliability against surge events
- Module locking system with module release button make module replacement easy without tools
- Optional remote signaling of all protection modules make status monitoring easy and accurate in any monitoring scheme
- No additional upstream overcurrent protection necessary to make installation easier and more economical
- Vibration and shock tested according to EN 60068-2 to withstand harsh environments

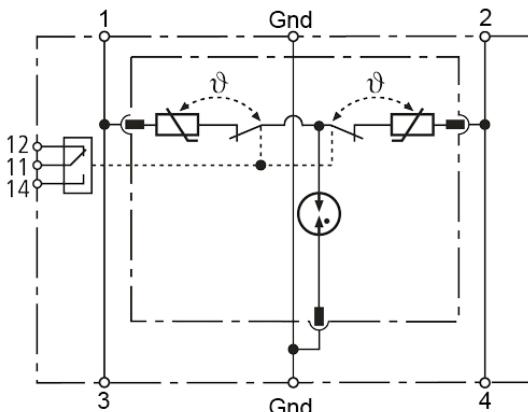

Optional remote signaling Form C contact

The remote signaling contact versions have a floating changeover contact for use as a break or make contact for easy adoption in any monitoring application.

* UL 1449 3rd Edition not applicable to DC voltages.

easyID™
Visual status indication

Remote signal contact available

**Description**

The Bussmann series IEC Class I 230V, two-pole, modular combined lightning, current and surge arresters feature local, easyID™ visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module. 230V models are offered with MCOV rating of 255V.

TN system arresters

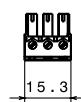

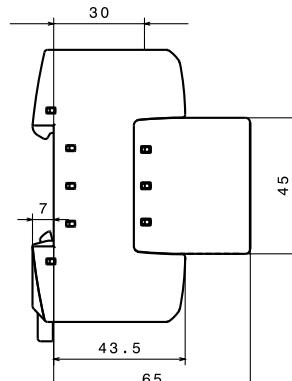

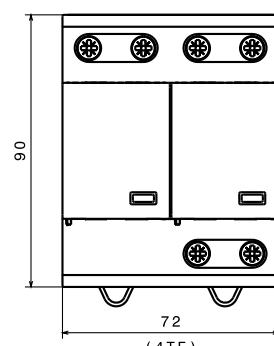

The features of these two-pole devices are for use as a modular combined lightning and current arrester and surge arrester for use in single TN- systems ("2-0" circuit).

TT system arrester

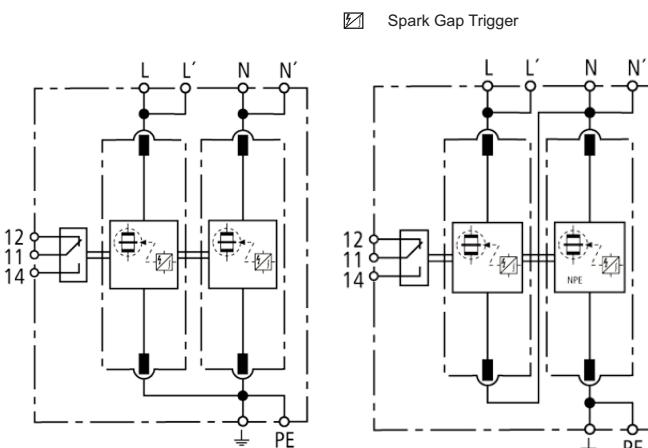

Provides a current arresting means for use in single TT- systems ("1-1" circuit).

Optional remote signaling Form C contact

The three-pole terminal remote signaling contact versions have a floating changeover contact for use as a break or make contact, according to circuit concept.

BSPM_____TN, BSPG_____NPE**Description**

The Bussmann series IEC Class II 275, 320, 385, 440 and 600V, one-pole, modular surge arresters feature local, **easyID™** visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

Class II single-pole surge arrester models are offered with MCOV ratings of 255, 275, 320, 385, 440 and 600V.

TN system arresters

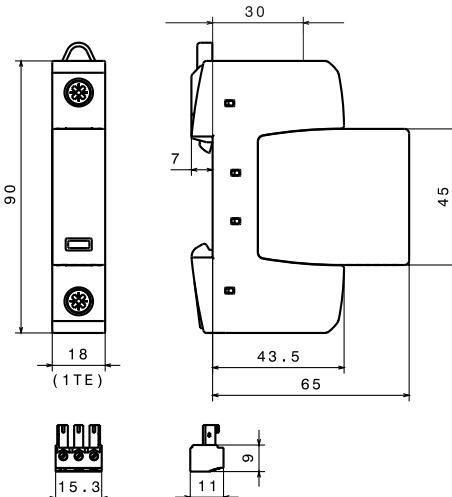

The features of these single-pole devices are for use as a single device or in combination with other devices.

TT system arrester

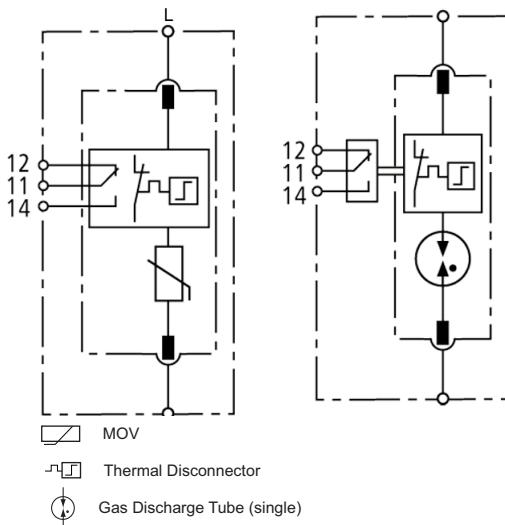

Provides a current arresting means between neutral conductor and protective conductor in TT systems, this device helps ensure fulfilling the requirements for protection of personnel and equipment in "3+1" and "1+1" circuits.

Optional remote signaling Form C contact

The three-pole terminal remote signaling contact versions have a floating changeover contact for use as a break or make contact, according to circuit concept.

Shown with optional remote contact signaling

Description

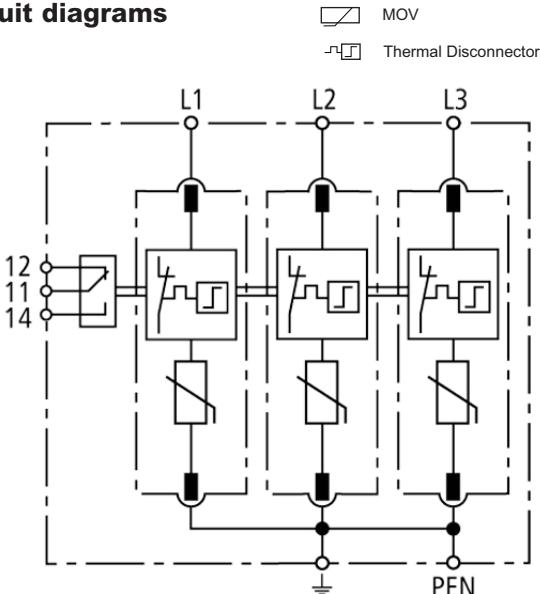

The Bussmann series IEC Class II 120/240V and 230/400V, three-pole, modular surge arresters feature local, **easyID™** visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module. 120V models are offered with a MCOV rating of 150V. 230V models are offered with a MCOV rating of 275 or 385V.

TNC system arresters

The features of these three-pole devices are for use in TN-C 120/240V or 230/400V systems ("3-O" circuit) against surges.

Optional remote signaling Form C contact

The three-pole terminal remote signaling contact versions have a floating changeover contact for use as a break or make contact, according to circuit concept.

Circuit diagrams**BSPM3150TNC, BSPM3275TNC, BSPM3385TNC**

Overvoltage surge protection

PV PRO (Performance)

- 600, 1000Vdc
- Bi-pole

PV HEAVY DUTY (Safety)

- 600, 1000, 1200Vdc
- Mono-pole, bi-pole
- Integrated overcurrent protection for complete device isolation and enhanced safety

+

Lightning current protection

PV ADVANCE (Lightning)

- Combined lightning current and surge protection

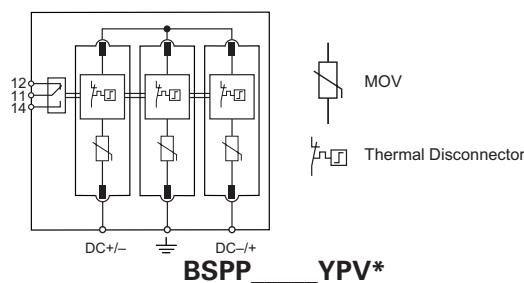

= Complete system protection

PV PRO — Performance

- UL 1449 3rd Edition Recognized, and EN 50539-11 SPDs for most popular bi-pole protection up to 600Vdc and 1000Vdc
- Modular DIN-Rail mounting with IP20 finger-safe construction makes it easy to install and maintain
- Built-in thermal disconnect technology eliminates the need for any additional fuse installation and wiring
- easyID*TM local visual indication and optional remote contact signaling make status monitoring simple
- Two-year warranty

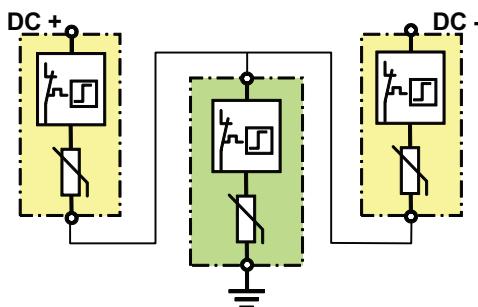

RoHS

Module circuit diagram

Shown with optional remote contact signaling

* For remote signaling contact, add "R" suffix to the part number.
E.g., BSPP3600YPVR

PV PRO "Y" series connection

Series connection of modules between line and ground extends MOV life and permits higher voltage ratings.

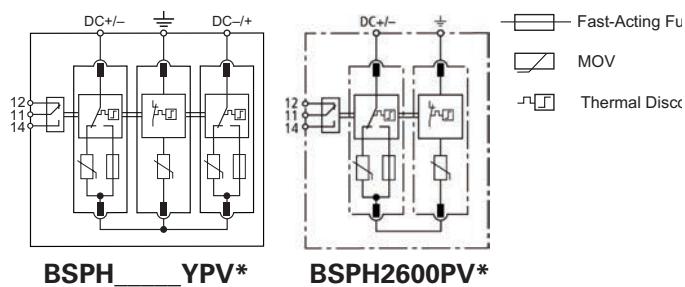

Data Sheet: 10091

PV HEAVY DUTY — Safety

- Patented, fast-acting hybrid Short-Circuit Interrupting (SCI) technology isolates system to prevent damage caused by DC arcs
- UL 1449 3rd Edition Recognized and EN 50539-11 SPDs for enhanced mono- and bi-pole system protection up to 600, 1000 and 1200Vdc
- Modular DIN-Rail mounting with IP20 finger-safe construction makes it easy to install and maintain
- easyID*TM local visual indication and optional remote contact signaling make status monitoring simple
- Five-year warranty

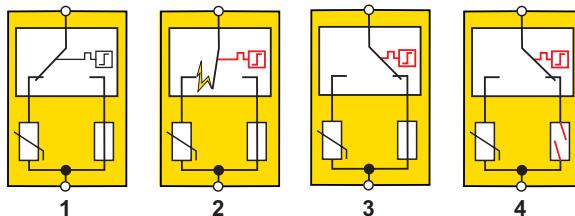

RoHS

Module circuit diagrams

Shown with optional remote contact signaling

* For remote signaling contact, add "R" suffix to the part number.
E.g., BSPH3600YPVR

PV HEAVY DUTY SCI technology

SCI technology utilizes an internal fast-acting fuse to fully isolate the SPD when a fault condition is encountered.

- Normal operating state; conduction path is through MOV to ground.
- MOV Failure trips thermal disconnect, moving contact off the MOV and starts DC arc.
- As contact moves, DC arc is extinguished and the contact engages the fuse.
- Fuse opens, isolating the SPD from the system, allowing safe module replacement and continued flow of power from PV arrays to inverter.

Data Sheets: 2055 (3-module) and 2145 (2-module)

PV ADVANCE — Lightning

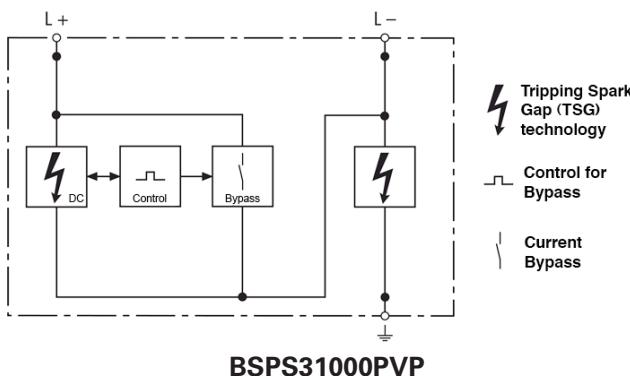

- Class I SPD per IEC 61643-11 standards for PV systems up to 1000V DC.
- Complements and enhances total PV system protection when used in combination with PV HEAVY DUTY or PV PRO SPDs up to 1000Vdc
- Protects arrays and inverters from direct and indirect lightning strikes, and damaging surges
- Triple terminals allow multiple PV string protection with one device
- High lightning current discharge capacity using Trigger Spark Gap (TSG) technology eliminates DC short-circuit currents up to 100A DC
- Five-year warranty

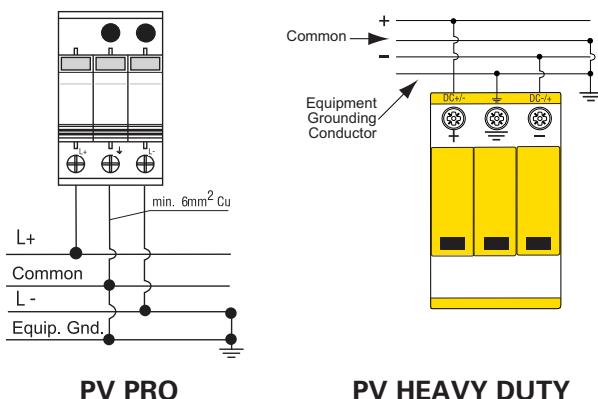

RoHS

Data Sheet 2148**PV wiring applications**

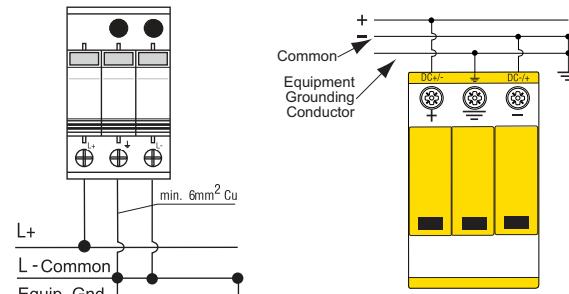

Application A: Circuit diagram and application wiring for two energized poles/modes up to 1000Vdc systems

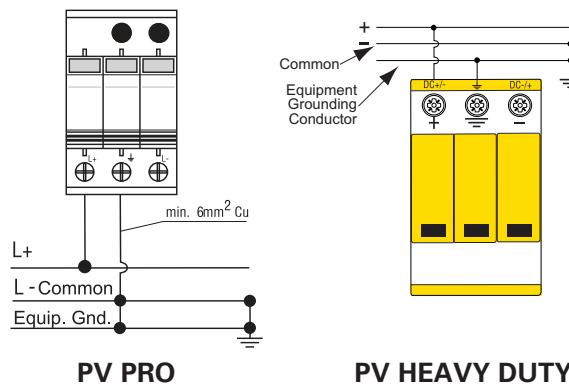

Application B: "Y" configuration - two energized poles/modes 600, 1000 and 1200Vdc* systems

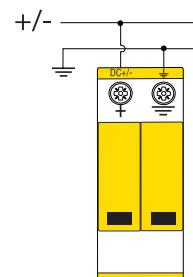

Application C: "I" configuration - one energized pole/mode 600Vdc and 1000Vdc systems only

Application D: "I" Configuration - one energized pole/mode 600Vdc and 1000Vdc** systems

Application E: "I" configuration - one energized pole/mode 600Vdc mono-pole systems only

* BSPP31200YPV(R) only.

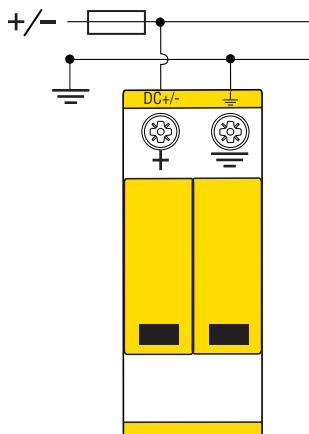

** BSPP31000YPV(R) 1000Vdc one energized pole/mode requires the following:

1. Use a suitable electrical insulator to keep a 10mm min. safety distance from the PV-SPD and other grounded parts in the housing.
2. No metal covers are permitted in the area of the module release button.

BSPM_____WE, BSPS_____WE**Description**

The Bussmann series IEC Class II 75, 230, 400, 690 and 1000V, one-pole, modular surge arresters feature local, easyID™ visual indication and optional remote contact signaling. The unique module locking system on the 75 to 690V arresters fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

TN system arresters (also 1-phase TT systems)

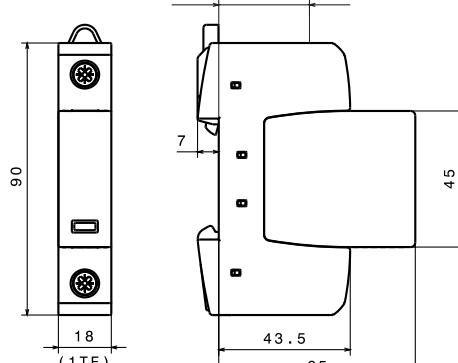

The features of these single-pole devices are for use as a single device or in combination with other devices.

TT system arrester

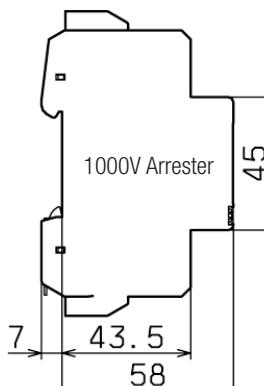

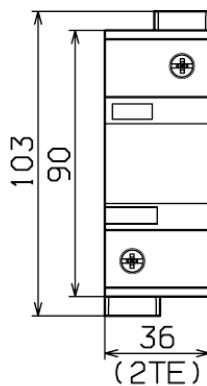

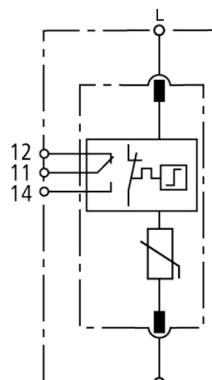

Provides a current arresting means between neutral conductor and protective conductor in TT systems, this device helps ensure fulfilling the requirements for protection of personnel and equipment in "3+1" and "1+1" circuits.

Optional remote signaling Form C contact

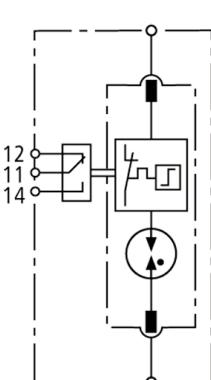

The three-pole terminal remote signaling contact versions have a floating changeover contact for use as a break or make contact, according to circuit concept.

Description

The Bussmann series IEC Class II 230V, two-pole, modular surge arresters feature local, easyID™ visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

TN system arrester

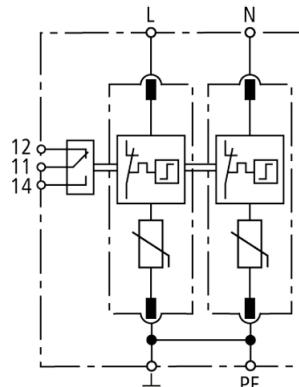

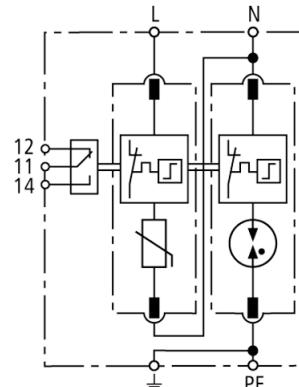

The features of these two-pole device are for use as a single device.

TT system arrester

For use as a single device in a 1-phase TT system.

Optional remote signaling Form C contact

The three-pole terminal remote signaling contact versions have a floating changeover contact for use as a break or make contact, according to circuit concept.

UL Listed 497B DIN-Rail mount surge protective device for BNC connector cable systems

Description

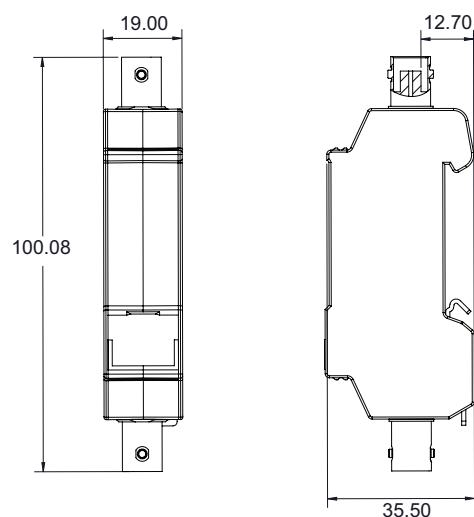

The Bussmann series BSPD5BNCDD and BSPD5BNCDI two-stage DIN-Rail mounted surge arresters are for protecting coaxial cable-connected systems (such as video and camera systems) from potential damage. The BSPD5BNCDD features direct (VCD) shield connection while the BSPD5BNCDI features indirect shield connection (VCID) to prevent leakage pickups.

The BSPD5BNCDD and BSPD5BNCDI shielded surge arresters are mounted on the supplied bracket with cable lug or mounted on a rack mounted DIN-Rail with suitable grounding. BNC connector terminated data or video signal cables are plugged into surge arrester with the equipment plugged into the protected side.

Common applications include protecting outdoor video surveillance systems or video control centers or coaxial data lines. For BSPD5BNCDI, the cable shield is indirectly grounded via a gas discharge tube to avoid being influenced by leakage pickups.

- UL 497B Listed
- Plug-in surge protective device for easy retrofitting
- The space-saving surge arrester with BNC socket is mounted on supplied rail terminal lug or standard 35mm DIN-Rail
- Integrated direct or indirect shield grounding avoids leakage pickups
- Easily adaptable due to BNC sockets

Direct vs. indirect shielding example

Apply the BSPD5BNCCDD (direct shield) at the equipment location and apply the BSPD5BNCDI (indirect shield) near exterior protected equipment. The indirect shield grounding at the exterior device will help avoid picking up leakage currents that can degrade signal quality while providing surge protection when needed.

See document 3A1977 for DIN-Rail BNC coaxial cable SPD installation instructions.

UL Listed 497B In-line surge protective device for BNC connector cable systems

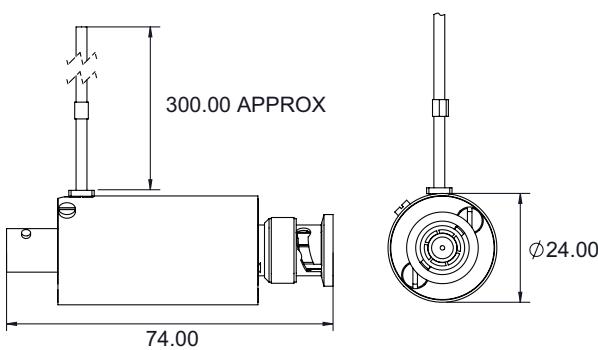

Description

The Bussmann series BSPD5BNCSI two-stage in-line surge arrester is for protecting coaxial cable-connected systems (such as video and camera systems) from potential damage.

The BSPD5BNCSI shielded surge arrester is plugged into coaxial terminal equipment or connections. Common applications include protecting outdoor video surveillance systems or video control centers. The cable shield is indirectly grounded via a gas discharge tube to avoid being influenced by leakage pickups. The arrester input is used as a socket and the protected output as a plug.

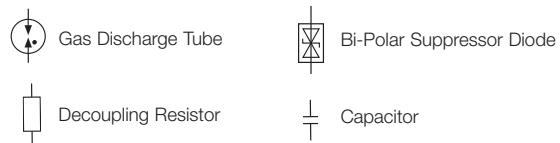

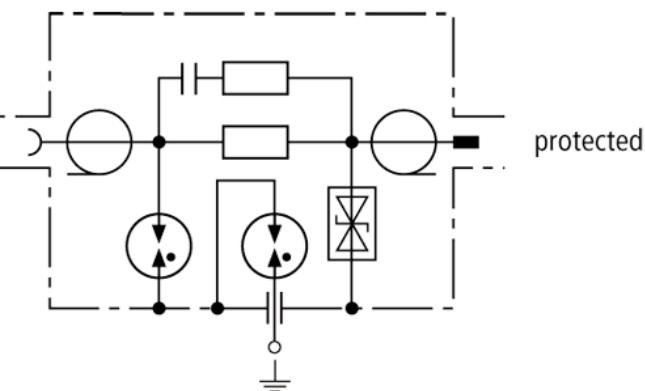

- UL 497B Listed
- Plug-in surge protective device for easy retrofitting
- Directly plugs into terminal equipment with BNC coaxial connections
- Integrated indirect shield grounding avoids leakage pickups

UL Listed 497B universal DIN-Rail mount surge protective device for RJ45/ethernet cable systems

Description

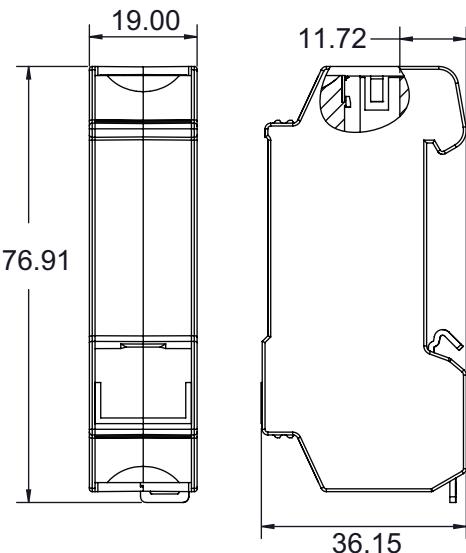

The Bussmann series DIN-Rail mount BSPD48RJ45 Surge Protective Device (SPD) for Ethernet cable systems with RJ connectors is easy to install in new, or retrofitting into existing, installations.

The BSPD48RJ45 is installed between the patch panel and the active component (a switch for example). The snap-in mechanism of the supporting foot allows the SPD to be safely grounded via the DIN-Rail. For single applications, the BSPD48RJ45 comes with a supplied mounting bracket with cable lug.

Fulfilling the requirements of Category 6, the BSPD48RJ45 can be universally used for all data services up to nominal voltages of 48V. It is well suited for existing services such as Gigabit Ethernet, ATM, ISDN, Voice over IP and Power over Ethernet (PoE+ acc. to IEEE 802.3at up to 57V) and similar applications in structured cabling systems according to Class E up to 250MHz. Protection of all pairs by means of powerful gas discharge tubes and one adapter filter matrix per pair.

- UL 497B Listed
- Easy to install or retrofit for protection of all lines
- CAT 6 according to ISO/IEC 11801
- CAT 6 in the channel (Class E)
- Power over Ethernet (PoE+ according to IEEE 802.3at)

UL Listed 497B DIN-Rail mount universal surge protective device for measuring and control circuits, and Bus systems

Description

The Bussmann series universal four-pole, DIN-Rail mounted surge arresters provide effective protection with minimum space requirements and are designed for stringent requirements on the availability of measuring and control circuits, and bus systems.

To ensure safe operation, the arresters provide protection against vibration and shock up to a 30-fold acceleration of gravity. The function-optimized design of the devices allows quick and easy removal of protection modules via "make-before-break" terminals that assure continuity of data signals in the protected and unprotected state.

For IEC Applications - Instruction for Surge Protective Device Use In Zone 2 Explosive Atmospheres per ATEX.

- When installed in potentially explosive atmospheres, the Data Signal DIN Series shall be installed into an enclosure which meets the requirements of a recognized type of protection, in accordance with EN 60079-0.
- The Data Signal DIN Series as transient suppressor. This approval applies to the following equipment types:

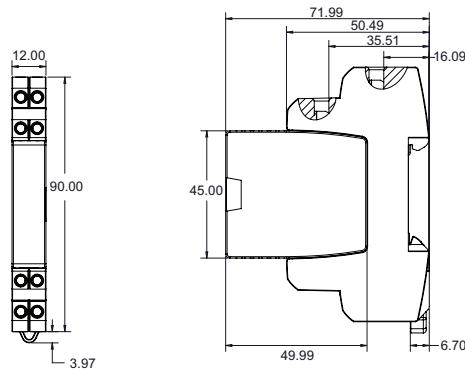

- BSPD5DING
- BSPD12DING
- BSPD24DING
- BSPD48DING
- BSPD5DINLHF
- BSPD24DINLHF

Ambient and Temperature Class

- 40°C to +80°C, T4:
DEKRA 12ATEX0254 X: II 3 G Ex nA IIC T4 Gc
- Standards used for:
ATEX: EN60079-0: 2009, EN 60079-15: 2005

- UL 497B Listed
- Function-optimized design for safe use and easy installation
- Four-pole and base mounts on grounded 35mm DIN-Rail
- Module removal without signal interruption via "make-before-break" circuitry
- 0-180V BSPD0180DINL automatically adjusts to system operating voltage and can protect data circuits of different voltages up to 100mA load current.

0-180V self-adjusting SPD application and mode of operation

The BSPD0180DINL surge protective device automatically adjusts to the operating voltage (from 0 to 180 volts) of the protected device.

When a surge occurs, the SPD voltage protection level adjusts itself based upon the output terminal operating voltage of the base.

SurgePOD™ standard and universal surge protective modules**Description**

Bussmann Standard and Universal SurgePOD modules are PCB-mountable for original equipment applications.

Universal modules are primarily differentiated from the Standard modules by having consistent terminal spacing dimensions on all Maximum Continuous Operating Voltage (MCOV) ratings.

This consistent terminal spacing eliminates the need for OEMs to maintain multiple PCB designs.

Standard modules have two available terminal lengths and spacing dimensions vary by MCOV rating (see Standard module dimensions for details).

When a surge condition exceeds either the Standard or Universal SPD module's MCOV, the patented Metal Oxide Varistor (MOV) technology becomes conductive to safely shunt the surge to ground.

The same MOV technology also eliminates the need for additional fusing in UL applications by safely disconnecting the SPD module upon reaching an overvoltage breakdown condition.

All Standard or Universal SPD modules are UL Recognized 1449 3rd Edition for installation in Type 1 or Type 2 surge protective devices.

Optional remote contact signaling is accomplished with a Normally Open (NO) microswitch that closes upon the module reaching an overvoltage breakdown condition.

Optional local visual indication is accomplished with indicating tabs that protrude through the device's top upon the module reaching an overvoltage breakdown condition.

**Catalog symbols**

SPOD (Standard module)

SPODU (Universal module)

**Ratings**

Type 1

See ratings table

Agency information

UL Recognized, 1449 3rd Edition Type 1 Component Assembly Device; E340782

Flammability rating

UL 94V0

Terminal material

Nickel-plated copper

Storage and operating temperature range

-25°C to +85°C

Traceability

Each SurgePOD SPD module is marked with a serial number for identification and tracking

Options

Remote contact signaling is accomplished with a Normally Open (NO) microswitch that closes upon the module reaching an overvoltage breakdown condition.

Local visual indication is accomplished with indicating tabs that protrude through the device's top upon the module reaching an overvoltage breakdown condition.

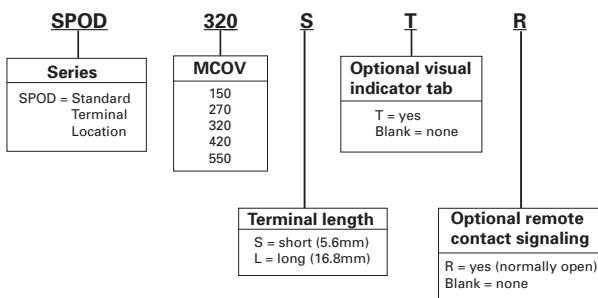

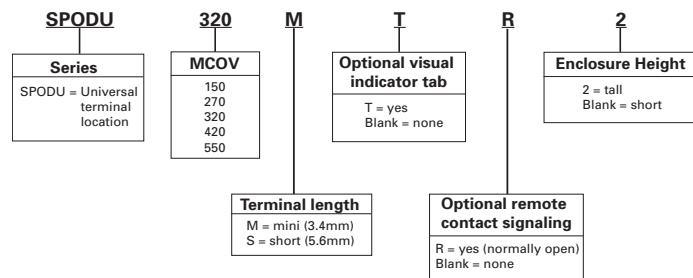

Packaging

200 units per master pack

Additional information

The SurgePOD module may be damaged by excessive mechanical shock or rough handling. To ensure integrity of finished device, do NOT install any SurgePOD module that was dropped or abused during assembly.

Suitability for final application of a SurgePOD module to be determined by the OEM.

Save time and money with these fuse service kits

Selection

These service kits are filled with the most common fuse types and sizes for the most common applications – no need to search for the right fuse, it's in the kit.

Organization

The compact and sturdy carrying case allows organizing and modifying the fuses needed to assure a proper supply is kept on hand.

Accessories

All kits come with a fuse puller for the fuses it contains. As a bonus, all kits on this page include a free wire stripper or lineman's pliers.

**Adapters for DIN and American rails****Specifications:****Description:**

Bussmann series DIN-Rail adapters permit secure, positive snap-on mounting of 0-30A fuse blocks (one-, two-, or three-pole) onto various size rails to eliminate costly and time consuming drilling, tapping, and screw mounting. Adapters mechanically lock into mounting holes of fuse blocks in seconds to become an integral part of the block. One adapter is required for one- and two-pole Bussmann series blocks. Two adapters are required for three-pole blocks.

With the exception of the 32mm DIN-Rail, all blocks with adapters can be removed from a rail simply by pulling up its release tab.

Use of rail end-stops on both sides of adapters is recommended.

Construction: Molded from "Lexan™ 241" for high strength and flexibility.

Catalog numbers (for 0-30A fuse blocks)

Catalog numbers	Fuse block class	Rail type	Size	Adapter color
DRA-1	CC* G H (250V)*† J (30A, 60A*)	DIN	15mm (Sym.) 32mm (Asym.) 35mm (Sym.)	Black
DRA-2	R (250)*† M Type*	American	1 1/4" (Sym.) (also 35mm DIN)	Gray

Package quantities: standard—10; bulk—100 (Cat. No. BK/DRA-1 or BK/DRA-2.)

*Not applicable for new modular fuse blocks that have built-in 35mm DIN-Rail mount capability.
†Mounting on 15mm rails is not recommended.

Spare fuse holders**Specifications:**

Description: Spare fuse holders durably constructed using black thermoplastic with common mounting using #6 screws or bolts on 5-inch centers. Dovetailed interlocking between fuse holders simplifies installation and reduces needed hardware. Common footprint allows for any combination of fuse holders to be mounted together. Built-in retaining clips secure fuses.

Flammability rating: UL 94V0.

Catalog numbers

Catalog numbers	Capacity	For use with:
TPSFH-CW	4-position	TPC and/or TPW fuses
TPSFH-M	4-position	TPM fuses
TPSFH-LC	1-position	TPL-C series fuses
TPSFH-LB	1-position	TPL-B series fuses
TPSFH-N60	1-position	TPN (35-60A) fuses
TPSFH-N30	4-position	TPN (1-30A) fuses
TPSFH-AS	6-position	TPA and TPS fuses
TPSFH-T	10-position	GMT fuses

5TPH**Specifications:**

Description: 5-position spare fuse holder for midget size and Class CC fuses (1/32" diameter) fuses. Constructed of thermoplastic with adhesive tape on back for easy mounting on cabinet doors.

Size: 2.98" W x 1.03" H x 0.63" D

Catalog number: 5TPH

Data Sheet: 5014

Fuse pullers**Specifications:**

Description: Fuse pullers in various sizes to safely and easily extract fuses from blocks and holders.

Catalog numbers

Catalog numbers	Application
FP-2	1 1/2" to 1 1/4" dia. fuses
FP-3	1" to 1 3/8" dia. fuses
FP-4	1 3/8" to 2 1/8" dia. fuses
FP-6	0-60A T-Tron fuses
FP-A3	Glass tube and ATC fuses
CFP-30	CUBEFuse 1-30A
CFP-60	CUBEFuse 35-60A
CFP-100	CUBEFuse 70-100A

Fuse pullers are only to be used when the associated circuit has been de-energized.

FT-2 fuse tester**Specifications:**

Description: Fuse tester for automotive, glass tube and ferrule fuses up to 1 1/8" length. Probe slides to appropriate fuse length. Batteries are included and replaceable.

WARNING: **DO NOT** test electrical fuses in the fuse panel.

Catalog number: FT-2

Replacement battery:

Rayovac 364

SFC spare fuse cabinet**Specifications:**

Description: Spare fuse cabinet with five cubic feet of storage space. Constructed of heavy gauge steel with durable baked ASA 61 grey enamel finish. Cabinet door is equipped with locking handle for security. Mounting holes are 16 inches on center with key slots.

Size: 24" W x 30" H x 12" D

Material: 0.062 sheet steel

Catalog numbers:

SFC-FUSE-CAB

SFC-SHELF*

Replacement key: 2A1910-1

Replacement lock: 2A1910-3

*Extra shelf for fuse cabinet.

Wide range of capability

Built to exceed the short circuit capacity of today's high power electrical distribution systems, the Gubany Center performs:

- Ultra-high power testing from 200kA to 300kA at 600Vac, three-phase
- Medium power testing from 5kA to 200kA at 600Vac, single- and three-phase; to 100kA at 1450Vac single-phase; to 100kA at 1000Vdc
- Low power testing up to 5kA at 600Vac, single-phase.

Our technicians conduct tests to many global agency standards including:

- | | |
|---|--|
| <ul style="list-style-type: none"> • ANCE • ANSI • CE • CSA | <ul style="list-style-type: none"> • ETL • IEC, and • Underwriters Laboratories |

Performance and compliance certification for components and assemblies

The Paul P. Gubany Center for high power technology is the electrical industry's most comprehensive facility for testing and certifying electrical components and assemblies.

OEM customers make the Gubany Center their first choice in testing equipment such as:

- Drives, both AC and DC
- Circuit breakers
- Motor control centers
- Soft starters
- Fuses
- Power distribution panels
- Surge suppressors
- Cables

Creating the right answers to unique or demanding needs

When you wish to gain a competitive edge or improve your product's performance, have Eaton provide a custom product that can:

- Improve functionality and utility
- Fit unique design needs
- Reduce labor and component costs

Our expertise Is your advantage

For over 100 years, Eaton has designed and manufactured products that improve electrical safety and performance. Whether it's modifying an existing product or creating a new one, our experience effectively brings together the skills to design, prototype, test, manufacture and secure agency approvals to deliver a single component, sub-assembly or finished product.

Eaton can design and manufacture products that integrate:

- Fuses - with the right size and performance characteristics
- Fuse holders and blocks - with the requisite terminations, mounting options and safety features
- Wire connection products - that make wiring simpler, safer and faster
- Molded products - that give the unique shape your product needs
- Power distribution products - that meet prevailing agency and Code requirements

In-house testing

All electrical performance testing of your custom products can be performed at the Paul P. Gubany Center for high power technology, an ASTA and CSA accredited, and an ANCE Designated facility.

We're able to conduct electrical performance testing that replicates any power system to be encountered in any country, covering:

- Up to 300kA and 600Vac
- Up to 100kA and 1000Vdc

And our technicians conduct tests to many global agency standards including:

- ANCE
- ANSI
- CE
- CSA
- ETL
- IEC, and
- Underwriters Laboratories

If you need a custom solution to a product problem, submit a request for quotation to your local authorized Eaton distributor or sales representative.

Circuit protection

The following is a basic introduction to overcurrent protection and fuse technology. In depth information on the selection and application of overcurrent protective devices is available in the Eaton publication "Selecting Protective Devices" (SPD). This publication is available free of charge as a PDF download at www.cooperbussmann.com/spd.

Electrical distribution systems are often quite complicated. They cannot be absolutely fail-safe. Circuits are subject to destructive overcurrents. Harsh environments, general deterioration, accidental damage, damage from natural causes, excessive expansion, and/or overloading of the electrical distribution system are factors which contribute to the occurrence of such overcurrents. Reliable protective devices prevent or minimize costly damage to transformers, conductors, motors, and the other many components and loads that make up the complete distribution system. Reliable circuit protection is essential to avoid the severe monetary losses which can result from power blackouts and prolonged downtime of facilities. It is the need for reliable protection, safety, and freedom from fire hazards that has made the fuse a widely used protective device.

Overcurrents

An overcurrent is either an overload current or a short-circuit current. The overload current is an excessive current relative to normal operating current, but one which is confined to the normal conductive paths provided by the conductors and other components and loads of the distribution system. As the name implies, a short-circuit current is one which flows outside the normal conducting paths.

Overloads

Overloads are most often between one and six times the normal current level. Usually, they are caused by harmless temporary surge currents that occur when motors are started-up or transformers are energized. Such overload currents, or transients, are normal occurrences. Since they are of brief duration, any temperature rise is trivial and has no harmful effect on the circuit components. (It is important that protective devices do not react to them.)

Continuous overloads can result from defective motors (such as worn motor bearings), overloaded equipment, or too many loads on one circuit. Such sustained overloads are destructive and must be cut off by protective devices before they damage the distribution system or system loads. However, since they are of relatively low magnitude compared to short-circuit currents, removal of the overload current within minutes will generally prevent equipment damage. A sustained overload current results in overheating of conductors and other components and will cause deterioration of insulation, which may eventually result in severe damage and short-circuits if not interrupted.

Short-circuits

Whereas overload currents occur at rather modest levels, the short-circuit or fault current can be many hundred times larger than the normal operating current. A high level fault may be

50,000A (or larger). If not cut off within a matter of a few thousandths of a second, damage and destruction can become rampant—there can be severe insulation damage, melting of conductors, vaporization of metal, ionization of gases, arcing, and fires. Simultaneously, high level short-circuit currents can develop huge magnetic-field stresses. The magnetic forces between bus bars and other conductors can be many hundreds of pounds per linear foot; even heavy bracing may not be adequate to keep them from being warped or distorted beyond repair.

Fuses

The fuse is a reliable overcurrent protective device. A "fusible" link or links encapsulated in a tube and connected to contact terminals comprise the fundamental elements of the basic fuse. Electrical resistance of the link is so low that it simply acts as a conductor. However, when destructive currents occur, the link very quickly melts and opens the circuit to protect conductors, and other circuit components and loads. Fuse characteristics are stable. Fuses do not require periodic maintenance or testing. Fuses have three unique performance characteristics:

1. *Modern fuses have an extremely "high interrupting rating"—can withstand very high fault currents without rupturing.*
2. *Properly applied, fuses prevent "blackouts." Only the fuse nearest a fault opens without upstream fuses (feeders or mains) being affected—fuses thus provide "selective coordination." (These terms are precisely defined in subsequent pages.)*
3. *Fuses provide optimum component protection by keeping fault currents to a low value...They are said to be "current limiting."*

Voltage rating

The voltage rating of a fuse must be at least equal to or greater than the circuit voltage. It can be higher but never lower. For instance, a 600V fuse can be used in a 208V circuit.

The voltage rating of a fuse is a function of its capability to open a circuit under an overcurrent condition. Specifically, the voltage rating determines the ability of the fuse to suppress the internal arcing that occurs after a fuse link melts and an arc is produced. If a fuse is used with a voltage rating lower than the circuit voltage, arc suppression will be impaired and, under some fault current conditions, the fuse may not clear the overcurrent safely. Special consideration is necessary for semiconductor fuse and medium voltage fuse applications, where a fuse of a certain voltage rating is used on a lower voltage circuit.

Amp rating

Every fuse has a specific amp rating. In selecting the amp rating of a fuse, consideration must be given to the type of load and code requirements. The amp rating of a fuse normally should not exceed the current carrying capacity of the circuit. For instance, a continuous load current of 16 amperes typically requires a conductor rated to carry 20A and a 20A fuse is the largest that should be used. However, there are some specific circumstances in which the amp rating is permitted to be greater than the current carrying capacity of the circuit.

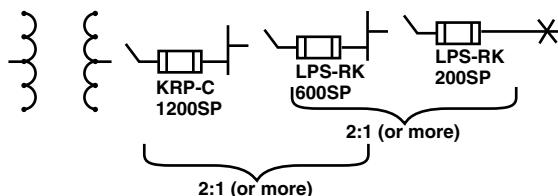

A typical example is the motor circuit; dual-element fuses generally are permitted to be sized up to 175% and non-time-delay fuses up to 300% of the motor full-load amps. As a rule, the amp rating of a fuse and switch combination should be selected at 125% of the continuous load current (this usually corresponds to the circuit capacity, which is also selected at 125% of the load current). There are exceptions, such as when the fuse-switch combination is approved for continuous operation in an assembly at 100% of its rating.

Interrupting rating

A protective device must be able to withstand the destructive energy of short-circuit currents. If a fault current exceeds the capability of the protective device, the device may actually rupture, causing additional damage. Thus, it is important when applying a fuse or circuit breaker to use one which can sustain the largest potential short-circuit currents. The rating which defines the capacity of a protective device to maintain its integrity when reacting to fault currents is termed its "interrupting rating". The interrupting rating of most branch-circuit, molded case, circuit breakers typically used in residential service entrance panels is 10,000A. Larger, more expensive circuit breakers may have interrupting ratings of 14,000A or higher. In contrast, most modern, current-limiting fuses have an interrupting rating of 200,000 or 300,000A and are commonly used to protect the lower rated circuit breakers. The National Electrical Code, Section 110-9, and §OSHA 29 CFR 1910.303(b)(4) require equipment intended to break current at fault levels to have an interrupting rating sufficient for the current that must be interrupted.

Selective coordination – prevention of blackouts

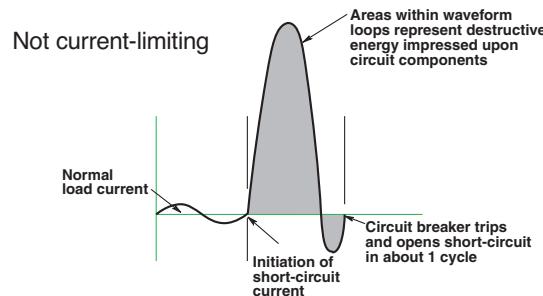

Coordination is isolation of an overloaded or faulted circuit by the opening of only the nearest upstream protective device for a specific overcurrent value. When only the nearest upstream protective device of an overloaded or faulted circuit opens and larger upstream fuses remain closed for the full range of overcurrents on a system, the protective devices are "selectively" coordinated (they discriminate). Selective coordination of protective devices prevents unnecessary system power outages or blackouts caused by overcurrent conditions.

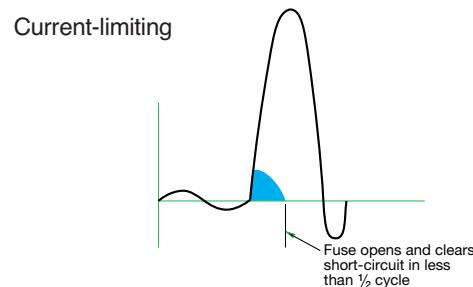

This diagram shows the minimum ratios of amp ratings of Low-Peak Yellow fuses that are required to provide "selective coordination" (discrimination) of upstream and downstream fuses.

It is a simple matter to selectively coordinate modern current-limiting fuses. By maintaining a minimum ratio of fuse-amp ratings between an upstream and downstream fuse, selective coordination is assured.

Current limitation – component protection

A non-current-limiting protective device, by permitting a short-circuit current to build up to its full value, can let an immense amount of destructive short-circuit heat energy through before opening the circuit.

A current-limiting fuse has such a high speed of response that it cuts off a short-circuit long before it can build up to its full peak value, when the fault current is within the current-limiting range of a fuse.

If a protective device cuts off a short-circuit current in less than one-half cycle, before it reaches its total available (and highly destructive) value, the device is a "current-limiting" device. Most modern fuses are current-limiting. They restrict fault currents to such low values that a high degree of protection is given to circuit components against even very high short-circuit currents. They permit breakers with lower interrupting ratings to be used when series rated. They can reduce bracing of bus structures. They minimize the need of other components to have high short-circuit current "withstand" ratings. If not limited, short-circuit currents can reach levels of 30,000 or 40,000A or higher in the first half cycle (0.008 seconds, 60Hz) after the start of a short-circuit. The heat that can be produced in circuit components by the immense energy of short-circuit currents can cause severe insulation damage or even explosion. At the same time, huge magnetic forces developed between conductors can crack insulators and distort and destroy bracing structures. Thus, it is important that a protective device limit fault currents before they reach their full potential level.

Operating Principles of Bussmann series fuses

The principles of operation of the modern, current-limiting fuses are covered in the following paragraphs.

Non-time-delay fuses

The basic component of a fuse is the link. Depending upon the amp rating of the fuse, the single-element fuse may have one or more links. They are electrically connected to the end blades (or ferrules) (see Figure 1) and enclosed in a tube or cartridge surrounded by an arc quenching filler material. Bussmann series Limitron™ and T-Tron™ fuses are both single-element fuses.

Under normal operation, when the fuse is operating at or near its amp rating, it simply functions as a conductor. However, as illustrated in Figure 2, if an overload current occurs and persists for more than a short interval of time, the temperature of the link eventually reaches a level which causes a restricted segment of the link to melt. As a result, a gap is formed and an electric arc established. However, as the arc causes the link metal to burn back, the gap becomes progressively larger. Electrical resistance of the arc quickly reaches such a high level that the arc cannot be sustained and is extinguished. The fuse will have then completely cut off all current flow in the circuit. Suppression or quenching of the arc is accelerated by the filler material. (See Figure 3.)

Single-element fuses of present day design have a very high speed of response to overcurrents. They provide excellent short-circuit component protection. However, temporary, harmless overloads or surge currents may cause nuisance openings unless these fuses are oversized. They are best used, therefore, in circuits not subject to heavy transient surge currents and the temporary over-load of circuits with inductive loads such as motors, transformers, solenoids, etc. Because single-element, fast-acting fuses such as Limitron and T-Tron fuses have a high speed of response to short-circuit currents, they are particularly suited for the series rating protection of circuit breakers with low interrupting ratings.

Whereas an overload current normally falls between one and six times normal current, short-circuit currents are quite high. The fuse may be subjected to short-circuit currents of 30,000 or 40kA or higher. Response of current limiting fuses to such currents is extremely fast. The restricted sections of the fuse link will simultaneously melt (within a matter of two or three-thousandths of a second in the event of a high-level fault current).

The high total resistance of the multiple arcs, together with the quenching effects of the filler particles, results in rapid arc suppression and clearing of the circuit. (Refer to Figures 4 & 5) Short-circuit current is cut off in less than a half-cycle, long before the short-circuit current can reach its full value (fuse operating in its current limiting range).

Figure 1. Cutaway view of typical single-element fuse.

Figure 2. Under sustained overload, a section of the link melts and an arc is established.

Figure 3. The "open" single-element fuse after opening a circuit overload.

Figure 4. When subjected to a short-circuit current, several sections of the fuse link melt almost instantly.

Figure 5. The "open" single-element fuse after opening a short circuit.

Bussmann series dual-element fuses

There are many advantages to using these fuses. Unlike single-element fuses, the Bussmann series dual-element, time-delay fuses can be sized closer to provide both high performance short-circuit protection and reliable overload protection in circuits subject to temporary overloads and surge currents. For ac motor loads, a single-element fuse may need to be sized at 300% of an AC motor current in order to hold the starting current. However, dual-element, time delay fuses can be sized much closer to motor loads. For instance, it is generally possible to size Fusetron dual-element fuses, FRS-R and FRN-R and Low-Peak™ dual-element fuses, LPS-RK_SP and LPN-RK_SP, at 125% and 130% of motor full load current, respectively. Generally, the Low-Peak dual-element fuses, LPJ_SP, and CUBEFuse™, TCF, can be sized at 150 to 175% of motor full load amps. This closer fuse sizing may provide many advantages such as: (1) smaller fuse and block, holder or disconnect amp rating and physical size, (2) lower cost due to lower amp rated devices and possibly smaller required panel space, (3) better short-circuit protection – less short-circuit current let-through energy, and (4) potential reduction in the arc-flash hazard.

Figure 6. This is the LPS-RK100SP, a 100A, 600V Low-Peak, Class RK1, dual-element fuse that has excellent time-delay, excellent current-limitation and a 300kA interrupting rating. Artistic liberty is taken to illustrate the internal portion of this fuse. The real fuse has a non-transparent tube and special small granular, arc-quenching material completely filling the internal space.

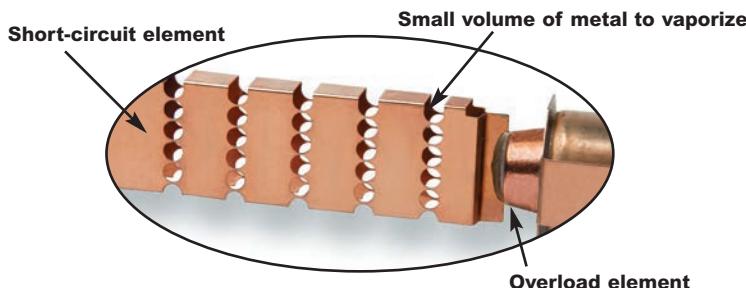

Figure 7. The true dual-element fuse has distinct and separate overload element and short-circuit element.

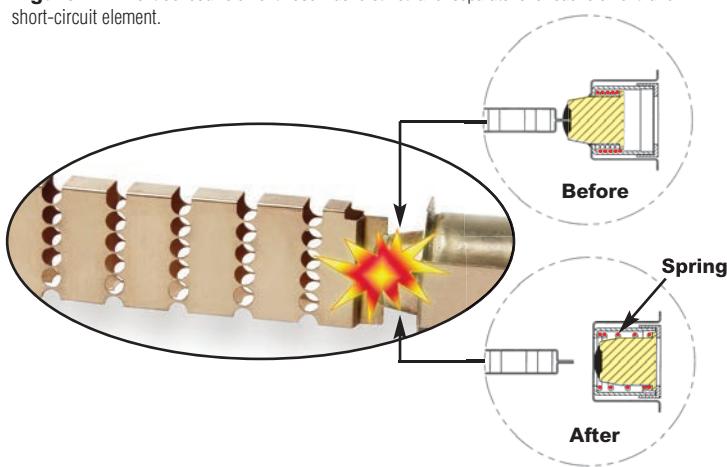

Figure 8. Overload operation: Under sustained overload conditions, the trigger spring fractures the calibrated fusing alloy and releases the "connector". The insets represent a model of the overload element before and after. The calibrated fusing alloy connecting the short-circuit element to the overload element fractures at a specific temperature due to a persistent overload current. The coiled spring pushes the connector from the short-circuit element and the circuit is interrupted.

When the short-circuit current is in the current-limiting range of a fuse, it is not possible for the full available short-circuit current to flow through the fuse – it's a matter of physics. The small restricted portions of the short-circuit element quickly vaporize and the filler material assists in forcing the current to zero. The fuse is able to "limit" the short-circuit current.

Overcurrent protection must be reliable and sure. Whether it is the first day of the electrical system or thirty or more years later, it is important that overcurrent protective devices perform under overload or short-circuit conditions as intended. Modern current-limiting fuses operate by very simple, reliable principles.

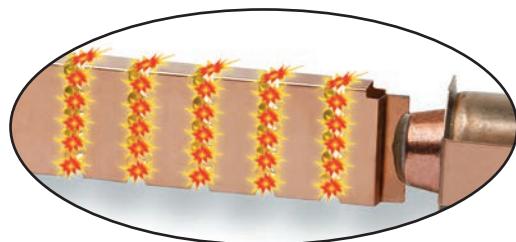

Figure 9. Short-circuit operation: Modern fuses are designed with minimum metal in the restricted portions which greatly enhance their ability to have excellent current-limiting characteristics – minimizing the short circuit let-through current. A short-circuit current causes the restricted portions of the short-circuit element to vaporize and arcing commences. The arcs burn back the element at the points of the arcing. Longer arcs result, which assist in reducing the current. Also, the special arc quenching filler material contributes to extinguishing the arcing current. Modern fuses have many restricted portions, which results in many small arclets – all working together to force the current to zero.

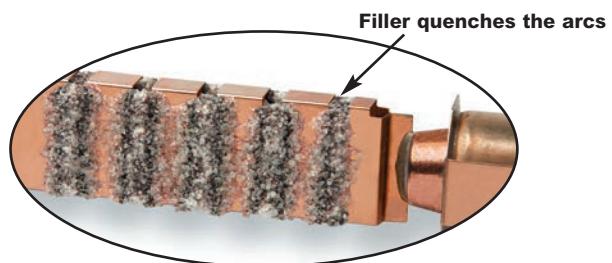

Figure 10. Short-circuit operation: The special small granular, arc-quenching material plays an important part in the interruption process. The filler assists in quenching the arcs; the filler material absorbs the thermal energy of the arcs, fuses together and creates an insulating barrier. This process helps in forcing the current to zero. Modern current-limiting fuses, under short-circuit conditions, can force the current to zero and complete the interruption within a few thousandths of a second.

Fuse time-current curves

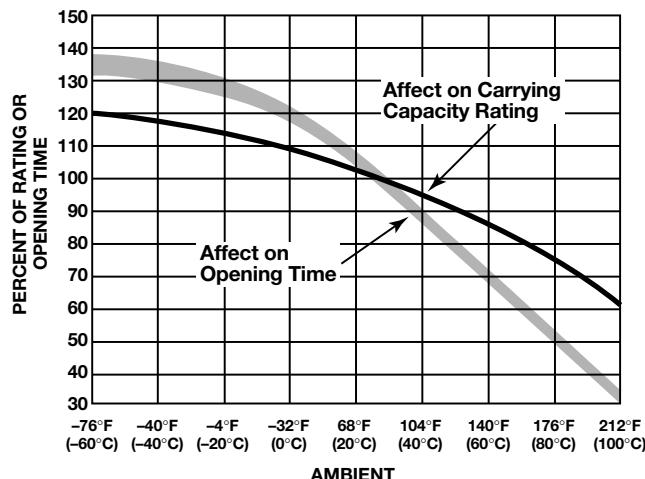

When a low level overcurrent occurs, a long interval of time will be required for a fuse to open (melt) and clear the fault. On the other hand, if the overcurrent is large, the fuse will open very quickly. The opening time is a function of the magnitude of the level of overcurrent. Overcurrent levels and the corresponding intervals of opening times are logarithmically plotted in graph form as shown to the right. Levels of overcurrent are scaled on the horizontal axis; time intervals on the vertical axis. The curve is thus called a "time-current" curve.

This particular plot reflects the characteristics of a 200A, 250V, Low-Peak™ dual-element fuse. Note that at the 1,000A overload level, the time interval which is required for the fuse to open is 10 seconds. Yet, at approximately the 2,200A overcurrent level, the opening (melt) time of a fuse is only 0.01 seconds. It is apparent that the time intervals become shorter as the overcurrent levels become larger. This relationship is termed an inverse time-to-current characteristic. Time-current curves are published or are available on most commonly used fuses showing "minimum melt," "average melt" and/or "total clear" characteristics. Although upstream and downstream fuses are easily coordinated by adhering to simple amp ratios, these time-current curves permit close or critical analysis of coordination.

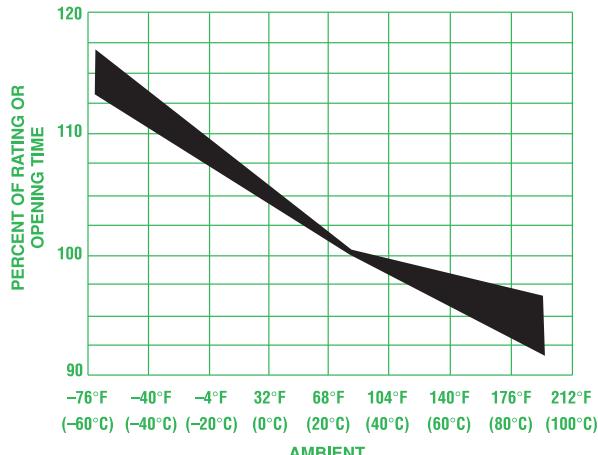

Better motor protection in elevated ambients

The derating of dual-element fuses based on increased ambient temperatures closely parallels the derating curve of motors in elevated ambient. This unique feature allows for optimum protection of motors, even in high temperatures.

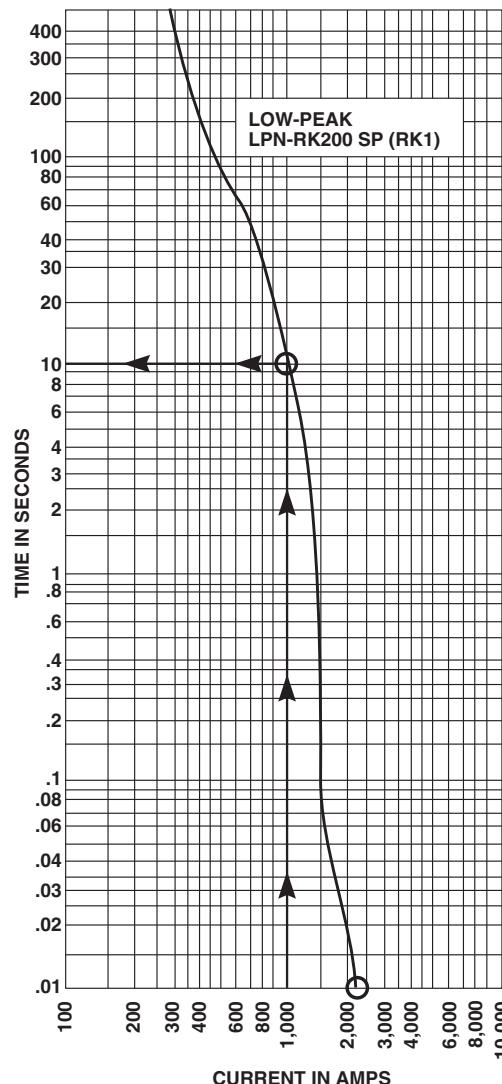

Affect of ambient temperature on operating characteristics of Fusetron and Low-Peak dual-element fuses.

Below is a rerating chart for single element fuses or non dual element fuses.

Ambient affect chart for non-dual-element fuses.

Better protection against motor single phasing

When secondary single-phasing occurs, the current in the remaining phases increases to approximately 200% rated full load current. (Theoretically 173%, but change in efficiency and power factor make it about 200%.) When primary single-phasing occurs, unbalanced voltages occur on the motor circuit causing currents to rise to 115%, and 230% of normal running currents in delta-wye systems.

No overcurrent protective device sized only for motor branch circuit short-circuit, ground fault protection will provide single-phasing protection for 3-phase motors. Single-phasing causes are numerous including the utility system that supplies the service losing a phase. Single-phasing is not a serious concern for 3-phase motors when properly protected by three properly sized and calibrated overload protective devices. Many solid state motor controllers will sense and cause the motor controller to open for serious unbalanced voltage situations caused by single-phasing. FRN-R, FRS-R, LPN-R_SP and LPS-R_SP dual-element fuses sized for motor running overload protection will help to protect motors against the possible damages of single-phasing. In addition, additional unbalanced voltage protection can be incorporated into motor protection schemes, if desired. For more information refer to the Eaton Selecting Protective Devices publication, section voltage unbalance and single-phasing.

Classes of fuses

Safety is the industry mandate. However, proper selection, overall functional performance and reliability of a product are factors which are not within the basic scope of listing agency activities. In order to develop its safety test procedures, listing agencies develop basic performance and physical specifications or standards for a product. In the case of fuses, these standards have culminated in the establishment of distinct classes of low-voltage (600V or less) fuses; Classes RK1, RK5, G, L, T, J, H and CC being the more important.

The fact that a particular type of fuse has, for instance, a classification of RK1, does not signify that it has the identical function or performance characteristics as other RK1 fuses. In fact, the Limitron™ non-time-delay fuse and the Low-Peak dual-element, time-delay fuse are both classified as RK1. Substantial differences in these two RK1 fuses usually requires considerable difference in sizing. Dimensional specifications of each class of fuse does serve as a uniform standard.

Class R fuses

Class R ("R" for rejection) fuses are high performance, 1/10 to 600A units, 250V and 600V, having a high degree of current limitation and a short-circuit interrupting rating of 200kA or 300kA (RMS Sym.). Bussmann series Class R fuses include Class RK1 Low-Peak™ and Limitron™ fuses, and RK5 Fusetron fuses. They have replaced the K1 Low-Peak and Limitron fuses and K5 Fusetron fuses. These fuses are identical, with the exception of a modification in the mounting configuration called a "rejection feature." This feature permits Class R fuses to be mounted in rejection type fuseclips. "R" type fuseclips

prevent older type Class H, one-time and renewable fuses from being installed. The use of Class R fuse holders is thus an important safeguard. The application of Class R fuses in such equipment as disconnect switches permits the equipment to have a high interrupting rating. NEC® 110-9 and §OSHA 29 CFR 1910.303(b)(4) require that protective devices have adequate capacity to interrupt short-circuit currents. Article 240-60(b) requires fuse holders for current-limiting fuses to reject non-current-limiting type fuses. In the above illustration, a grooved ring in one ferrule provides the rejection feature of the Class R fuse in contrast to the lower interrupting rating, non-rejection type.

Branch-circuit listed fuses

Branch-circuit listed fuses are designed to prevent the installation of fuses that cannot provide a comparable level of protection to equipment.

The characteristics of branch-circuit fuses are:

1. They must have a minimum interrupting rating of 10kA
2. They must have a minimum voltage rating of 125V.
3. They must be size rejecting such that a fuse of a lower voltage rating cannot be installed in the circuit.
4. They must be size rejecting such that a fuse with a current rating higher than the fuse holder rating cannot be installed.

Supplementary overcurrent protective devices for use in motor control circuits

Branch circuit vs. supplemental overcurrent protective devices

Branch circuit overcurrent protective devices (OCPD) can be used everywhere OCPD are used, from protection of motors and motor circuits and group motor circuits, to protection of distribution and utilization equipment. Supplemental OCPD can only be used where proper protection is already being provided by a branch circuit device, by exception [i.e., 430.72(A)], or if protection is not required. Supplemental OCPD can often be used to protect motor control circuits but they cannot be used to protect motors or motor circuits. A very common misapplication is the use of a supplementary overcurrent protective device such as a UL 1077 mechanical overcurrent device for motor branch circuit short-circuit and ground fault protection. Supplementary OCPDs are incomplete in testing compared to devices that are evaluated for branch circuit protection. THIS IS A SERIOUS MISAPPLICATION AND SAFETY CONCERN!! Caution should be taken to assure that the proper overcurrent protective device is being used for the application at hand. Below is a description of popular supplementary overcurrent protective devices.

Most supplemental overcurrent protective devices have very low interrupting ratings. Just as any other overcurrent protective device, supplemental OCPDs must have an interrupting rating equal to or greater than the available short-circuit current.

Supplemental fuses as listed or recognized to the

UL/CSA/ANCE Trinational 248-14 Standard

These are fuses that can have many voltages and interrupting ratings within the same case size. Examples of supplemental fuses are 13/32" X 1 1/2", 5 x 20mm, and 1/4" x 1 1/4" fuses. Interrupting ratings range from 35 to 100kA.

Reliability and maintenance of overcurrent protective devices

Whether the first day of the electrical system or years later, it is important that overcurrent protective devices perform under overload and fault conditions as intended.

Modern current-limiting fuses operate by very simple, reliable principles. Fuses do not have to be maintained. By their inherent design, fuses do not have elements or mechanisms to calibrate, adjust or lubricate. If and when fuses are called upon to open on an overcurrent, installing the same type and ampere rated fuses provides the circuit with new factory-calibrated protection. The original design integrity can be maintained throughout the life of the electrical system. One last point on fuse systems; the terminations, clips and disconnects should be maintained as necessary.

Motor circuits – choice of overcurrent protection

Motor circuits have unique characteristics and several functions, such as short-circuit protection, overload protection and automatic/ remote start/stop, that may be required. Sometimes the comment is made that users prefer circuit breakers because they can be reset. Let's examine the choice of either circuit breakers or current-limiting fuses for motor branch circuit protection.

In the case to be examined, fuses and circuit breakers (includes magnetic only circuit breakers which are called MCPs or motor circuit protectors) are sized with the intent to provide only short-circuit and ground fault protection for the motor branch circuit protection per 430.52. Other means, such as overload relays, provide the motor overload protection. Typical thermal magnetic circuit breakers can only be sized for motor branch circuit protection (typically 200% - 250% of motor current) because if they are sized closer, the motor starting current trips the circuit breaker's instantaneous mechanism. Magnetic only circuit breakers (MCPs) are intentionally not provided with overload capability; they only operate on short-circuit currents. There are some fuses such as the FRS-R and LPS-RK fuses that can be sized close enough for motor running overload protection or backup motor running protection. But for the discussion in this section, assume current-limiting fuses are sized only for motor short-circuit and ground fault protection.

It is important to note that in this protection level being discussed, a circuit breaker or fuses should only open if there is a fault on the motor circuit. A separate overload protective device, such as an overload relay, provides motor overload protection per 430.32. Here are some important considerations:

1. OSHA regulation 1910.334(b)(2) Use of Equipment states:

Reclosing circuits after protective device operation. After a circuit is deenergized by a circuit protective device, the circuit may not be manually reenergized until it has been determined that the equipment and circuit can be safely energized. The repetitive manual reclosing of circuit breakers or reenergizing circuits through replaced fuses is prohibited. NOTE: When it can be determined from the design of the circuit and the over-current devices involved that the automatic operation of a device was caused by an overload rather than a fault condition, no examination of the circuit or connected equipment is needed before the circuit is reenergized.

So the speed of reclosing a circuit breaker after a fault is not an advantage. The law requires that if the condition is a fault (that is the only reason the circuit breaker or fuses should open on a motor circuit), then the fault must be corrected prior to replacing fuses or resetting the circuit breaker.

2. The typical level of short-circuit protection for the motor starter provided by circuit breakers and MCPs is referred to as Type 1. This is because most circuit breakers are not current-limiting. So, for a loadside fault, the starter may sustain significant damage such as severe welding of contacts and rupturing of the heater elements. Or the heater/overload relay system may lose calibration. This is an acceptable level of performance per UL 508, which is the product standard for motor starters. Current-limiting fuses can be selected that can provide Type 2 "No Damage" short-circuit protection for motor starters.

Consequently, with circuit breaker protection, after a fault condition,

significant downtime and cost may be incurred in repairing or replacing the starter. With properly selected fuses for Type 2 protection, after the fault is repaired, only new fuses need to be inserted in the circuit; the starter does not have to be repaired or replaced.

- 3. Circuit breakers must be periodically tested to verify they mechanically operate and electrically tested to verify they still are properly calibrated within specification. The circuit breaker manufacturers recommend this. Typically circuit breakers should be mechanically operated at least every year and electrically tested every 1 to 5 years, depending on the service conditions. Modern current-limiting fuses do not have to be maintained or electrically tested to verify they still will operate as intended. The terminations of both circuit breakers and fusible devices need to be periodically checked and maintained to prevent thermal damage. Plus fuse clips should be periodically inspected and if necessary maintained.**
- 4. After a circuit breaker interrupts a fault, it may not be suitable for further service. UL 489, the product standard for molded case circuit breakers, only requires a circuit breaker to interrupt two short-circuit currents at its interrupting rating. Circuit breakers that are rated 100 amps or less do not have to operate after only one short-circuit operation under "bus bar" short-circuit conditions. If the fault current is high, circuit breaker manufacturers recommend that a circuit breaker should receive a thorough inspection with replacement, if necessary. How does one know a circuit breaker's service history or what level of fault current that a circuit breaker interrupts? With modern current-limiting fuses, if the fuse interrupts a fault, new factory calibrated fuses are installed in the circuit. The original level of superior short-circuit protection can be there for the life of the motor circuit.**
- 5. After a fault, the electrician has to walk back to the storeroom to get new fuses; that is if spare fuses are not stored adjacent to the equipment. This does require some additional down time. However, if fuses opened under fault conditions, there is a fault condition that must be remedied. The electrician probably will be going back to the storeroom anyway for parts to repair the fault. If properly selected current-limiting fuses are used in the original circuit, the starter will not sustain any significant damage or loss of overload calibration.**

With circuit breaker protection on motor circuits, after a fault condition, it may be necessary to repair or replace the starter, so a trip to the storeroom may be necessary. And if the starter is not significantly damaged, it may still need to be tested to insure the let-through energy by the circuit breaker has not caused the loss of starter overload calibration. Also, the circuit breaker needs to be evaluated for suitability before placing it back into service. Who is qualified for that evaluation? How much time will that take?

In summary, resetability is not an important feature for motor branch circuit (short-circuit) protection and resetability of the branch circuit protective device is not a benefit for motor circuits. As a matter of fact, resetability of the motor branch circuit overcurrent protective device may encourage an unsafe practice. The function of motor branch circuit protection is fault protection: short-circuit and ground fault protection. Faults do not occur on a regular basis. But when a fault does occur, it is important to have the very best protection. The best motor branch circuit protection can be judged by (1) reliability - its ability to retain its calibration and speed of operation over its lifetime, (2) current-limiting protection - its ability to provide Type 2 "No Damage" protection to the motor starter, and (3) safety - its ability to meet a facility's safety needs. Modern current-limiting fuses are superior to circuit breakers for motor branch circuit protection.

Ampere (Amp)

The measurement of intensity of rate of flow of electrons in an electric circuit. An ampere (amp) is the amount of current that will flow through a resistance of one ohm under a pressure of one volt. Ampere is often abbreviated as "A."

Amp rating

The current-carrying capacity of a fuse. When a fuse is subjected to a current above its amp rating, it will open the circuit after a predetermined period of time.

Amp squared seconds, I^2t

The measure of heat energy developed within a circuit during the fuse's clearing. It can be expressed as "melting I^2t ", "arcing I^2t " or the sum of them as "Clearing I^2t ". " I " stands for effective let-through current (RMS), which is squared, and " t " stands for time of opening, in seconds.

Arcing I^2t

Value of the I^2t during the arcing time under specified conditions.

Arcing time

The amount of time from the instant the fuse link has melted until the overcurrent is interrupted, or cleared.

Breaking capacity

(See Interrupting Rating)

Cartridge fuse

A fuse consisting of a current responsive element inside a fuse tube with terminals on both ends.

Class CC fuses

600V, 200kA interrupting rating, branch circuit fuses with overall dimensions of $13/32" \times 1\frac{1}{2}$ ". Their design incorporates a rejection feature that allows them to be inserted into rejection fuse holders and fuse blocks that reject all lower voltage, lower interrupting rating $13/32" \times 1\frac{1}{2}$ " fuses. They are available from 1/10A through 30A.

Class G fuses

480V, 100kA interrupting rating branch circuit fuses that are size rejecting to eliminate overfusing. The fuse diameter is $13/32"$ while the length varies from $15/16"$ to $2\frac{1}{4}$ ". These are available in ratings from 1A through 60A.

Class H fuses

250V and 600V, 10kA interrupting rating branch circuit fuses that may be renewable or non-renewable. These are available in amp ratings of 1A through 600A.

Class J fuses

These fuses are rated to interrupt a minimum of 200kA AC. They are labeled as "current-limiting," are rated for 600Vac, and are not interchangeable with other classes.

Class K fuses

These are fuses listed as K-1, K-5, or K-9 fuses. Each subclass has designated I^2t and I_p maximums. These are dimensionally the same as Class H fuses, and they can have interrupting ratings of 50kA, 100kA, or 200kA. These fuses are current-limiting. However, they are not marked "current-limiting" on their label since they do not have a rejection feature.

Class L fuses

These fuses are rated for 601 through 6000A, and are rated to interrupt a minimum of 200kA AC. They are labeled "current-limiting" and are rated for 600Vac. They are intended to be bolted into their mountings and are not normally used in clips. Some Class L fuses have designed in time-delay features for all purpose use.

Class R fuses

These are high performance fuses rated 1/10-600A in 250V and 600V ratings. All are marked "current limiting" on their label and all have a minimum of 200kA interrupting rating. They have identical outline dimensions with the Class H fuses but have a rejection feature which prevents the user from mounting a fuse of lesser capabilities (lower interrupting capacity) when used with special Class R clips. Class R fuses will fit into either rejection or non-rejection clips.

Class T fuses

An industry class of fuses in 300V and 600V ratings from 1A through 1200A. They are physically very small and can be applied where space is at a premium. They are fast-acting fuses with an interrupting rating of 200kA RMS.

Classes of fuses

The industry has developed basic physical specifications and electrical performance requirements for fuses with voltage ratings of 600V or less. These are known as standards. If a type of fuse meets the requirements of a standard, it can fall into that class. Typical classes are K, RK1, RK5, G, L, H, T, CC, and J.

Clearing time

The total time between the beginning of the overcurrent and the final opening of the circuit at rated voltage by an overcurrent protective device. Clearing time is the total of the melting time and the arcing time.

Current limitation

A fuse operation relating to short circuits only. When a fuse operates in its current-limiting range, it will clear a short circuit in less than 1/2 cycle. Also, it will limit the instantaneous peak let-through current to a value substantially less than that obtainable in the same circuit if that fuse were replaced with a solid conductor of equal impedance.

Dual-element fuse

Fuse with a special design that utilizes two individual elements in series inside the fuse tube. One element, the spring actuated trigger assembly, operates on overloads up to 5-6 times the fuse current rating. The other element, the short circuit section, operates on short circuits up to their interrupting rating.

Electrical load

That part of the electrical system which actually uses the energy or does the work required.

Fast-acting fuse

A fuse which opens on overload and short circuits very quickly. This type of fuse is not designed to withstand temporary overload currents associated with some electrical loads.

Fuse

An overcurrent protective device with a fusible link that operates and opens the circuit on an overcurrent condition.

High speed fuses

Fuses with no intentional time-delay in the overload range and designed to open as quickly as possible in the short-circuit range. These fuses are often used to protect solid-state devices.

Inductive load

An electrical load which pulls a large amount of current—an inrush current—when first energized. After a few cycles or seconds the current “settles down” to the full-load running current.

Interrupting capacity

(See interrupting rating)

Interrupting Rating — IR**(Breaking capacity)**

The rating which defines a fuse's ability to *safely* interrupt and clear short circuits. This rating is much greater than the ampere rating of a fuse. The NEC® defines interrupting rating as “The highest current at rated voltage that an overcurrent protective device is intended to interrupt under standard test conditions.”

Melting I²t

Value of the I²t during the melting time of the fuse link under specified conditions.

Melting time

The amount of time required to melt the fuse link during a specified overcurrent. (See arcing time and clearing time.)

“NEC®” dimensions

These are dimensions once referenced in the National Electrical Code. They are common to Class H and K fuses and provide interchangeability between manufacturers for fuses and fusible equipment of given ampere and voltage ratings.

Ohm

The unit of measure for electric resistance. An ohm is the amount of resistance that will allow one ampere to flow under a pressure of one volt.

Ohm's law

The relationship between voltage, current, and resistance, expressed by the equation E = IR, where E is the voltage in volts, I is the current in amps, and R is the resistance in ohms.

One time fuses

Generic term used to describe a Class H non-renewable cartridge fuse, with a single element.

Overcurrent

A condition which exists on an electrical circuit when the normal load current is exceeded. Overcurrents take on two separate characteristics—overloads and short-circuits.

Overload

Can be classified as an overcurrent which exceeds the normal full load current of a circuit. Also characteristic of this type of overcurrent is that it does not leave the normal current carrying path of the circuit—that is, it flows from the source, through the conductors, through the load, back through the conductors, to the source again.

Peak let-through current, I_p

The instantaneous value of peak current let-through by a current-limiting fuse, when it operates in its current-limiting range.

Renewable fuse (600V and below)

A fuse in which the element, typically a zinc link, may be replaced after the fuse has opened, and then reused. Renewable fuses are made to Class H standards.

Resistive load

An electrical load which is characteristic of not having any significant inrush current. When a resistive load is energized, the current rises instantly to its steady-state value, without first rising to a higher value.

RMS current

The RMS (root-mean-square) value of any periodic current is equal to the value of the direct current which, flowing through a resistance, produces the same heating effect in the resistance as the periodic current does.

SCCR

See Short-Circuit Current Rating

Semiconductor fuses

Fuses used to protect solid-state devices. See “high speed fuses.”

Short-circuit

Can be classified as an overcurrent which exceeds the normal full load current of a circuit by a factor many times (tens, hundreds or thousands greater). Also characteristic of this type of overcurrent is that it leaves the normal current carrying path of the circuit—it takes a “short cut” around the load and back to the source.

Short-Circuit Current Rating (SCCR)

The maximum short-circuit current an electrical component can sustain without the occurrence of excessive damage when protected with an overcurrent protective device.

Short-circuit withstand rating

Same definition as short-circuit current rating.

Single-phasing

That condition which occurs when one- phase of a three-phase system opens, either in a low voltage (secondary) or high voltage (primary) distribution system. Primary or secondary single-phasing can be caused by any number of events. This condition results in unbalanced currents in polyphase motors and unless protective measures are taken, causes overheating and failure.

Threshold current

The symmetrical RMS available current at the threshold of the current-limiting range, where the fuse becomes current-limiting when tested to the industry standard. This value can be read off of a peak let-through chart where the fuse curve intersects the A-B line. A threshold ratio is the relationship of the threshold current to the fuse's continuous current rating.

Time-delay fuse

A fuse with a built-in delay that allows temporary and harmless inrush currents to pass without opening, but is so designed to open on sustained overloads and short circuits.

Total clearing I^2t

Total measure of heat energy developed within a circuit during the fuse's clearing of a fault current. Total clearing I^2t is the sum of the melting I^2t and arcing I^2t .

Voltage rating

The maximum open circuit voltage in which a fuse can be used, yet safely interrupt an overcurrent. Exceeding the voltage rating of a fuse impairs its ability to clear an overload or short-circuit safely.

Withstand rating

The maximum current that an unprotected electrical component can sustain for a specified period of time without the occurrence of extensive damage.

* >60A use FRN-R (250V).

** >60A use FRS-R (600V).

*** Finger-safe covers are available for this block along with optional open fuse indication.

† >12A use TL.

†† <10A use FRN-R (600V).

††† <10A use FRS-R (600V).

1. Some competitor blocks are adder blocks and/or have multiple terminal offerings for Cu/Al or Cu only conductors.

2. Wire ranges are not always the same. Please assure wire range is suitable for the application.

3. All blocks listed have a box lug for wire termination. Alternate connection types are available in the 30 and 60 amp range. If an alternate type is required, please see the appropriate Eaton's Bussmann division data sheet for part number ordering information.

Data sheets are available online at www.cooperbussmann.com/DatasheetsEle. For technical assistance, contact the Eaton Application Engineering Team. Call 636-527-1270 between 7:00 AM and 5:00 PM Central Time, or e-mail FuseTech@eaton.com.

For customer assistance, call the Customer Satisfaction Team toll-free 855-BUSSMANN (855-287-7626) or e-mail BussCustSat@eaton.com.

Notes

Bussmann series fuse cross reference and Low-Peak upgrade

The left column represents part numbers for Bussmann series and competitor products. The right column represents the Low-Peak™ upgrade.

The Low-Peak upgrade offers superior performance while reducing the number of SKUs that need to be in stock. Bussmann series Low-Peak fuses feature a high degree of current limitation, which will provide the best component protection and may reduce the arc flash hazard. Listings are alpha-numerical by fuse class and fuse catalog symbol.

This list is only a consolidated cross reference to some of our most common products. For a much more extensive database, please consult the Product Profiler competitor cross-reference. Just visit www.eaton.com/bussmannseries and click on the magnifying glass icon in the upper right corner.

The comparative catalog numbers shown were derived from the latest available published information from various manufacturers. Because competitors' products may differ from Bussmann series products, it is recommended that each application be checked for required electrical and mechanical characteristics before substitutions are made. Eaton is not responsible for misapplications of our products. Overcurrent protection is application dependent. Consult the latest catalogs and application literature, or contact our Application Engineering Department toll free at 855-287-7626 (855-BUSSMANN).

Leadership in circuit protection

When it comes to circuit protection, only Eaton can provide a complete portfolio of solutions for virtually every application. Eaton delivers:

- The most diverse solutions to mitigate arc flash energy for personnel and equipment protection.
- The smallest and most cost effective solutions to meet selective coordination requirements.
- The most experienced, time-tested solutions to meet national and local code requirements.
- The most tested circuit breaker/circuit breaker, circuit breaker/fuse, and fuse/fuse selective coordination combinations.
- The only one-stop shop to solve your design challenges using our expertise and an unmatched portfolio.

Our focus is on delivering the right solution for the application. But, decision makers demand more than just innovative products. They turn to Eaton for an unwavering commitment to personal support that makes customer success a top priority.

At Eaton, that's how we're powering business worldwide.

Customer satisfaction team:

Available to answer questions regarding Bussmann series products and services Monday-Friday, 7:00 a.m. – 6:00 p.m. Central time.

- Toll-free phone:
855-287-7626 (855-BUSSMANN)
- Toll-free fax: 800-544-2570
- E-mail: busscustsat@eaton.com

Emergency and after-hours orders:

Next flight out or will call shipment for time-critical needs. Customers pay only standard product price, rush freight charges, and modest emergency service fee. Place these orders through the customer satisfaction team during regular business hours.

- After hours: 314-995-1342

My.Eaton.com:

Provides real time product availability, net pricing, order status and shipment tracking. Log onto my.eaton.com or call:

- 1-800-468-1705 Option #3 for log-in assistance.

Application engineering:

Technical assistance is available to all customers. Application support is available Monday-Friday, 7:00 a.m. – 5:00 p.m. Central time.

- Toll-free phone:
855-287-7626 (855-BUSSMANN)
- E-mail: Fusetech@eaton.com
